Preface

In *Mage Knight Board Game*, players earn powerful abilities that're richly diverse and ingeniously stackable as they face ever-stronger warriors and wizards and monsters. This fine-tuned combination of abilities and challenges has given the game much variety and many, many fans. But whenever this much variety and this many fans come together, you inevitably get questions, lots and lots of questions. It may seem contradictory, but that's the prize complex games often receive for their popularity. Peruse [Board-GameGeek](#)¹ and you'll see that MKBG has certainly achieved this honor, for across its fifteen years of stardom it has racked up many hundreds of rule questions.

Yet these questions, though myriad, are no cause for dismay. Many come from new players and the replies help other new players. Other questions cover situations you may soon encounter yourself, or give insight into the underlying principles of the game. Some even elicit clarifications from the designers themselves, always a win.² And in those rare instances where there're no definitive answers, you can at least be guided by the consensus opinion of your fellow gamers.³ So quite arguably, these questions and replies are a valuable database of information.

Although that value is undeniable, the database itself can be difficult to mine. Misspellings and loose terminology often frustrate searches. Digressions, wordiness, and errors prolong reading time. And clashing opinions can cast doubt on the conclusions that're ultimately drawn. That's where a Compendium like this one comes in handy. Concise, orderly, and using standard terminology, it summarizes questions, gives reasoned answers,⁴ and links you to discussions for attribution and further reading.⁵ With it, you can hopefully resolve your problems quickly and get back to what really matters: playing the game.

- **Credits:** "Thank you!" to the designers and developers who've provided many clarifications on BGG: Vlaada Chvátil, Paul Grogan, Filip Murmak, and Phil Pettifer.⁶ And to the prolific posters on BGG.⁷
- **Lost Legion:** These Q&A presuppose the clarifications and component changes made in the *Lost Legion* expansion. If you don't own *Lost Legion* or the *Ultimate Edition* or the recent updated version of the MKBG base game,⁸ then some of the Q&A in this Compendium may seem wrong or odd to you.⁹
- **Apocalypse Dragon:** At present, this Compendium does not cover the *Apocalypse Dragon* expansion.
- **Latest Version of this File:** <https://boardgamegeek.com/filepage/218596/q-compendium>.
- **Page Numbers:** Cited page numbers are to the original releases of the rulebooks.¹⁰
- **Finding Information:**
 - The page numbers on the first page Table of Contents are hot links.
 - The Index in the back is hot-linked to the main entry of each referenced item.
 - All of the **Cross Reference** lists and all of the "see <topic> ##" remarks are hot-linked.
 - Sections, subsections, and sub-subsections are bookmarked for .pdf navigation.
 - Every page has a header that tells you which section you are in.
 - Every entry is preceded by a quick summary of what it covers.
 - You can use Control + F to search the document. To find a main entry, append " #" to the search word, or " (" for hero-specific main entries. E.g.: "Combat #" or "Mana Pull (".¹¹
- **Changes:** New and modified entries are marked with an asterisk.
- **Key:**

Q: question A: answer S: Q&A formatted as a statement	O: an open question [orange]: discussion on unresolved questions [green]: a house rule
--	---

Clarifications by Mechanic

Setup

S1:—*The Dummy Is Not a Player*—The dummy player does not count as a player: in solo games, the number of Units in the Offer and the number of mana dice in the SOURCE are normally three. But if you're playing a blitz scenario or playing against VOLKARE (see VOLKARE Q20), you add an extra Unit and an extra die.¹²

Q2:—*Number of Map Tiles*—Do the map tiles that you place on the map during setup count toward the number of map tiles specified for use during that scenario? And are they revealed?

A2: Yes. Yes. For example, the Solo Conquest scenario reads . . .

- *Map Shape: Wedge*
- *Countryside Tiles: 7*

For this scenario we use the Wedge layout (rulebook p. 12), so first you place the PORTAL tile on side A. With the Wedge map, there's one additional tile in each succeeding tier of the map: the PORTAL tile creates the first tier; then you expose and place two green countryside tiles to fully populate the second tier. So at the start of Solo Conquest you have three tiles in your map—the PORTAL plus two countryside tiles—all of them already revealed. The two countryside tiles you placed count against the seven countryside tiles in the scenario description, leaving you with five green countryside tiles that have yet to be explored.

If a scenario setup specifies that 11 countryside tiles are to be used with a Fully Open map shape, you use side B of the PORTAL tile which directly connects to 3 countryside tiles: these 4 tiles—the PORTAL plus 3 countryside tiles—are placed on the map already revealed before the game begins, leaving 8 countryside tiles left to be explored.¹³

S3:—*Ordering Tiles*—You don't always start with tile number 1 and work your way up to the higher numbered tiles: that rule is only for the First Reconnaissance scenario (*Walkthrough*, p. 2). In all other scenarios, you shuffle the countryside tiles together and stack them on top of the (separately shuffled) core tiles.¹⁴

S4:—*Choosing Map Tiles*—When a scenario setup says "Countryside tiles: 7", it means you shuffle all of the countryside tiles together (1 through 11 if playing without the *Lost Legion* expansion; 1 through 14 if playing with it), and blindly draw 7 of them for use in the scenario, and in the scenario they'll be randomly ordered. You're not restricted to using only tile numbers 1 through 7.¹⁵

S5:—*Placing Initial Map Tiles*—When setting up a scenario and laying out the already revealed tiles, you choose where the tiles go *before* revealing them, not the other way around.¹⁶

Dummy Player

S1:—*Skills*—The dummy player adds Skills to the Common Skill Offer only during solo games.¹⁷

S2:—*Starting Mana Tokens*—The dummy player begins the game with mana tokens matching the colored dots on the bottom of his hero card, one for each dot. An additional mana token gets added to these at the end of every Round. These tokens are not true "mana", but are simply markers indicating how many additional Deed cards the dummy player will flip when, on his turn, he flips over his third card and it matches one of the colors of the marker crystals.

The only other purpose these colored dots serve is to show which crystals a player begins with when using the "Starting at a Higher Level" variant: see Variants S2.¹⁸

Player-controlled Mage Knights do not begin the game with mana crystals matching these dots.

S3:—*End of Round*—The dummy player announces the end of the Round only if, when he begins his turn, his Deed deck is empty. If, as he's flipping cards, he empties his Deed deck, he does not announce the end of the Round: he'll do that on his *next* turn. If the dummy player is the one who announces the end of the Round, all non-dummy players get one more turn.¹⁹

Cross References: Setup S1; CITIES S16; Variants S2; Scenarios Q8.

Turn Start

S1:—*Options between Turns*—There are two different types of activity that can happen between turns:²⁰

- I. The "**before your turn**" options and the "**on another player's turn**" options:[†]
 - Play a *Motivation Skill*.
 - Plunder a *VILLAGE*.
 - Optionally advance the shield token on *Master of Chaos* if it wasn't used in the previous turn.
 - Use the ability of the Tactic *Midnight Meditation* or *Sparing Power*.
- II. The "**at the start of your turn**" steps:[‡]
 - **Forced:** Take back any competitive (black helmet) or cooperative (white helmet) Skill token of yours that's in the center of the play area. See Skill Tokens S4.
 - **Forced:** If your round order token is face-down, flip it face-up—your turn is now over.
 - **Forced:** If your deed deck is empty and you have no cards in your hand, you *must* announce the end of the round (assuming it hasn't already been announced yet) and you *must* forfeit your turn (take no further actions). See End of Round S1.
 - **Optional:** If your deed deck is empty but you do have cards in your hand, you *may* forfeit your turn and announce the end of the round (per the above bullet), but only if you wish to.
 - **Forced:** If you haven't skipped or forfeited your turn and are on a *MAGICAL GLADE*, gain a gold (day)/black (night) mana token.

[†] - You can't take any of these options during your End-of-Turn sequence, or before Tactic selection at the start of a new Round, or after your final turn of a Round. But you *can* take these options when Fully or Partially Attending a PvP combat. Note also that the terms "before your turn" and "on another player's turn" are interchangeable terms for describing this group of options.²¹ See Miscellaneous S5.

[‡] - This set of steps do *not* occur when a player only Partially Attends a PvP combat: see the partially attending entry—these steps will only happen when that player finally *does* take her full turn.

Mana

Q1:—*The Free Mana Die*—Does "taking a mana die from the SOURCE", as stated in the strong effect of the card *Mana Draw*, count as your free one-allowed die from the SOURCE?

A1: No. Any effect that tells you to "take a die" from the SOURCE is a *separate* effect from you taking your one free die from the SOURCE. But do note that the phrase "pay a mana" is not the game instructing you to "take a free mana die from the SOURCE".²²

Q2:—*Taking Dice from the SOURCE*—If an effect allows you to use "additional dice" from the SOURCE, can you use those dice even if you don't use your one free die from the SOURCE?

A2: Yes. So for the basic effect of *Mana Pull*, you could use a black mana die from the SOURCE as any color even if you haven't used your standard free SOURCE die.²³ See also *Mana Draw* S1.

S3:—*Day and Night Restrictions*—You cannot use black mana during the day and you cannot use gold mana at night—unless explicitly permitted otherwise, like when in a DUNGEON/TOMB or with the basic effect of *Mana Pull*. And it doesn't matter what form the mana is in—mana dice or mana tokens. (Remember, there can never be black or gold crystals.) You may find it easier to think of black mana as losing its potency during the day when the sun is hitting it, and of gold mana as losing its potency when it's not bathed in sunlight.²⁴

S4:—*Gold Mana*—During the day you can use gold mana in place of a basic color, including when paying the mana cost of an ALTAR, or when buying a Spell at a MAGE TOWER, etc.²⁵

S5:—*Gold Mana*—If you take a gold mana die from the SOURCE during the day, you must immediately choose what color it is and immediately use it. You can't take a gold mana die from the SOURCE and bring it down into the darkness of a DUNGEON and decide what color it'll be while there. Nor can you take a gold mana die from the SOURCE, decide it's red mana, and bring that red mana down into a DUNGEON and use it there. Taking a die from the SOURCE is only allowed if you immediately use the mana it provides.

You can, though, take a gold mana die from the SOURCE during the day, immediately use *Crystallize* to make it a red mana crystal, and then bring that red mana crystal down into a DUNGEON and use it there.²⁶

S6:—*Wild Mana*—You cannot use gold mana as black mana: gold mana can only assume one of the four basic colors. Black mana, contrarily, is not wild: it cannot be used as any other color unless an effect explicitly says so, such as *Mana Pull*.²⁷

Q7:—*Black Mana in DUNGEONS*—If you enter a DUNGEON during the day, can you use a black mana die from the SOURCE?

A7: When in a DUNGEON/TOMB it is always night, so you can use black mana but not gold mana. And furthermore, you can only play effects that're usable during Combat: see Combat Q2 and *Energy Steal* Q1.²⁸

Q8:—*Mana Tokens When It's not your Turn*—What happens to a mana token that you gain while it isn't your turn, such as the mana token you can gain from *Motivation*?

A8: You keep it until you use it or until the end of your upcoming turn (even if you don't execute an End-of-Turn Sequence during that turn), whichever happens first.²⁹ Also note that Mana crystals, even excess ones, can't be turned into mana tokens when it isn't your player turn. See S9 and Q10 below.³⁰

S9:—*Surplus Crystals*—Unused mana tokens are lost during step 3a of your End-of-Turn sequence. If after this point you gain a fourth crystal of a basic color from a MINE or as a combat reward, you don't gain anything from it, not even a mana token. But any mana tokens you gain after step 3a (noting the restrictions in the previous sentence) will stay in your possession until you use them or until step 3a at the end of your *next* turn, whichever comes first. You cannot turn crystals into usable mana outside of your turn, even during your End-of-Turn sequence, but you *can* do so while engaging in PvP combat, even while only partially attending.³¹

Q10:—*Mana Tokens vs. Mana Crystals*—I can't figure out what a mana token is, whether it's a die that gets returned to the SOURCE at the end of the turn, a crystal that goes into your inventory, or something else.

A10: "Pure Mana" is what you use to power the strong effect of action cards, to power spells, etc.³²

A mana die represents pure mana.

A mana token represents pure mana.

A mana crystal can be, instantly and freely, turned into pure mana at any time during your turn.

When playing Solo Conquest, you never need to turn mana crystals into pure mana outside of your turn. (Well, practically never: see S9 just above.) Most of the time you can dispense with the idea of "pure mana" and envision that "a red mana die" = "a red mana token" = "a red mana crystal", unless some effect specifically mentions mana dice, or mana tokens, or mana crystals. And there're various restrictions as to when you can access mana dice in the SOURCE (but you probably already know those).

Or perhaps your question is more basic. If so, then know that you use the colored-plastic-mana-thingsies that come with the game to represent both mana crystals and mana tokens. If a colored-plastic-mana-thingy is sitting on the table in your play area, then it's a mana token. If it's sitting on your hero card in the inventory box, then it's a mana crystal. Mana tokens—whether you use them during your turn or not—get returned to the bank during your End-of-Turn sequence; mana crystals stay in your inventory until you use them.

You gain mana tokens only when a specific effect says so, such as when you're on a MAGICAL GLADE or when you're using the basic effect of *Concentration*. You gain mana crystals only when a specific effect says so, such as with either effect of *Crystallize* or when you're on a CRYSTAL MINES.

The way most people play is to set the mana die, mana token, or mana crystal on the deed card or Unit that they're powering with it. If you have trouble remembering whether a specific colored-plastic-mana-thingy represents a mana token or a mana crystal (important if you wish to take actions back) then tip all of the mana tokens on their sides and keep all of the mana crystals standing upright—or position mana tokens toward the left side of the card and mana crystals toward the right.³³

S11:—*Mana-Powered Effects*—If you expend red mana or blue mana to power an effect that gives you Attack points or Block points, those Attack points and Block points are not automatically Fire points or Ice points: for the points to be Fire or Ice, the text describing the effect has to explicitly say that they are.³⁴

S12:—*Using SOURCE Dice*—Whenever you're allowed to use a mana die from the SOURCE—no matter what rule or effect gives you that permission (c.f., your one free mana die every turn, or the basic effect of *Mana Draw*)—you may use the mana die any way you wish (assuming the effect text doesn't explicitly say otherwise), such as to power the strong effect of an Action Card, or to use with the basic effect of *Crystallize*, or to enable a specific ability of a Unit that requires mana, or to select a specific effect of *Mana Bolt*, or when paying mana at an ALTAR, etc. See S4 and Q10 above.³⁵

All mana dice that you took and used from the SOURCE are re-rolled and returned to the SOURCE during your End-of-Turn sequence (unless some rule or effect explicitly states otherwise). When you re-roll a used mana die before returning it to the SOURCE, it doesn't matter what color you roll: it's placed in the SOURCE with its new color showing, even if that means more than half of the dice in the SOURCE are now black and/or gold.³⁶

S13:—*Setting up the SOURCE*—When rolling mana dice for the SOURCE at the start of a Round, at least half of the mana dice in the SOURCE must be basic colors: re-roll *all* black and *all* gold dice if this isn't the case. If there still aren't enough dice of basic colors in the SOURCE, re-roll all of the dice that are currently black and currently gold, again and again, as necessary. This re-rolling occurs only at the start of Rounds—you never re-roll dice in the SOURCE simply for this reason during the middle of a Round.³⁷

S14:—*DUNGEON Reward*—The DUNGEON site card says "roll a mana die to determine your reward". It means a mana die that's in the Bank (see the base game rulebook p. 3), not a die from the SOURCE.³⁸

Movement

S1:—*Unspent Points*—Movement points gained during the Movement Phase will be lost when you begin your Action Phase. And Movement points played during your Action Phase will be wasted unless some effect explicitly allows you to use them, such as Blocking Cumbersome enemies, or entering a MAZE/LABYRINTH, or buying Attack points with the card *Agility*. That's because once you've begun your Action Phase, you cannot move your figure to a new space or explore new tiles (exception: *Temporal Portal*).

Example:

You play Move 4 during the Movement Phase to move into a hills space that contains a MAZE, expending 3 Move points to do so. Then, to initiate your Action Phase, you declare you're entering the MAZE. The moment you do that, the 1 remaining unspent Move point is lost. So in order to enter the MAZE, you play the strong effect of *Agility* and use 2 of its 4 Move points to move into the MAZE. Having taken a FORESTERS Unit with you, you expend it for 2 Move points to move even deeper into the MAZE. At this moment—since you're not yet in combat—you could Refresh the FORESTERS if you have a means of doing so (but only if the FORESTERS became spent while moving into the MAZE, for the FORESTERS must have been unspent for you to have taken them with you into the MAZE). Then you begin Combat. At this point, your 2 leftover Move points from *Agility* do carry forward because you played them *during* your Action Phase. With *Agility*, you can convert the points into Ranged Attack 1 or into a (non-Ranged) Attack 2.

You can play Move points during Combat for use with *Agility*. If you're about to get knocked out, you can even play every card you hold as a sideways Move 1 and then later convert these Move points into Attack points during your Attack Phase for use with a previously-played *Agility* card. Under normal circumstances you likely wouldn't be able to Attack if you were knocked out; however, Move cards can be played even during the Block Phase and those Move points will linger through the remainder of the Action Phase.³⁹

See S11 below and Miscellaneous S9.

S2:—*During Combat*—You can use *Wings of Wind*, *Underground Travel*, and the move effect of *Druidic Staff* to move into new spaces, but only during the Movement Phase. During the Action Phase (inclusive of the Combat Phase) you can use Move points from, say, the SCOUTS Unit, but you can't enter a new space with them or use the tile-revealing effect of that SCOUTS Unit. The only way to move your figure onto a new space outside of the Movement Phase (except for withdrawals or retreats) is with *Temporal Portal*, as that card explicitly states that you move "as your Action". See Miscellaneous S9.⁴⁰

S3:—*Out-of-Order Turns*—When playing your turn out of order (when you're attacked by another player or by VOLKARE, or during a cooperative assault or defense), you're not allowed to move to a new space, reveal a map tile, or perform an Action (except for movements and actions explicitly dictated by your situation).⁴¹

S4:—*Entering Fortified Sites*—It always costs two movement points to enter a CITY: ignore any other terrain showing in the CITY space. Entering an unconquered CITY is an Assault and immediately ends your Movement Phase. As you enter an unconquered CITY, you lose one point of Reputation and must immediately fight. If you don't kill every enemy token in the CITY, you retreat back to the space you entered it from. This, though, is not Forced Withdrawal—see Forced Withdrawal S1 and S2, and CITIES S3 and S10.⁴²

With other Fortified Sites—KEEPS, MAGE TOWERS—the movement cost of entry is based on the underlying terrain, but the rest of the remarks in the above paragraph also apply to those Assaults.⁴³

S5:—*Altered Terrain Costs*—Some effects let you move spaces at no cost (like *Underground Travel*), or at a Movement point cost that's unrelated to the terrain moved over (like *Wings of Wind*). In both cases you're not paying the terrain cost of the spaces nor the cost of WALLS, and you can move over inaccessible spaces. With effects like these, as long as you move over revealed tiles and stop on a safe space, you can pass through mountains, lakes, Rampaging Enemies, KEEPS, MAGE TOWERS, CITIES (even unconquered), and VILLAGES. See O9 below.⁴⁴

Q6:—*Rampaging Enemies*—If you start your turn in a space adjacent to a Rampaging Enemy and spend two Move points to explore, does this provoke the enemy?

A6: No. Only moving directly from one adjacent space to another adjacent space can provoke a Rampaging Enemy. See *Lost Legion*, p. 4, for how Walls affect this.⁴⁵

S7:—*The PORTAL*—On the PORTAL tile (assigning N as the direction toward the top of the page, e.g., the edge with the Forest space), on Side A the spaces W, SW, and SE of the portal space are inaccessible; on Side B, the spaces W and SW of the portal space are inaccessible.⁴⁶

S8:—*Revealing Information*—As you move, information is often revealed. If, during the Movement Phase, you travel past an unconquered KEEP or MAGE TOWER during the day, or past an unconquered CITY during either day or night, you reveal the enemy token(s) that're there. And at night, once you move onto a RUINS token, you flip the RUINS token face-up: you can keep moving farther or you can stay there, but either way the RUINS token gets revealed (but no enemy token(s) *within* that ADVENTURE SITE get revealed).⁴⁷

See O9 just below, Combat S14, and End of Round S6.

O9:—*Revealing Information*—With some move effects, you don't pay the terrain cost of the spaces you cross, per S5 above. Do you reveal enemy tokens and RUINS tokens (see S8 above) as though you *had* moved into those spaces via the standard movement process?

A9: Definitely not for these effects:

—*Space Bending*: it says "ignore any spaces you leap over".

—*Temporal Portal* (strong effect): you "teleport" there.

—*Underground Travel*: thematically you're moving underground.

But a player could argue "yes" for these effects:

—*Druidic Staff*: A druid is "one with the land", so conceivably he learns all there is to know about the spaces he moves through. (But *Lost Legion* p. 4 seems to treat this effect as a teleport.)

—*Wings of Wind, Flight*: You're flying over spaces, so you likely can see what's below you, perhaps even better than if you had walked. Then again, maybe clouds or darkness limit visibility.⁴⁸

As you see, making judgment calls for individual cards is fraught with ambiguities: a simpler solution is to rule "no" for all types of movements for which you don't pay (adjusted) terrain costs. See S5 above.

Effects that simply "change the terrain cost" should reveal information in the usual way, allowing you as you move to reveal enemy tokens and RUINS per the usual rules. These latter effects include *Song of Wind, Frost Bridge, Path Finding, Mountain Lore, Mist Form, Secret Ways*, and FORESTERS. And note that with effects that simply change the terrain costs, you do have to pay to cross WALLS.⁴⁹

S10:—*Applying Multiple Effects*—Note this easily overlooked rule on p. 6 of the rulebook: *If a player plays more than one* [effect that changes the Move costs for different types of terrain], *he can apply* [these effects] *in any order*.⁵⁰ For an exception to this, see *Prayer of Weather* S2.

S11:—*Movement Phase vs. Action Phase*—You get one Movement Phase and one Action Phase every turn. The Movement Phase always precedes the Action Phase. You can move as much as you want and explore as many tiles as you want during the Movement Phase, but once the Action Phase begins, the Movement Phase is over: you cannot move to a new space again during this turn, nor can you explore new tiles.

During the Movement Phase you can, as spelled out in point 6 on p. 6 of the base game rulebook, alternate between moving to new spaces, exploring new tiles, and playing more movement points, in whatever order you wish and as many times as you wish—just so long as the Action Phase hasn't begun yet.

And Combat, anytime it occurs, always take place in the Action Phase.

- If your movement triggers an automatic combat (say, by provoking Rampaging Enemies to attack you), your Movement Phase instantly ends and your Action Phase (now a Combat Phase) begins.

- If you (a) choose to *enter* an ADVENTURE SITE (which isn't the same thing as being *on* the same space as an ADVENTURE SITE), or (b) challenge or provoke a Rampaging Enemy, or (c) begin to Interact with the Locals, or (d) activate an ANCIENT ALTAR, or (e) attack another mage knight, or (f) assault a fortified site, or (g) attempt to burn down a MONASTERY, etc., then your Movement Phase has just ended and you're now in your Action Phase.
- There is never more than one Combat per player turn. If multiple enemies are involved in a Combat (say, if you're Assaulting a fortified site and fighting adjacent Rampaging Enemies that were provoked by your entrance), there is still only one (combined) Combat.

After the Action Phase ends, you can play healing effects and special effects, but you can't engage in movement nor in any other Action. For instance if you Assaulted a KEEP and won, you cannot Interact with the Locals there during the same turn: your Action Phase (which was Combat) is now over. To Interact with the Locals at a newly captured Keep, you must wait until a future turn and choose "Interact with the Locals" as your Action during that turn.

See Combat Q1, Q2, S4, S18, and S40, Influence S7, and End of Turn S1.⁵¹

Q12:—*Revealing Information*—When you spend Move points to enter and Assault a Fortified Site, do you immediately reveal any enemy tokens adjacent to that Fortified Site (say, in another adjacent CITY or KEEP), or must you succeed in actually conquering the Fortified Site (and not being forced back) in order to reveal those adjacent enemy tokens?

A12: Since you've paid the Movement points to enter the site, and since your Movement Phase has ended and a Combat Phase has begun, it seems clear that you're "in" that space and so meet the Site Reference card requirement for revealing adjacent tokens.⁵²

S13:—*After Revealing Information*—If you play the basic effect of *March* for two Movement Points, reveal a map Tile, and then wish to add a green mana to change from the basic effect to the strong effect of the *March* card, it is too late. You have revealed new information and therefore cannot change earlier decisions.⁵³

Cross References: Map Revealing S2; Combat Q1, S31, S32, S40; CITIES S10; Resting S3; Miscellaneous S9; Silver Units S10; FORESTERS S1.

Combat

Q1:—*When Combat Begins*—:⁶¹

A1: Combat is usually initiated by a player's intentional decision, a decision that's often indicated by revealing an enemy token. Examples:

- a. A player expends movement points to enter an unconquered **KEEP/MAGE TOWER**.⁶² The moment those Movement points are used, the Movement Phase ends and the Combat Phase begins. Healing effects can no longer be played and if the enemy garrisoning that site hasn't yet been revealed, it's revealed now. See Movement S8, and Combat S3 and S14.
- b. A player decides to **challenge** an adjacent **Rampaging Enemy**. Combat begins immediately.
- c. A player moves to a space that **provokes** an adjacent **Rampaging Enemy**. Combat begins immediately. Anything he does in the new space is done while he is in Combat. See Movement S1, Q6, and S11.
- d. While standing on an **ADVENTURE SITE** a player declares he is entering that ADVENTURE SITE. Enemy token(s) are revealed and combat begins immediately. See Q2 and S18 below.
- e. A player standing on a **MAZE/LABYRINTH** chooses to enter it. His Movement Phase ends and his Action Phase begins—but he is not yet in Combat. Any unspent Movement points vanish, for the player has begun his Action Phase. He must now play and pay 2/4/6 new Movement points to walk into the MAZE/LABYRINTH. If he plays more Movement points than he uses, those points will carry over into the Combat Phase.⁶³ At this point the player is *still* not in Combat: Combat begins only when he draws an enemy token.⁶⁴

Any Heal points generated during the Movement Phase do carry over into the Action Phase, and are available even while walking through a MAZE/LABYRINTH. However any unspent Heal points are immediately lost when a player begins Combat. See Miscellaneous S9.

Q2:—*When Combat Begins*—Is there a moment between entering a DUNGEON (revealing a MONSTER token) and the Ranged-and-Siege-Attack Phase of Combat, a moment during which you can play Healing effects?

A2: No. As soon as the MONSTER token is revealed, you are in Combat. See Q1 just above and *Energy Steal* Q1. And at the moment that the Combat Phase ends, you are no longer in the DUNGEON.⁶⁵

S3:—*Healing during Combat*—The *Rejuvenate* card has a hand symbol in the upper left corner (and only a hand symbol), so even its "non-healing" effects are prohibited during Combat. See *Rejuvenate* Q1.

The readying effect of *Inspiration* is a hand-symbol effect (as indicated by the hand icon on the Skill description card), and so cannot be played during Combat.⁶⁶

S4:—*Combat Overview*—:

The Combat Phase has four sub-phases: ⁶⁷

Ranged and Siege Attack Phase

Block Phase

Assign Damage Phase

Attack Phase

Once Combat begins, you cannot withdraw from it—you must complete it. You will execute the four-phase sequence exactly once, no matter how many enemy tokens you're facing.⁶⁸ All sub-phases are voluntary except the Assign Damage Phase, which is mandatory.

First you do the **Ranged and Siege Attack Phase**: you may attack none, any, or all of the enemy tokens with Ranged Attacks (if they're unfortified) and/or Siege Attacks (if they aren't fortified twice). Group the enemy tokens however you wish. Any enemy tokens that you kill are immediately removed from the Combat.

Next is the **Block Phase**: Block as many or as few enemy Attacks as you wish, but each separate *Attack* must be handled one at a time—even if those Attacks all come from a single enemy token.

After you've made all of your Blocks, next comes the **Assign Damage Phase**: any enemy Attacks that were not fully Blocked (ignore the Attacks of enemies that were killed during earlier phases) are now assigned to your Units and/or Mage Knight. You choose the order in which to process these unblocked enemy Attacks.

Last is the **Attack Phase**: you may Attack as many enemy tokens as you wish, grouping them however you wish, without regard for how you may have grouped them during the Ranged and Siege Attack Phase.

You go through this four-phase sequence exactly once, and all (unkilled) enemy tokens are present during each phase. Attack them or don't attack them, it's up to you, but all of those that weren't killed or that weren't fully Blocked during the Block Phase will assign damage to you during the Assign Damage Phase (see ORC SUMMONERS S1). If any enemy tokens survive the entire Combat Phase, see S18 below and CITIES S23.

S4a:—*Blocking*—If an enemy has a physical Attack of 4, you will need 4 Block points to block it. That Block can be of any type, for any type of Block is efficient against a *physical* attack.

If you're facing a Fire Attack, only Ice or Cold-Fire Blocks are efficient against it; physical Blocks and Fire Blocks are only half effective against it. So if an enemy attacks you with a 4 Fire Attack, you'll need a 4 Ice Block or a 4 Cold-Fire Block, or a physical Block 8 or a Fire Block 8, or some combination that totals 4 (with Ice and Cold-Fire Blocks counting fully, and others counting half).

Armor values have nothing to do with blocking. *All* Blocks are done before any Damage is assigned.⁶⁹

S4b:—*Assigning Damage*—If a Cold-Fire Attack of 9 hits you, you do not take 18 points of damage—you take only 9 points of damage, for at this point an elemental Attack is no different than a physical Attack.

The only exception in this case is if you assign the Cold-Fire damage to a Unit that has *both* Ice and Fire Resistance: in that case the Unit deducts its Armor value from the damage without taking a Wound. If any Damage remains, the Unit deducts its Armor value a second time and then takes a Wound—see S34 below.

S4c:—*Attacking*—If an enemy token has no resistances, you only need to do damage equal to its Armor: any type of damage will do. Against 5 Armor, an attack of Attack 2 + Fire Attack 3 will kill it. And a 2 Ice Attack delivers the same amount of damage as a plain (physical) 2 Attack.⁷⁰

If an enemy has 5 Armor and Physical Resistance, any non-elemental attack will be halved. Against this enemy, your Fire Attack 3 is still 3 damage, but the physical Attack 2 is halved to 1 damage, making your total damage now 4—not enough to kill it.

Other resistances work similarly: if an enemy is Resistant to Fire, then all Fire Attacks are halved, but physical or Ice or Cold-Fire Attacks are at full strength.

Example: You use a 6 Ranged Fire Attack (from AMOTEP GUNNERS) and a 4 Ice Siege Attack (from ICE MAGES) against an unfortified enemy. If the enemy has no Resistances, this will be a combined Attack of 10 (6+4). If the enemy has Ice Resistance, it'll be an Attack of 8 (6+2); if the enemy has Fire Resistance, it'll be an Attack of 7 (3+4); if the enemy has both Fire and Ice Resistance, it'll be an Attack of 5 (3+2).

S5:—*Types of Attack*—MKBG can mean varying things by "types of attack/block", including . . .

- (a) the "modes of attack" that appear on the left-side of enemy tokens (physical, fire, ice, cold-fire, summons, multiple attacks);
- (b) the "elements of the attack" (fire, ice, cold-fire); and
- (c) the "distance of the attack" (siege, ranged, or regular "close-ranged" attacks).

Sometimes a phrase encompasses multiple meanings. *Concentration*, *Will Focus*, *Deadly Aim*, and *Ambush* include both the element and the distance meanings, while *Spirit Guides* and *Shapeshift* are referring only to the elements of the attack. When an effect says "reduce one enemy attack by 1", it's referring to all kinds of attack—ice attack, cold-fire siege attack, physical ranged attack, etc. Context is your guide.

When an effect provides "Attack 2" or "Block 5", that indicates physical Attacks and physical Blocks. When the Action Card *Swiftness* says "Ranged Attack 3", it means physical Ranged Attack 3. Even if an Attack or Block requires mana to generate it, the Attack or Block it provides is physical unless the effect text explicitly states something like "Fire Attack 3" or "Ice Block 3" or "Cold-Fire Siege Attack 3". See Mana S11.⁷¹

At times you'll come across abilities that affect only *non-elemental* Attacks and Blocks. These abilities will use the word "physical" in their phrasing—see, for example, the strong effect of the *Sword of Justice*.

See *Cold Toughness* S1 where enemy abilities are differentiated from enemy attack types.⁷²

S6:—*Attack Types during the Attack Phase*—During the Attack Phase there is no difference between Attacks, Ranged Attacks, and Siege Attacks: they're all treated as plain Attacks. So if you use *Leadership* during the Attack Phase, you gain +2 regardless of what type of Attack is shown on the Unit. And if you use *Vial of Toxin* during the Attack Phase, you gain +3 to the Attack regardless of what "range" of Attack it is applied to—Ranged, Siege, or just a plain Attack—just so long as it's a *physical* Attack. See S5 above.⁷³

Q7:—*Resistances versus Multi-Card Plays*—When you play *Concentration*, *Will Focus*, or *Maximal Effect* and then a follow-on card, which of the played cards decides "the color of the card" when facing enemy tokens with Fire or Ice Resistance?

A7: The second card played is what matters: the first card is simply enabling the second card or making it better. So using the strong effect of (red) *Maximal Effect* to play (blue) *Ice Shield* against an enemy with Fire Resistance lets the *Ice Shield* armor reduction apply—but not if the enemy has Ice Resistance. See S33 below.⁷⁴

Q8:—*Spell Colors*—Is a Spell that's powered by red mana considered "a red card" for purposes of Resistance and Special Effects?

A8: Yes. For example if a Spell powered by red mana says "Fire Attack 4, and the target melts into goo", then an enemy with Fire Resistance halves the Fire Attack to 2 but it won't turn gooey.⁷⁵

S9:—*Fortified Sites*—MONASTERIES are not fortified. MAGE TOWERS, KEEPS, and CITIES are fortified.⁷⁶

S10:—*Mage Knights in Fortified Sites*—Mage Knights and their Units gain no benefit from being in a fortified spot when they're attacked by enemy tokens.

There's an exception, though, for PvP combat.⁷⁷ And, by extension, a DEFENDER'S Units should be protected against attacks by an AGGRESSOR'S ILLUSIONISTS Unit that might otherwise prevent the DEFENDER'S Units from "attacking during this combat". However fortification does not apply when VOLKARE attacks a player.⁷⁸

S11:—*WALLS*—If you engage a Rampaging Enemy across a WALL and the enemy has the Unfortified ability, you can attack it with Ranged Attacks. Thematically, some enemies take advantage of a WALL; others cross it to fight you. An enemy token inside a Fortified Site (like a KEEP) that's attacked across a WALL hexside is doubly fortified: but if it has the Unfortified ability, both site Fortifications are canceled for that enemy token. See also the next two entries.⁷⁹

S12:—*Grouping Enemies*—When you group several enemy tokens together for an attack, those enemy tokens don't share abilities or resistances with each other. Rather . . .

- (1) if any member of the group has fortification, that restricts the types of attacks that can be played against the group during the Ranged-and-Siege-Attack Phase; and
- (2) if any member of the group has Fire, Ice, or Physical Resistance, the strength of any Fire, Ice, or Physical Attacks (respectively) played against the group is halved. Cold-Fire Attacks are halved only when at least one enemy token has both Fire and Ice Resistance.⁸⁰

These are the only two qualities—fortifications and resistances—which extend from one enemy token to affect the entire group.⁸¹ So remember . . .

- If fortification prohibits an attack against a member token, that attack is prohibited against the group.
- If resistance halves an attack against a member token, that attack is halved against the group.

If an enemy token in an attacked group has the Elusive ability, the armor values of the other enemy tokens remain as they were. Similarly, the Defend ability doesn't propagate to other enemy tokens, nor does Arcane Immunity, nor the Unfortified ability (see S13 below), nor cumbersome, etc. Immunity against non-Attack /non-Block effects (which enemy tokens with Ice Resistance have against blue cards and against Unit abilities powered by blue mana) does not spread to other enemy tokens in the same group, nor does the corresponding immunity of Fire Resistance. Only effects (1) and (2) listed above will apply to the entire group.⁸²

S13:—*Grouping Fortified Enemies*—During the Ranged-and-Siege-Attack Phase, if you attack a fortified site that has two enemies, one with a fortified symbol  on its counter and the other with an unfortified symbol  on its counter, and you group them together, you won't be able to attack them during the Ranged-and-Siege-Attack Phase—not with Ranged Attacks and not with Siege Attacks—because there's at least one enemy token in the group that's doubly Fortified. [The rulebook (p. 8) says it's not that these attacks are ineffective, it's that you cannot play any attacks during the Ranged-and-Siege-Attack Phase if all enemy tokens are doubly Fortified. *Lost Legion* relaxed some of the restrictions on when you can play effects: in general, cards and Skills and Units can be played so long as you respect the sequence of play, even when you don't make use of their beneficial effects—but it didn't remove the attack prohibition for doubly Fortified targets. See *Miscellaneous S1* and *Vial of Toxin S2*.] Similarly, if any enemy token in a group is singly fortified (after all site and ability effects are applied), you can't play Ranged Attacks against that group. See S11 above, and CITIES Q2 for an example with CRYPT WORMS.⁸³

If you group two enemy tokens for a combined attack, one of which is fortified from being inside a fortified site, and the other of which is fortified from being behind a WALL or from having the fortified symbol on its counter (but not both), then you can attack this group with a Siege Attack. Their having single fortification from two different sources does not make the group doubly fortified.⁸⁴

If you group a fortified Armor 3 enemy with an unfortified Armor 5 enemy, and play Siege Attack 4 against them during the Ranged-and-Siege-Attack Phase, you are not then allowed to play a Ranged Attack 4 effect to finish killing off the unfortified enemy token. The group is killed—or not killed—as a whole: as long as they are grouped, only Siege Attacks are permitted against them during the entire Ranged-and-Siege-Attack Phase. Groups cannot, in general, be killed piecemeal by Attacks.⁸⁵

S14:—*Rampaging Enemies during Assaults*—If at night you Assault a KEEP/MAGE TOWER with Rampaging Enemies adjacent to it that won't be provoked by your entry, you must declare whether you're challenging them *before* you reveal the defending enemy token in the KEEP/MAGE TOWER. See CITIES S3.⁸⁶

S15:—*Reputation*—Killing DRACONUM in LABYRINTHS/TOMBS gains you Fame and possibly site rewards, but it doesn't gain you a Reputation bonus.⁸⁷

Q16:—*Reputation*—When do you adjust your Reputation for Assaults on fortified sites, for killing Rampaging Enemies, and for killing HEROES and THUGS?

A16: When you make an Assault, you lose one point of Reputation at the moment you enter the fortified space (unless you're already on the "X" space of the Reputation track). You apply Reputation adjustments for killing enemy tokens whenever you defeat them—at the same time that you gain the Fame for doing so.⁸⁸ See Influence O3, Enemy Tokens: HEROES S1, and Silver Units: THUGS O3.⁸⁹

S17:—*Burning MONASTERIES*—If you attempt to burn a MONASTERY, you cannot combine that attempt with combat against Rampaging Enemies, either by challenging them yourself or by provoking them by your move. If your move provoked them, you cannot attempt to burn the MONASTERY this turn.⁹⁰

If someone burns a MONASTERY and marks it with their shield token, treat that spot as if it's an empty space of the indicated terrain type: anyone can enter it, but no one can Interact with the Locals there.⁹¹

S18:—*Remaining on ADVENTURE SITES*—If you explore an ADVENTURE SITE (even those with two enemy tokens like SPAWNING GROUNDS or some RUINS tokens) and don't defeat all of the enemy tokens, you nevertheless remain on that space at the end of Combat. During your following turn, you can explore the ADVENTURE SITE again, or even remain on the space and choose *not* to explore it. See Miscellaneous S14.⁹²

S19:—*Forced Withdrawal*—A failed Assault of a fortified site forces you back to the hex you came from. This is not Forced Withdrawal. Forced Withdrawal only happens during the End-of-Turn sequence: it can apply after a failed Assault, but only if the space *you retreat to* isn't a safe space. Retreating from a fortified site

after a failed combat doesn't use Movement points or provoke Rampaging Enemies; the same is true for Forced Withdrawals from unsafe spaces. See Forced Withdrawal S1 and S2.⁹³

S20:—*Poison and Knockout*—The extra Poison damage that goes into your discard pile does not count toward the knockout rule. See *Blood Ritual* S3.⁹⁴

S21:—*Knockout*—If you play *Blood Rage* and the Wound you get from it knocks you out, you still get to play the Attack 5 or 9 that the card gives you—you can't, though, add any more Attack card effects after this point (unless you somehow manage to draw more cards after you get knocked out). If you played *Blood Rage* by means of *Maximal Effect*, you could take up to three Wounds while resolving the effect. If so, you might take more Wounds than your hand size limit before the knockout takes effect.⁹⁵

Q22:—*Knockout/Paralyze*—If you get knocked out or paralyzed, can you use *Motivation* to draw cards?

A22: Yes. *I Feel No Pain* also works. Being knocked out or paralyzed causes you to discard non-wound Deed cards—but you can still use Skills/Units/mana, and any enduring effects of cards played earlier continue to apply. Between turns, you can also plunder VILLAGES.⁹⁶ Note: you can get knocked out only once a turn.⁹⁷

S23:—*SUMMONERS*—To cancel a summoning attack by ORC SUMMONERS, ILLUSIONISTS, DRAGON SUMMONER, or SHROUDED NECROMANCER, you must do so at the start of the Block Phase *before* the SUMMONER draws the MONSTER/ORC token(s). After that point new information has been revealed, so you can't change a previous decision (i.e., your decision *not* to cancel the SUMMONER'S summoning attack). See ORC SUMMONERS S1.⁹⁸

Official Clarification: *The attack (from a SUMMONER) itself isn't an enemy. If you want to cancel a SUMMONER'S attack, you have to do so before you draw the summoned token. If you do draw the summoned token, then you have to block/assign damage. (In retrospect, I would say "Summon Attack" isn't the best name for it. It gives an impression that you are facing two enemy tokens, which isn't true.)*⁹⁹

Implication: the summoned MONSTER/ORC is the SUMMONER'S Attack, or perhaps even more precisely, "the Attack of the summoned MONSTER/ORC" is the SUMMONER'S Attack. Once the MONSTER/ORC token has been revealed, its Attack cannot be canceled: you can Block the Attack or reduce the Attack, but you cannot "cancel" the Attack or "prevent that MONSTER/ORC from Attacking". You've already had one bite at the apple. You can, though, modify the Attack of the summoned MONSTER/ORC or even directly "kill" the MONSTER/ORC (say, with *Exploding Shield*), although you gain no Fame from doing so. See *Banner of Fear* Q6.¹⁰⁰

[Effects that kill a summoned MONSTER/ORC or modify its characteristics have no further effect once the MONSTER/ORC disappears—but effects that have an action that targets "the same enemy" during the ensuing Attack Phase, in my opinion, *should* be usable against the SUMMONER itself. See *Dueling* S2, *Taunt* O2, *Ice Shield* S3, and *Shield Bash* Q6. The vampiric ability, though, should not affect the armor of the SUMMONER.]¹⁰¹

Q24:—*Arcane Immunity*—Since you *can* affect the Attacks of an enemy with Arcane Immunity, can you also affect the Attacks of an enemy with Ice Resistance by using a blue card or a blue-mana ability?

A24: No. Arcane Immunity works differently than Ice Resistance. Enemies with Arcane Immunity are immune to magic, yet their attacks are not. See Arcane Immunity S6.¹⁰²

S25:—*Cumbersome*—ZOMBIE HORDE (from *Shades of TEZLA*) has three physical Cumbersome Attacks of 1. If you use Movement points to Block all three, you need 3 Movement points. But—unlike with Block cards—you don't have to get the points from three different Movement cards. See Miscellaneous S9.

With Cumbersome, any Movement points you pay will reduce the attack. Even if you don't reduce it to zero, the damage from the attack will still be lessened. And note that Movement points reduce Cumbersome Attack points before they're doubled for Swiftiness, a consideration when *Nature's Vengeance* is used.¹⁰³

S26:—*The Defend Symbol*—The Elusive symbol (which exactly doubles the armor value) and the Defend symbol (always either 1 or 2) are similar. Entry CRYSTAL SPRITES S1 demonstrates both symbols.¹⁰⁴

S27:—*The Defend Ability*—Only one Defend effect can be applied to a given enemy token. Although all three enemies in the third Defend example in *Shades of TEZLA* (p. 2) have Defend, only two of them can apply Defend during the Ranged-and-Siege-Attack Phase because only two enemy tokens are being attacked during that phase. You get to choose which enemy tokens use their Defend abilities, so be smart! In the example, the Defend abilities of both CRYSTAL SPRITES are used—one on a CRYSTAL SPRITES and the other on the ELVEN PROTECTORS. The ELVEN PROTECTORS are killed during the Ranged-and-Siege-Attack Phase, and so will not be present during the Attack Phase to apply their Defend ability to any newly attacked enemy token. During the Attack Phase, the lone remaining enemy token—the second CRYSTAL SPRITES (which has already applied its Defend ability to protect the now-dead ELVEN PROTECTORS)—receives *no* Defend boost to its armor. See S29 below.¹⁰⁵

S28:—*The Defend Ability*—

Q: Is an actual attack of Attack points needed to trigger the Defend ability? **A:** Yes.

Q: When does the armor-increase-given-by-the-Defend-ability get assigned to an enemy token? **A:** After at least one Attack point (even if it's inefficient and halved) is irrevocably assigned to a specific enemy token or group of tokens. You are permitted to attack an enemy token or group of enemy tokens with an attack that's insufficient to defeat them, and doing so is enough to justify attaching a Defend bonus to the attacked tokens.

Q: Does *Tremor* (which reduces the armor of enemy tokens) constitute an Attack that forces Defend to be assigned to particular targets? **A:** No: Attack points are needed.

Q: Can I assign some Attack points to an enemy token, thereby forcing Defend to react, then play *Tremor* to lower its armor, and then play enough additional Attack points so that, together with the points I played previously, I have enough Attack points to kill that enemy token, all during the same Attack Phase? **A:** **Not quite.** In general, Armor reductions and similar effects are applied first (that is, immediately¹⁰⁶), and only afterward do you apply any Attack points. Defend kicks in when Attack points are applied (that is, after *Tremor* armor reductions). See O46 and S49 below, Basic Action Cards S2, and *Sacrifice* S4.

Q: Can I assign one Attack point against an enemy token, apply Defend to it, then use *Tremor* on it, then assign a second completely separate Attack against that same enemy token, all in the same Attack Phase? **A:** **No.** Opinions differ, but I believe you're allowed only one consolidated attack against an enemy token during any sub-phase of Combat.¹⁰⁷ If you skirt this restriction, you open the door to gamey tactics that might neuter the Defend ability altogether, which clearly isn't what is wanted.

Q: Could I play an unsuccessful Ranged-and-Siege-Attack-Phase attack (one too weak to kill the target, but which affixes Defend points to this target), then follow that up with the *Tremor* Spell, and then play an Attack-Phase attack against the reduced armor of that enemy (due to the effects of *Tremor*)? **A:** Yes, so long as the Ranged-and-Siege-Attack Phase attack could potentially harm the enemy token: e.g., Ranged Attack points played against a Fortified enemy token would not work.¹⁰⁸

S29:—*The Defend Ability*—If one ELVEN PROTECTORS token (Armor 4, Defend 2) and one SHADOW token (Armor 4, Elusive 8) are in Combat with you, and you attack the PROTECTORS first, then the PROTECTORS will have Armor 6 for the whole Combat phase.

Conversely, if you attack the SHADOW first during the Ranged-and-Siege-Attack Phase, their Elusive Armor will be increased to 10. If you then kill the PROTECTORS in the Ranged-and-Siege-Attack Phase but not the SHADOW, and then successfully block the SHADOW Attack in the Block Phase, the SHADOW will have Armor 6 during the Attack Phase, as the Defend boost persists even after the enemy providing that Defend is killed.¹⁰⁹

Q30:—*Enemies with the Ambush Trait*—Under *Ambush* (TEZLA p. 2), what does the last sentence mean?

A30: Any movement effects that don't trigger attacks by Rampaging Enemies also don't trigger *Ambush* attacks. In other words, if a movement ignores "provoke", it also ignores "ambush". See Movement S5.¹¹⁰

An enemy with the *Ambush* trait "may not cross a WALL". If a Hero ends up two hexes away from an *Ambusher*, and more than one route to him exists, and if at least one route is free of WALLS (and mountains and lakes), then the *Ambusher* will attack. If a Hero ends up adjacent to the *Ambusher* across a single WALL hexside, but there's a valid two-hex route around the WALL, then the *Ambusher* will attack.¹¹¹

S31:—*Pursuing Enemies—Pursuit*, like *Ambush*, is an ability that some scenarios assign to enemy tokens, and a variant that players can add to any scenario.¹¹²

Enemies in pursuit will cross WALLS to get closer to their targeted hero, but they won't attack across WALLS. You can, though, challenge them across WALLS.

Pursuing Enemies attack their targeted hero only if they're already adjacent to the targeted hero and only if their movement would otherwise cause them to enter the same location as the targeted hero: if they do attack in this way, the attack counts as that hero's Action for the turn just as if the hero had provoked a Rampaging Enemy. Also note that pursuing enemies *are* Rampaging Enemies, so no one can move into their space, and if pursuing enemies are adjacent to a hero and the hero moves directly from an adjacent space to another adjacent space, that movement *will* provoke an attack from them the same as usual, no matter *which* hero those pursuing enemies are chasing (assuming no WALLS interfere of course). If you are the target and you assault a fortified location adjacent to their location, they'll automatically join in that combat even if your assault move doesn't provoke them (assuming again that no WALLS impede them from doing so).

The paragraph describing when a hero can be attacked is grammatically complicated, using multiple negatives. What it's saying is that a hero is safe from attack if he's in a location where Interaction is possible, (this includes if he's in a fortified location that he's not currently Assaulting). He's also safe if he's behind a WALL. Accordingly, pursuing enemies can participate in attacks on the NECROPOLIS and the HIDDEN VALLEY.

If you Rest, if you fully participate in a PvP combat as a DEFENDER, if you announce the end of the Round, or if you accept an offer to participate in a cooperative assault on a CITY/VOLKARE/faction leader, then you won't have a Movement Phase this turn and consequently any pursuing enemies won't move toward you or attack you this turn (except of course in the case of cooperative assaults where pursuing enemies could be provoked into attacking you as you enter the assault space via the normal rules that cover provoking Rampaging Enemies). However if you take a normal turn and simply decide not to move, then you still have had a Movement Phase and pursuing enemy tokens will move at the end of your (unused) Movement Phase.¹¹³

Multiple pursuing enemy tokens can move into a space with each other if their movement rules otherwise allow it, even if those pursuing enemy tokens are pursuing different players. Similarly, if pursuing enemy tokens are in the same space with each other, you can split them apart in the future if their movement rules otherwise allow it. And if multiple pursuing enemies are in the same space and you move adjacent to them, you can challenge them in combat—it's even permissible to challenge just one of them (unless they're both pursuing *you*—and even in that case you can still decide to attack just one of them *if* they're across a WALL from you).

If, as a Mage Knight moves to Assault a fortified site, a pursuing enemy moves into the space the Mage Knight entered the site from, the Mage Knight is permitted to challenge that pursuing enemy, just as he is permitted to challenge any other adjacent Rampaging Enemy. However, should the Mage Knight fail to defeat the fortified site defenders, he moves back into the now unsafe space (assuming he didn't defeat the Pursuing enemy token that's now there) and must backtrack from there via the Forced Withdrawal rules (see F.W. entry S1).¹¹⁴

When a pursuing enemy token participates in Combat as a rampaging enemy, if it survives, it is nevertheless still flipped. [Some players disagree with this and don't flip them.] While inverted, pursuing enemies can be challenged in Combat.

In scenarios, pursuit movement doesn't begin until the turn after the pursuing enemy token is placed.¹¹⁵

S32:—*Entering another Character's Space*—If you end your Movement Phase in another character's space (except for CITIES/PORTAL where multiple players can be), then one of the following things happen:

- (a) If you provoked a Rampaging Enemy while entering the space, your movement is disallowed.¹¹⁶
- (b) If PvP is permitted, you must start a PvP combat.¹¹⁷ You can't take a different Action: not Interacting with the Locals, not entering an ADVENTURE SITE, not using a card effect (*Peaceful Moment*) or Skill (flipping back *Shamanic Ritual*) as your Action, nor challenging Rampaging Enemies. See *Temporal Portal* O7.
- (c) If PvP isn't permitted, you have to do a Forced Withdrawal and may not take an Action Phase.¹¹⁸

S33:—*Fire & Ice Resistance*—The non-Attack/non-Block effects of red/blue Deed cards (and of Unit abilities that require red/blue mana) do not affect enemies with Fire/Ice Resistance. This rule affects nine cards:

<i>Chilling Stare</i> (Ultimate Edition)	<i>Chill & Lethal Chill</i>
<i>Explosive Bolt</i> (Ultimate Ed., strong effect)	<i>Demolish & Disintegrate</i>
<i>Ice Shield</i> (strong effect)	AMOTEP FREEZERS (blue-mana effect)
<i>Shield Bash</i> (strong effect)	DELPHANA MASTERS (red- and blue-mana effects)
<i>Exploding Shield</i>	

You might wish to add reminder marks to these cards—maybe small red/blue pentagons.¹¹⁹

If you face several enemies, some with Fire/Ice Resistance and some without, you can still play the above cards (including *Demolish/Disintegrate* that affects multiple enemies at once), but only those enemies without Fire/Ice Resistances will be affected by the non-Attack/non-Block effects.¹²⁰

S34:—*Assigning Damage to a Unit with Resistance*—An IRONCLADS token (4 physical attack, Brutal) goes unblocked when facing a Mage Knight (armor 3) and an ILLUSIONISTS Unit (armor 2, physical resistance).

Since the IRONCLADS are Brutal, the 4 attack delivers 8 damage.

If any Units are to be assigned damage from this attack, it must be done before any damage from this attack is assigned to the Mage Knight himself. Choosing the ILLUSIONISTS first will reduce the IRONCLADS attack by the ILLUSIONISTS' armor value: 8 damage - 2 armor = 6 damage remaining. No Wound is taken for this first reduction because the ILLUSIONISTS are resistant to physical attacks. As there is still damage remaining, the ILLUSIONISTS now take one Wound (this is mandatory), but in doing so it reduces the remaining damage by its armor a second time: 6 damage - 2 armor = 4 damage remaining. This completes the ILLUSIONISTS' contribution. A Unit can only be assigned damage once during a Combat Phase, even if due to Resistances it doesn't take a Wound.

At this point the player assigns all remaining damage to his Mage Knight. (Once this decision is made, no more damage *from the current attack* can be assigned to Units.) So the Knight takes a Wound and decreases the damage by his armor: 4 damage - 3 armor = 1 damage remaining. Since there is still damage left, the Knight takes a second Wound and then decreases the damage again: 1 damage - 3 armor ≤ 0 damage remaining.

The ILLUSIONISTS have taken one Wound, the Mage Knight two Wounds (in his hand). See S38 below.¹²¹

S35:—*Assigning Damage to a Unit with Resistance*—If you assign damage to an unspent Unit that's Resistant to the type of attack being made, and if the armor of the Unit is high enough to absorb all of the damage from that attack without the Unit becoming wounded, then that Unit can still use any of its abilities later during this Combat. It may not, however, be assigned damage from another attack during the same Combat Phase. See Silver Units S9.

A *wounded* Unit can never be assigned damage, even if its Armor-plus-Resistance would be enough to prevent it from taking a Wound from that damage.¹²²

S36:—*Reward for Killing Enemies*—When you defeat enemy tokens, you always get their full Fame points, even when burning MONASTERIES (but not when attacking player-controlled KEEPS: S39 below).

If you face several enemies and defeat only some of them, you receive Fame for those you defeat and place shield tokens on a CITY card for those that were inside the CITY. And you gain Reputation for killing Rampaging Enemies: S40 below. But you gain "the reward for clearing a site" only if you defeat all of the enemy tokens in that site. E.g., if you kill the sole defender of a MAGE TOWER but not a Rampaging Enemy that was provoked by your move into that MAGE TOWER, you don't retreat and you do gain the reward Spell card for conquering the TOWER. See CITIES S3.¹²³

S37:—*Resistances during the Ranged and Siege Attack Phase*—The protective benefits of the Physical/Fire/Ice/Cold-Fire Resistance icons that appear on enemy tokens are always active: they affect attacks made during both the Attack Phase and during the Ranged-and-Siege-Attack Phase.¹²⁴

S38:—*Assign Damage Separately*—If you assign damage directly to your Mage Knight from four enemy tokens in the amounts of 3, 4, 5, and 6 while your Mage Knight has an armor of 4, you will take 6 Wounds ($1 + 1 + 2 + 2 = 6$). You do not add the damage together $3 + 4 + 5 + 6 = 18$, divide by 4, then round up to 5.¹²⁵

If you assign all of the damage from an enemy token with an Attack 5 to your Mage Knight with Armor 2, you follow this process: take a wound ($5 - 2 = 3$); take a wound ($3 - 2 = 1$); take a wound ($1 - 2 \leq 0$). All of the damage having been assigned, you're done and your Mage Knight has taken three wounds.

The mechanics are easy: every time you assign a wound to a Unit or to the Mage Knight, a certain portion of the enemy token's printed attack strength (doubled printed attack strength if the enemy has Brutal) is absorbed. The portion absorbed is equal to the armor value of the Unit or Mage Knight that takes the wound. The amount of the attack that is "still remaining to be assigned after a wound is sustained" is equal to "the previously unabsorbed attack strength" minus "the armor value of the Unit or Mage Knight that is taking the wound".¹²⁶

S39:—*Replacing Defeated Enemy Tokens*—If you failed to defeat an enemy token in a TOMB/DUNGEON/MONASTERY or when assaulting another player's KEEP, the enemy token is discarded. If you failed to defeat an enemy in a MONSTER DEN/SPAWNING GROUNDS/RUINS, the enemy token remains there.

When you assault another player's KEEP, you fight a gray enemy token but you only earn half of the Fame (rounded up) for defeating it. This enemy token is discarded if you fail to defeat it. The same applies to MAGE TOWERS in the "Conquer and Hold" scenario.¹²⁷

S40:—*Rampaging Enemies and ADVENTURE SITES*—If moving into a space provokes an attack by a Rampaging Enemy, your Movement Phase immediately ends and a Combat with that Rampaging Enemy begins. See Combat Q1 and Influence S7. Exploring an ADVENTURE SITE, on the other hand, is a voluntary Action and cannot happen on the same turn that a mandatory Combat occurs: if entry of a space provokes a Rampaging Enemy, you cannot explore an ADVENTURE SITE on the same turn. On the other hand if you choose to explore an ADVENTURE SITE, you cannot voluntarily challenge adjacent Rampaging Enemies as part of any Combat that ensues. There's no way to combine Combat with Rampaging Enemies *and* Combat that occurs while exploring an ADVENTURE SITE. And also remember that ORC MARAUDERS and DRACONUM, when they appear in an ADVENTURE SITE, are not "Rampaging Enemies", so you earn no Reputation bonus for defeating them there.¹²⁸

S41:—*Defeating Rampaging Enemies*—If you defeat a Rampaging Enemy, whether you provoked them or challenged them, you do not move onto their space after your successful combat.¹²⁹

Q42:—*Assigning Damage and Using Unit Abilities*—Can a Unit use one of its abilities and also be assigned damage during the same Combat Phase?

A42: It depends. If a Unit has an ability that's usable during the Ranged-and-Siege-Attack Phase or Block Phase—such as a Ranged Attack 3, or a Block 2—then yes, because the Assign Damage Phase occurs later in the Combat Phase. If a Unit has Resistance to an Attack and is assigned damage $\leq$ its Armor value (see S35 above), then the Unit won't be wounded and—if it's still "ready"—it also can use an ability later on.¹³⁰

S43:—*Units Not Present*—You cannot assign damage to Units that don't accompany you during Combat, such as when burning a MONASTERY or when entering a DUNGEON/TOMB or if you didn't bring them with you into a MAZE/LABYRINTH. You can, though, assign damage to HEROES during an Assault even if you didn't pay them 2 Influence points. See *Call to Arms* S2.¹³¹

S44:—*Excess Attack Points*—Any excess Attack points (of any type) beyond the total Armor of the enemy group you are attacking are lost. Excess points can't be applied to other groups of enemy tokens nor saved at the end of the Ranged-and-Siege-Attack Phase for use during the Attack Phase. See S13 above.

Similarly, if an attack during the Ranged-and-Siege-Attack Phase is insufficient to kill the attacked enemy token(s), any partial damage is voided as soon as the Ranged-and-Siege-Attack Phase ends: the partial damage does not linger on or make it any easier to kill those enemy tokens during the Attack Phase.¹³²

S45:—*After being Knocked Out*—The base game rulebook, p.8, says "*While knocked out . . . you continue taking Wounds if you have to assign further damage to your Hero.*" Don't be confused: assigning damage continues to work the same way after you're knocked out—you can choose to assign damage to your Units or to your Mage Knight at your discretion (with the usual proviso that after any damage is assigned to your Mage Knight, the remainder of the damage *from the current attack* also has to be assigned to your Mage Knight).¹³³

O46:—*Apportioning Effects Among Multiple Enemy Tokens*—At various times there has been discussion in the BGG forums as to whether a player is allowed to . . .

- (a) play Attack points from a Deed Card/Skill/Unit against one group of enemy tokens, then play Attack points from another Deed Card/Skill/Unit against a different group of enemy tokens, then play Attack points from a third Deed Card/Skill/Unit against the first group of enemy tokens, and
- (b) whether multiple effects from a single Deed Card/Skill/Unit (such as with the Spell *Expose*) can be played against different groups of enemy tokens.[†]

I see no clear prohibition against either sequence, especially in light of the Skill *Forked Lightning* (see *Forked Lightning* Q4).¹³⁴ Combat S28 discusses a tangential issue of playing *fewer* Attack points than are needed. See also S49 below and *Sacrifice* S4.¹³⁵

[†] - Of course multiple Attack points or Block points provided by a single Deed Card/Skill/Unit generally have to be combined and used against a single group of enemy tokens/a single Attack.¹³⁶

S47:—*Paralyze Damage*—An enemy token with the Paralyze ability (like MEDUSA) which inflicts a Wound on a Unit will destroy that Unit. But although the Unit is destroyed, the Unit in dying nevertheless still absorbs damage from the enemy attack in the usual way: see S38 above.

If, however, the Unit is Resistant to the type (physical, ice, fire, or cold-fire) of the Paralyze Attack, the Unit will be destroyed *only if* the Attack is greater than the Unit's Armor. And if the Attack is greater than the Unit's Armor, then the Unit in dying reduces the damage coming from the enemy Attack by twice the Unit's Armor value, just as it does in non-Paralyze attacks. See S34 and S35 above.¹³⁷

S48:—*Non-Attack/Non-Block Effects*—Enemy tokens with Fire Resistance and/or Ice Resistance are immune to non-Attack/non-Block effects from any Effect activated by a red/blue mana (see Q8, S12, and S33 above), but Attack points or Block points of any kind (Ice Block 3, Ranged Attack 2, Cold-Fire Siege Attack 4) granted by those effects still apply in the usual way (though sometimes being halved for being inefficient). This means that red/blue mana Effects that say "enemy is killed", "enemy armor is reduced", "enemy does not attack", etc., will not affect enemies with Fire Resistance and/or Ice Resistance, as appropriate. See *Cold Toughness* S3.¹³⁸

S49:—*Applying Multiple Effects*—As you play Attack points, you *assign* them to a specific target, but you don't *apply* them against that target until you're ready to do so. Before you release the waiting Attack points, you can play other Attack points as well as non-Attack effects that (usually) take effect immediately,¹³⁹ effects that, say, reduce Armor values and make a target easier to kill. See S28 and O46 above, and *Sacrifice* S4.¹⁴⁰ There is a debate as to whether Attack points, when *assigned*, need to be legal at that moment (see *Bow of Starsdown* O5, *Ghostly Elixir* S1, and S13 above), but the easier and more permissive interpretation is that Attack points only need to be legal when they're *applied*.¹⁴¹

Player versus Player Combat

Q1:—*Sequence of Play in PvP*—How do you handle PvP combat?¹⁴²

A1: Here is an approach many players use:

1. When the AGGRESSOR ends his move in a hex with another player, PvP combat occurs.†
 - a. The AGGRESSOR is now restricted to the PvP sequence of play, which includes only Ranged and Siege Attacks, and Melee Attacks.
2. The DEFENDER responds:
 - a. The DEFENDER takes "before your turn" and "on another player's turn" options like pillaging and *Motivation*: see Turn Start S1.¹⁴³
 - b. The DEFENDER declares whether he is fully or partially attending the PvP combat. See S2 below.
 - c. The DEFENDER, if fully attending, takes his start-of-turn actions (MAGICAL GLADE): see Turn Start S1.¹⁴⁴
 - d. The DEFENDER plays Special Effects* such as *Mana Draw* and *Crystallize* (even if only partially attending). Remember the restrictions on Skills and Mana dice that apply if a player is only partially attending.
3. Players conduct their Ranged and Siege Attacks.‡ PvP Combat consists of multiple Attacker/Blocker sequences:
 - a. Attack Step: The Attacker plays Special Effects and Attack effects, or passes (concluding this sequence).
 - b. Block Step: The Blocker plays Special Effects and Block effects, or passes.
 - c. Assign Damage Step (Attacker): The Attacker plays Special Effects and other combat effects (e.g. *Tremor*), and assigns unblocked Attack points.§
 - d. Assign Damage Step (Blocker): The Blocker plays Special Effects and other combat effects (e.g. *Veil of Mist*, *Banner of Fortitude*, *Battle Hardened*).§
4. After all combat ends, the AGGRESSOR and a fully-attending DEFENDER play Special Effects and Healing Effects, the AGGRESSOR going first.
5. End-of-Turn sequence (for both players, if the DEFENDER is fully attending). Turn order again matters, the AGGRESSOR going first.

† - Some players believe the AGGRESSOR can play *Into the Heat* when he initiates PvP combat.¹⁴⁵

‡ - Another view is that there should be a step in between steps (2) and (3) where the AGGRESSOR can play start-of-combat effects, just before the DEFENDER plays his own start-of-combat effects. If so, this is where the AGGRESSOR would first be allowed to play *Into the Heat*.

§ - Combat effects (*Tremor*, and wound- and Resistance-oriented effects, etc.) can be played in earlier steps rather than waiting until step 3.c and 3.d if, say, a player is concerned about being able to use SOURCE dice before the other player does. Effects persist for the entire combat.

* - Some might argue that players attacked via PvP can play Healing Effects before the combat begins, but the wording of the rule doesn't seem to support this. Perhaps it's better to view a PvP attack (and an attack by VOLKARE) as immediately dropping a player into the thick of combat where no healing is allowed.¹⁴⁶

S2:—*Fully and Partially Attending Combat*—¹⁴⁷

- When **Fully Attending** a Combat, the player takes his next turn right then:
 - He flips his Round Order Token face down.
 - ◆ While it's facedown, he cannot be attacked again by PvP combat.
 - ◆ When it would next be his turn, all he does is flip his Round Order token face up and retrieve any expiring Interactive Skill in the center of the play area.
 - He cannot move to new spaces or reveal tiles, and his Action this turn will be Combat.
 - He can use a free mana die from the SOURCE, and play deed cards, and use Skills and Units.
 - After Combat he can play Special Effect cards and Healing cards.
 - He concludes his turn by taking all of the usual End-of-Turn steps.

- When **Partially Attending** a Combat, the player . . .
 - Doesn't get a free mana die (but can use SOURCE dice *if* an effect allows him to do so).
 - Cannot use Skill tokens (except those usable outside of his turn, like *Motivation*).
 - Cannot play Healing Effects.
 - Cannot play Special Effects outside of combat.
 - Doesn't take End-of-Turn steps (not even drawing back up to his hand limit).

He can however play cards and activate Units, and he can turn crystals into mana.

S3:—*Crystal Use*—You can use crystals from your inventory as mana to power your cards even when you only Partially Attend a PvP Combat.¹⁴⁸

S4:—*Declaring the End of the Round*—You cannot declare the end of the Round during PvP combat.¹⁴⁹

Q5:—*Few Cards*—If a player has no cards in her draw deck and only a couple of cards in her hand and is attacked by PvP combat, what are her options? Can she declare the end of the Round?

A5: She has two options: (a) Fully attend the combat—she can get one free mana from the SOURCE, can use Skills, can use Healing and Special Effects after the combat, and gets an End-of-Turn sequence—but she must skip her next turn and therefore would not be able to declare the end of the Round until the following turn. (b) Partially attend the combat—she gets no free mana from the SOURCE, cannot use Skills, cannot use Healing and Special Effects after combat, and does not get an End-of-Turn sequence—but in this way she can declare the end of the Round during her upcoming turn.¹⁵⁰

S6:—*PvP in a KEEP*—If PvP combat occurs in a KEEP, and one player is forced out of it, the player who remains takes possession of the KEEP, removing the opponent's shield token and placing his own there.¹⁵¹

S7:—*Playing Cards outside your Turn*—Cards like *Agility*, *Ambush*, or *Wings of Night* can also be used when defending (against another player or VOLKARE) even when the combat isn't directly following the Movement Phase of your own turn.¹⁵²

O8:—*Applying Effects to Mage Knights*—How do you handle effects like those of SHOCKTROOPS that say "*Reduce . . . one attack of chosen enemy by 1*" and "*Reduce one enemy attack by 3*"?¹⁵³

A8: A strict reading of the effect text might prohibit the first effect (*one attack of chosen enemy*) from being used against an opposing Mage Knight, yet allow the second effect (*one enemy attack*)—but such fine parsing of the language may be beyond the designer's intent.¹⁵⁴ See *Know Your Prey* O3.¹⁵⁵

S9:—*The Melee Phase*—If using cards like *Tornado* and *Disintegrate* in PvP combat, when they say "Play only in the Attack Phase," they mean "Play only in the Melee Attack Phase."¹⁵⁶

O10:—*Contradictory Effects*—In some PvP combats, it's possible players will play competing effects, such as one player removing Resistances from the opponent's Units (with effects like *Expose*, or the SORCERERS third ability, or *Know Your Prey*), and the other player adding Resistances to his own Units (with effects like *Veil of Mist*, or the ALTEM GUARDIANS third ability, or *Force of Nature*). In resolving such cases, apply the effects in the order they're played: if the first effect removes a Resistance from a Unit (whether or not the Unit had that Resistance to begin with), and a later effect adds the same Resistance to that Unit, then the Unit now *has* that Resistance. Or if the first effect adds Resistance to a Unit (whether or not the Unit had that Resistance to begin with), and a later effect removes the Resistance, then the Unit now no longer has that Resistance.¹⁵⁷

S11:—*Efficient Blocks*—The rulebook (p. 10) says the efficient/inefficient Blocking rules apply normally. So if an opponent attacks you in a Melee Attack Phase with Fire Attack 4 + Ice Attack 3, and if you play Fire Block 5, then all 5 Block points are fully effective: your opponent will be left with 2 points of damage to assign. If instead you play Ice Block 3 (fully effective vs. Fire Attacks) + Block 5 (not fully effective vs. either), the Attack is reduced by $3 + 5/2 = 5.5$, again leaving him 2 points of damage to assign.¹⁵⁸

O12:—*Assigning Damage*—The PvP rules don't say whether an Attacker is allowed to play an effect while she's assigning damage, yet for the other phases of PvP combat the rules *do* say that she *can* play effects. From this, some players infer that a player cannot play effects while assigning damage (and that this applies both to the Attacker and to the Blocker). See, however, Q1 above and *Battle Hardened* S3. Further note that a player can play a card or use mana from the SOURCE only when it's her turn to act.¹⁵⁹

S13:—*Forced Retreat*—Damage points can be freely split between stealing Artifacts and inflicting wounds and forcing a retreat.¹⁶⁰

O14:—*Skill Usage in PvP*—An instructive example regarding *Nature's Vengeance*:

If the AGGRESSOR (or the DEFENDER when fully attending) plays *Nature's Vengeance* during PvP, then only the first part of the Skill (giving an enemy Cumbersome and reducing an attack of that enemy) would be applied to this PvP Combat. I would then interpret the interactive part of this Skill (the attack of all other enemies being increased by one during the Block Phase) as coming into effect only after this entire PvP Combat is concluded (because the interactive part of a Skill comes into play only after the owning player's turn ends).

If on the other hand the DEFENDER had played *Nature's Vengeance* during his previous turn, then the interactive part would apply to this PvP Combat—and this would be true regardless of whether the DEFENDER fully or partially participates in the PvP Combat. See Skill Tokens S4 and S6.

In the former case (the AGGRESSOR playing *Nature's Vengeance*, or the DEFENDER playing it while fully attending), the "enemy" affected has to be one of the BLOCKER'S unwounded Units (this is how a co-designer of the *TEZLA* expected this Skill to work), and the effects (Cumbersome, -1 Attack) would apply to that Unit for the entire PvP Combat. (See O8 above, and page 11 of the base game rulebook.) BRAEVALAR plays this Skill after the attack is fully announced and specified. [If you do permit effects that use the word "enemy" to target the attack of Mage Knights (see O8 above), then you should restrict the effect of the Cumbersome attribute and -1 attack reduction to its target, which in this case would be the current attack. And once the current attack is resolved, the attack ceases to exist, so whether Cumbersome and the -1 Attack endures for the entire PvP Combat is immaterial, because the attack—once resolved—is over with and gone.]

In the latter case (the DEFENDER having played *Nature's Vengeance* during his previous turn), the situation is more complicated because, in PvP Combat, players are permitted to partially block an opponent's attacks. In this case, I would allow the BLOCKER to selectively block the non-*Nature's Vengeance* attack points first. If that's allowed, then the only negative effect of blocking all attack points except the *Nature's Vengeance* point would be that the attack would not count as being fully blocked, even though the attack would assign no damage. (See *Nature's Vengeance* S1 and S2.) [An alternate approach is simply to point out that partial blocks in PvP Combat are effective, and therefore any effect that raises the attack factor merely for the duration of the Block Phase has practically no effect and consequently should be entirely ignored in PvP Combat.]¹⁶¹

Cross References: Partially Attending; Turn Start S1; Mana S9; Combat S10, S32; End of Turn S3; End of Round S5; Scenarios S20; VOLKARE S22, S24; Basic Action Cards S3; Counterattack S3; *Into the Heat* S4; *Mana Storm* S2; *Temporal Portal* O7; *Call to Arms* S12; *Possess* S5; *Time Bending* S8, S9; *Underground Attack* O5; Skill Tokens S4, S6; *Battle Hardened* S3; *Forked Lightning* S1; *Know Your Prey* O3; Faction Tokens S3; ALTEM MAGES O4.

Arcane Immunity

S1:—*Canceling an Attack*—Enemies with Arcane Immunity are not affected by non-Attack/non-Block effects from any source: magic does not touch them. As such, they can never be prevented[†] from attacking; their armor can never be reduced; they can never lose their defensive abilities; they can never lose their modes of attack (like summons attacks—see Combat S5) or their long-range attacks (like Siege Attacks). Their *attacks*, however, *can* be targeted by effects that reduce the strength of the attack, or by effects that remove elements like cold-fire^{*} or abilities like poison from the attack (as discussed in *Chilling Stare* S2). In these cases your actions are targeting not the enemies themselves but their attacks. So a SHOCKTROOPS Unit *can* reduce the Attack of a SORCERERS enemy token by 3, despite the SORCERERS having Arcane Immunity.¹⁶²

[†] - The phrase "prevent an enemy from attacking" and the phrase "cancel an enemy attack" appear to be synonymous in game terms.[‡] [Some players argue that these phrases mean different things, that the latter phrasing can be used against Arcane Immunity, but not the former (arguing that "canceling an attack" is different than "preventing an attack"). I find this argument unconvincing. And note that *Lost Legion* p. 5 makes no distinction between "preventing attacks" and "canceling attacks" when it discusses the Elusive ability, using the phrase "preventing in some way" to encompass both ideas. See *Banner of Fear* Q7.]¹⁶³

[‡] - One obvious difference between these phrases arises when facing an enemy with Multiple Attacks: the former phrase cancels *all* of that enemy's attacks while the latter phrase cancels only one. Simply expressing this distinction might be the entire reason for these two different phrases.

^{*} - Players might question whether an effect can remove an element of an attack from an enemy with Arcane Immunity because at present no effect does so. (There are very few enemies in the first place that even combine elemental attacks with Arcane Immunity: SHADOW MONSTERS are the only enemy token, and there's also VOLKARE and Faction Leaders.) *Lost Legion* p. 6, however, implies that effects can do this (see S5 below).

S2:—*Resolving Attacks and Blocks*—Arcane Immunity does not affect any Attack points or Block points played against an enemy token: simply look for any Resistances in the enemy tokens, same as usual. So no Attack points directed against a SORCERERS token (Armor 6, Attack 6, Arcane Immunity, Assassination, Poison, Fame 5) get halved. And the only Attack points that're halved against a DRAGON SUMMONER token (Armor 8, Physical Resistance, Arcane Immunity, Attack: summon 2 MONSTER tokens, Fame 9) are Physical Attacks.¹⁶⁴

S3:—*The Defend Ability*—Defend can increase the Armor of an enemy with Arcane Immunity.¹⁶⁵

Q4:—*Grouping Enemies*—If an enemy with Arcane Immunity is in the same group with other enemy tokens, do those other enemy tokens gain Arcane Immunity protection for their Attacks and their armor?

A4: No: Arcane Immunity does not spread to other members of a group. See Combat S12.¹⁶⁶

S5:—*Shield Bash*—The second example of Arcane Immunity on p. 6 of *Lost Legion* is incorrect—it was written before a final change was made to the text of the *Shield Bash* card, and was overlooked in the final editing: *If you use the strong effect of Shield Bash . . . the Block works, ~~the attack even loses eventual Swiftness~~ [and even counts twice against an enemy with Swiftness] (as it targets the attack, not the enemy), but the Armor of the enemy is not reduced.* [Unfortunately, the error wasn't caught in the *Ultimate Edition* either.]¹⁶⁷

S6:—*Not a Resistance*—Arcane Immunity is not a Resistance.¹⁶⁸

CITIES

S1:—*Fight All Enemy Tokens*—When a CITY is attacked, all enemy tokens in the CITY (that is, all of the CITY Defenders) join in the Combat. Exception: Cooperative CITY Assaults—see S11 below.¹⁶⁹

If you attack a CITY, kill an enemy token, and then retreat, that enemy does not re-spawn.¹⁷⁰

Q2:—*Fortifications*—If you attack a CITY defended by three enemy tokens, one of which is a CRYPT WORM (armor 6, Fortified, Attack 6, Fame 5), are all enemies doubly fortified?

A2: Not necessarily. When attacking CITY Defenders, you group them however you wish: singly, all together, or anything in between. Only those enemy tokens in the same group with the CRYPT WORM will face the attack restrictions of double fortification. See Combat S12 and S13.¹⁷¹

S3:—*Rampaging Enemies*—If you kill every CITY Defender but not all provoked/challenged Rampaging Enemies, you have defeated the CITY and you don't retreat to your starting space. Undeclared Rampaging Enemies remain where they were.¹⁷² This is also true when Mage Knights assault KEEPS and MAGE TOWERS.

S4:—*CITY Bonus: Summoned MONSTERS / Arcane Immunity*—In CITY assaults, summoned MONSTERS (if summoned by a SUMMONER inside the CITY and not by a nearby Rampaging Enemy) do benefit from the CITY bonus and from the CITY fortifications, just as do all enemies inside the CITY.

The same goes for enemies who have Arcane Immunity: they too receive the CITY bonus and the CITY fortifications.¹⁷³

S5:—*CITY Bonus: Brutal / Poison*—Although Brutal can apply to any enemy token, the **red CITY** grants the Brutal ability only to enemy tokens with a Physical Attack (any Fire, Ice, and Cold Fire attacks do not gain the Brutal ability). Likewise for the **green CITY**, Poison is added only to those enemy tokens with a Physical Attack. See S6 just below and *Know Your Prey* O2.¹⁷⁴

S6:—*CITY Bonus: Brutal / Poison*—A Brutal enemy token with a physical Attack defending inside the **red CITY** gains no additional benefit (other than being fortified), for Attacks can't be "doubly" Brutal. Similarly, Attacks from inside the **green CITY** can't be "doubly" Poisonous. See *Know Your Prey* O2.¹⁷⁵

S7:—*CITY Bonus: Armor Increase*—Enemies in the **white CITY** get +1 to their Armor. This applies *before* any Armor reduction from other effects. So white-CITY defenders subject to the Spell *Disease* get their Armor reduced down to one, not to two. Enemy tokens with Elusive get +1 to *both* Armor values.¹⁷⁶

S8:—*CITY Bonus: Combat Example*—To Block FREEZERS (Ice Attack 3, Swiftiness, Paralyze, Fire Resistance) in the **blue CITY** (+2 Ice Attack), you can play 10 Fire Block, 10 Cold-Fire Block, 20 Ice Block, 20 Physical Block, or some combination of those. See *Possess* O2.¹⁷⁷

S9:—*Cooperative Assaults: Restrictions*—You cannot offer a Cooperative Assault from a space occupied by another player. Once agreed to, a Cooperative CITY Assault is an Action (and requires a mandatory move into the CITY). You cannot do any other Action, either before the Assault or afterward.¹⁷⁸

S10:—*Cooperative Assaults: Entering the CITY*—To participate in a Cooperative CITY Assault, you have to expend two Move points to enter the CITY. And you have to be adjacent to the CITY to be invited to join in: you can't use a card like *Space Bending* or *Underground Attack* to reach the CITY—unless you're the player who is initiating the Cooperative CITY Assault.¹⁷⁹

S11:—*Cooperative Assaults: Assigning Enemy Tokens*—In Cooperative CITY Assaults, only the *number* of enemy tokens are agreed to: the *colors* of those tokens are determined randomly. Cooperative Assaults on VOLKARE are handled differently: *Lost Legion*, p. 8.¹⁸⁰

S12:—*Cooperative Assaults: Rampaging Enemies*—In Cooperative CITY Assaults, the first player (in Round Order, see S15 below) to provoke or challenge a Rampaging Enemy as she moves into the CITY will be the one to fight it. (Decisions to challenge Rampaging Enemies are made before revealing which CITY defenders she'll be facing: see Combat S14.) If she fails to kill a Rampaging Enemy, other players do not then get a chance to attack that Rampaging Enemy during the same CITY assault. Cooperative CITY Assaults are simultaneous events: each CITY defender engages only one Mage Knight, and the same goes for Rampaging Enemies.¹⁸¹

S13:—*Cooperative Assaults: Free Mana Dice*—In Cooperative CITY Assaults, if the current player has already used his free mana dice from the SOURCE, he is not granted an additional free mana dice.¹⁸²

S14:—*Cooperative Assaults: Empty SOURCE*—During a Cooperative CITY Assault, if you play *Mana Storm* and take all of the dice from the SOURCE, those who take their Cooperative Assault turns after you won't be able to use those dice and will even lose out on their one free die. See Skill Tokens S6.¹⁸³

S15:—*Cooperative Assaults: Round Order*—In Cooperative CITY Assaults, "in Round Order" means play begins with the current player and continues with the involved player who would normally be next, etc.¹⁸⁴

S16:—*Cooperative Assaults: Turn Order*—In a Cooperative CITY Assault, if Players C and A accept Player B's offer, then play proceeds as follows. (Turn Order tokens are in this order: A, B, C, D, Dummy.)¹⁸⁵

Player A has taken her normal turn.

Player B proposes a Cooperative CITY Assault, and Players C and A accept:

Player B does his CITY Assault.

Player C does his CITY Assault (and flips over his Round Order token).

Player A does her CITY Assault (and flips over her Round Order token).

Player B plays any Healing and Special Effects, then does his End-of-Turn sequence.

Player C plays any Healing and Special Effects, then does his End-of-Turn sequence.

Player A plays any Healing and Special Effects, then does her End-of-Turn sequence.

Player C takes no action during his turn order except to flip his Round Order token face-up.

Player D takes a normal turn.

Dummy Turn.

Player A takes no action except to flip her Round Order token face-up.

Player B takes a normal turn.

Player C takes a normal turn.

Player D takes a normal turn.

Dummy Turn.

S17:—*Cooperative Assaults: Losing Next Turn*—In Cooperative CITY Assaults, players who're invited and accept will lose their next turn. In Full Conquest and Full Cooperation scenarios, when the final CITY is conquered, the scenario rules say players get a last turn (if the Round doesn't end). Players who joined in the Assault on the final CITY, though, will not get a final turn: they've already taken it in advance.¹⁸⁶

S18:—*Cooperative Assaults: Actions before Moving*—In Cooperative CITY Assaults, players who accept the invitation may play Special Effects and Healing Effects *before* moving into the CITY.¹⁸⁷

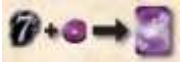

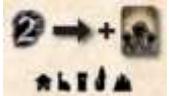

S19:—*Neutral / Friendly CITIES*—Neutral CITIES (found in some scenarios) are already conquered: you can enter them, Interact there (with +1 for your shield token), have a +1 hand limit if adjacent, but no one is the CITY Leader.

With CITIES conquered during a game, any player—even one with no shield tokens on it—can Interact with the Locals there.¹⁸⁸ Team Rules, if in play, don't alter this. If a CITY hasn't yet been conquered—that is, if it still has enemy tokens inside—then no Interaction is permitted there, even if the CITY is a MEGAPOLIS.¹⁸⁹

S20:—*Card Draws*—A CITY must be conquered before a Mage Knight gains extra card draws from the shield tokens he has earned there.¹⁹⁰

S21:—*Interacting with the Locals*—After a CITY has been conquered (see S19 above, and Influence S7), when Interacting with the Locals inside it, you receive one Influence point for every shield token you've placed on the CITY card (in addition to whatever Influence adjustment you gain from your Reputation).

You can purchase the items below, as many of each as you can afford, but you receive the Influence bonus for shields only once per turn. And remember that on the turn you conquer a CITY, no Interaction is allowed there because your Action for that turn was Combat, not Interaction. And unlike with MONASTERIES and VILLAGES, you cannot purchase healing inside CITIES.¹⁹¹

- **Red CITY:** you may purchase **Artifacts** for twelve Influence each. You receive them during your End-of-Turn sequence, drawing one more Artifact than you purchased, and choose one to discard: those you keep go on top of your Deed Deck.¹⁹² 
- **Green CITY:** you may purchase **Advanced Action cards** from the Advanced Action Offer (not from the MONASTERY Unit Offer) or take the top card sight-unseen from the Advanced Action deck, for six Influence each. When any card is purchased from the Offer, it is instantly replenished. Purchased cards go on top of your Deed Deck.¹⁹³ 
- **Blue CITY:** you may purchase **Spells** from the Spell Offer for seven Influence *plus* a matching mana, each. After each Spell purchase, the Spell Offer is instantly replenished. Purchased Spells go on top of your Deed Deck.¹⁹⁴ 
- **White CITY:** you may recruit *any* **Unit** from the Unit Offer while here (no matter what site icons are on the Unit card), for the standard price. You may also pay to add elite (gold) Units to the Unit Offer, for two Influence each.¹⁹⁵ 

S22:—*Rewards for Conquering CITIES*—When you conquer a CITY, these are the "rewards" you gain:¹⁹⁶

- the Fame points for the enemy tokens you defeated while conquering it,
- the purchase and recruitment abilities discussed in S21 above that will apply when you're Interacting with the Locals while inside that conquered CITY during future turns,
- the Influence bonus for shield tokens placed on the CITY card when you're Interacting with the Locals while inside that conquered CITY during future turns,
- the hand limit increase you gain while you're within one space of the conquered CITY, and
- whatever scenario-specific rules the defeated CITY might trigger, including scoring bonuses and satisfying end-of-game conditions.

S23:—*Failing to Defeat All Enemy Tokens*—If you fail to defeat all of the enemy tokens inside a CITY, you withdraw back to the space from which you entered the CITY (however far away that space was); this, though, is not Forced Withdrawal. See Combat S19 and Forced Withdrawal S1 through S3.

You do receive rewards for the enemy tokens that you did defeat (see Combat S36). Regarding Rampaging Enemies that joined the Combat, see S3 above.

When you attack the CITY again, any enemy tokens killed during earlier attacks do not respawn: you only face those CITY Defenders that still remain (plus any Rampaging Enemies that're provoked by your CITY entry or that you optionally choose to challenge).¹⁹⁷

Cross References: Movement S4, S8, Q12; Influence S1, S10; End of Turn S5; *Demolish* S4; *Possess* O2; *Know Your Prey* O2.

Influence

S1:—*Influence Points*—Your Reputation modifies your Influence points only when you choose "Interact with the Locals" as your Action for the turn, and the effect of your Reputation applies only once, either to increase or decrease your Influence points. Any Reputation change that occurs after Interaction begins, doesn't affect you this turn. If you're not "Interacting with the Locals", your Reputation does not affect your Influence points (nor do any shield tokens on a conquered CITY).

Before *Lost Legion*, you could play Influence cards only during an Interaction or in very specific situations (c.f., *Learning*). Now the rule is simpler: you can play Influence anytime, even during Combat. But know that when you go from the Movement Phase to the Action Phase, any unspent Influence points will vanish.

Example: You play the basic effect of *Learning* during the Movement Phase, then generate 5 more Influence for a total of 7 (any Reputation bonus/penalty will not apply). You spend 6 Influence to add an Advanced Action to your discard pile and then explore a new tile, finding a MONASTERY, and move to it to begin an Interaction. At this point your unspent Influence point disappears and your Reputation penalty of -1 applies, giving you an Influence deficit. If you play 3 Influence points, you'll have 2 total and can buy 1 Healing point.

Example: During Combat you play *Diplomacy* plus 4 additional Influence points. You can now convert that Influence into Block points (with elements, if you played the strong effect of *Diplomacy*) and you can apply them however you wish among different enemy attacks. See Miscellaneous S9.¹⁹⁸

S2:—*Interacting with the Locals*—When you declare you're Interacting with the Locals, you immediately apply your Reputation modifier, even if you don't intend to buy anything at your current site. If your Reputation is positive, you could use it with *Learning* or even use it to recruit Units or buy Healing all by itself.¹⁹⁹

O3:—*Recruiting HEROES or THUGS*—When you declare you're Interacting with the Locals, your Reputation at that moment is fixed for the entire Interaction. If you recruit HEROES or THUGS, it's this fixed Reputation modifier that gets adjusted. But you can't take the Reputation adjustment for recruiting HEROES/THUGS and then not recruit them. These rules are clear. But can the decision to recruit HEROES/THUGS be delayed?²⁰⁰

View 1: No.²⁰¹ According to this view, you must immediately declare your intention to recruit HEROES/THUGS, and you can't change your mind later (especially not after new cards are revealed). Additionally, you also need to have the demonstrable means to be able to recruit them. If HEROES/THUGS get added to the Unit Offer only after Interaction begins, you can't recruit them—even if your Reputation modifier is zero.

View 2: Yes. Under this view, you can retroactively account for the effect your decision would've had on your Reputation modifier and on your allowable actions: if you knew from the get-go what you would do, could you have afforded what you actually bought? If so, you can even recruit HEROES/THUGS that're added to the Unit Offer after Interaction begins.

Fortunately situations where this matters don't arise very often, but I tend to side with View 2.²⁰²

Example: If you have a -3 Reputation and recruit THUGS this turn, it'll cost you 2 additional Influence to do so. If you then recruit a standard Unit, say, SHOCKTROOPS, it'll cost you an additional 6 Influence to do so.

S4:—*Recruiting Multiple Units*—You can recruit multiple Units during a single Interaction, and even spend the first Unit you recruit to help you recruit a second Unit. See Silver Units Q3.²⁰³

S5:—*Low Reputation*—If you're on the "X" spot of the Reputation track, you can still take actions that decrease your Reputation, such as pillaging a VILLAGE, burning a MONASTERY, or attacking a fortified site.²⁰⁴

Q6:—*Low Reputation*—If you're on the "X" spot of the Reputation track and there're no ORC MARAUDERS or DRACONUM to defeat, how can you gain Reputation?

A6: It won't be easy. The cards that increase Reputation are *Noble Manners* and *Heroic Tale*. The strong effect of *Noble Manners* increases your Reputation if you play it during Interaction—but if you're on "X", you can't Interact! *Heroic Tale* increases your Reputation for recruiting Units, but that's difficult to do while your Reputation is on "X"—so you probably need to couple it with *Call to Glory*.²⁰⁵

S7:—*Interaction and Combat*—You're allowed only one Action. If you choose to Interact with the Locals, you can't engage in Combat later in the turn. Or if you engage in Combat, whether voluntary or mandatory, you're not allowed to Interact with the Locals later in the same turn. So if you assault a MAGE TOWER/KEEP/CITY, or attempt to burn a MONASTERY, or fight Rampaging Enemies, you can't have Interacted with the Locals earlier in the turn nor do so later in the turn, even if the Combat is successful. See Combat S14, S17, and S40.²⁰⁶

S8:—*Timing of Purchases*—When you spend Influence, you usually gain your items immediately: recruited Units can be used immediately (even to generate more Influence to buy more items); new Spells and Advanced Actions go facedown on your Deed deck (even if empty) and can be drawn if some effect (like *Motivation*) permits it; and Healing points can immediately heal (or be saved for later, though they're lost if you enter Combat). Purchased Artifacts, however, are gained during your End-of-Turn sequence—see End of Turn S5.

Rewards from Combat (like those gained by fighting at TOMBS and ANCIENT RUINS) are different: they're collected during step 5 of the End-of-Turn sequence. Units earned as Combat Rewards may be delayed until the level-up step of the End-of-Turn sequence; purchased Units may not be. See Silver Units Q3.²⁰⁷

S9:—*Interacting with the Locals*—Effects that let you recruit from any tile space (like the strong effect of *Banner of Command*) generally are not considered "interaction with the locals". So when you play effects like it, you can still do an Action of your choice during your turn and can even play them while Resting.²⁰⁸

S10:—*HEROES/THUGS inside CITIES*—It's only your Reputation modifier that gets adjusted when you announce you're recruiting HEROES/THUGS. When you recruit them inside a CITY, you calculate the Reputation effect first. Only after that do you add the (unaltered) Influence bonus from any shield tokens on the CITY card.²⁰⁹

S11:—*When Leveling Up*—Level Ups happen *after* your turn. You cannot Level Up mid-turn and recruit a Unit with a newly gained command token. Nor may you delay taking purchased Units until after a level-up during your End-of-Turn sequence. See S8 above.²¹⁰

Cross References: CITIES S21; Miscellaneous S1, S9; Basic Action Cards S2; *Ruthless Coercion* S1, S2; *Diplomacy* S1; *Learning* S1; *Call to Arms* S7; *Bonds of Loyalty* S5; *Bright Negotiation* S1; *Dark Negotiation* S1; Faction Tokens S2; Silver Units Q3; MAGIC FAMILIARS S1; THUGS O3; HEROES S2.

Healing

Q1:—*Unit Wounds*—If you play an effect that Heals a Unit, what happens to a Unit with two wounds?

A1: Only one of the wounds is Healed unless the effect says something like "the Unit is *fully* healed".²¹¹

S2:—*Wounds not in your Hand*—Healing effects remove wounds from your hand, not from your discard pile or draw deck. MAGICAL GLADES throw away a wound from your discard pile, but it's not "healing".²¹²

S3:—*MAGICAL GLADE*—The rulebook (p. 10) says, "*the MAGICAL GLADE site does not provide healing. Its effect may not be used on Units and cannot be combined with other healing effects.*" IMO the second sentence explains the first: the difference between healing and a MAGICAL GLADE is that a MAGICAL GLADE cannot heal Units and that a MAGICAL GLADE lets you to throw away a Wound from your discard pile. Also, since a MAGICAL GLADE is not "healing", it can't be used with, for instance, the strong effect of *Golden Grail*.²¹³

S4:—*Number of Times*—When Interacting with the Locals, you may pay for as much healing as you can afford. E.g., at VILLAGES you could spend 6 Influence to Heal two wounds from your hand.²¹⁴

Cross References: Combat S3; CITIES S21; Influence S8; Resting Q1, S3, S5; End of Turn S1; Miscellaneous S9; *Rejuvenate* Q1; *Cure* S2, O3; *Golden Grail* S1; *Healing Ritual* Q4.

Resting

Q1:—*Choosing which Type of Resting*—Your hand at the beginning of a turn is 4 wounds and *Tranquility*. You want to do a Standard Rest and use *Tranquility* to Heal a wound. But if you play *Tranquility*, you'll have only wound cards in your hand and won't be able to discard a non-wound card. What happens?

A1: You have several options: (Assume your hand size is 5 cards.)

1. Take a normal turn, play *Tranquility* without mana to **throw away** 1 wound. Then draw 2 cards.
2. Take a normal turn, play *Tranquility* with mana to **throw away** 2 wounds. Then draw 3 cards.
3. Declare a Rest, play *Tranquility* without mana to **throw away** 1 wound, then show you have only wounds left and do a Slow Recovery, **discarding** 1 wound card. Then draw 3 cards.
4. Declare a Rest, play *Tranquility* with mana to **throw away** 2 wounds, then show you have only wounds left and do a Slow Recovery, **discarding** 1 wound card. Then draw 4 cards.
5. Declare a Rest, **discard** the unplayed *Tranquility* card to pay for a Standard Rest and **discard** all 4 wounds. Then draw 5 cards.

When you Rest, you don't declare which kind of Rest you're doing (Standard Rest or Slow Recovery): you merely announce that you're Resting. You may play Special Effects and Healing cards, and at any moment either (a) **discard** 1 non-wound card and *any number of* wound cards (including 0 if you wish), or (b) reveal your hand to show you have nothing but wounds and **discard** 1 of them.²¹⁵

Q2:—*No Cards to Discard*—You begin a turn with an empty deck and a hand of two cards, both of which are wounds. You use HERBALIST to throw both away, leaving you without a legal discard. Is this legal?

A2: Yes. It's a special case of Slow Recovery where you have no wound cards to discard, because you healed yourself beforehand (even though you had cards in your hand at the start of the turn).²¹⁶

S3:—*Playing Cards while Resting*—Resting doesn't prevent you from playing cards: it merely prevents you from Moving, Fighting, Interacting, or doing anything "as your Action". So you can play, say, *Crystallize* to use your once-per-turn die from the SOURCE, or *Tranquility* to Heal or draw cards, or *Learning* or *Training* to gain Advanced Action cards (even playing non-wound cards sideways for Influence), or *Gem Rings* to gain crystals or mana tokens. While Resting, you can play most Special Effects and Healing cards, though it might not always make sense to do so. You can also use many Skills and Units. You also gain the benefit of any space you're standing on, like a MAGICAL GLADE or a MINE. But you have no Movement Phase or Action Phase.²¹⁷

S4:—*No Non-Wounds in your Hand*—If you begin a turn with only wounds in your hand, you ordinarily can't play a Skill (like *Flight*) to move to a new space (say to a VILLAGE, hoping to plunder it between turns), because you don't have a Movement Phase while you're Resting. But if you can somehow *play* a card, you aren't forced to Rest. See Minimum Turn S2 and S3.

S5:—*Healing while Resting*—Buying Healing at a MONASTERY is "Interacting with the Locals", an Action, and therefore isn't allowed while you're Resting. Throwing away a wound card at a MAGICAL GLADE, however, is an End-of-Turn step and therefore is allowed at the end of turns in which you Rest.²¹⁸

Minimum Turn

S1:—*Playing or Discarding a Card*—Every turn you must play at least one card from your hand. Failing that, you must discard one unplayed card from your hand. Using a Unit or Skill or Site to heal a wound or move to a new space or block an attack doesn't suffice.²¹⁹ Neither does "using a Skill as your Action" (like flipping *Shamanic Ritual*). Nor does having a Unit disband or die, even if that Unit had a Banner: it's true that the Unit gets thrown away and any Banner gets discarded, but neither is coming directly from your hand.²²⁰

S2:—*Playing a Card*—The requirement to play at least one card could be satisfied by . . . ²²¹

- Using *Power of Pain* to play a wound card sideways for 2 Move points.
- Playing a Banner from your hand onto a Unit.
- Playing an Artifact from your hand for its strong effect (which is then thrown away).

S3:—*Do Skills Count?*—These Skills do not count as having played a card.²²²

- *I Feel No Pain*: Discard one wound from hand.
- *Invocation*: Discard a wound card to gain a mana token.
- *Healing Ritual*: Throw away up to two wounds from your hand.
- *Regenerate*: Throw away a wound from your hand.
- *Ritual of Pain*: Throw away up to two wounds from your hand.
 - But the second part of this Skill—"play a wound sideways"—would count.

End of Turn

S1:—*Playing Effects just before End of Turn*—After your one allowed Action (even if it's Combat), you are permitted to play Special Effects and Healing Effects (and Move and Influence Effects) before your End-of-Turn sequence begins—but of course you can't move to new spaces or reveal tiles or Interact with the Locals.²²³

S2:—*Restrictions during End of Turn*—Once you announce your turn is over and you begin your End-of-Turn sequence, your turn is officially over: you can no longer use Skills, Spells, etc.²²⁴

S3:—*Fame after PvP Combat*—If you Partially Attend a PvP combat and earn enough Fame to level up, you don't level up until your normal turn. There is no End-of-Turn sequence when Partially Attending.²²⁵

Q4:—*Rolling for Crystal Color*—When you earn multiple crystals at once and have to roll to determine color (MONSTER DEN, SPAWNING GROUND, *Endless Game Pouch*), must you roll a single die at a time?

A4: Yes, and presumably you choose the color of any gold result before any ensuing rolls.²²⁶

S5:—*Artifacts*—Artifacts won during combat or bought at the red CITY are gained during the End-of-Turn sequence. You always draw one more Artifact than the number you're receiving, select all but one to keep, and return the extra one to the bottom of the Artifact deck. The gained Artifacts are placed on top of your Deed Deck. See CITIES S21 and Silver Units Q3.²²⁷

S6:—*Adding Cards to your Deck*—If you gain an Advanced Action card from leveling up on the same turn that you gain a reward from combat (usually a Spell or an Artifact), you don't choose the order to place them on your deed deck. Rewards from combat are placed first in step 5 of the End-of-Turn sequence, and leveling up is done in step 6, so the card from leveling up goes on top of any reward from combat.²²⁸

S7:—*Leveling Up*—If you level up and earn an Advanced Action card and a Skill, you have to take them both. You can't forgo the Advanced Action card just to make it easier to draw a different card.²²⁹

See also Influence S8 and S11.

S8:—*Bonus Draws*—If you're in or adjacent to a conquered CITY that has your shield tokens on it, your hand size is +1 (+2, if CITY leader). This card-drawing bonus does not stack with the card bonus for KEEPS: take only the larger bonus. See CITIES S20. Nor do you get the KEEP bonus twice if you're adjacent to two KEEPS.²³⁰

S9:—*Errata in Ultimate Edition*—Step 3a in the End-of-Turn sequence on p. 11 of the *Ultimate Edition* rulebook should read "Return all mana tokens . . . to the bank", not "all mana crystals".²³¹

S10:—*Exceeding Your Hand Limit*—If you begin your End-of-Turn sequence with more hand cards than your current hand limit, you keep them (unless you use a MAGICAL GLADE to throw away a wound, or unless you choose to discard unused non-wound cards in step 7a). You're not forced to discard excess cards.²³² If, during End-of-Turn step 7b, you have as many (or more) cards in your hand than your current hand limit, you simply do not draw cards (per step 7c).

Your hand limit can be temporarily increased by being near KEEPS or CITIES, and through other effects like the Tactic card *Planning*.²³³

Forced Withdrawal

S1:—*Retreating from Combat*—If you don't defeat all of the defenders of a fortified site, you go back to the space from which you assaulted it. See CITIES S3. This, though, is not Forced Withdrawal.

Forced Withdrawal only applies at the end of your turn, and only if your current space is not a safe space. This usually happens only if you conducted an assault/attack from a lake space while using some sort of water-walking Skill. Or while assaulting/attacking from a mountain space. It can also happen if an enemy with Pursuit moves into the space you're conducting an assault from. Or if you end your Movement Phase on a space with another mage knight when PvP is not allowed: in this case you lose your Action Phase for the turn—see Combat S32.²³⁴

S2:—*Taking Wounds*—When you retreat from a fortified site that you failed to conquer (CITY, KEEP, MAGE TOWER), you don't take a wound. Wounds only happen if Forced Withdrawal ensues.²³⁵

S3:—*Provoking Rampaging Enemies*—Neither retreating from a failed assault nor making a Forced Withdrawal provokes Rampaging Enemies. Nor does either cost you Movement points.²³⁶

S4:—*Retreat Route*—With Forced Withdrawal, you retrace your path, space by space, until you reach a safe space, even if your approach path occurred across several turns. If you used magical assistance to skip over spaces, you must decide how to handle those: you could (a) "unwind" the magical assistance and make the same hops in reverse (for free), or you could (b) trace a retreat through the skipped-over spaces. With CITY assaults, you undo any final hop, so there's precedence for option (a). See CITIES S23 and *Mountain Lore* O3.²³⁷

Cross References: Movement S4; Combat S4, S19, S32; Scenarios S1; VOLKARE O6; *Frost Bridge* S2; *Mountain Lore* S2, O3; *Song of Wind* S3; *Mist Form* Q5; *Space Bending* S5.

End of Round

S1:—*Declaring End of Round*—When you declare the End of the Round, you can't do anything else—you can't use Skills, cards, or Units, and you don't do the End-of-Turn sequence (so no throwing away Wounds while on a MAGICAL GLADE). The only exception applies to cooperative and competitive Skills in the center: these do get returned to you. See Skill Tokens S4 and Turn Start S1.²³⁸

S2:—*Competitive Skills and Interactive Spells*—After the end of the Round has been announced (or an end-of-game state has been triggered), you cannot "*affect other players with competitive Skills or interactive Spells*". Competitive Skills and interactive Spells that were played before the End-of-Round was announced—but which are still in effect—continue to apply.²³⁹ After the End-of-Round is announced, if *Mana Meltdown* gets played it does nothing, and if *Mana Radiance* gets played it applies only to the player playing it.²⁴⁰

S3:—*Mandatory*—All End-of-Round steps are mandatory: you must ready Units and flip Skills, etc.²⁴¹

S4:—*Discarding Cards*—At the end of the Round, you discard all of your cards—those in your hand and those in your deed deck, including all wounds and any cards from leveling up or from combat rewards. All of them get shuffled together in preparation for the new Round.²⁴²

S5:—*Leveling Up after PvP*—If, while Partially Attending a PvP combat, you earn enough Fame to level up and then on your next turn you announce the end of the Round, you won't actually level up until the end of your first turn in the new Round. See S1 above and End of Turn S3.²⁴³

S6:—*Revealing Tokens on the Map*—At the start of every Day Round, you reveal all RUINS tokens and you reveal all enemy tokens in fortified locations adjacent to Mage Knights. This happens before any player chooses a new Tactic card, during step 2.a of preparing the Round.²⁴⁴

Cross References: Movement S8; Miscellaneous S10.

Final Scoring

S1:—*Greatest Leader*—When calculating the Fame for your Units (*Walkthrough*, p. 19), you halve the level of each wounded Unit, round down, then sum. [A fair house rule is to sum, halve, then round down.]²⁴⁵

S2:—*Unconquered CITIES*—Shield tokens on unconquered CITIES do not count during final scoring. So in conquest scenarios, you will not earn 4 Fame per shield token on those CITIES that were not conquered.²⁴⁶

S3:—*Conquered-CITY Bonus*—In Cooperative and Solo scenarios, the VPs for "all CITIES being conquered" is referring to only those CITIES that were to have been in-play during that scenario.

S4:—*Award No Titles*—When the Solo Variant says "award no titles", it's talking about the "trophy" points: e.g., a player still gets 2 Fame for each Spell and 1 Fame for each Advanced Action in his deck, but he doesn't get the extra 3 Fame for the Greatest Knowledge category. The same goes for the other Greatest ____ categories, including Greatest Beating.²⁴⁷

S5:—*Cards Thrown Away*—Any cards thrown away during the game are "out of the game" and do not count in any way toward final scoring.²⁴⁸

Cross References: CITIES S17; Scenarios O31.

Miscellaneous

S1:—*Effects Must Be Usable*—Effects that generate "something" can, in general, only be played during phases in which you could use that "something". This applies to Deed cards, Units, and Skills. See *Mana Draw* S2 and S3, Basic Action Cards O5, and Combat S13. So you can't play *Maximal Effect* and throw away *Rage* unless you're *in combat*. You can, however, play more Attack/Block points than are currently needed—or fewer, for that matter. And you can play Movement points and choose not to use them, or activate PEASANTS for Influence and choose not to use it. See S9 below and Dual-Colored Action Cards O4.²⁴⁹

S2:—*Examining Discard Piles*—Every player's discard pile is open information, should the owner or another player wish to examine at it. By extension, this also applies to the Dummy player's discard pile.²⁵⁰

S3:—*Hand Limit*—Your hand limit never forces you to discard cards, even if you're over that limit. See End of Turn S10.²⁵¹

S4:—*Card Draws*—Card draws are mandatory: you can't skip them. See also End of Round S3.²⁵²

S5:—*Plundering VILLAGES*—You can plunder a VILLAGE before your turn even if you're the first person to take your turn during a new Round. See Turn Start S1.²⁵³

S6:—*Removing RUINS*—If you pay mana to activate an ANCIENT ALTAR, or if you defeat *all* of the enemy tokens at a RUINS site, you discard the RUINS token and mark the site with a shield token.²⁵⁴

The icons on the RUINS tiles are not defined in the base game rulebook—you have to infer them from p. 16 of the base game *Walkthrough*. They are shown correctly in the *Ultimate Edition* rulebook (p. 10, pictured to the right), but in the *Ultimate Edition Walkthrough* (p. 16) the Unit reward icon is incorrect.

S7:—*Refilling the Offers*—The Advanced Action Offer and Spell Offer are refilled immediately whenever a card is taken. If you purchase two Spells from a MAGE TOWER during the same Interaction, immediately after the first Spell is selected, another Spell is added to the Offer, giving you three choices of Spells for your second purchase. (This does not happen with the Unit Offer, or with MONASTERY Advanced Actions cards.)²⁵⁵

S8:—*The "Missing" Walkthrough Rules*—Some rules in the *Walkthrough* are not in the rulebook:²⁵⁶

- (1) Using Advanced Action cards 1-16 when playing First Reconnaissance (p. 4), and having at least one Unit card with a VILLAGE icon (p. 5).
- (2) The meaning of the RUINS icons (p. 16). See S6 above.
- (3) The "rule" which limits when Unit abilities can be played. See Silver Units O8.
- (4) The final scoring rules (pp. 18-19). (Fixed in the *Ultimate Edition*.)
- (5) The icons for the various mana colors (p. 6). These can be inferred, however.
- (6) Text about the "Special Effects" icon on some Unit cards (p. 9). (Fixed in the *Ultimate Edition*.)
- (7) Not removing Advanced Action cards from the Unit Offer when a MONASTERY is burned (p. 15).
- (8) Removing RUINS tokens when someone fulfills them (p. 16). See S6 above.
- (9) Mage Knights cannot exceed level 10, though Fame can go past the end of the Fame track (p. 17).
- (10) Assaulting an opponent's KEEP earns half Fame, rounding up (p. 14). Discard unbeaten tokens.²⁵⁷
- (11) You cannot refresh a Unit during Combat so as to allow it to act twice during the same fight (p. 10).
- (12) You should flip your Tactic card facedown once you've used its ability (p. 13).
- (13) At night, black mana does not work as a wild card like gold mana does during the day (p. 18).
- (14) The *Lost Legion* p. 6 rule about the secondary effect of Cooperative Skills in Solo Games is missing from the *Ultimate Edition* rulebook (but it is on p. 17 of the *Ultimate Edition Walkthrough*).

S9:—*Pool Points*—Healing points, Influence points, and Movement points, when played, are accumulated in a notional pool of points, a separate pool for each type. They are then spent from these pools of points whenever and however the player wishes, until either the points are all spent or until the pools of points disappear. (Note that Healing Effects that direct you to discard or throw away a Wound—as with *I Feel No Pain* or *Healing Ritual*—are not giving you "Healing points".) For an example, see this endnote.²⁵⁸

Influence pool points and Movement pool points disappear when you transition from your Movement Phase to your Action Phase. Healing pool points disappear when (and if) you enter Combat. And all pool points disappear when your End-of-Turn sequence begins.

Attack points and Block points, conversely, do not go into pools. Almost always they're spent immediately to attack a single (group of) enemy tokens/block a single attack. Excess Attack/Block points cannot be re-directed against different groups of enemy tokens or against different attacks. See Combat O46 and S49.

These concepts affect the Cumbersome ability and cards like *Diplomacy*: for these, you can spend Influence/Movement points from its pool against multiple attacks, even if those points came from just one card.²⁵⁹

S10:—*Night Rules*—During Night Rounds, and while in DUNGEONS/TOMBS/NECROPOLIS/GRAVEYARD, (but not necessarily while using the *Amulet of Darkness*), Night Rules are in effect. This means that (a) black mana can be used to power effects (like the strong effect of Spells) and gold mana is unusable, and (b) Skills with differing effects during Day/Night (*Bright Negotiation*, *Night Sharpshooting*) use their Night values.

Other things also change: MAGICAL GLADES give black mana, not gold; tokens in KEEPS/MAGE TOWERS are not revealed when you move adjacent (but you can make blind Assaults against them); RUINS tokens are not automatically revealed; the move cost of forests and deserts change; and you use Night Tactic cards.²⁶⁰

See also *Mana Pull S1*, *Blood Ritual S2*, *Amulet of Darkness S1*, *Amulet of the Sun S1*, *Endless Gem Pouch S1*, *Dark Fire Magic Q1*, *Invocation S1*, *Polarization S1*, *Regeneration S2*, *Universal Power S4*, *Orb of Twilight S1*, ALTEM MAGES Q3 and Q5, Spell Cards S2, and Movement S8.²⁶¹

S11:—*ANCIENT RUINS*—One ANCIENT RUINS that came with *Lost Legion* shows four different color mana tokens at the top. When activating this ALTAR, you pay four mana, one of each basic color: ignore the text on the Site Description card that says "pay 3 mana of the color shown".

The ANCIENT RUINS defended by three ORC MARAUDERS, and the one defended by a gray and a violet enemy, both reward you with a free Unit. Take one Unit of your choice from the Unit Offer, Regular or Elite (but never DELPHANA MASTERS or MAGIC FAMILIARS). If the Unit Offer is empty, you get nothing. See S6 above.²⁶²

S12:—*Standalone Points vs. Tack-on Points*—Some Deed Cards/Skills/Units give points that can be used by themselves; others give points that must be tacked onto points gotten elsewhere.

Freezing Power provides a Siege Attack of 1: this point can be used independently despite the "+" symbol on the token. The points from these Skills can all be used independently: *Arcane Disguise*, *Battle Frenzy*, *Beguile*, *Bright Negotiation*, *Burning Power*, *Cold Swordsmanship*, *Dark Negotiation*, *Dark Paths*, *Day Sharpshooting*, *Double Time*, *Dueling*, *Feral Allies*, *Forked Lightning*, *Hawk Eyes*, *Hot Swordsmanship*, *Master of Chaos*, *Night Sharpshooting*, *On Her Own*, *Puppet Master*, *Refreshing Bath*, *Refreshing Breeze*, *Secret Ways*, and *Shield Mastery*. Similarly, *Dodge and Weave* gives standalone attack points, though of course they can be added with other Attack points. The same goes for *Bow of Starsdawn* and *Sword of Justice*. And cards played sideways don't need to be tacked onto other effects.²⁶³

But *Leadership* (a Skill that also uses the "+" symbol) does require that the Unit it benefits have a base Attack/Ranged Attack/Block. *Banner of Glory* likewise requires a Unit with a base Block or Attack ability. The same goes for *Into the Heat* and for the first ability of SHOCKTROOPS. *Ambush*, similarly, requires a base Attack or base Block from a Deed card, as does *Deadly Aim*. The Move point from *Spirit Guides* is standalone, but the Block point must be added onto another Block effect. *Shapeshift* also requires a Basic Action card that provides points. And *Vial of Toxin* requires a physical attack it can modify.

If in doubt, assume points may be used by themselves unless the text clearly indicates otherwise.²⁶⁴

S13:—*Walkthrough Errata*—On *Walkthrough* p. 8 under "Action Cards : Special Cards", the last picture shows another way to get eight Move points: you play *Promise* sideways, *Stamina* without mana, then *Improvisation* with a red die plus a discard (a second *Promise*). But in MKBG no player starts with two *Promise* cards (though there's a rare way to gain a second *Promise* card using *Mind Steal*). A close-eyed reader, therefore, might wonder if this example is showing a single Action card being used for two purposes: being played sideways for one Move point and then being discarded to satisfy *Improvisation*. But doing that wouldn't be legal: you can't use a card for more than one purpose. See Minimum Turn S1.²⁶⁵

S14:—*Exploring ADVENTURE SITES*—To enter and explore an ADVENTURE SITE—RUINS, DUNGEON, TOMB, MONSTER DEN, SPAWNING GROUND, MAZE, LABYRINTH—you must be standing on the space: being adjacent isn't sufficient. (A MAZE/LABYRINTH cannot already be marked with one of your shield tokens.) While on an ADVENTURE SITE you can also choose to ignore it, whether just passing through the space, beginning your turn on it, ending your turn on it, pausing there during the Movement Phase, or attacking Rampaging Enemies from it. See Combat S18 and S40.²⁶⁶

S15:—*SPAWNING GROUND*—Anytime you enter an unvanquished SPAWNING GROUND, you will face two MONSTERS, a new token being drawn to replace a previous kill. You have to kill both of them to earn the stated Combat reward and to place a shield token there.²⁶⁷

S16:—*Enemy Tokens in ANCIENT RUINS*—Some ANCIENT RUINS have enemies you must defeat to earn a reward. These enemies—when encountered elsewhere—are often Fortified, fought under Night Rules, or earn you Reputation for defeating them. But those things, in general, don't necessarily apply to enemies in RUINS.²⁶⁸

S17:—*Drawing Cards*—Whenever a rule says to draw a card, unless it explicitly states otherwise, it's referring to drawing a card from the top of your shuffled, face-down, as-yet-undrawn Deed card deck.

S18:—*Reshuffling Decks*—If the Advanced Action, Spell, Artifact, or Unit decks are ever exhausted, they don't get reshuffled. During play, most cards are simply returned to the bottom of their respective decks. But note that some cards do get removed from the game (replaced or killed Units, and thrown away cards). In any case it's seldom that you'll play all of the way through these decks, especially with low player counts: but if you do play through them, simply keep cycling your way through the various decks. [A house rule that says you reshuffle exhausted decks is also perfectly playable.]²⁶⁹

Variants

S1:—*Starting at a Higher Level*—When starting at a higher level and wanting to begin the game with a MAGIC FAMILIARS, you must pay the Influence cost of 6 and also provide a crystal (which you could buy for 3 Influence). You would not, however, have to pay another crystal at the beginning of the first Round.²⁷⁰

S2:—*Starting at a Higher Level*—When starting at a higher level, the two crystals you begin with will be different colors. E.g., GOLDYX gets one green and one blue: he can't choose to get two greens.

Players should draw and select Skills in secret at the same time as other players, and also buy their Units, crystals, and other things before revealing any of them. The specific cards that're chosen are kept secret, but players should tell others what type of items they've spent points on so the others can check their math.

No Skills from the Dummy get added to the initial Common Skill Offer. And the Dummy deck and crystals are the same as they would be if you were *not* playing with this variant.

Cards and Skills are gained on *even*-numbered levels, not odd-numbered as incorrectly stated: you draw Advanced Action cards and Skills at levels 2, 4, 6, etc. This erratum was fixed in the *Ultimate Edition*.

In the p. 13 table, the number of Units dealt to each player should be "character level + 1", not "character level + 2". (This was corrected in the *Ultimate Edition*.) If NOROWAS selects *Bonds of Loyalty*, he adds 2 regular Units to his pre-setup deal of Units (two more than specified in the table), and gets -5 to the cost of 1 Unit.

You draw "2 + character level" Advanced Action cards. You choose your free cards from this stack. You may then buy others from this stack for 6 Influence each. So if you're beginning at level 3, you would draw 5 Advanced Action cards, pick one for free, and then may buy any of the remaining four for 6 Influence each.

When ready, place your shield token on the leftmost space of the Fame track on the row corresponding to your starting level (e.g., start with 3 Fame at level 2; 8 Fame at level 3). If playing Blitz (or a scenario that grants extra Fame for every line), add 1 Fame per level (e.g., start with 4 Fame for level 2; 10 for level 3).²⁷¹

O3:—Rampage!—Rampaging Enemies don't respawn if there's a Knight on their space.

The Reputation you earn for killing Rampaging Enemies is ambiguously worded: "*Reputation +1 for each enemy token defeated*" could mean that all respawned Rampaging Enemies earn 1 Reputation each, or that the Reputation for non-respawned Rampaging Enemies is also altered, or that all enemy tokens (even non-Rampaging Enemies) earn Reputation, or that the +1 Reputation is in addition to that for killing Rampaging Enemies on these respawned spaces (1 for brown respawned enemies, 2 for green, 3 for red). You could argue for any of these. (I give brown respawned Rampaging Enemies 1 Reputation, and leave green and red enemies as is.)²⁷²

S4:—*Interactive Combat*—When facing an enemy token that has Multiple Attacks and your opponent chooses the red die face, he adds +1 to only *one* of the Attacks—but he gets to choose which Attack. And he chooses the die face after the enemy token is revealed.²⁷³

S5:—*Daytime Variability - Darkness is Coming*—With this variant, you may see more than three Day turns or three Night turns. If so, you could run out of Tactic cards, which means you'll have to adjust the rules. Perhaps force players to play a Round without choosing any Tactic card, or reduce the number of Tactic cards that are discarded, or provide a mechanism to return some or all of the thrown-away Tactic cards to play.²⁷⁴

S6:—*Team Rules*—Hand limit increases for being adjacent to an ally's Keep does not apply for being adjacent to an ally's CITY: to gain hand limit increases for CITIES, you must have shield tokens in that CITY.²⁷⁵

Scenarios

S1:—*Faction Leaders in Combat*—²⁷⁶

The Faction Leader's Army: In a *TEZLA* scenario, you can defeat a faction leader without killing all of its followers. If you do so, at the end of Combat you remove any followers that're still alive and you remain in the now-liberated space. You don't, though, earn Fame or Faction Tokens for any followers that "get away".²⁷⁷

If the faction leader dies in the Ranged-and-Siege-Attack Phase, its followers can still attack you in the Assign Damage Phase, but the faction leader cannot (nor can any Summons Attacks it had while alive).²⁷⁸

Whether or not you kill the faction leader, any slain followers do not respawn.

Assaults on Faction Leaders: An attack on a faction leader is always an Assault (c.f., *HEROES*), but you don't lose Reputation for it.²⁷⁹ If you don't defeat him, you retreat and must reenter his space to re-fight him.²⁸⁰

The *NECROPOLIS* and *HIDDEN VALLEY* are not fortified, but they are unsafe spaces until liberated. So if you fail in battle, you retreat to where you attacked from and this isn't considered a Forced Withdrawal. It's different when fighting enemy tokens in *GRAVEYARDS*: there, you are not forced out if you don't succeed.

Killing Faction Leaders: If a faction leader is, say, level 4, you must Attack with 4 times his armor to kill him. But you cannot make, say, an Attack 20 in the Attack Phase and a separate Fire Attack 16 in the same Attack Phase and include him in both attacks.²⁸¹ You can, though, attack him in the Ranged-and-Siege-Attack Phase and then again in the Attack Phase. Any damage he takes in the Ranged-and-Siege-Attack Phase does not lower his Attack in the Block Phase (unless he was fully defeated in the Ranged-and-Siege-Attack Phase), nor does a successful Ranged-and-Siege-Attack Phase attack lower his armor during the Attack Phase.

The Defend Ability: The Defend ability can be used on a faction leader to increase his armor, and that increase will apply during the *entire* Combat Phase. See Combat S23 and S29.

S2:—*Cooperative Assaults vs. Faction Leaders*—Cooperative Assault agreements on how many levels each player will damage a leader are permitted, but they are non-binding and don't deny players Fame for the full damage they do inflict (3 Fame per level defeated, whether or not the leader dies). If he has already been killed, you can't attack him, and any player who resolves her attacks after his defeat is not attacked by him.²⁸²

S3:—*Cooperative Assaults vs. Faction Leaders*—When victorious, the player who initiated the cooperative assault remains in the space where the battle was fought. The other players return to their earlier spaces.²⁸³

Q4:—*Faction Leader Summon Attacks*—If you make an assault on the **DARK CRUSADER faction leader (DCBOSS)** when the **DCBOSS** is at level ten, he'll summon two **DARK CRUSADER DRACONUM enemy tokens (DC-DRAGONS)** to use for his attack. Treat the **DCDRAGONS** like summoned MONSTERS: you draw them at the start of the Block Phase and they stand in for the attack of the **DCBOSS**.

There're 4 **DCDRAGON tokens** in total. If the **DCBOSS** begins the scenario at $\geq$ level 8, he gets 2 **DCDRAGONS** in his army. So if players make a cooperative assault against a level-ten **DCBOSS**, does the **DCBOSS** draw 2 different DCDRAGONS for his attacks on each player, or does he use the same 2 DCDRAGONS for all opponents?

A4: The **DCBOSS** draws his tokens from the DARK CRUSADER pool if non-empty, otherwise he draws them from the non-faction pool.²⁸⁴ (**DCDRAGONS** in the dead pile are available to be drawn.)

So if 2 **DCDRAGONS** are in the **DCBOSS** army and 1 **DCDRAGON** is elsewhere on the map, there'll be only 1 **DCDRAGON** token that can be drawn. In cooperative assaults, each player conducts her attacks in turn against the level-ten **DCBOSS**, and that boss draws 2 **DCDRAGONS** during the Block Phase for his attack. If only 1 **DCDRAGON** token is not in use, (and if the first player doesn't defeat either **DCDRAGON** in the **DCBOSS** army), then the first two players in the cooperative assault will face an Attack from the **DCBOSS** as represented by the draw of the same fourth **DCDRAGON** and the draw of a different (non-faction) DRACONUM token. If the 2nd player defeats both **DCDRAGONS** in the **DCBOSS** army, the 3rd player in the cooperative assault faces an attack from the **DCBOSS** as represented by the draw of two of the three now-available **DCDRAGON** tokens.

If any summoned enemy token is itself a SUMMONER, see SHROUDED NECROMANCER S1.²⁸⁵

S5:—*Running out of Enemy Tokens*—If you run out of faction enemy tokens, reshuffle any killed enemy tokens of the same faction and type (MONSTER, ORC MARAUDERS, DRACONUM) to form a new draw stack. If you still fall short, decide randomly which enemy tokens—faction or non-faction—go in each location.²⁸⁶

S6:—*GRAVEYARD and NECROPOLIS*—Night Rules (Miscellaneous S10) apply when you're in a GRAVEYARD or NECROPOLIS. If you start your turn there at night, you get a black mana token—but not during the day. A Skill that has different day/night values (e.g., *Day Sharpshooting*) uses the night version. The strong effect of *Endless Gem Pouch* gives a black mana token. If you explore a tile during the day while on a GRAVEYARD/NECROPOLIS, you won't reveal RUINS nor reveal enemy tokens in adjacent KEEPS/MAGE TOWERS. See S1 above.²⁸⁷

S7:—*GRAVEYARD*—A GRAVEYARD is not a MAGICAL GLADE nor does it become one when you kill everything in it—it remains a GRAVEYARD.²⁸⁸

Q8:—*Removing Tactic Cards*—In which scenarios do Tactic cards get removed at the end of a Round?

A8: In Solo Conquest, both used Tactic cards get removed. In Solo games versus VOLKARE, only the player's Tactic card is removed (VOLKARE's card remains available). In Multiplayer Coop with a dummy player, players must agree on and remove one of their own Tactic cards—the dummy's Tactic card remains in play.²⁸⁹

S9:—*Cooperative Scenarios*—In cooperative scenarios, Team Rules are used with everyone being on the same team. Conquered KEEPS are friendly and can be entered without combat; Units can be recruited there; and your hand limit is increased when you're adjacent to them by one card for every KEEP you yourself own.²⁹⁰

S10:—*First Reconnaissance*—Use only Advanced Action cards 1 through 16. Redraw the Unit Offer until at least one Unit has a VILLAGE icon. Reveal Countryside Tiles in increasing numeric order.²⁹¹

S11:—*Mines Liberation*—MINES are safe spaces. You can be on a MINE without having to fight either enemy. The brown enemy isn't revealed by being adjacent to the space, or even by being on the space.²⁹²

S12:—*Mines Liberation*—There's no official solo mode. A custom approach is to use 7 countryside tiles (4 having MINES), 1 core tile (with a MINE), and the red CITY, and to play the scenario for 4, 5, or 6 Rounds.²⁹³

S13:—*Mines Liberation*—If you're given a crystal at the start of a Round and already have three crystals of that color, you gain nothing, not even a same-colored mana token. See Mana S9.²⁹⁴

O14:—*Mines Liberation*—At the beginning of new Rounds, are you given crystals from liberated mines *before* or *after* you "pay" your MAGIC FAMILIARS? And can you choose which color comes from DEEP MINES?

A14: *There's no definite answer to this, so I'd permit players to receive the crystals first. I'd also allow players to choose their crystal color, since there's nothing overruling the DEEP MINES site card.*²⁹⁵

S15:—*Druid Nights*—An "uninhabited space" is any space where you can't Interact with the Locals.²⁹⁶

S16:—*Dungeon Lords*—KRANG cannot enter-and-quit a tunnel via the same entrance/exit just to use *Savage Harvest* to gain crystals.²⁹⁷

Q17:—*Dungeon Lords*—If KRANG plays the strong effect of *Savage Harvesting* and enters a tunnel, can he discard a card for every hex he travels underground in order to gain a crystal?

A17: Yes. The scenario says you pay "for each space you travel", so you are moving "spaces".²⁹⁸

Q18:—*Dungeon Lords*—What happens if you can't legally place a secret tomb near a MONASTERY, like when placing tile 12, as the MONASTERY is surrounded by a mountain, a Rampaging Enemy, and a swamp?

A18: You don't place *any* secret tomb, as you can't fulfill the restrictions on where to place one.²⁹⁹

S19:—*Conquer and Hold*—Surviving enemy tokens in opponents' KEEPS/MAGE TOWERS are removed: when you attack again, draw new enemy tokens.³⁰⁰

S20:—*Conquer and Hold*—If the other player is present in his KEEP, you conduct a PvP combat instead of a combat with enemy tokens, just as you would in a standard scenario.³⁰¹

S21:—*TEZLA Scenarios*—Except in Lost Relic, when placing enemy tokens on map sites and in ADVENTURE SITES, use regular (non-*TEZLA*) enemy tokens unless DARK CRUSADER/ELEMENTALIST tokens are specified.

If players use the option of placing extra countryside tiles after the last core tile has been placed, oddities can occur if you place GRAVEYARDS on newly exposed MAGICAL GLADES. So maybe exclude extra countryside tiles that have MAGICAL GLADES, or treat the newly exposed spaces as basic MAGICAL GLADES.³⁰²

S22:—*Life and Death*—When you enter a TOMB/DUNGEON/MONSTER DEN/SPAWNING GROUNDS/MAZE/LABYRINTH/RUINS, pick your enemy tokens from the base game tokens, not from the faction enemy tokens.³⁰³

S23:—*Life and Death*—When you clear the HIDDEN VALLEY/NECROPOLIS, the hexagonal tile remains on the map and is treated as a MAGICAL GLADE/GRAVEYARD. (A CITY doesn't suddenly appear out of nowhere.) Nor does clearing it count as liberating the space: you aren't rewarded an Artifact/Spell/Reputation (but it's now a safe space). Nor is there a reward for defeating the High Priestess/Necromancer, other than Fame per level.³⁰⁴

The 3rd paragraph under MAGICAL GLADES in the *Ultimate Edition* can leave you wondering if only one enemy token is placed on "border" MAGICAL GLADES. The original rulebook is clear, though: you place two.³⁰⁵

S24:—*Realm of the Dead*—If played with four or five players, the 5th GRAVEYARD has a brown and a red DARK CRUSADER token, and the 6th has a green, brown, and red DARK CRUSADER token. The reward for the 5th GRAVEYARD is an Artifact and Advanced Action card; for the 6th, an Artifact and a Spell.³⁰⁶

S25:—*Realm of the Dead*—Various rulings:

- Rampaging Enemies placed while exploring new map tiles do not gain Pursuit until the ensuing turn.
- Although it is always night in GRAVEYARDS, GRAVEYARDS do not provide black mana during day turns.
- The MAGICAL GLADE on the green CITY tile is a MAGICAL GLADE, not a GRAVEYARD.
- MAGICAL GLADES on tiles placed during setup are GRAVEYARDS, so remember the order of placement.³⁰⁷

O26:—*Lost Relic*—Lost Relic uses the Blitz rules, but doesn't list a starting Reputation. This is likely an oversight. **Many players start the scenario with +2 Reputation, as in other Blitz scenarios.**³⁰⁸

S27:—*Lost Relic*—You use PORTAL tile side B, so you begin with three countryside tiles revealed.³⁰⁹

S28:—*Lost Relic*—DESTROYED CITIES provide no fortifications.³¹⁰ ORC MARAUDERS Rampaging Enemies that replace DRACONUM Rampaging Enemies score only one Reputation bonus when killed, and DRACONUM on DESTROYED CITIES score no Reputation bonus.³¹¹

S29:—*Lost Relic*—The text "you grab the relic from its treasure hoard" is simply flavor text.³¹²

O30:—*End Conditions*—The Full Conquest and Blitz Conquest scenarios say, "When all cities are conquered, all players . . . have one last turn. If the Round ends during this, the game ends immediately." The Full Cooperation and Solo Conquest scenarios lack the latter sentence, but that's likely an oversight.³¹³

O31:—*Solo Scoring*—In Solo Conquest, there's no mention of a player receiving victory points for being a CITY leader, but the scoring card lists the CITY Leader victory points under the heading "Conquest Scenarios" and Solo Conquest is certainly a Conquest scenario. I include these victory points but many players do not—so be aware of this when comparing scores.³¹⁴

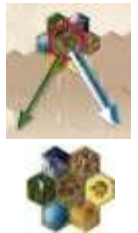

S32:—*Mines Liberation*—To keep the difficulty of this scenario constant, if you own *Lost Legion*, take the six Countryside tiles that have MINES, shuffle them, and discard two. Separately shuffle the other Countryside tiles and draw as many as are needed to make your pool. For non-CITY Core tiles, remove tiles 1, 9, and V. When playing with 3 players, consider including five MINE Countryside tiles, and six with 4 players.³¹⁵

S33:—*Realm of the Dead*—GRAVEYARDS can be sealed on the turn they're liberated, or later on.³¹⁶

VOLKARE

S1:—*Orienting the CAMP Tile*—In all but the most recent *Ultimate Edition* printing, the rulebook shows the tile orientation correctly for VOLKARE'S Quest but the scenario card does not.

If you ignore the scenario card and orient the CAMP tile according to the tile-placement rules, trace the arrows in relation to the other map tiles as shown on the scenario card, not in relation to the CAMP tile orientation. I.e., VOLKARE always moves toward the PORTAL, not toward the edge of the map: the green arrow points from VOLKARE'S CAMP tile diagonally down to the left; the white & blue arrows, diagonally down to the right. Don't move off the CAMP tile through the yellow Desert-Village when moving along the white & blue arrows—move through the Hill hex.³¹⁷

S2:—*The CAMP Tile*—In VOLKARE'S Return, VOLKARE'S CAMP does not count as a core tile in the sense of permitting you to place elite (gold) Units in the Unit Offer: you must reveal a non-CAMP core tile first.³¹⁸

S3:—*The CAMP Tile*—When playing with the "VOLKARE'S CAMP in Place of a CITY" variant, multiple Mage Knights are not permitted to be in the CAMP simultaneously (unlike with CITIES and the PORTAL).³¹⁹

Q4:—*When Attacked by VOLKARE*—Is it an Assault when you're defending against VOLKARE?

A4: No.³²⁰ Nor are the green and red enemy tokens in VOLKARE'S Army "Rampaging Enemies": you don't provoke them by movement nor do you earn Reputation points for defeating them.³²¹

Q5:—*When Attacked by VOLKARE*—When attacked by VOLKARE (or by another player), do you get to use the "at the start of your turn" effects like MAGICAL GLADE?

A5: Only if you fully attend the combat. See Turn Start S1 and PvP Combat Q1.³²²

If, in VOLKARE'S Quest, VOLKARE draws a red card and attacks you from an adjacent space, and you fully attend the fight and defeat enough of his army to slow him down, then the following happens: used mana dice are returned to the SOURCE, then on your turn you flip your round token face up, then VOLKARE on his turn flips his round token face up, then you take a full turn, then VOLKARE takes a full turn, etc.³²³

O6:—When Attacked by VOLKARE—What happens if VOLKARE moves onto a Mage Knight's space to attack her, and the Mage Knight retreats, but none of the surrounding spaces are safe? [I'd say the player can choose her retreat direction, but can't retreat to or through the space VOLKARE advanced from. I'd also say she has to choose from among the shortest retreat (number of spaces), and has to avoid prohibited terrain.]³²⁴

Q7:—VOLKARE on a Fortified Site—Can you attack VOLKARE if he's on an unconquered fortified site?

A7: Yes. VOLKARE's presence overrides everything else: you face VOLKARE's Army and disregard the unconquered fortified site (except for the fortification it gives to VOLKARE's Army). The terrain of the space is used only to determine movement costs, though you can't attack VOLKARE if you can't enter the terrain. The fortified site and the enemies in it are otherwise ignored. If you end up on an unsafe space after defeating VOLKARE, you'll have to retreat—not that it matters, as scenarios usually end when you defeat VOLKARE.³²⁵

Q8:—Revealing VOLKARE's Army—When is VOLKARE's Army first revealed?

A8: In VOLKARE's Return and VOLKARE's Quest, the Army is revealed when a player begins a combat against VOLKARE. The Army isn't revealed from an adjacent space, or if you decline combat and flee.³²⁶

With the "VOLKARE's Camp in Place of a CITY" variant, tokens behave as if there were in a CITY.³²⁷

Q9:—Revealing VOLKARE's Army—What if you run out of tokens when revealing VOLKARE's army?

A9: Improvise, because component shortages are not meant to be a limiting factor.³²⁸

S10:—Revealing VOLKARE's Army—Enemy tokens added to VOLKARE's Army after it has been revealed are added face-down. See Q8 above.³²⁹

S11:—VOLKARE's Recruits—In VOLKARE's Return, VOLKARE recruits the Unit marked by the matching crystal. But what that Unit is doesn't matter, as VOLKARE always takes a random gray enemy token.³³⁰

S12:—Indecisive Units—When playing VOLKARE's Return Epic scenario at the Thrilling race level with 4 players, there'll be 6 indecisive Units. Use a black and gold crystal for the 5th and 6th indecisive Units. And yes, players can recruit indecisive Units just as they can recruit Units that aren't indecisive.³³¹

S13:—Indecisive Units—If you aren't using gold or black crystals to mark indecisive Units (see S12 above), and you roll gold or black on the die, then Volkare has failed to recruit an indecisive Unit.³³²

S14:—Defeating VOLKARE's Army—If you assault VOLKARE's CAMP and provoke/challenge Rampaging Enemies as you do so, and if you defeat the last of VOLKARE's Army in the Ranged-and-Siege-Attack Phase but not the Rampaging Enemies, then VOLKARE will *not* attack you during the Block and Assign Damage Phases: he is already defeated—Rampaging Enemies have no effect on that.

Note also this new rule in the *Ultimate Edition* (p. 8): *Special Case: If a player defeats their entire portion of enemies in [the] Ranged-and-Siege-Attack Phase, their part of the combat ends. They do not have to face VOLKARE's attack, even if VOLKARE is not defeated because another player does not defeat all their troops.*³³³

S15:—Victory in VOLKARE's Quest—If you don't stop VOLKARE and kill all of his defenders by the end of six rounds, you lose.³³⁴

S16:—Number of Players—In VOLKARE's Quest, he is slowed down if he loses twice as many tokens from his army as there're players in the game: this is referring to human players and doesn't count VOLKARE.³³⁵

S17:—Adding Skills to the Skill Offer—VOLKARE's Quest and VOLKARE's Return say to "add one Skill of [a randomly chosen] hero to the Common Skill Offer after each of your level ups." Most players see this as a typo and think it should say "add a Skill after each of your level ups *in which you gain a Skill*".³³⁶

S18:—*Placing New Tiles*—VOLKARE and players obey the same rules when placing tiles. Neither can explore in illegal directions. If VOLKARE wants to move illegally, move him in the closest legal direction.³³⁷

In VOLKARE'S Quest, all of the map tiles are already laid out. Nothing, however, overrides the rules about tile exploration by the players. For players to reveal a facedown tile, that tile must be adjacent to the requisite number of already-revealed tiles. VOLKARE, however, isn't limited by that.³³⁸

S19:—*Being Knocked Out*—In VOLKARE'S Return, if a knocked-out player has nothing but wounds in her hand when VOLKARE attacks again, she won't be able to fully attend the combat—but it's legal to keep assigning her wounds. Although his might make it easier to win, it will dramatically decrease her score.³³⁹

Q20:—*VOLKARE'S CAMP in Place of a CITY*—Do you add an extra die to the SOURCE and an extra Unit to the Unit Offer when playing with the "VOLKARE'S CAMP in Place of a CITY" variant? If so, would this add two dice and two Units if playing a Blitz scenario?

A20: No. No. Rules for adding extra dice and Units appear only in specific scenarios, not in the rules for the "VOLKARE'S CAMP in Place of a CITY" variant. There's an official FAQ entry that suggests otherwise:

How many dice & Units should there be in a solo game?

The dummy player does not count as a player for these purposes, so it would normally be 3, but you add an extra one if playing Blitz scenario or against Volkare.

But this FAQ entry is likely meant to cover standard scenarios, not optional variants. The "VOLKARE'S Return - Blitz" scenario should be the only time you add two dice and two Units.³⁴⁰

S21:—*An Empty CAMP*—In VOLKARE'S Return and VOLKARE'S Quest, once VOLKARE leaves his CAMP, you cannot interact with that space: treat it as an empty space costing 2 Movement points to enter.³⁴¹

And in both scenarios, the CAMP tile begins the game face up.³⁴²

S22:—*VOLKARE Draws a Red Card*—In VOLKARE'S Return and VOLKARE'S Quest, treat VOLKARE'S drawing of a red card as being synchronous with step 1 in the SoP under PvP Combat Q1.³⁴³

S23:—*Team Rules*—In cooperative scenarios against VOLKARE, I suggest using Team Rules even though it's not mentioned in the scenario rules, as that was probably just an oversight.³⁴⁴

S24:—*Skill Use when Partially Attending*—*Lost Legion* p. 7 says when a player Partially Attends an attack by VOLKARE, handle it the same as when partially attending a PvP Combat. But it also says the player is only restricted from using Skills that're usable once a turn; the base game rulebook, conversely, limits you to only those Skills usable during other players' turns. It's likely that the *Lost Legion* wording here is simply loose.³⁴⁵

Q25:—*VOLKARE'S Return*—In the Third Phase (the Battle for the CITY), if you're attacked by VOLKARE while you're in the CITY and defeat at least one enemy token in his army per real player in the game (but not all of the enemy tokens), what happens?

A25: At the end of Combat, VOLKARE and his army retreat to a space two spaces away from the CITY (with one space between VOLKARE and the CITY). You then take your next turn, which if you fully attended the Combat consists of turning your round order token face up. Then VOLKARE takes a normal turn which, unless he draws a Spell card or is in a Frenzy, will bring him adjacent to the CITY again. You then take a regular turn. (However if VOLKARE did draw a Spell card or was in a Frenzy and has attacked you again, and if you fully attended that resulting Combat, then you would instead flip up your round order token again).³⁴⁶

S26:—*VOLKARE'S Return vs. Megapolis*—With a MEGAPOLIS in place of the CITY, VOLKARE can assault it from any space adjacent to either of its spaces, and he faces all Mage Knights then inside the MEGAPOLIS, regardless of which space of the MEGAPOLIS they're on.³⁴⁷

Q27:—*Mage Knights Attacked in a CITY during VOLKARE'S Quest*—What happens if two Mage Knights are in a conquered CITY and VOLKARE moves to attack them?

A27: This happens either by VOLKARE moving into or through the conquered CITY (after drawing a blue, green, or white card), or by him staying put but fighting a Mage Knight close to him (after drawing a red card).³⁴⁸ In either case, the Mage Knights can retreat (taking wounds) or stay and fight.³⁴⁹ If either or both Mage Knights stay and fight, and VOLKARE ends his turn on the conquered CITY, then the player(s) have to withdraw (even if VOLKARE lost twice as many army tokens as there are Mage Knights in the game and has to flip his round order token facedown).

If one or both Mage Knights decide to stay and fight, follow the instructions on pp. 7-8 of *Lost Legion*. The Mage Knights decide whether to fully or partially attend the combat. If both Mage Knights fight, they can do a cooperative defense, dividing VOLKARE'S army between them as discussed on p. 8 of *Lost Legion*.³⁵⁰

S28:—*Fearful Units*—*Lost Legion* p. 18 refers to "fearful" Units: elsewhere these Units are called "indecisive" Units.³⁵¹

S29:—*VOLKARE Attacks from a Fortified Space*—In VOLKARE'S Return, if VOLKARE draws a red card and attacks from a fortified space, he is not treated as being fortified. Although his piece doesn't physically enter your space, he is nevertheless sallying out of his space to engage you (and then returning to it after the battle).³⁵²

S30:—*Player on PORTAL in VOLKARE'S Quest*—If a player is on the PORTAL, and VOLKARE is adjacent to it and draws a non-red Spell card, what happens after VOLKARE moves onto the PORTAL and attacks the player?³⁵³

- If the player eliminates VOLKARE'S army, the player wins.
- If the player kills too few of VOLKARE'S army to slow him down, the player withdraws from the PORTAL, and VOLKARE moves through the PORTAL for the second portion of his spell card and wins.
- If the player kills enough of VOLKARE'S army to slow him down, the player withdraws from the PORTAL and VOLKARE remains there and turns his Round Order token face down. For the second portion of his spell card, he turns his Round Order token face up and his turn ends. The player(s) then have one last turn to kill him.

S31:—*VOLKARE Attacks Players in a CITY*—If players choose to do a Cooperative Defense against an attack by VOLKARE (*Lost Legion* p. 8), they can't play Healing Effects before Combat per the discussion in PvP Q1, but they can play Special Effects before and during Combat—see PvP S2. And if fully attending, players can also play Healing and Special Effects after Combat.³⁵⁴

In VOLKARE'S Return, if VOLKARE attacks the CITY but the players in it don't want to defend it, they stand aside, let VOLKARE destroy the CITY walls, don't take Wounds, and remain in the CITY afterwards (*Lost Legion*, p. 15). If some players wish to defend but not all of them, or if they can't agree on who does what, then follow the instructions on p. 8 under the "Agreement" paragraph. In all cases, defending players individually choose whether to partially or fully attend any resulting Combat (p. 8).³⁵⁵

S32:—*VOLKARE is not a Dummy Player*—When playing VOLKARE'S Quest or Return, VOLKARE has a fixed deck: you don't add cards to his deck at the end of a Round. Cards are added to the Dummy player (base game rulebook p. 12), but in these scenarios VOLKARE "replaces" the Dummy player, so you treat the Offers per the base game rulebook p. 4, simply discarding the lowest one [or two--*Lost Legion* p. 12] Offer cards.³⁵⁶

S33:—*Scoring*—In VOLKARE'S Quest/Return, the Race level multiplies only the sum (30/40/50 + 2/card).³⁵⁷

Cross References: Movement S3; Combat S10; PvP S7; CITIES S11; Scenarios Q8; *Counterattack* O2; *Flame Wave* O5; *Time Bending* S8; *Veil of Mist* O3; *Banner of Fear* Q8; HEROES S1; *Sparing Power* S1.

Clarifications by Component

Basic Action Cards

S1:—*Identification*—All **Basic Action Cards** have a Mage Knight emblem in the upper right corner. **Advanced Action Cards** look like Basic Action Cards, but lack the Mage Knight emblem. **Artifacts** resemble Action Cards, but the strong effect has a brown background and is separated from the basic effect by a line. **Spells** have a purple border and no image.³⁵⁸

S2:—*Timing of Effects*—Effects (aside from Move, Influence, Healing, Attack, or Block points) work immediately when played, whether the effect comes from a card, Skill, or Unit. Effects cannot be delayed and no new effect can be played before the previous effect is fully processed. See Miscellaneous S9.³⁵⁹

Even effects that provide Attack and Block points usually have to be used at that time (see Combat S49). Exceptions can apply if the wording of an effect specifies that the effect will be available in future phases, as with *Ambush* or *Dodge and Weave*. See Dual-Colored Action Cards O4 and *Sacrifice* S4.

S3:—*Duration of Effects*—Effects remain active until the end of your turn (unless stated otherwise).³⁶⁰
[For players only Partially Attending a PvP combat, presumably effects last until the end of their first full turn.]

S4:—*Multi-Card Plays*—When a card allows you to play another card (or Skill or Unit ability) as part of its effect (such as *Concentration*), both cards are evaluated as if playing a single effect.³⁶¹ See Combat Q7 and *Resistance Break* S2.

O5:—*Paying Costs*—If the only card in your hand is *Concentration*, you can't use your free mana die to power its strong effect because you don't have another card to pay the additional "cost" of the effect, since it says "... play another Action card with it".³⁶²

Similarly, you can't play the basic effect of *Magic Talent* if you don't have a card to discard. You also can't use *Magic Talent* to play a Combat Spell (with crossed swords) if you're *not* in Combat. Nor, vice versa, use *Magic Talent* to play a Healing Spell (with a hand icon) if you *are* in Combat. See Miscellaneous S1.³⁶³

Many effects require an additional cost, and all effects provide a benefit. But the cost has to be paid *before* the card, Skill, or Unit ability is put into effect.³⁶⁴

When it comes to the benefit, things get murky. The card *Training* says, "Throw away an Action card ... then take a card ... from the Advanced Action Offer". Throwing away an Action card is clearly mandatory, but what about "taking a card from the offer"? Some players see benefits as voluntary and allow you to throw away a card that doesn't match any of the colors in the Advanced Action Offer, or to simply skip taking a card.

It gets more complicated with *Maximal Effect*. Its basic effect says "Use the basic effect of that card three times." Throwing away "that card" is clearly part of the cost, but is "use the basic effect of that card three times" voluntary? Must a player use the effect of "that card" even once?³⁶⁵ (To avoid gamey tactics, I suggest that at the very least players should have to execute the secondary card at least once.)

Another problem with the idea that "benefits are voluntary" is that the rules don't seem to support it.

A cleaner approach, IMO, is to say that any text written in the imperative tense (e.g., a command) has to be followed, even benefits. This doesn't apply, of course, to text with "may" or "or". And there are cases where the rules themselves permit laxness (the rules say Influence/Movement/Block/Attack/Heal points need not be used effectively or even used at all; and when we're told to draw cards, we draw only as many as we can—even if it's zero). This stance IMO is more consistent with the rules, is straightforward, and guards against gamey tactics. In this Compendium, my stance is that beneficial effects are mandatory; with *Maximal Effect*, the second card's effect must be used as many times as specified. For further discussion, see *Maximal Effect* S1 and S9.³⁶⁶

S6:—*Basic Effect vs. Strong Effect*—The basic effect (top portion) of Basic Action and Advanced Action cards does not require *any* mana; the strong effect on the bottom portion *does* require mana.³⁶⁷ With Deed cards, you use either the basic effect or the strong effect—never both. See Movement S13.³⁶⁸

Cold Toughness (TOVAK)

S1:—*Counting Enemy Abilities*—The strong effect of *Cold Toughness* gives Ice Block 5, plus an additional +1 for each ability and each color-of-attack the enemy has. Here's an exhaustive list of these abilities:³⁶⁹

- Offensive: Swift, Cumbersome, Brutal, Poison, Paralyze, Assassination, Vampiric.
 - Defensive: Elusive, Fortified, Unfortified, Defend, ~~Arcane Immunity~~.†
 - Resistances: Fire, Ice, Physical.
 - Color of Attack: Ice, Fire. (Cold Fire Attacks have both colors and therefore count as two.)
- † - Arcane Immunity is crossed out because *Cold Toughness* itself specifies that *Cold Toughness* gives only the base Ice Block 5 against enemies that have Arcane Immunity.

Examples:

- (1) HIGH DRAGON (Cold Fire Attack, Brutal, Fire and Ice Resistance): 5 + 5 = 10 Ice Block.
- (2) DELPHANA MASTERS (Cold Fire Attack, Paralyze, Assassinate, Fire and Ice Resistance): 5 + 6 = 11 Ice Block.
- (3) DRAGON SUMMONER (Summons Attack x2, Physical Resistance, Arcane Immunity): per the enemy token you are blocking—see O4 below.
- (4) ELEMENTAL PRIESTESSES (Fire Attack, Ice Attack, Fire and Ice Resistance): 5 + 4 = 9 Ice Block.

Q2:—*Site-Conferred Abilities*—Does an enemy in a fortified location or in the green CITY count the additional abilities granted by those sites when executing *Cold Toughness*?

A2: No. *Cold Toughness* gives +1 for only those abilities that are physically printed on the token.³⁷⁰

S3:—*Ice Resistance*—Non-Attack/non-Block effects of blue cards don't apply to enemies with Ice Resistance, but that doesn't stop *Cold Toughness* from causing additional Ice Block points against them.³⁷¹

O4:—*SUMMONERS*—When *Cold Toughness* blocks a Summoned MONSTER, do you count up the abilities of the SUMMONER or of the Summoned MONSTER? What if the SUMMONER has Arcane Immunity?

A4: Go by the icons printed on the Summoned MONSTER token because *Cold Toughness* refers to each ability and color "depicted on the blocked enemy token you blocked".

And as for the second question, Arcane Immunity prevents the strong effect of *Cold Toughness* from giving an increased Ice Block (only the base Ice Block 5 applies)—and this reduction to Ice Block 5 only applies if the Summoned MONSTER itself has Arcane Immunity. See S1 above.³⁷²

Cross References: *Shapeshift* S1, S3.

Concentration

Q1:—*Improvisation*—When *Concentration* is used with *Improvisation* to gain the strong effect of *Improvisation* "for free", do you still discard another card? (This answer will also apply to *Will Focus*.)

A1: Yes. When deed cards give players the strong effect of another card "for free", they're referring *only* to the standard mana cost (*Mana Overload* S2). Any "costs" in the text effect itself must still be paid: see Basic Action Cards O5.³⁷³

S2:—*Attacks*—The strong effect of *Concentration* can increase the strength of all kinds of Attacks, including physical Ranged Attacks, Ranged Fire Attacks, Siege Ice Attacks, Cold Fire Attacks, etc.³⁷⁴

S3:—*Blocks*—The strong effect of *Concentration* can increase the strength of all kinds of Blocks, including physical Blocks, Fire Blocks, Ice Blocks, and Cold Fire Blocks.³⁷⁵

S4:—*Strong Effects*—When you play the strong effect of *Concentration*, and then another Action card, say *Swiftness*, you cannot couple the +2 bonus of *Concentration* with the basic effect (Move 2) of *Swiftness*: you must always use the strong effect of the latter card, in this case "Ranged Attack 3".³⁷⁶

S5:—*Into the Heat*—If you play the strong effect of *Concentration* with *Into the Heat*, the bonus from *Concentration* will not apply since *Heat* isn't directly providing Move, Influence, Block, or Attack points. See *Maximal Effect* S13.³⁷⁷

S6:—*Action Cards Only*—The strong effect of *Concentration* can only be played with other Action cards (Basic or Advanced), not with Spells or Artifacts. It works fine with cards like *Pure Magic*.³⁷⁸

Cross References: Combat S5, Q7; Basic Action Cards S4, O5; *Improvisation* Q1; *Tirelessness* S3; *Will Focus* S1, S4; *Ambush* S5; *Blood of Ancients* S5; *Counterattack* S1; *Dodge & Weave* S2; *Maximal Effect* Q3, S9, S10, S11, S12, S13; *Shield Bash* S5; *Deadly Aim* Q2; *Mana Overload* S6; *Shapeshift* S2, S3; *Fire Gem* S3.

Crystal Joy (GOLDYX)

S1:—*Reclaiming Crystal Joy*—*Crystal Joy* lets you discard another card to return *Joy* to your hand. This must be done at the end of the same turn in which you played *Joy*. See End of Turn S2.

If *Joy* is thrown away, say with *Maximal Effect*, you cannot return *Joy* to your hand.

Taking *Joy* back into your hand should happen before step 3 of the End of Turn sequence.³⁷⁹

You can reclaim *Joy* after you've been Knocked Out, if you can make a card discard somehow.³⁸⁰

Crystallize

S1:—*No Gold or Black Crystals*—You can't gain gold or black crystals because they don't exist.³⁸¹

Cross References: Mana S5, S12; PvP Q1; *Resting* S3; *Maximal Effect* S1, S31.

Determination

S1:—*Blocks Cannot Be Split*—Block points from a single effect can be played only while Blocking a specific enemy attack, and all points must go toward Blocking that one Attack. Excess Block points are lost.³⁸²

Cross References: *Diplomacy* S1; *Maximal Effect* S5, S11; *Circlet of Proficiency* S14.

Improvisation

Q1:—*Concentration*—When using *Concentration* to play the strong effect of *Improvisation* "for free", do you still need to discard another card?

A1: Yes. When deed cards give players the strong effect of another card "for free", they're referring *only* to the standard mana cost. Any "costs" in the text effect itself must still be paid: see Basic Action Cards O5.³⁸³

S2:—*Usage*—With *Improvisation*—as with most cards—you choose only one effect: Move 3 or Influence 3 or Attack 3 or Block 3. Cards that let you to use the full list will explicitly state so. And with *Improvisation*, you not only discard an extra non-Wound card, but *Improvisation* itself is of course also discarded.³⁸⁴

S3:—*Discard from Hand*—The non-wound card discarded to enable *Improvisation* cannot have been used or played or discarded to achieve some other purpose: it must come from your hand and be unused.³⁸⁵

Cross References: Miscellaneous S13; *Concentration* Q1; *Maximal Effect* S7, S8, S9; *Time Bending* S7.

Mana Draw

S1:—*Timing*—With *Mana Draw*, just as with other cards or Skills or Units that permit you to take mana dice from the SOURCE, you may take the dice either before or after you take your once-a-turn free mana die.³⁸⁶

S2:—*Use Required for the Basic Effect*—You can't use the basic effect of *Mana Draw* simply to re-roll a mana die at the end of your turn: you have to *use* the mana die in some way. See Miscellaneous S1.³⁸⁷

S3:—*Use Not Required with Strong Effect*—You need not use the mana gotten with the strong effect.³⁸⁸

S4:—*Mana Tokens Only*—With the strong effect, you're allowed to use both mana tokens but you can-not use the mana die itself.³⁸⁹

S5:—*End of the Round*—The die that's set with the strong effect does not persist across a Round boundary.³⁹⁰

S6:—*Black Mana*—With either effect you can choose black mana, but you're allowed to use that black mana only under the usual constraints: see Mana S3 and Q7.³⁹¹

S7:—*Depleted Dice*—With the strong effect, you can choose to take a "depleted" mana die.³⁹²

S8:—*Returning the Die to the SOURCE*—With the strong effect, you return the changed die to the SOURCE during your End-of-Turn sequence, not immediately after setting it to a new face. One consequence of this is that you know it'll have that color during the next turn—unless you're at the end of a Round (see S5 above).³⁹³

Cross References: Mana Q1, S12; PvP Q1; *SOURCE Freeze S1; Who Needs Magic Q1.*

Mana Pull (ARYTHEA)

S1:—*Wild Black Mana*—With the basic effect you can take a black die as your additional die—even during the day—but only *this* black die is wild. See *Mana Draw S1*.³⁹⁴

O2:—*Taking Only One Die*—With the strong effect, must the player take *exactly* two dice? If so, then the strong effect of *Mana Pull* can't be played when there's only one mana die remaining in the SOURCE. [It's fair to permit ARYTHEA to play the strong effect of *Mana Pull* even when there's only one mana die remaining in the SOURCE. This case arises most often when playing solo, when fewer dice are in the SOURCE: in my opinion, ARYTHEA shouldn't lose the punch of one of her two specialized cards when playing solo.]³⁹⁵

Cross References: Mana Q2; *Mana Draw S1-S8; Polarization S5; Who Needs Magic Q1.*

March

Cross References: Movement S13; Agility S1; *Maximal Effect S10, S11, S18; Mountain Lore O3.*

Noble Manners (NOROWAS)

S1:—*Spending Points Isn't Required*—You can gain the Fame (and Reputation) bonus even if you don't spend the Influence points, just so long as you play *Noble Manners* when Interacting with the Locals as your Action while you're on a space where Locals exist: a VILLAGE, MAGE TOWER, etc.³⁹⁶

S2:—*Permissible Sites*—You cannot choose to Interact if there're no Locals in your space.³⁹⁷

S3:—*At the end of the Turn*—The *Ultimate Edition* removed the phrase "at the end of your turn" from both effects of this card because *Lost Legion* made it clear that changes to Reputation and Fame are now applied immediately (Combat Q16). Yet *Noble Manners* still works the same as before because if you play it after choosing Interaction as your Action, your Reputation modifier will have already been applied.³⁹⁸

Cross References: Influence Q6; *Threaten S1.*

One with the Land (BRAEVALAR)

S1:—*DUNGEON/TOMB*—With the strong effect, you get an Ice Block when you're in a DUNGEON/TOMB.³⁹⁹

Promise

S1:—*Spending Points Isn't Required*—You can play the strong effect of *Promise* (Influence 4) even when you can't use the Influence points, and even if your true goal is merely to re-roll a die in the SOURCE.⁴⁰⁰

Cross References: *Miscellaneous S13; Diplomacy S4.*

Rage

Cross References: *Miscellaneous S1; Maximal Effect S1, Q4, S13, S14, S16; Sword of Justice S7; Fire Gem S1; Vial of Toxin S2.*

Rejuvenate (NOROWAS)

Q1:—*Healing Card*—Are all *Rejuvenate* effects "Healing effects" and unusable in combat?

A1: Yes. Healing effects aren't limited to healing wounds. Readying Units, for instance, is often treated as a Healing effect. And, with *Rejuvenate*, even gaining a crystal is considered a Healing effect because the card doesn't also have a Special Effects icon in the upper left corner, only a hand (healing) icon.⁴⁰¹

S2:—*Select One Only*—You can select only one option from the list.⁴⁰²

Cross References: *Combat S3; Maximal Effect S26.*

Ruthless Coercion (KRANG)

S1:—*Readying Effect*—With the strong effect, you ready Units the moment you play *Ruthless Coercion*. You cannot ready a Unit with *Coercion*, gain more Influence by expending that Unit, then again ready the same Unit, ad nauseam. But you can play other Influence points before playing *Coercion*, and use those Influence points with it. *[During playtesting, this card was played as is stated here. This is consistent with how Regeneration (S2) and Rebirth (S2) work.]*⁴⁰³

S2:—*Discount Optional*—With the basic effect of *Ruthless Coercion*, the discount to recruit a Unit is optional, so if you recruit a Unit at full price you will avoid the Reputation reduction.⁴⁰⁴

O3:—*Use during Combat*—This card has a hand symbol: can it be used during Combat?

A3: I allow its non-Readying effects to be used during Combat (say, to influence THUGS to take damage or to influence HEROES to participate in an Assault). *Ruthless Coercion* is an upgraded version of *Threaten*, a card that can be played during Combat, so in my opinion *Coercion* should be treated similarly.⁴⁰⁵

Cross References: *Maximal Effect S25; Dual-Colored Action Cards O4; Regeneration S1.*

Savage Harvesting (KRANG)

S1:—*Discard Precedes Movement*—You decide which card to discard as you make your move into the new space, and you don't reveal garrisons until *after* you have entered that space and discarded your card. See Scenarios S16 and Q17.⁴⁰⁶

O2:—*Move a Space*—Movement in MKBG is done either through paying terrain Movement costs or through effects that directly move you one or more spaces (such as *Temporal Portal*). With these latter "direct" modes of movement, I don't count the intervening spaces, only the terminal space. See Movement O9.⁴⁰⁷

Cross References: *Scenarios Q17; Maximal Effect S22, S23.*

Stamina

Cross References: *Mountain Lore O3.*

Swiftness

Cross References: *Concentration* S4; *Maximal Effect* S13; *Deadly Aim* S5.

Swift Reflexes (WOLFHAWK)

Cross References: *Dueling* S4.

Threaten

S1:—*At the end of the Turn*—The *Ultimate Edition* shortened the strong effect text from "At the end of your turn, Reputation -1" to "Reputation -1" because *Lost Legion* made it clear that changes to Reputation are now applied immediately (Combat Q16). Yet *Threaten* still works the same as before because if you play it after choosing Interaction as your Action, your Reputation modifier will have already been applied.⁴⁰⁸

Cross References: *Noble Manners* S3; *Ruthless Coercion* O3; THUGS O3.

Tirelessness (WOLFHAWK)

S1:—*No Retroactive Bonus*—The extra "1 Move" from the strong effect of *Tirelessness* does not apply retroactively to previously played cards, only to cards played after *Tirelessness* is played.⁴⁰⁹

S2:—*Agility*—See *Agility* S3.

S3:—*Concentration*—The strong effect of *Concentration* on *Tirelessness* gives you Move 4 from *Tirelessness* and Move +2 from *Concentration*. *Concentration* itself doesn't trigger the +1 Move bonus because, in this case, only *Tirelessness* is directly providing Movement points.⁴¹⁰

S4:—*Units*—Units that provide Move points don't benefit from the +1 Move granted by *Tirelessness*.⁴¹¹

S5:—*Duration of Bonus*—If played during the Movement Phase, unused Move points don't transfer to the Action Phase, but the bonus for future Move cards does.⁴¹²

Cross References: *Agility* S3; *Maximal Effect* S11, S17, S18; *I Don't Give a Damn* S2.

Tranquility

S1:—*Superfluous Effects*—You can play the strong effect of *Tranquility* even with only 1 or 0 Wounds to heal, or with only 1 or 0 undrawn cards in your Deed deck. See Miscellaneous S1.⁴¹³

Cross References: *Mana Draw* S2; *Maximal Effect* S9, S12.

Will Focus (GOLDYX)

S1:—*Ambush*—The strong effect of *Will Focus* with *Ambush* gives 7 (4+3) Move points. The Attack and Block parts of it are not boosted because, technically, *Ambush* isn't itself giving Attack or Block points.⁴¹⁴ A similar logic follows with *Agility*: only the Move 4 is boosted.

S2:—*Magic Talent*—If you use the strong effect of *Will Focus* to play *Magic Talent*, you still must pay a mana of the corresponding color to take the Spell.⁴¹⁵

S3:—*Types of Attack*—*Will Focus* does increase Ice Blocks, Siege Fire Attacks, etc.⁴¹⁶

S4:—*Concentration*—*Will Focus* works like *Concentration*, so all Q&A apply to both.⁴¹⁷

Cross References: *Combat* S5, Q7; *Concentration* Q1; *Ambush* S5; *Maximal Effect* Q3, S14.

Advanced Action Cards

Agility

S1:—*Using Move Points in Combat*—The strong effect of *Agility* (updated in *Lost Legion*), lets you convert Move points into Ranged Attacks (at a 2-for-1 rate) or into standard Attacks (at a 1-for-1 rate). If in addition to powered *Agility* you play powered *March* for an extra Move 4, you could convert, say, 6 points into 3 Ranged Attack points, leaving you 2 Move points to spend later during Combat, perhaps to reduce a Cumber-some attack by 2, or to gain Attack 2 in the Attack Phase. See Miscellaneous S9.⁴¹⁸

S2:—*Entering the Action Phase*—Movement points don't transfer to the Combat Phase (Movement S1), but the *Agility* ability to convert Move points into Attack points does. So after playing *Agility* in the Movement Phase, you could play additional Movement cards (or sideways cards) in the Combat Phase and convert those Move points into Attacks.⁴¹⁹

S3:—*MAZE and Tirelessness*—If you play the strong effect of *Tirelessness* as you enter a MAZE, you gain Move 4 and a +1 bonus to all other Move cards. If you then play the basic effect of *Agility*, you'll have a total of 7 Move points. You could spend 6 of these to take the longest path into the MAZE. Then later in Combat you could play a card sideways for Move 2 (*Tirelessness* still applies) and so have three Move points to convert into Attack points. See Movement S1.⁴²⁰

Cross References: Movement S1; PvP S7; Will Focus S1; Ambush S6; Maximal Effect S8; Deadly Aim Q2; Fire Gem Q2; Ghostly Elixir Q2.

Ambush

S1:—*Deed Cards Only*—*Ambush* does not benefit Units or Skills.⁴²¹

S2:—*Sideways Cards*—*Ambush* does apply to cards played sideways for Attack or Block points.⁴²²

S3:—*The First Card*—If the first Attacks or Blocks you make during your turn come from Units or Skills, you'll still gain the benefits from *Ambush* when you *do* play an Attack card or a Block card.⁴²³

S4:—*Timing*—You can play *Ambush* even if you aren't going to be using its Move points. If you play it during Combat, it need not be played *before* your first Attack or Block: you can delay playing it until immediately before *any* Attack or Block you wish to affect. But once played, *Ambush* affects the very next Attack or Block (whichever is first) that comes from a (non-Unit) card.⁴²⁴

S5:—*Will Focus/Concentration*—See Will Focus S1. *Ambush* works similarly with *Concentration*.⁴²⁵

S6:—*Diplomacy/Agility*—*Diplomacy* is not a Block card, so *Ambush* doesn't apply to it. So if *Diplomacy* Block points are the first Attack or Block played, then *Ambush* could apply to an Attack card played in the Attack Phase. The same reasoning holds for *Agility* when used with *Ambush*. See also *Fire Gem* Q2.⁴²⁶

Q7:—*Shield of the Fallen Kings*—With the two or three Blocks against different attacks from *Shield of the Fallen Kings*, do you add the +X Block from *Ambush* to the first Block or to both Blocks?

A7: Per the designer, *Ambush* plus *Shield* gives a Block 4+X (first) and then a Block 4 (second).⁴²⁷

Q8:—*"Attack" Cards*—Do the *Bow of Starsdawn* and the *Sword of Justice* count as "Attack cards" when played with *Ambush*? Does *Disintegrate*?

A8: Yes, but *Ambush* only adds +1 (or +2 with the strong effect) regardless of how many cards you discard with the *Sword* or the *Bow*.⁴²⁸ *Disintegrate*, however, does not count as an Attack card.⁴²⁹

S9:—*Dodge and Weave*—If after *Ambush* you play the basic effect of *Dodge and Weave*, then *Dodge and Weave* does count as an Attack card if you do not take any Wounds to your hand before the Attack Phase. This might require some tricky figuring in deciding which is the first Attack/Block card played if, after *Dodge and Weave*, you play a Block card in the Block Phase, because *Dodge and Weave* is, strictly speaking, a conditional Attack card and you won't know for certain if it is one until the Attack Phase. [To avoid having to retroactively adjust the whole Combat Phase, you could say that—when used with *Ambush*—the card *Dodge and Weave* will not count as being played until the Attack Phase begins (even if it's physically played earlier).]⁴³⁰

O10:—*When Playing a Card in an Offer*—If, after *Ambush*, you use *Blood of Ancients* or *Tome of All Spells* or *Magic Talent* to "play" a card in the Advanced Action Offer/Spells Offer, the card you play from the Offer can trigger the *Ambush* bonus. See *Tome of All Spells* S2.⁴³¹

Cross References: Combat S5; PvP S7; Miscellaneous S12; *Concentration* S2, S3; *Will Focus* S1; *Blood of Ancients* S3; *Maximal Effect* S11, S15, S16; *Shield Bash* S5; *Shield of the Fallen Kings* S1; *Sword of Justice* S7; *Tome of All Spells* S2.

Blood of Ancients

S1:—*Taking a Wound*—With the basic effect, the Wound goes into your hand, not onto a Unit.⁴³²

S2:—*Fire Resistance*—With the strong effect, you pay a red mana to use an Action card in the Advanced Action Offer, but the color of this red mana is immaterial for effects that target enemy tokens who have Fire Resistance: what matters is the color of the card in the Offer. See Combat Q7 and *Maximal Effect* Q3.⁴³³

S3:—*Ambush*—See *Tome of All Spells* S2 and *Ambush* O10.

S4:—*Steady Tempo*—If you play *Steady Tempo* via *Blood of Ancients*, neither *Steady Tempo* nor *Blood of Ancients* goes on top of your Deed deck (*Blood of Ancients* says *Steady Tempo* remains where it is).⁴³⁴

S5:—*Concentration*—If you use the strong effect of *Concentration* to play *Blood of Ancients*, any Move/Influence/Block/Attack points provided by a card in the Advanced Action Offer do not benefit from *Concentration's* "+2" effect because *Blood of Ancients* is not providing the points directly.⁴³⁵

S6:—*Pure Magic*—If you use the strong effect of *Blood of Ancients* to play *Pure Magic* from the Advanced Action Offer, you still must pay the additional mana cost of the specific effect that you desire.⁴³⁶

S7:—*During Combat*—You cannot use *Blood of Ancients* during Combat to play a Healing effect, such as *Regeneration*.⁴³⁷

Cross References: *Ambush* O10; *Tome of All Spells* S2; *Deadly Aim* Q2; *Invocation* S2; *Mana Overload* S6.

Blood Rage

S1:—*Assigning Wounds*—The Wound goes into your hand, not onto a Unit.

S2:—*Timing of Wounds*—If you take a Wound from *Blood Rage*, you can immediately use that Wound with *Power of Pain* or *Invocation*, and you can even add any Attack points you gain through those Skills onto the *Blood Rage* Attack. See Combat S49.⁴³⁸

Cross References: Combat S21; *Maximal Effect* S33.

Blood Ritual

S1:—*One Use Only*—With the strong effect, you gain at most one crystal [and strict play requires you to gain it immediately]. *Crystallize*, of course, could make a crystal out of a second mana, etc.⁴³⁹

S2:—*Black Mana during the Day*—With the strong effect, you can take a black mana token during the day but, depending on circumstances, you may find yourself unable to use it.⁴⁴⁰

S3:—*Knocked Out*—If you use *Blood Ritual* during Combat, the wound counts toward being knocked out, but not if *Blood Ritual* is played before or after Combat.⁴⁴¹

Chivalry

S1:—*Faction Leaders*—Avatars (faction leaders) count as enemies if defeated (that is, reduced below level one) by this attack. GENERAL VOLKARE does not count.⁴⁴²

S2:—*Grouping Enemy Tokens*—All enemy tokens that are grouped together for an Attack that includes *Chivalry* will qualify for the Reputation and Fame bonuses.⁴⁴³

S3:—*Reputation Adjustments*—Reputation adjustments for defeating enemy tokens apply the instant they're defeated, see Combat Q16. If you use *Chivalry* to defeat HEROES, the +1 and -1 Reputation adjustments are applied simultaneously and cancel out. See Enemy Tokens: HEROES S1.⁴⁴⁴

Counterattack

S1:—*Attack Points Must Be Combined*—The Attack 2s/3s gained for blocking enemies must be used together in one combined Attack. See *Maximal Effect* Q4. If you use *Concentration* to play *Counterattack*, *Concentration* adds a total of +2 to the Attack, not +2 for each enemy blocked.⁴⁴⁵

O2:—*VOLKARE*—Does VOLKARE count as an enemy?

A2: Faction leaders are considered enemy tokens (*TEZLA*, p. 5), and VOLKARE has an attack similar to that of faction leaders and enemy tokens, so blocking his attack should permit the same kind of benefit.⁴⁴⁶

S3:—*PvP*—The "number of enemies blocked" only counts enemy Units that contributed to the last Attack (plus possibly one for the enemy hero)—but only count them if you decreased that last Attack to zero.⁴⁴⁷

S4:—*DRAGON SUMMONER*—If you block only one of a DRAGON SUMMONER'S summoned MONSTERS, it doesn't count toward *Counterattack*. But if you block both MONSTERS, it counts as blocking the (one!) enemy.⁴⁴⁸

S5:—*Multiple Attacks*—All of the multiple attacks of a single enemy must be fully Blocked for that enemy to count toward "each enemy blocked this turn".⁴⁴⁹

S6:—*Summoned MONSTERS*—Blocking a summoned MONSTER does count as having blocked an enemy. But see S4 above.⁴⁵⁰

Cross References: *Maximal Effect* S6; *Shield Bash* S4; *Burning Shield* Q1.

Crystal Mastery

Q1:—*All Crystals Count*—With the strong effect of *Crystal Mastery*, which crystals do you get back?

A1: *Crystal Mastery* returns *all* of the crystals you used this turn, including those used *before* and *after* you played this card, and any you paid at RUINS. If a blue crystal powered the card, you get that back too.⁴⁵¹

S2:—*No Converted Crystals*—Crystals converted into mana tokens for reasons other than immediate use (such as happens with *Sacrifice*), do not get returned by *Crystal Mastery*.⁴⁵²

Cross References: *Maximal Effect* S20.

Decompose

Cross References: *Maximal Effect* S9; *Training* S2.

Diplomacy

S1:—*Using Influence as Blocks*—All Influence points played in the Action Phase can be used as Blocks. And Influence points from one origin can Block several different Attacks. See Miscellaneous S9.⁴⁵³

S2:—*Fire or Ice*—If you choose Fire or Ice, you get a normal Fire Block or Ice Block. They can be used against a Physical Attack as usual and are fully effective. See Combat S4.

S3:—*Fire or Ice*—With the strong effect of *Diplomacy*, all Influence-Blocks must be of the same type: Ice or Fire.⁴⁵⁴

Cross References: Influence S1; Miscellaneous S9; *Ambush* S6; *Maximal Effect* S31; *Bright Negotiation* S1; *Dark Negotiation* S1; *Spirit Guides* S2; *Fire Gem* Q2.

Dodge and Weave

S1:—*Reducing Attacks*—You can reduce enemy Attacks to zero even for summoned enemies or those with Arcane Immunity. It reduces every kind of attack: physical, ice, cold-fire, brutal, swiftness, poison, etc.⁴⁵⁵

S2:—*Concentration*—If played through the strong effect of *Concentration*, the Attack 2 is eligible for the +2 bonus.⁴⁵⁶

S3:—*Swiftness/Brutal*—This card reduces "one enemy attack by 2" (not "reduce the damage by 2"). If an enemy has Swiftness or Brutal, you double the reduced Attack value to see how much Blocking is needed or when assigning damage, respectively.⁴⁵⁷

S4:—*Timing*—*Dodge and Weave* is clearly intended to be used in the Block Phase, as that is when its first effect will get applied. [Some players further insist it can be played *only* during the Block Phase.]⁴⁵⁸

S5:—*Attack Type*—The attack you gain is a physical (non-elemental) Attack.⁴⁵⁹

Cross References: Miscellaneous S12; *Ambush* S9; *Battle Hardened* Q2; *Deadly Aim* Q3; *Nature's Vengeance* S2.

Force of Nature

Cross References: *Maximal Effect* S28; THUGS S2.

Frost Bridge

S1:—*Lakes*—Your ability to travel through lakes does not make them safe spaces.⁴⁶⁰

S2:—*Provoking Rampaging Enemies*—Travel *can* provoke Rampaging Enemies when you enter a lake space. You could also challenge Rampaging Enemies from a lake space. Forced Withdrawal rules will likely then apply. See Forced Withdrawal S1.⁴⁶¹

Cross References: Movement O9; *Song of Wind* O1; *Prayer of Weather* S2.

Heroic Tale

S1:—*Recruiting Multiple Units*—If you recruit a Unit with *Heroic Tale*, and then disband it as you recruit another Unit during the same Interaction, you'll gain Fame/Reputation for both recruited Units.⁴⁶²

Cross References: Influence Q6.

Ice Shield

S1:—*Ice Resistance*—Ice Resistant enemies do not get -3 to their armor, but the Ice Block 3 still applies.⁴⁶³

Q2:—*Unsuccessful Blocks*—If the Block is too small to block the Attack, is the enemy armor reduced?

A2: Yes, per the Official FAQ.⁴⁶⁴

S3:—*SUMMONERS*—If used against a summoned MONSTER, the armor of the SUMMONER is unaffected.⁴⁶⁵

S4:—*Preventing Attacks*—Enemies prevented from Attacking cannot have Block cards played against them, so *Ice Shield* cannot reduce their armor.⁴⁶⁶

Cross References: Combat Q7, S23, S33; *Maximal Effect* Q3; *Fire Gem* S1.

In Need

S1:—*Power of Pain*—You can count a wound card in your hand toward *In Need*, and then play that same wound card with *Power of Pain* to gain additional Influence points, and then expend those combined Influence points together in a single purchase.⁴⁶⁷

Cross References: *Mana Exploit* S1.

Intimidate

S1:—*Reputation is "X"*—You can play *Intimidate* when your Reputation is on "X". Your Reputation is so bad, it can't get any worse, so *Intimidate* away! See Influence S5.⁴⁶⁸ See also the discussion on *Threaten* S1.

Into the Heat

S1:—*Base Ability Required*—Units must already have Attack or Block values to gain any benefit from *Into the Heat*. And the specific Unit ability you activate must *itself* have Attack or Block values.⁴⁶⁹

S2:—*Types of Attacks and Blocks*—It increases any Attack or Block, no matter its type or elements: Ice Siege Attacks, Cold-Fire Blocks, physical Attacks, etc. See Combat S5.⁴⁷⁰

S3:—*SHOCKTROOPS/UTEM SWORDSMEN*—See SHOCKTROOPS S4 and UTEM SWORDSMEN S1.

S4:—*PvP*—This card does not prevent a PVP opponent from assigning damage to your Units.⁴⁷¹

Cross References: PvP Q1; Miscellaneous S12; *Concentration* S5; *Maximal Effect* S27; *Call to Arms* Q4, S10; *Mana Overload* S6; SHOCKTROOPS S4; UTEM SWORDSMEN S1.

Learning

S1:—*Timing*—You can play *Learning* at any point during your turn, since it's a Special Effects card.⁴⁷²

If you aren't Interacting with the Locals, Reputation doesn't apply nor do shield tokens on conquered CITIES. So if your Reputation is negative, consider playing *Learning* outside of Interaction (even during the Movement Phase—but remember that unspent Influence points do not transfer to the Action Phase). And you can play *Learning* while your Reputation is on "X", just so long as you aren't Interacting with the Locals.⁴⁷³

Cross References: Influence S1, S2; Resting S3.

Magic Talent

S1:—*Mana Required*—To cast a spell in the Spell Offer, you must still pay the corresponding mana.⁴⁷⁴

Q2:—*Call to Glory*—In Combat, can you use *Call to Glory* in the Spell Offer to recruit a Unit?

A2: Yes: both *Magic Talent* and *Call to Glory* have the Special Effects icon. See *Call to Glory* S1.⁴⁷⁵

S3:—*Artifacts*—Artifacts cannot be discarded with *Magic Talent*: they have no color.⁴⁷⁶

O4:—*Minimum Cost*—With the basic effect of *Magic Talent*, you must discard a card. With the strong effect of *Magic Talent*, you must pay a second mana after the blue mana. [The wording of the card text appears to also require that this second mana must match the color of a card in the Spells Offer.]⁴⁷⁷

S5:—*During Combat*—You cannot use *Magic Talent* to cast a Healing Spell during Combat.⁴⁷⁸

Cross References: Basic Action Cards O5; *Will Focus* S2; *Ambush* O10; *Maximal Effect* S19; *Time Bending* S1, S5, S13; *Tome of All Spells* S2, S5; *Deadly Aim* Q2.

Mana Storm

S1:—*Limited Mana Dice*—In Solo Conquest, there're only three dice in the SOURCE. If you power *Mana Storm* with a die from the SOURCE, you'll only be able to reroll and use at most 2 dice.⁴⁷⁹

S2:—*PvP*—You can use *Mana Storm* in PvP combat even if you're only Partially Attending.⁴⁸⁰

Cross References: CITIES S14; *Mana Curse* S1; *Who Needs Magic* Q1.

Maximal Effect

S1:—*General*—*Maximal Effect* essentially copies the text of another card 2 or 3 times. For instance, if you throw away *Rage* with the basic effect of *Maximal Effect*, you get three Attack 2s. (See Q4 below.)

If you play the basic effect of *Maximal Effect* with *Crystallize*, you convert precisely three mana into crystals: you don't convert one mana into three crystals. If you cannot convert three mana, you cannot play this combination. [Some players allow you to convert up to three mana into crystals: see Basic Action Cards O5.]

If you play the strong effect of *Maximal Effect* with *Crystallize*, you get the text "gain a crystal of any color" twice, so you gain two crystals and they don't need to be the same color.⁴⁸¹

S2:—*Sideways Cards*—You cannot play a card sideways for use with *Maximal Effect*.⁴⁸²

Q3:—*Fire and Ice Resistance*—When you play a follow-on card with a base card like *Concentration*, *Will Focus*, or *Maximal Effect*, how does this work against enemies with Fire or Ice Resistance?

A3: Only the color of the card played second matters for purposes of Fire and Ice Resistance: the first card is simply making the second card better. If you play the strong effect of *Maximal Effect* (red) with *Ice Shield* (blue) against an enemy with Ice Resistance, the armor reduction does not apply. See Combat Q7.⁴⁸³

Q4:—*Attack Points*—Can the Attack points from a *Maximal Effect* combination be used separately?

A4: No. *Maximal Effect* repeats the text on the follow-on card two or three times. When used with *Rage* you get "Attack 2. Attack 2. Attack 2." or "Attack 4. Attack 4." You then process this effect immediately and treat it as a single effect, giving you one "Attack 6" or one "Attack 8". See S1 above, Basic Action Cards S2, and Miscellaneous S9.⁴⁸⁴

S5:—*Determination*—The strong effect of *Maximal Effect* with *Determination* gives Block 10 that has to be used against a single attack, not as two separate Block 5's. See Basic Action Cards S2 and Miscellaneous S9.⁴⁸⁵

S6:—*Counterattack*—After having Blocked two enemies, if you play the basic effect of *Maximal Effect* with *Counterattack*, you get an Attack 18 = $3 \times 2 + 3 \times (2+2)$. See Q4 and S5 above.⁴⁸⁶

S7:—*Improvisation*—Playing *Maximal Effect* with *Improvisation* (or *Battle Versatility*) cannot give both Block points and Attack points, because you cannot play an Attack effect in the Block Phase, or vice versa.⁴⁸⁷

S8:—*Improvisation*—The strong effect of *Maximal Effect* with *Improvisation* can provide Block 5 and Move 5 when blocking an Enemy (don't forget to discard two cards to power both uses of *Improvisation*). The Block must be used immediately, but the Move points can be saved for other purposes. Or you could instead gain both Block and Influence, the Block to counter an immediate Attack and the Influence to, say, convince HEROES to join in an Assault and even get them to contribute to the *same* Block. The Influence points may be used later during your turn, but surplus Block points are wasted.⁴⁸⁸

S9:—*Improvisation/Concentration*—When using *Maximal Effect* with *Improvisation*, you must also discard three hand cards with the basic effect or two with the strong effect, to pair with each use of *Improvisation*. Similarly, with *Concentration* and *Decompose*. And you aren't allowed to play *Maximal Effect* with a card like *Improvisation* or *Concentration* if, at the moment you play it, you don't have enough cards to complete the two- or three-card cost. So if you play *Maximal Effect* plus *Concentration*, but have only *Tranquility* left in your hand (intending to use the two-card-draw effect of *Tranquility*), that would be prohibited if you have undrawn Wound cards in your draw deck, as drawing Wounds would prevent you from completing the combination.⁴⁸⁹

[Some players say you need not use the second card to its full extent, as it is a benefit and hence voluntary: Basic Action Cards O5.]⁴⁹⁰

S10:—*Concentration and March*—If you play the strong effect of *Maximal Effect* then *Concentration* then *March* for six Move points, you cannot wait until after you expend those Move points (to, say, explore a new tile) before choosing what other card you'll be playing with *Concentration*. All card plays have to be resolved before you spend those Move points. See Miscellaneous S9 and also S12 below.⁴⁹¹

S11:—*Concentration and Tirelessness/Ambush*—If you play the strong effect of *Maximal Effect*, then *Concentration*, then *Tirelessness*, then *March*, the bonus of *Tirelessness* will apply to *March*. Similarly, if during the Block Phase you play the strong effect of *Maximal Effect*, then *Concentration*, then *Ambush*, then *Determination*, the Block bonus from *Ambush* will apply to *Determination*—see *Ambush* S4.⁴⁹²

S12:—*Concentration and Tranquility*—If you play *Maximal Effect*, then *Concentration*, then *Tranquility*, you resolve the effects one at time and therefore do get to see which cards you draw with *Tranquility* before having to commit which card(s) you'll play with the second (and third) application of *Maximal Effect*.⁴⁹³

S13:—*Concentration then Maximal Effect*—If you play the strong effect of *Concentration* then *Maximal Effect* then *Rage*, you get two Attack 4's that have to be used in the same Attack. *Maximal Effect* itself doesn't directly provide any "points" that *Concentration* can increase by 2, so the only benefit of playing *Concentration* before *Maximal Effect* is to allow a green mana to power *Maximal Effect* instead of a red mana.⁴⁹⁴ Remember that *Maximal Effect* doesn't provide Attack points directly, a key insight that helps with other similarly worded effects like *Deadly Aim* or *Mana Overload*, and combinations like *Will Focus* plus *Ambush*.^{495,496}

If you play the cards in the opposite order—the strong effect of *Maximal Effect* then *Concentration* then both *Swiftness* cards—this gives you two Ranged Attack 5's for a single combined Ranged Attack 10. And in this case the *Concentration* card is thrown away, but not the *Swiftness* cards.⁴⁹⁷

S14:—*Will Focus*—*Will Focus* plays similar to *Concentration*: see S13 above.⁴⁹⁸

S15:—*Ambush*—If you play the strong effect of *Maximal Effect* then *Ambush*, you get the strong effect of *Ambush* twice: Move 8, and then either +4 to your first Attack card or +8 to your first Block card. (You do not get +2 to your first Attack card *and* +4 to your first Block card.)⁴⁹⁹

S16:—*Ambush and Rage*—If you play *Ambush* then *Maximal Effect* then *Rage*, all using their basic effects, you will get Move 2 and either Attack 1 (from *Ambush*) plus 3 (from *Maximal Effect*) x Attack 2 (from *Rage*) = Attack 7, or Block 2 (from *Ambush*) plus 3 (from *Maximal Effect*) x Block 2 (from *Rage*) = Block 8. The Attack and Block bonus from *Ambush* itself is not doubled or tripled.⁵⁰⁰

S17:—*Tirelessness*—If you play the strong effect of *Maximal Effect* then *Tirelessness*, you get Move 8 (4+4) and +2 Move points for every additional movement card you play later this turn. A player might wonder if the second instance of *Tirelessness* should benefit from the first playing of *Tirelessness* and result in Move 9, but remember that you're playing the card *Tirelessness* only once but are using its effect twice.⁵⁰¹

If you play the basic effect of *Maximal Effect* then *Tirelessness*, you get Move 6 (2+2+2) and +3 Move points for the next movement card you play during this turn.⁵⁰²

S18:—*Tirelessness*—If you play the strong effect of *Tirelessness* then the basic effect of *Maximal Effect* then *March*, you'll gain Move 4 from *Tirelessness* and then 3 x Move 2 from *March*, plus 1 additional for a total of 11. You're playing *March* once, but using its effect three times.⁵⁰³

S19:—*Magic Talent*—If you play the basic effect of *Maximal Effect* then *Magic Talent*, you must discard three additional cards regardless of whether or not you cast any Spells from the Spell Offer: see S9 above. You must also pay a mana of the matching color for each Spell you choose to cast. If you throw away the right color cards, you could cast the same Spell more than once.⁵⁰⁴

When playing the strong effect of *Maximal Effect* then *Magic Talent*, you must pay two mana, one for each use of *Magic Talent*. These mana must match the colors of Spells in the Spell Offer: see *Magic Talent* O4.

[Some players say you need only discard a card (basic effect)/pay a mana (strong effect) for each use you make of the Magic Talent card: see S9 above.]

S20:—*Crystal Mastery*—If you play the strong effect of *Maximal Effect*, then *Crystal Mastery*, you don't get double the crystals: each crystal gets returned to your inventory twice, but no matter how many times a crystal is returned to you, it's still just the one crystal.⁵⁰⁵

S21:—*Spell Forge*—If you play the basic effect of *Maximal Effect* then *Spell Forge*, you gain three crystals, and you can choose the same Spell card in the Spell Offer all three times. When playing this combination using the strong effect, you may choose the same two Spell cards both times.⁵⁰⁶

S22:—*Savage Harvesting*—If you play the basic effect of *Maximal Effect* then *Savage Harvesting*, you get Move 6. And if you Move a space this turn, you may discard a card to gain a crystal of the same color, and you may do this up to three times—even if you Moved only *one* space. Or you could discard two cards after your first Move, and a third card after your second Move; or other similar combinations.⁵⁰⁷

S23:—*Savage Harvesting*—If you play the strong effect of *Maximal Effect* then *Savage Harvesting*, you get Move 8. With each space moved, you may discard up to two cards to gain crystals of matching color(s).⁵⁰⁸

S24:—*Ritual Attack*—If you play the strong effect of *Maximal Effect* then *Ritual Attack*, you must then throw away two additional cards. Doing so will result in you throwing away three cards in total and will gain you two Fire Attacks (of perhaps different strengths and types) that must be used together in one combined Attack against a single group of enemy tokens.⁵⁰⁹ [Some players allow you to throw away fewer than two cards after playing *Ritual Attack*—see S9 above.]

S25:—*Ruthless Coercion*—If you play the basic effect of *Maximal Effect* then *Ruthless Coercion*, you gain Influence 6. You also get up to three discounts of two Influence each, which may be applied to the same or different Unit recruitments. For each discount of two Influence you use, you lose one Reputation.⁵¹⁰

S26:—*Rejuvenate*—If you play the basic effect of *Maximal Effect* then *Rejuvenate*, you're allowed to choose different effects from the *Rejuvenate* card each time, taking perhaps two green mana tokens and Ready-ing a Unit. You cannot, however, designate two uses of the Ready-ing effect of *Rejuvenate* to Ready a single level-III or -IV Unit.⁵¹¹

S27:—*Into the Heat*—If you play either effect of *Maximal Effect* then *Into the Heat*, all of your Units will have their Attack and Block values increased by 6 each.⁵¹²

S28:—*Force of Nature*—If you play the basic effect of *Maximal Effect* then *Force of Nature*, you can give Physical Resistance to three different Units.⁵¹³

S29:—*Steady Tempo*—If you play the basic effect of *Maximal Effect* then *Steady Tempo*, you won't be able to return *Tempo* to the bottom of your Deed deck because *Tempo* will have been thrown away.⁵¹⁴

S30:—*Temporal Portal*—If you play *Maximal Effect* (basic or strong effect) and then *Temporal Portal*, you'll be able to use the effect of *Temporal Portal* only once, as doing so counts as your Action for the turn.⁵¹⁵

S31:—*Diplomacy*—If you play the strong effect of *Maximal Effect* with *Diplomacy*, you can choose both fire and ice, using some Influence points for Ice Blocks and other Influence points for Fire Blocks (but you cannot get Cold-Fire Blocks). This is similar to how *Crystallize* would work when used with the strong effect of *Maximal Effect*: you would be able to choose two (possibly different) color crystals.⁵¹⁶

S32:—*Training*—When playing the basic effect of *Maximal Effect* and throwing away *Training*, you then—one-at-a-time—throw away three other hand cards and take three cards from the Advanced Action Offer. The Advanced Action Offer is refreshed after each card is chosen so you'll get to see an additional card before choosing which card to throw away next. But to play this combination in the first place you need to have at least five cards in your hand: *Maximal Effect*, *Training*, and three other cards. And these three other cards must also match the colors of the cards in the Advanced Action Offer at the moment that you play *Maximal Effect*. See *Training* S3.⁵¹⁷ [Some players let you choose how many additional cards to throw away, between zero and three. And they don't insist that these discards have to match the colors of the cards in the Advanced Action Offer, and they also permit you to choose not to draw *any* cards from the Offer.]

S33:—*Blood Rage*—The optional cost of *Blood Rage*—taking a Wound—is part of the effect, so you have to take a separate Wound for each application of the *Blood Rage* increase that you choose to use. And as always, Attack points gained through *Maximal Effect* have to be used together in a single Attack.⁵¹⁸

S34:—*Stout Resolve*—If you play *Maximal Effect* then *Stout Resolve*, the discard ability of *Resolve* can also be used with each use you make of its basic or strong effect. With the basic effect, you could discard up to three wounds, each of which would give you a +1. So if you chose Move 4 and Influence 2, the three discarded wounds would give you +2 Move and +1 Influence.⁵¹⁹

Cross References: Combat Q7, S21; Miscellaneous S1; *Concentration* Q1; *Crystal Joy* S1; *Blood of the Ancients* S2; *Counterattack* S1; *Shield Bash* S7; *Stout Resolve* S3; *Chilling Stare* S6; *Explosive Bolt* O7; *Power of Crystals* S4; *Rush of Adrenaline* S9; Spells S1; *Time Bending* S3, S13; *Deadly Aim* Q2; *Mana Overload* S6; *Fire Gem* S3.

Mountain Lore

S1:—*Card Draws*—The card-draw effect of *Mountain Lore* occurs when you draw up to your hand limit, not when you draw *any* card(s)—and the effect will apply across a Round boundary.⁵²⁰

S2:—*Forced Withdrawal*—You may end your turn on a mountain space after using the strong effect of *Mountain Lore*. On your ensuing turn you're not required to move off from that space—but if you don't, you'll face Forced Withdrawal during your End-of-Turn sequence. An exception applies if you declare the End of the Round during that ensuing turn, then you won't be subject to Forced Withdrawal during that turn.⁵²¹

O3:—*Safe Spaces*—Are mountain spaces safe for you during your turn?

A3: Yes. So you can move onto mountain spaces by other movement effects later during this turn, including by *Underground Travel*, *Temporal Portal*, *Wings of Wind*, etc. This, though, could make Forced Withdrawal on a future turn trickier when the Mage Knight must retrace his steps. See Forced Withdrawal S4.⁵²²

Cross References: Movement O9; *Path Finding* S1; *Mist Form* O4, Q5; *Underground Attack* O5.

Path Finding

S1:—*Impassable Terrain*—With *Path Finding*, lakes and mountains remain impassable. But the reduced terrain costs *will* apply to lakes and mountains if other effects make them passable: e.g. *Mountain Lore*. See Movement S10.⁵²³

Cross References: Movement O9; *Song of Wind* S4.

Peaceful Moment

S1:—*Refreshing Units*—With this card you may Refresh at most one Unit.⁵²⁴

S2:—*Timing*—If you play *Peaceful Moment* as your Action, you may play other Influence points and use the obtained Healing points and Refresh one Unit (but only one!) at any point during your Action Phase. If, instead, you play this card as an immediate Special Effect, you gain only the Influence points.⁵²⁵

S3:—*Reputation Bonus*—If you play *Peaceful Moment* as your Action, you do not get the Reputation bonus or penalty because your Action is not Interacting with the Locals.⁵²⁶

Pure Magic

S1:—*Versus Ice/Fire Resistance*—Although *Pure Magic* is a blue-mana card, its effects—both the basic and strong effects—are fully usable when facing enemies that are Ice and/or Fire Resistant. This remains true even if you use blue mana to power the strong effect to create Move/Influence points which you then spend during combat using *Diplomacy* for Block points or using *Agility* for Attack points. See Combat S33.⁵²⁷

S2:—*Minimum Cost*—When playing the basic effect, you must pay a mana of a basic color. When playing the strong effect, you must pay a blue mana and then an additional mana of a basic color. And you must be in Combat if the sole/additional mana is blue or red: see Miscellaneous S1.⁵²⁸

Cross References: *Concentration* S6; *Blood of Ancients* S6; *Mana Overload* S2.

Refreshing Walk

S1:—*Healing Points*—If you play *Refreshing Walk*, and then move to a MONASTERY and buy a Heal point there, the Heal points from both sources combine and you can use them to heal yourself and/or Units.⁵²⁹

S2:—*MAZE / LABYRINTH*—If you play this card on entering a MAZE, you can use the Move points to walk into the MAZE and can play other movement cards. Just before combat, your Heal point(s) from *Refreshing Walk* are still available, so you can Heal yourself (but probably not the Unit chosen to accompany you since it must have been *unwounded* when you entered the MAZE). Once combat begins, the Heal points are lost.⁵³⁰

S3:—*Timing*—If you play *Refreshing Walk* after combat is over, you won't be able to use the Move points (as there's no effect or situation that allows for that), but you will be able to use the healing effect.⁵³¹

Cross References: *Miscellaneous* S9; *Power of Crystals* O3.

Regeneration

S1:—*Readying Cannot Be Delayed*—When playing *Regeneration*, the following sequence is not permitted: Heal an unspent Unit, use that Unit, refresh that Unit. The refreshing effect of *Regeneration* has to be used immediately: you can't use the Heal point first (although you can Heal a Unit *after* it is readied). See Basic Action Cards S2 and *Ruthless Coercion* S1.⁵³²

S2:—*Readying Cannot Be Delayed*—With *Regeneration*, you can't spend the Heal point(s), then do something else, then later use the "ready a Unit" power. The readying power doesn't go into a "bank" of powers for later use, unlike the Heal point(s).

This card gives both Heal point(s) and the ability to ready a Unit. See *Rebirth* S2.⁵³³

Cross References: *Miscellaneous* S9; *Ruthless Coercion* S1; *Blood of Ancients* S7; *Rebirth* S2.

Ritual Attack

S1:—*Throw Away*—The card you throw away must be an unplayed card from your hand, not one you just played. See *Training* S2. And throwing away an Action card is not optional.⁵³⁴

Cross References: *Maximal Effect* S24.

Shield Bash

Q1:—*Additional Block Cards*—With the strong effect, can you play other Block effects to earn an even larger reduction in armor?

A1: Yes, though those Block points are not automatically doubled against Swiftiness. See O3 below.⁵³⁵

S2:—*Ice Resistance*—*Shield Bash* Block points do count twice against an enemy that has both *Swiftiness* and *Ice Resistance*, but no armor reduction applies.⁵³⁶

O3:—Armor Reduction—Vlaada Chvátil, the designer, posted on BoardGameGeek that "if, while using [the strong effect of *Shield Bash*], an enemy with *Swiftiness* is successfully Blocked, the resulting armor reduction is based on the excess *undoubled* Block points, not on the excess doubled Block."⁵³⁷

Applying Vlaada's clarification, if the strong effect of *Shield Bash* (Block 5, counts twice vs. *Swiftiness*) is used against an enemy token with Attack 3 and *Swiftiness*, there'll be an excess of $(5 \times 2 - 3 \times 2 = 4)$, or "two doubly-counted Block points". So this excess would reduce the enemy's armor by two.

Applying the *Shield Bash* effect, though, gets complicated if . . .

- (a) a player plays additional Block points against an enemy with *Swiftiness*, and/or
- (b) if some of the Block points are inefficient (and hence halved).

So how do you determine the reduction to an enemy's armor?⁵³⁸ I see two sensible options: (Approach A has a small following, so **Approach B** is colored as a house rule.)

A. Apply these three rules:

1. If the enemy attack has *Swiftiness*, apply the doubled Block points of *Shield Bash* first.
2. If there are any doubled Block points from *Shield Bash* left over, undouble them.⁵³⁹
3. Halve any Block points that are inefficient against this attack, even those Block points that're in excess of the number needed to fully block this attack.

B. Ask, how many more attack points could've been blocked? That's the armor reduction.

Examples:

- You play *Rage* (Block 2) and *Shield Bash* against an enemy token with Attack 3 and *Swiftiness*:
 - **Approach A:** You have $2 + (5 \times 2)$ Block points against the 3 Attack (doubled for *Swiftiness*). You apply the doubled *Shield Bash* points first, which leaves you with $2 + (2 \times 2)$ excess Block points. The excess *Shield Bash* points are now undoubled, leaving you with $2 + 2$ excess Block points. You reduce the enemy token's armor by 4.
 - **Approach B:** There's a total of $2 + 5$ Block points played (with the 5 points from *Shield Bash* being doubled), which gives you $2 + 5 \times 2 = 12$ points. You need $3 \times 2 = 6$ points to fully block this attack. With the remaining 6 Block points, you could've blocked an additional 3 *Swiftiness* Attack points, so you reduce the enemy's armor by 3.
- You play *Shield Bash* against an enemy token with 2 Fire Attack (without *Swiftiness*):
 - **Approach A & B:** In this case the Block is inefficient, so you have a surplus of $(5 \div 2) - 2 = \frac{1}{2}$ Block point, and therefore will not earn *any* reduction to the enemy's armor.
- You play *Shield Bash* (Block 5×2), *Shield of the Fallen Kings* (Block 6), and a sideways Deed card (Block 1) against a STORM DRAGON (4 Ice Attack with *Swiftiness*), and you play the third ability of your SHOCKTROOPS Unit to "reduce one enemy attack by 3".
 - **Situation:** The SHOCKTROOPS reduce the STORM DRAGON's attack to "1 Ice Attack with *Swiftiness*". The total Block points you are playing are $(5 \times 2) + 6 + 1 = 17$.⁵⁴⁰
 - **Approach A:** You apply *Shield Bash*'s doubled Block points first, but these are inefficient against Ice Attacks, so this takes 2 of *Shield Bash*'s 5 base Block points, (halved for being inefficient and doubled for going against an attack with *Swiftiness*). This leaves you with $(3 \times 2) + 6 + 1 = 13$ excess Block points. You now undouble the excess *Shield Bash* points: $3 + 6 + 1 = 10$ excess points. And since the attack is an Ice Attack, these points are inefficient, so that leaves you with 5 excess Block points for an armor reduction of 5.
 - **Approach B:** You use 4 of the 17 Block points to handle the "1 Ice Attack with *Swiftiness*" (needing 4 Block points due to the *Swiftiness* and inefficiency of the Block points). This leaves you with 13 Block points which could've blocked an additional "3 Ice Attack with *Swiftiness*" (plus a useless remainder of 1 Block point). The armor is reduced by 3.
 - **Trick Question:** The armor reduction is actually zero because STORM DRAGONS have Ice Resistance, so blue-card non-Attack/non-Block effects have no effect.⁵⁴¹

S4:—*Multiple Attacks*—If *Shield Bash* is used against an enemy with Multiple Attacks, any resulting armor reduction is based solely on the excess Block points from the single Attack which *Shield Bash* was used against. None of the *other* Multiple Attacks need to be Blocked in order to qualify for the armor reduction.⁵⁴²

S5:—*Concentration*—When the strong effect of *Concentration* is used with *Shield Bash* against an enemy with Swiftess, the two additional Block points gained from *Concentration* will also be doubled. The same goes for *Ambush*, and also if *Ambush* and *Concentration* are used together on *Shield Bash*.⁵⁴³

Q6:—*SUMMONERS*—If the strong effect of *Shield Bash* is used against a MONSTER summoned by an ORC SUMMONER, can it reduce the ORC SUMMONER's armor?

A6: No. No effects that affect Blocked MONSTERS affect the SUMMONER.⁵⁴⁴

S7:—*Maximal Effect*—Even if you use *Maximal Effect* to play the strong effect of *Shield Bash*, *Shield Bash* is still considered to be powered by blue mana and any enemy with Ice Resistance will be immune to the armor reduction effect. And at most only one enemy can ever be affected, as Blocks must be combined for use against a single Attack. See *Maximal Effect* Q3 and S5.

Cross References: *Combat* S33; *Arcane Immunity* S5.

Spell Forge

S1:—*Choosing Colors*—You choose the crystal color yourself; they are not randomly chosen.

S2:—*Choosing Colors*—If two blue Spells are in the Spell Offer, you *can* use the strong effect to get two blue crystals.

Cross References: *Maximal Effect* S21.

Song of Wind

O1:—*Lakes*—Does "travel through lakes" require that it be "through", or may you voluntarily stop on a lake or "pause" there to challenge an adjacent Rampaging Enemy?

A1: See the discussion for *Frost Bridge*, which uses the same phrase. It's easiest to allow players to do either, as there're negative consequences for stopping on a lake so it's not likely to be abused. [Some players, though, think the opposite.] See S3 and S6 below, and *Frost Bridge* S2.⁵⁴⁵

S2:—*WALLS*—You need to pay the additional movement cost of WALLS if you cross them.⁵⁴⁶

S3:—*Provoking Rampaging Enemies*—If, while moving onto a lake, your movement provokes Rampaging Enemies, they'll attack you on the lake space and then—win or lose—you'll likely face Forced Withdrawal during your End-of-Turn sequence. If your move does provoke an attack, you can challenge additional adjacent Rampaging Enemies to join in the resulting combat. See O1 above.⁵⁴⁷

S4:—*Path Finding*—If you play the basic effects of both *Song of Wind* and *Path Finding*, no matter which order you play them in, the movement cost of plains is reduced to one, not to zero, due to the "to a minimum of two" restriction on *Path Finding*.⁵⁴⁸

O5:—*Paying Blue Mana*—If you want to move onto lakes, must you pay the blue mana when you play the card, or can you defer it until later in the turn? This seems unresolved, but I'd allow paying later.⁵⁴⁹

S6:—*VOLKARE*—You are permitted to enter a lake where VOLKARE is and attack him there.⁵⁵⁰

Cross References: Movement O9; *Frost Bridge* S2.

Steady Tempo

S1:—*Points Need Not Be Spent*—You can play this card for its Move points, not spend them, and still put this card back into your deed deck.⁵⁵¹

S2:—*Timing*—The decision of whether to put *Steady Tempo* back into your deck happens during step 3b of the End-of-Turn Sequence.⁵⁵²

Cross References: *Blood of the Ancients* S4; *Maximal Effect* S29.

Stout Resolve

S1:—*Wound Discard Is Optional*—With the strong effect, you're permitted to discard up to one wound card, but you're not *required* to discard a wound.⁵⁵³

S2:—*Discard from Hand Only*—The Wound you discard must come from your hand, not from your discard pile and not from wounded Units.

S3:—*Maximal Effect*—See *Maximal Effect* S7, S8, and S9: similar things can be said for using *Stout Resolve* with *Maximal Effect* as are said for using *Improvisation* with *Maximal Effect*.

S4:—*Discards*—All discards are made immediately, before using any points from *Stout Resolve*.⁵⁵⁴

Cross References: *Maximal Effect* S34.

Temporal Portal

S1:—*Lakes/Mountains*—You can walk through lakes and mountains with this effect.⁵⁵⁵

S2:—*Unrevealed Tiles*—You cannot walk over unrevealed spaces belonging to tiles not yet placed.

S3:—*Moving through Obstacles*—With the strong effect of *Temporal Portal*, you can move *through* Rampaging Enemies and CITIES, and you do not pay movement points for intervening WALLS.⁵⁵⁶

S4:—*Hand Limit*—The hand limit increase applies the next time you draw up to your hand limit, not the next time you draw *any* card(s). And this hand limit increase does apply across Round boundaries.⁵⁵⁷

S5:—*Strong Effect*—The two options are that you can either (a) move two spaces and increase your hand limit by one, or (b) move zero or one space and increase your hand limit by two.⁵⁵⁸

S6:—*Rampaging Enemies*—The basic effect means your move will not provoke adjacent Rampaging Enemies. It does not prohibit you from making a move that, under usual circumstances, would provoke them.⁵⁵⁹

O7:—*In another Mage Knight's Space*—Normally, if you end your Movement Phase co-located with another Mage Knight (unless in a CITY or the PORTAL), you have to either engage in PvP Combat or conduct a Forced Withdrawal (Combat S32). But are you also allowed to play *Temporal Portal* as your Action just so long as you use it to exit the space?

A7: Under a strict interpretation, you aren't allowed to take *any* Action in this case.⁵⁶⁰ [I'm sympathetic with allowing this play, however, for doing so does prevent two Mage Knights from ending the turn together.]

Cross References: Movement S1, S2, O9; *Savage Harvesting* O2; *Maximal Effect* S30; *Mountain Lore* O3.

Training

S1:—*Blood of the Ancients*—A clever combination: activate the strong effect of *Blood of the Ancients*, target *Training* in the Advanced Action Offer, throw away a green Action card, then use *Training* to target itself and pull *Training* into your hand.⁵⁶¹

S2:—*Paying the Cost*—You cannot throw away the *Training* card itself to fulfill the requirement to "throw away an Action card from your hand". Once you play *Training*, it is no longer *in* your hand. (The same reasoning applies to *Decompose* and similar cards.)

S3:—*Matching Color*—As I read the card, you don't have an option: the thrown away card must match the color of a card in the Advanced Action Offer, and you must take that card. [Others argue that while you do have to discard a card, it doesn't have to match any colors and you don't have to take a card. See Basic Action Cards O5.]

S4:—*Advanced Actions Offer*—You cannot take cards put into the Unit Offer by MONASTERIES.⁵⁶²

Cross References: Resting S3; Basic Action Cards O5; *Maximal Effect* S32.

Ultimate Edition Dual-Colored Action Cards

S1:—*Instructions*—The *Ultimate Edition* includes special instructions on a single-sided, single-page insert for the four new dual-colored Advanced Action Cards: be sure to read that.

S2:—*Unofficial Rulings*—Very few, if any, official answers have been provided for the questions listed below. **In place of official answers, we can make extrapolations based on how MKBG generally works.**

S3:—*Dummy Player*—If a dual-colored action card in the dummy's deck comes up, treat it as being the color that has the greater number of crystals. (E.g., pick the color that's more challenging for you.)

[Playing strictly by the text, you could treat the action card as being *both* colors and turn over a number of cards equal to the total of both crystal colors, but this seems drastic and likely wasn't intended.]⁵⁶³

O4:—*Card Icons*—Every card and Skill has at least one gold icon. Before *Lost Legion*, these icons restricted when effects could be played. With the rule changes in *Lost Legion*, these restrictions were explained in greater detail even as some of them were loosened, yet a few questions remained. Before discussing the icons on the dual-colored Action cards, we need to know that there're differing views about handling these gold icons:

View One: You can essentially ignore all of the icons except . . .

- 1) The Hand (Healing) Icon, which indicates that the card or Skill can't be played during Combat (unless the text explicitly allows it to be played or the effect also has a Crossed-Swords Icon).
- 2) The Crossed-Swords (Combat) Icon, which indicates that this card or Skill can only be played in Combat (unless there're additional icons in the upper left corner).

The "A" (Action) icon can be ignored because the restrictions relating to it are spelled out in the effect text itself, and the other icons—Head (Influence), Foot (Move), and Plus-Sign (Special Effects) icons—can pretty much be played anytime during your turn (*Lost Legion*, p. 9).

View Two: When an effect has multiple gold icons, associate each sub-part of the effect text with one of those icons. You're allowed to use a sub-part of an effect only if its associated icon can be played during the current phase of the turn (e.g., Crossed-Swords effects in Combat, Hand effects outside of Combat).⁵⁶⁴

View Three: When you play a card, choose one of the gold icons, and all of the sub-parts of the effect that *can be played* under the restrictions of this icon are now playable.⁵⁶⁵

If this seems overly complicated to you, you're not alone. The good news is that, whatever your view, it'll affect only a limited number of cards: *Ruthless Coercion* (Can Influence be used during Combat?), *Druidic Staff* (Which sub-parts of the effect are playable during Combat?), and three of the four new Advanced Action cards that came with the *Ultimate Edition*—see the corresponding entries for further discussion. **[Ben Kyo⁵⁶⁶ believes these three new cards are missing an icon: *Power of Crystals* should also have a special effects icon; *Chilling Stare* should also have an influence icon; *Explosive Bolt* should also have a special effects icon. I really like this solution and have added the icons to my own cards.]**⁵⁶⁷

S5:—*Both Colors*—When you play these new cards and wonder whether Ice or Fire Resistance in an enemy token limits the card's effect, know that these cards are considered to be both of the shown colors, even if you use the strong effect and paid for it with the "other" color mana. See also Combat S33.⁵⁶⁸

Chilling Stare

S1:—*Effect*—This is a blue- and white-mana card that gives Influence and affects an enemy attack.

S2:—*Attack Abilities*—With the basic combat effect, the chosen physical attack or ice attack or fire attack or cold-fire attack remains as is, but it loses any assassination, cumbersome, swiftness, brutal, poison, paralyze, or vampiric characteristics it may have had. This effect of *Chilling Stare* fully applies against an attack from an enemy with Arcane Immunity but not from an enemy with Ice Resistance. The other effect—Influence points—can be played no matter what enemy token you're facing in combat. See Arcane Immunity S1.⁵⁶⁹

S3:—*Strong Combat Effect*—The strong combat effect that prevents an enemy from attacking does not affect enemy tokens with Arcane Immunity or Ice Resistance, regardless of which color mana (blue or white) is used to power the card.⁵⁷⁰

S4:—*SUMMONERS*—The basic combat effect of *Chilling Stare* must be applied against a summoned MONSTER, not against the SUMMONER. If a SUMMONER has Ice Resistance or Arcane Immunity, this doesn't affect the basic combat effect of *Chilling Stare* when it's used against the summoned MONSTER—only Ice Resistance in the MONSTER itself would matter.

Conversely, the strong combat effect of *Chilling Stare* must be applied against the SUMMONER, not against the summoned MONSTER. The strong combat effect of *Chilling Stare* cannot prevent a SUMMONER from summoning a MONSTER if the SUMMONER has Ice Resistance or Arcane Immunity (nor can it prevent the summoned MONSTER from attacking). See Combat S23.

O5:—*Use outside of Combat*—This card has only a Combat icon in the upper left corner. Can it be played outside of Combat?

A5: The Influence points ought to be usable outside of Combat. It's probable that this card should be treated as if it also had an Influence [Head] icon: see Dual-Colored Action Cards O4.⁵⁷¹

S6:—*A Chosen Enemy*—This card affects only one enemy token. See *Disintegrate* S3.
If used with *Maximal Effect*, I would allow each usage to affect a different enemy token.⁵⁷²

Cross References: Combat S33, *Explosive Bolt* O5.

Explosive Bolt

S1:—*Effect*—This is a red- and white-mana card that gives a crystal (basic effect) or a Ranged Attack and armor reductions (strong effect).

Q2:—*Armor Reduction*—With the strong effect, if you defeat two enemies with the Ranged Attack 3, must the -1 armor be applied to two different enemies, or can it be stacked as -2 armor against one enemy?

A2: You can do either.⁵⁷³

S3:—*Fire Resistance*—Fire Resistant enemy tokens defeated by the strong effect *do* count toward reducing another enemy's armor, but Fire Resistant enemy tokens cannot have their *own* armor reduced (regardless of which mana—red or white—is used to power this card).⁵⁷⁴

S4:—*Multiple Attacks*—If you stack the Ranged Attack 3 with other Attack points and kill several enemy tokens in a single group, *each* of the defeated enemy tokens provide a -1 armor effect.⁵⁷⁵

O5:—*Use outside of Combat*—This card has only a gold combat icon. Must it be played in Combat?

A5: The basic effect of *Explosive Bolt* should be playable outside Combat. It's probable that this card should be treated as if it also had a Special Effects icon: see Dual-Colored Action Cards O4.⁵⁷⁶

S6:—*Timing and Duration*—The armor reduction is immediate (so you can apply it to other enemy units attacked during the same sub-phase of combat) and it endures through the entire Combat Phase (so an armor reduction earned in the Ranged-and-Siege-Attack Phase can apply to enemy units in the Attack Phase).⁵⁷⁷

O7:—*Maximal Effect*—With the strong effect, the Ranged Attacks must be combined, but each defeated enemy should only reduce armor by -1 (not by -2). With the basic effect, take 3 wounds and gain 6 crystals.

Cross References: Combat S33.

Power of Crystals

S1:—*Effect*—This is a blue- and green-mana card that gives crystals (basic effect) or Move points or Heal points or card draws (strong effect).

O2:—*Bonus Effects*—With the strong effect, if you chose "Move 4" and have one of each crystal color, must you choose "Move 2"—or could you choose "Heal 1" or "draw 1" instead?

A2: Opinions differ, for the wording is ambiguous. Some believe you can choose any of the options, even a different option for each complete set of crystals you own; others believe your choice must match the base choice. This latter seems more in keeping with how other card effects are usually worded and handled.⁵⁷⁸

When used with *Maximal Effect*, I would treat each subsequent usage of *Power of Crystals* separately, allowing a different base effect and bonus option for each.

If you play that "the crystal bonus effect can be chosen by the player", then that crystal bonus effect must be chosen by the player at the moment that she plays the card: she can't use the 4 new Movement points she gets to move around and learn new information, and then decide which type of crystal bonus to receive.⁵⁷⁹

O3:—*Use during Combat*—This card has a healing (hand) icon on it, and also a movement (foot) icon. Can it be played during combat (seeing as it lacks verbiage similar to what *Refreshing Walk* has)?

A3: An open question. It's fair to allow its use in Combat, but only its strong effect, and only for Move points. [Other players allow all but the Heal points.] See Dual-Colored Action Cards O4.⁵⁸⁰

S4:—*Gain a Crystal*—The basic effect gives you at most one crystal, and you choose it from among the basic crystal colors you lack. If used with *Maximal Effect*, you cannot gain two crystals of the same color, yet I would allow its use with *Maximal Effect* even if the player already has two or more colors of crystals.

S5:—*Gain a Crystal*—With the basic effect, if you had a crystal of a certain color earlier this turn but have since spent it, and currently have no crystals of that color, you can gain a crystal of that color.⁵⁸¹

Rush of Adrenaline

S1:—*Effect*—This is a red- and green-mana card that gives card draws for taking wounds.

S2:—*Which Wounds Count*—This card is referring only to new wounds you receive into your hand.⁵⁸²

S3:—*Retroactive Effect*—Both effects also apply retroactively during the turn in which you play them.

O4:—*Power of Pain*—If ARYTHEA takes a Wound, and then plays *Power of Pain* and discards that Wound, can she then play the strong effect of *Rush of Adrenaline*? If so, does she throw away the discarded Wound? If not, would she throw away the next Wound she takes?

A4: I think ARYTHEA would be prevented from playing the strong effect because she cannot pay the required cost, that is, throwing away the first Wound she received this turn (as she has already discarded it).⁵⁸³

S5:—*Knockout*—With the strong effect, the Wound that is thrown away—if it was gained during Combat—still counts toward your being knocked out.⁵⁸⁴

Q6:—*Knockout*—If you take enough Wounds to get knocked out, do you draw your *Rush of Adrenaline* card(s) before the knockout rule makes you discard your hand, or after?

A6: Core rule mechanics should have priority of execution over card effects unless card effects explicitly state otherwise. So after you finish taking Wounds into your hand from this enemy's current attack, you check to see if you are knocked out. If you are, you discard all non-wound cards from your hand. Only then do any card draws from *Rush of Adrenaline* apply.⁵⁸⁵

Q7:—*Paralyze*—What happens when an enemy with the paralyze ability wounds your Mage Knight: does the paralyze ability cause you to first discard all non-wound cards *before* making any dictated card draws?

A7: The paralyze damage is an inherent part of taking the Wound, so treat the resulting paralyzation as happening immediately, before *Rush of Adrenaline* can initiate card draws. See Q6 above.⁵⁸⁶

S8:—*Fire Resistance*—Neither effect of *Rush of Adrenaline* is lessened in any way when Wounds are taken from an enemy token that has Fire Resistance: the full effect of *Rush of Adrenaline* continues to apply.⁵⁸⁷

S9:—*Maximal Effect*—With the basic effect of *Maximal Effect*, I would draw three cards for each of the first three wounds. With the strong effect, only the first wound is thrown away, but you draw two cards for the first four wounds you take, not one.⁵⁸⁸

Spell Cards

S1:—*Spell Color*—Spell cards are considered to be the color of the mana used to power their basic effects. So if you use a red Spell card (either its basic effect or its black-mana-boosted strong effect) against an enemy with Fire Resistance, then any non-Attack/non-Block effects of that Spell will not affect that enemy. See Combat Q8, *Maximal Effect* Q3, and *Disintegrate* S2.⁵⁸⁹

S2:—*Basic Effect*—The basic effect of Spell cards—as with all Deed cards—can be played at night as well as during the day.⁵⁹⁰

Burning Shield

Q1:—*SUMMONERS*—If ORC SUMMONERS summon a HYDRA, and you use *Burning Shield* to Block one of the HYDRA's three Attacks but take wounds from its other two Attacks, does the second part of *Burning Shield* kick in for your having used it as part of a successful Block?

A1: There's a distinction between successfully blocking an *attack* and successfully blocking an *enemy*. The wording of *Burning Shield* appears to describe the former. If so, then the Fire Attack of *Burning Shield* is available to attack the ORC SUMMONERS with. See Combat S23. [Some players disagree.]⁵⁹¹

S2:—*Permissible Targets*—The gained Fire Attack need not be used against the same enemy that the Fire Block was used against. It can even be used on a SUMMONER whose MONSTER you successfully blocked.⁵⁹²

S3:—*No Second Mana Needed*—If you Block successfully, you don't pay any mana to activate the Fire Attack. And the Fire Attack works against enemies with Arcane Immunity and those with Fire Resistance.⁵⁹³

Cross References: *Exploding Shield* S3; *Deadly Aim* Q4; *Mana Overload* O4; *Spirit Guides* S3.

Call to Arms

S1:—*Timing*—You can cast *Call to Arms* early in a turn and then use its effect sometime later in the same turn. And you can use *Call to Arms* during Combat, as indicated by its Special Effects icon.⁵⁹⁴

S2:—*Sites*—You can't benefit from *Call to Arms* while in a DUNGEON/TOMB because Units can't be used there. And if you've already taken a Unit with you into a MAZE/LABYRINTH, you can't cast it there either.

[Can you use *Call to Arms* in a MAZE/LABYRINTH if you've gone in unaccompanied and have drawn the enemy token(s)? I'd say yes. What if your accompanying Unit has just been killed by a Paralyze attack? Again, I'd say yes, although the site card does refer to your Unit "*during the entire action*", so some may disagree.]⁵⁹⁵

S3:—*Limitations*—With *Call to Arms*, you cannot ready a spent Unit that you already control, nor refresh the ability of a Unit that you have used. And you cannot use it with *Bonds of Loyalty* to notionally "take this Unit with you" where it's otherwise prohibited, nor to force a Unit to help you burn a MONASTERY. See S13 below.⁵⁹⁶ Nor can you use *Call to Arms* to use a MONASTERY Advanced Action card in the Unit Offer.⁵⁹⁷

Against enemy tokens with Arcane Immunity, you can use Unit Abilities per the usual restrictions.

Q4:—*SHOCKTROOPS*—What happens if you use *Call to Arms* and the bottom effect of SHOCKTROOPS?

A4: The designer, regarding using *Into the Heat* with SHOCKTROOPS, has said that for SHOCKTROOPS "we should have written '*even if not allowed otherwise*' instead of '*even if that enemy has Assassination*'. "⁵⁹⁸ So, going by the re-worded text, any damage from the attack should be assigned to the SHOCKTROOPS, giving it a Wound (even though it's still in the Unit Offer). See Q6 below and SHOCKTROOPS S4.⁵⁹⁹

S5:—*SHOCKTROOPS*—If a SHOCKTROOPS that was put into play by *Call to Arms* absorbs damage from a Paralyze Attack, it should be removed from the Unit Offer. (If Units can be wounded while in the Unit Offer, it stands to reason they can also be killed while there.) See the previous entry and the next entry.

Q6:—*UTEM SWORDSMEN*—What happens if you use *Call to Arms* ("You cannot assign damage to this Unit.") and you choose the lower effect of the *UTEM SWORDSMEN* ("This Unit becomes wounded.")?

A6: The Unit becomes wounded, but note that you're not "assigning damage" to it. It'll remain wounded, and so can't be used in this way again. However the rules state that any Unit recruited from the Offer is recruited ready and healthy, so when recruited, the wounded *UTEM SWORDSMEN* will at that moment be Healed.⁶⁰⁰

S7:—*ILLUSIONISTS*—This is legal: use *Call to Arms* to invoke the Influence ability of an *ILLUSIONISTS*, and then use those Influence points to help you recruit the very same *ILLUSIONISTS* (assuming your Action for the turn is Interact with the Locals and you're at a site where you *can* recruit them). You could then spend the newly acquired *ILLUSIONISTS* to recruit yet another Unit, all in the same turn.⁶⁰¹

S8:—*MAGIC FAMILIARS*—See *MAGIC FAMILIARS* S2: *Call to Arms* does not work on them.⁶⁰²

S9:—*DELPHANA MASTERS*—See *DELPHANA MASTERS* S1: *Call to Arms* does not work on them.⁶⁰³

S10:—*Into the Heat*—*Call to Arms* can be combined with *Into the Heat* to give a Unit in the Unit Offer an increase to its Attack and Block.⁶⁰⁴

O11:—*Leadership*—*Call to Arms* can be used in concert with *Leadership*, which adds additional Attack/Block points to a single Unit.⁶⁰⁵

S12:—*PvP*—If *Call to Arms* is used in *PvP* combat, and you need to know how many enemies you're facing (for effects like *Flame Wave*), then be aware that the *Call to Arms* Unit can count toward the number of enemies.⁶⁰⁶

S13:—*MONASTERY*—You cannot use *Call to Arms* on a Unit when burning a *MONASTERY*, for you have to treat that Unit "as if were one of your recruits".⁶⁰⁷

S14:—*Inspiration*—You cannot re-ready a *Call-to-Arms* Unit with *Inspiration*.⁶⁰⁸

S15:—*Costs*—If there's a mana cost to use an ability of the Unit in the Offer, it must be paid.⁶⁰⁹

S16:—*HEROES*—You can use *Call to Arms* on the Influence ability of a *HEROES* Unit to help you recruit that self-same *HEROES* Unit. And if you do so, the *HEROES* Unit will come to you unused (ready).⁶¹⁰

Cross References: *Call to Glory* S1; *Leadership* Q3; *MAGIC FAMILIARS* S2; *SHOCKTROOPS* S4; *UTEM SWORDSMEN* S1; *DELPHANA MASTERS* S1.

Call to Glory

S1:—*Adventure Sites*—You can cast this while in a *DUNGEON/TOMB*, or while accompanied by a Unit in a *MAZE/LABYRINTH*, but this new Unit doesn't join you in the *ADVENTURE SITE* (unless you're in a *MAZE/LABYRINTH* and you disband and replace the Unit accompanying you, or unless that Unit just died). [Some players disallow calling a Unit to join you in a *MAZE/LABYRINTH* if you went in alone, but I allow it. See *Call to Arms* S2.]⁶¹¹

S2:—*Locals Unneeded*—You don't have to be on a site with Locals to recruit with *Call to Glory*.⁶¹²

S3:—*MAGIC FAMILIARS*—See *MAGIC FAMILIARS* S2: *Call to Glory* does not work with them.⁶¹³

S4:—*DELPHANA MASTERS*—See *DELPHANA MASTERS* S1: *Call to Glory* does not work with them.⁶¹⁴

S5:—*Combat*—You can use *Call to Glory* during *Combat*, due to its "special effects" icon.⁶¹⁵

Cross References: *Influence* Q6; *Magic Talent* Q2; *Banner of Command* S3; MAGIC FAMILIARS S2; DEL-PHANA MASTERS S1.

Charm

S1:—*When Playable*—You're allowed to play *Charm* and not spend the resulting Influence points. And if you're at a site that allows Interaction with the Locals and you choose Interaction as your Action for the turn, then playing *Charm* can gain you a crystal which you can use immediately if you wish.⁶¹⁶

Chill

S1:—*Ice Resistance/Arcane Immunity*—*Chill* and *Lethal Chill* have no effect on enemies with Ice Resistance, nor on enemy tokens with Arcane Immunity.⁶¹⁷

Q2:—*Timing*—Can you use *Chill/Lethal Chill* on an enemy *after* it has already assigned damage?

A2: The loss of Fire Resistance/Armor seems like a secondary effect tied to the primary effect of "*enemy does not attack*." However, since delaying the play of these Spells reduces their effectiveness, I see nothing game-breaking in using them after the targeted enemy token has already assigned its damage. (Why couldn't you make an enemy chilly *after* he punches you instead of before?) A player could even play *Chill/Lethal Chill* between the attacks of an enemy with multiple attacks. See AMOTEP FREEZERS O2.⁶¹⁸

S3:—*SUMMONERS*—*Chill/Lethal Chill* prevent SUMMONERS from drawing MONSTER tokens, but of course only if they don't have Ice Resistance, per S1 just above. See ILLUSIONISTS S2.⁶¹⁹

Cross References: *Combat* S33; AMOTEP FREEZERS O2.

Cure

O1:—*Readying Units*—A Unit need not be *fully* Healed to become readied, but it must have had a least one Wound Healed to be readied.⁶²⁰

S2:—*All Healing Counts*—You draw a card for each Wound Healed from your hand, not only those healed earlier in the turn but also those healed after you play *Cure*. The means of healing do not matter, whether it's through Skills or other cards or map sites. But Wounds thrown away in a MAGICAL GLADE or removed through effects not explicitly labeled "Healing" do not count.⁶²¹

O3:—*Healing Ritual*—Does using *Healing Ritual* to throw away Wounds earn you card draws from *Cure*?

A3: *Healing Ritual* has "Healing" in its name, despite the word not appearing in the body of its description. And there's a hand icon on the Skill description card, so in my view it *is* Healing.

[Some players disagree, saying the phrasing is like that used on the MAGICAL GLADE site card.]⁶²²

Q4:—*Multiple Heals and Draws*—If there's a Wound in your hand when you play *Cure*, and you heal and discard it, then you will draw a card. If this bonus card is also a Wound, can you heal that too?

A4: Yes. And you draw a second bonus card from doing so. See Miscellaneous S9.⁶²³

Cross References: *Healing Ritual* Q4.

Demolish

S1:—*Site Fortifications*—This Spell negates *site* fortifications only (not the fortified icon on enemy tokens)—but it negates all site fortifications. If an enemy is in a fortified site behind a WALL, *Demolish* negates both fortifications.⁶²⁴

Q2:—*Fire Resistance*—Does the *Demolish* Spell work on enemies with Fire Resistance?

A2: The first part does, as it targets the structure not the enemy itself. The armor reduction does not.⁶²⁵

S3:—*Arcane Immunity*—Site fortifications get ignored even for enemies with Arcane Immunity. See Q2 just above.⁶²⁶

S4:—*Fortifications Only*—Only fortifications are affected (and the armor of enemy tokens). The bonuses that CITIES provide—armor or elemental attack increases, Brutal or Poison attributes—still apply.⁶²⁷

S5:—*Future Turns*—If you use *Demolish* to negate site fortifications (whether those fortifications come from WALLS, or CITIES/MAGE TOWERS/KEEPS, or both) but then fail to defeat all of the enemy tokens, you might re-attack that site on a future turn. If you do so, the fortifications will once again be intact. The benefits of *Demolish* do not extend to other Mage Knights participating in a Cooperative Assault.⁶²⁸

Cross References: Combat S33; *Earthquake* Q2; *Expose* S1; ILLUSIONISTS S3.

Disease

S1:—*Multiple Attacks*—All of the Attacks of an enemy need to be successfully Blocked for the armor reduction to apply.⁶²⁹

S2:—*White CITY Bonus*—When *Disease* is played against an enemy token inside the White CITY, the +1 armor bonus of the CITY is applied first, then *Disease* reduces the Armor to 1. See CITIES S7.⁶³⁰

Cross References: CITIES S7; *Counterattack* S4; *Shield Bash* S4; *Burning Shield* Q1.

Disintegrate

S1:—*Fire Resistance / Arcane Immunity*—*Disintegrate* will not destroy enemy tokens with Fire Resistance, such as FIRE MAGES. If you use *Disintegrate* to destroy a susceptible enemy token, other enemies with Fire Resistance will not suffer -1 to their armor. The same goes for enemy tokens with Arcane Immunity.⁶³¹

S2:—*Tome of All Spells*—If you cast *Disintegrate* through the *Tome of All Spells*, any enemies with Fire Resistance will still be immune despite your paying no mana to cast it. See Combat Q7 and *Maximal Effect* Q3.

S3:—*Target of the Spell*—*Disintegrate* eliminates only one enemy token: whichever single enemy token the caster chooses (as long as the token is susceptible to this attack—e.g., no Fire Resistance, no Arcane Immunity). And whenever a Mage Knight casts *Disintegrate*, she must destroy an enemy token in order for other enemies to get -1 to their Armor.⁶³²

Cross References: Combat S33; PvP S9; *Ambush* Q8.

Earthquake

S1:—*Underground Attack*—If you play *Underground Attack* followed by *Earthquake*, only the lesser armor reductions of *Earthquake* apply because the enemy tokens will no longer be fortified (except for enemies with the fortified icon on their token, as these are still fortified.)⁶³³

Q2:—*Demolish*—If you assault a CITY and play both *Earthquake* and *Demolish*, what happens?

A2: Order matters. Play *Earthquake* first to reduce enemy armor by the larger amounts (-6 or -4), then play *Demolish* to remove the site fortifications.⁶³⁴

S3:—*Doubly Fortified*—The larger armor reduction still applies even if an enemy is *doubly* fortified.⁶³⁵

S4:—*Block Phase Use*—You can wait till the Block Phase before playing *Earthquake* and still get the larger reduction versus fortified enemies.⁶³⁶

S5:—*Mixed Fortifications*—If you play *Earthquake* when some enemies are fortified and some are not, and you choose the armor reduction for "all enemies", then the unfortified enemies get the lesser (-2) armor reduction and the fortified enemies get the larger (-4) armor reduction.⁶³⁷

S6:—*Arcane Immunity*—Neither *Earthquake* nor *Tremor* affect the armor of Arcane Immune enemies.⁶³⁸

Cross References: *Mass Expose* S1; *Tremor* S1; *Invocation* S2; *Know your Prey* Q1; DELPHANA MASTERS S6.

Energy Flow

S1:—*Spending Opponent's Units*—When you "spend" Units in other players' areas, simply slide their command token onto their Unit: you don't get to use any of their abilities.⁶³⁹

S2:—*Spending Opponent's Units*—You may spend an opponent's Unit even if that Unit is wounded.⁶⁴⁰

O3:—*Spending Opponent's Units*—When you spend Units in other players' Unit areas, you can choose to do so for some players and not for other players. [The wording on this card is unclear, so I let myself be guided by the "may" and allow the choice.]⁶⁴¹

Energy Steal

Q1:—*DUNGEON / TOMB*—Can you cast *Energy Steal* while you're in a DUNGEON during the day?

A1: No. *Energy Steal* is a Healing Spell and cannot be cast during Combat. As soon as you enter a DUNGEON/TOMB, you're in Combat; and as soon as the Combat ends, you are no longer in the DUNGEON/TOMB and, since it's day, you can no longer use black mana. See Combat Q1.⁶⁴²

S2:—*Spent Units*—If you have an *unspent* wounded Unit, you cannot heal it with this Spell. But you can ready a spent *unwounded* Unit and then still spend your opponents' Units.⁶⁴³

S3:—*Wounded Units*—If a Unit has two Wounds, only one Wound is healed.⁶⁴⁴

S4:—*Spending Opponent's Units*—You may use *Energy Steal* to spend an opponent's Unit even if that Unit is wounded. See *Energy Flow* S2.

Cross References: *Mana* Q7; *Combat* Q2.

Exploding Shield

S1:—*Fire Resistance*—If you use the Fire Block to Block an enemy with Fire Resistance (e.g., FREEZERS), that enemy will not be destroyed but the Fire Block will work as usual. The same is true for an enemy with Arcane Immunity.⁶⁴⁵

Q2:—*SUMMONERS*—If *Exploding Shield* blocks a summoned MONSTER, does it destroy the SUMMONER?

A2: No. The card says you destroy the blocked enemy, which is the summoned MONSTER. And note that destroying the summoned MONSTER does not earn you Fame.⁶⁴⁶

S3:—*Multiple Attacks*—For blocking an enemy with Multiple Attacks, see *Burning Shield* Q1. If you use *Exploding Shield* to successfully block one of the attacks of a (non-Fire Resistant, non-Arcane Immune) enemy that has Multiple Attacks, the enemy token will be destroyed and none of its attacks will be assigned during the Assign Damage Phase. [As discussed in the referenced *Burning Shield* entry, some players hold the opposite view and require that all of the attacks of an enemy token must be successfully blocked.]⁶⁴⁷

Cross References: Combat S23, S33; *Tome of All Spells* S2.

Expose

S1:—*Arcane Immunity*—An enemy with Arcane Immunity does *not* lose its fortifications or its Resistances.⁶⁴⁸ The Ranged Attack, however, can be used normally against any enemy with Arcane Immunity. See SORCERERS S2 for more discussion on the use of the "Ranged Attack 2".⁶⁴⁹

Cross References: Combat O46; PvP O10; *Resistance Break* S2; SORCERERS S1, S2.

Fireball

S1:—*Unplayable vs. Fortification*—In the Ranged-and-Siege-Attack Phase, if all enemy tokens are fortified or doubly fortified, *Fireball* cannot be played, even if you simply wish to spend a red mana die.⁶⁵⁰ See Combat S13.

Firestorm

S1:—*Wound*—The Wound taken is an inherent cost of casting the Spell. And it's always only one Wound, even if you assign the resulting Siege Fire Attack points to enemies with poison.⁶⁵¹

Flame Wave

S1:—*Faction Leaders*—Avatars (faction leaders) do count as enemies. See O5 below.⁶⁵²

S2:—*Counting Enemies*—Any enemies defeated *during* the Ranged-and-Siege-Attack Phase will not increase your Block. Any enemies defeated *before* the Attack Phase will not increase your Attack.⁶⁵³

S3:—*Counting Enemies*—When counting how many enemy tokens you're facing, count all enemy tokens present, not just those you're grouping together for your current Attack. [I include any enemy tokens you've already blocked or killed during *this sub-phase* of combat (but exclude any Summoned MONSTERS, per Q4 just below).] If you're participating in a cooperative CITY assault, count only those enemy tokens (including any Rampaging Enemies) that're assigned to your Mage Knight.⁶⁵⁴

Q4:—*SUMMONERS*—When facing an enemy token that summons MONSTER(S), do you count the summoned enemy tokens when determining the size of the Block?

A4: No—only count the SUMMONER's token. [A few players argue that, during the Block Phase, you should count the Summoned MONSTERS but not the SUMMONER—but that argument seems contrary to the official statement cited in Combat S23.]⁶⁵⁵

O5:—VOLKARE—Does VOLKARE count as an enemy token?

A5: The rules explicitly state that faction leaders are treated as enemy tokens. VOLKARE makes the same kinds of attacks as faction leaders do, so it makes sense to count him as an enemy token when computing *Flame Wave* Block strength. But *Flame Wave* attacks do *not* affect VOLKARE directly, so it also makes sense that *Flame Wave* Attack strength should only count "attackable" enemies, not VOLKARE.⁶⁵⁶

Cross References: *Call to Arms* S12.

Lethal Chill

Cross References: *Chill* S1, Q2, S3.

Mana Bolt

S1:—*Mana Cost*—When you play *Mana Bolt*, you must pay two mana: one blue mana and one mana of a basic color. You cannot pay the initial blue mana and then omit paying the second mana of a basic color. This Spell can be played only during Combat. Similar statements can also be made regarding *Mana Thunderbolt*, where a black mana also has to be paid, raising the number of mana that must be spent to three.⁶⁵⁷

Cross References: *Mana* S12; *Blood of Ancients* S6; *Mana Overload* S2.

Mana Curse

S1:—*Mana Storm*—If *Mana Curse* is in effect and a player uses the basic effect of *Mana Storm*, that player will not take a Wound because that player isn't "using mana". See *Who Needs Magic* Q1.⁶⁵⁸

Cross References: *Mana* S5; *Polarization* S3.

Mana Meltdown

S1:—*Crystal Choice*—You choose the color of the crystal you gain: it isn't chosen randomly.

S2:—*Crystal Loss*—If a player has two blue crystals and one red crystal, then she has a two-thirds chance of losing a blue crystal and a one-third chance of losing the red crystal.⁶⁵⁹

Cross References: *End of Round* S2.

Mana Radiance

Cross References: *End of Round* S2.

Mana Thunderbolt

Cross References: *Mana Bolt* S1; *Tome of All Spells* S1.

Mass Expose

S1:—*Earthquake*—If you play *Earthquake* on a CITY (reducing the armor of all fortified tokens), then play *Mass Expose* (causing enemies to lose fortifications), this reduces the enemies in the CITY to unfortified, low-armor targets. See *Earthquake* Q2 and the endnotes for *Expose* S1.⁶⁶⁰

Cross References: *SORCERERS* S2.

Meditation

S1:—*End of Round*—The gain to your hand size (but not the ability to reorder cards in your deck) will carry over to the next Round if you play this card on the last turn of the current Round.⁶⁶¹

S2:—*Chosen Cards*—You do get to look at the cards after randomly choosing them. And either (a) both of the drawn cards must go on top of your Deed deck, or (b) both of the drawn cards must go below your Deed deck—you don't get to split them. But you do get to choose the order of the two cards.⁶⁶²

[I see a textual argument for a player being able to split the cards above and below (all the more so as this spell seems relatively weak), but I play by the majority opinion that the cards cannot be split.]

O3:—*Card Draw*—If you somehow play *Meditation/Trance* twice during the same turn, or if you cast it twice via the *Time Bending* Spell, do you draw two extra cards next turn—or do you draw four?

A3: With *Time Bending*, you wouldn't draw the extra cards during the first of the two turns because you skip that portion of the turn. So the choice is either to draw +2 or +4 cards during the upcoming End-of-Turn sequence. I'd allow a player to stack the abilities and draw +4, especially as the player may have spent up to four mana to bring this situation about, a steep price!⁶⁶³

S4:—*An Empty Discard Pile*—You are permitted to play *Meditation* even when your discard pile is empty. See also S1 above.⁶⁶⁴

Cross References: Turn Start S1; *Mind Read* S2; *Trance* S1.

Mind Read

S1:—*End of Round*—You cannot steal a card with *Mind Read* after the End of the Round has been announced by a player, nor after the end of a scenario has been triggered by a game-ending condition.⁶⁶⁵

S2:—*Timing*—Someone could potentially play *Midnight Meditation* or *Motivation* after you announce you're playing *Mind Read* or *Mind Steal*, but not after you've announced the chosen color.⁶⁶⁶

S3:—*Action Card*—Action cards include both Basic Action cards and Advanced Action cards.⁶⁶⁷

Cross References: End of Round S2; Dual-Colored Action Cards S1; *Midnight Meditation* S1.

Mist Form

S1:—*Hills/Mountains*—You cannot enter hills or mountains with the Move 4 you gain from this card.

S2:—*Duration*—The reduced terrain cost applies for the remainder of your turn.⁶⁶⁸

S3:—*Provoking Rampaging Enemies*—*Mist Form* movement can provoke Rampaging Enemies.⁶⁶⁹

O4:—*Mountain Lore*—If played in the same turn with *Mountain Lore*, can you enter mountains?

A4: I rule no: *Mist Form* is prohibitive (You cannot . . .), while *Mountain Lore* is merely permissive (You can . . .). Furthermore, *Mist Form* specifically prevents you from entering mountains, which you can't do under ordinary circumstances anyway, so the developers could very well have had the effect of *Mountain Lore* in mind when they wrote the text for *Mist Form*.

[A few players rule the other way, and say the ability to enter mountains depends solely on the order in which you play these two cards, the card played later overruling the earlier card. But see Movement S10.]⁶⁷⁰

Q5:—*Lakes*—Are lakes safe spaces for you on turns in which you play *Mist Form*?

A5: No. This effect doesn't say they're safe. You can voluntarily pause on lakes, but if you're still on them during your End-of-Turn sequence, Forced Withdrawal rules will apply. (*Mountain Lore* explicitly allows you to end your turn on a mountain, and it specifically states mountains are safe spaces for you. Since *Mist Form* doesn't explicitly state the same, we must assume that lakes are *not* safe spaces.)⁶⁷¹

S6:—*Walls*—You do pay the move cost to cross WALLS. See Movement S5 and O9.

S7:—*Move Costs*—The reduced Move costs for all terrains applies for the entire turn.⁶⁷²

Cross References: *Movement O9*.

Offering

S1:—*Rewording*—A possible rewording for greater clarity:⁶⁷³

- Gain a red mana crystal into your inventory.
- You may also discard up to 3 non-wound cards from your hand: for each card discarded, gain a mana crystal matching that card color. (For a discarded Artifact, choose a mana crystal of any single basic color.)

Possess

S1:—*SUMMONERS*—To determine the Attack value of a SUMMONER, draw a MONSTER token and use its values, but you must play *Possess* before this MONSTER token is drawn (see Combat S23). The summoned MONSTER (since it is *not* a separate, targetable entity) cannot be used to attack its own SUMMONER.

Physical Attacks, Ice Attacks, Fire Attacks, Cold-Fire Attacks, Summon Attacks, and Multiple Attacks are all "types of attacks" and not Special Abilities, and so can be used by this spell.⁶⁷⁴

O2:—*Complicated Cases*—If you use the strong effect of this Spell against a GUNNERS token (Fire Attack 6 plus Brutal) defending inside the blue CITY, what Attack do you gain?

A2: You would not gain Brutal, as that is a special ability (nor could you gain Poisonous, Paralyze, Assassinate, Vampiric, or Swiftess). You would gain a Fire Attack 6, plus the +2 Fire Attack for the token being a blue CITY defender (since it's still inside the CITY when it launches its attack).

If the enemy token has multiple attacks (e.g., MAGIC FAMILIARS), you would also gain those multiple attacks. The question then would be, must you use them all together in a single Attack? I rule yes.⁶⁷⁵

S3:—*Arcane Immunity*—*Possess* cannot be used to take control of enemies with Arcane Immunity.⁶⁷⁶

S4:—*Solo Enemy*—If there's only one enemy present in a Combat, *Possess* can still be played, but all it does is prevent that single enemy from attacking you: you cannot use *Possess* to make an enemy attack itself.

S5:—*PvP*—If you play *Possess* in PvP combat, you have to use it in your next Attack Phase. There's a strong argument that it still couldn't be used to wound the Unit that got *Possessed*.⁶⁷⁷

Cross References: *Taunt Q4*.

Rebirth

Q1:—*DUNGEON / TOMB*—Can you cast *Rebirth* when you're in a DUNGEON during the day?

A1: No. *Rebirth* is a Healing Spell and cannot be cast during Combat. As soon as you enter a DUNGEON you're in Combat, and as soon as the Combat ends you're no longer in the DUNGEON and, since it is day, you can no longer use black mana. See Combat Q1.⁶⁷⁸

S2:—*Readying Effect Cannot Be Delayed*—The *Rebirth* Spell can be used to ready one or more Units, but it cannot be used to ready the same Unit twice: you have to process the entire effect immediately, and thus you cannot use the Unit in between your readying acts. This doesn't apply to the Heal points that *Rebirth* provides, for as usual these points can be banked for future use: see Miscellaneous S9.⁶⁷⁹

Cross References: *Ruthless Coercion S1; Magic Talent S5; Regeneration S2; Tome of All Spells S3*.

Restoration

Cross References: *Magic Talent S5; Tome of All Spells S3.*

Sacrifice

S1:—*Rewording*—A possible rewording for greater clarity:⁶⁸⁰

Select exactly two mana colors: choose either green or white, and then either red or blue. Gain:

Siege Fire Attack 4 (for each green and red crystal pair in your inventory), or

Siege Ice Attack 4 (for each green and blue crystal pair in your inventory), or

Ranged Fire Attack 6 (for each white and red crystal pair in your inventory), or

Ranged Ice Attack 6 (for each white and blue crystal pair in your inventory).

Then turn all of the crystal pairs (of the two chosen colors) into mana tokens.

S2:—*Lose All Crystal Pairs*—A player cannot elect to hold back complete pairs of the chosen colors.⁶⁸¹

S3:—*Attack Points Must Be Combined*—If you have two pairs of crystals, you get one Attack 8 or one Attack 12—you *don't* get two separate Attacks 4's or two separate Attack 6's.⁶⁸²

S4:—*Using Converted Crystals*—When generating Attack points with *Sacrifice*, the specified crystal pairs are immediately turned into mana tokens which you can use anytime for any purpose during the remainder of your turn. For instance . . .

—You could use the newly transformed mana tokens to power additional Attack effects that you combine with the Attack points generated by *Sacrifice* and apply them against a single (group of) enemy token(s).

—You could even use the newly transformed mana tokens to power non-Attack effects (such as the green- or white-mana abilities of DELPHANA MASTERS) to cancel resistances or reduce the armor of the enemies you'll be attacking with the *Sacrifice* Attack points. See Combat S28.

For further relevant discussion, see Combat S13, S28, O46, and S49.⁶⁸³

Cross References: *Combat S49; Crystal Mastery S2.*

Space Bending

Q1:—*Multiple Use*—Can *Space Bending* be used more than once in a turn? Can you continue to hop?

A1: Yes, the ability lasts for the rest of your turn (so the Spell really isn't being used more than once).⁶⁸⁴

S2:—*Exploring Tiles*—*Space Bending* lets you explore tiles without being directly adjacent to them.⁶⁸⁵

S3:—*Movement Costs*—With *Space Bending*, you still pay 2 Movement points when you explore a new tile. And you still need to spend the movement point cost of the space you're entering when you move.⁶⁸⁶

S4:—*Combines with Other Effects*—*Space Bending* complements and expands the capabilities of *Flight*, *Wings of Wind*, and *Underground Travel*: see *Flight* Q1 and S2 for an example of how other effects work in concert with *Space Bending*.⁶⁸⁷

S5:—*Before a Failed Attack*—If you move to a fortified site with *Space Bending* and don't defeat all of the enemy tokens in that site, then you retreat to the space you traveled from (two spaces away). This retreat does not cause you to take Wounds (although if the space you have traveled back to is itself *not* a safe space, you'll conduct a Forced Withdrawal at the end of your turn and take Wound(s) then); see Forced Withdrawal S4.⁶⁸⁸

S6:—*Walls*—*Space Bending* says you move to distance spaces "*as if they were adjacent*". When you move like this, you ignore the movement cost of all intervening WALLS.⁶⁸⁹

S7—*Revealing Enemy Tokens*—If you have *Space Bending* active and are two spaces from a MAGE TOWER or KEEP during the day, you do not reveal the enemy token in it.⁶⁹⁰

Cross References: Movement O9; CITIES S10; *Flight* Q1, S2.

Time Bending

S1:—*Setting the Card Aside*—*Time Bending* is set aside after it's played. If you use another card (say *Magic Talent*) to cast *Time Bending*, that other card is set aside instead.⁶⁹¹

S2:—*End of Round*—If the end of the Round has been declared, you can still play *Time Bending* and take another immediate turn.⁶⁹²

S3:—*Maximal Effect*—*Time Bending* does not work with *Maximal Effect* because *Time Bending* is not an Action card. See S13 below.⁶⁹³

S4:—*DUNGEON / TOMB*—You can cast *Time Bending* during the day while in a DUNGEON or TOMB.⁶⁹⁴

S5:—*Casting It Twice*—The only way to use *Time Bending* more than once in a Round is to use it from the Spell Offer via *Magic Talent*, then acquire *Time Bending* from the Spell Offer via normal means. (No matter what, you're not permitted to cast *Time Bending* twice in a row, even if you somehow get it into your hand again during a *Time Bent* turn: see S13 below.)⁶⁹⁵

S6:—*Plundering VILLAGES*—You can plunder a VILLAGE between a normal turn and a *Time Bent* turn.⁶⁹⁶

S7:—*Preparing for the Time-Bent Turn*—When finishing your first, non-*Time Bent* turn . . .

Any used **mana dice** are returned to the SOURCE and all **mana tokens** are discarded.

Check for **Forced Withdrawal**, use your **Space** (MAGICAL GLADE, CRYSTAL MINE), receive **Rewards from Combat**.

Any **cards in your play area** at the end of the turn are returned to your hand.

Any cards that were **discarded** (e.g., with *Improvisation*) or **thrown away** do not return to your hand.

Any **Banners** that were played onto Units remain there (see O12 below), and if the *Banner of Courage* got flipped, it remains flipped.

Any **Wounds** taken into your hand that have not been discarded or thrown away, remain there. But you don't consider hand limits when you re-take your turn, so Wounds won't be an immediate problem.

You can **level up** at the end of the first turn. (New cards placed on your Deed deck, though, won't ordinarily get drawn since the "draw cards" step in the End-of-Turn sequence is skipped.)

A *Time Bending* turn is **an entirely new turn**; it is not part of the turn that preceded it.⁶⁹⁷

S8:—*PvP / VOLKARE*—How you handle *Time Bending* while you're in a PvP Combat or in Combat with VOLKARE depends on if you're fully attending or partially attending the Combat:

If you're **fully attending**, you immediately take your next turn—but that next turn consists of just one step: flipping your Round Order token face up. (You keep the redrawn cards as your hand.) This also happens if you're participating in a Cooperative Assault when you cast *Time Bending*: see S11 below.

If you're only **partially attending**, things get more complicated because you weren't taking your full turn yet and your turn doesn't end until you *do* take your turn. I recommend not casting *Time Bending* until it is your full turn, but if you insist on casting it while only partially attending then whenever you finish the partially attended combat, leave the cards you played in your play area because you'll be collecting them again at the end of your full turn. Then, when that full turn *does* end, you immediately take your *Time Bent* turn.⁶⁹⁸

S9:—*PvP and Stolen Artifacts*—You do not get back any Artifacts stolen from you in PvP combat.⁶⁹⁹

S10:—*One Last Turn*—In several scenarios you get one last turn after the last CITY has been conquered. If you cast *Time Bending* while you're conquering that last CITY, you can get two more turns.⁷⁰⁰

S11:—*Cooperative Assaults*—If someone casts *Time Bending* during a cooperative assault, her *Time Bent* turn doesn't begin until all of the participating players complete their cooperative assaults and any used SOURCE dice are re-rolled. If played by the one who initiated the cooperative assault, she now gets a full turn. If played by someone else, the *Time Bending* player simply turns her Round Order token face up.⁷⁰¹

O12:—*Banners*—If you play a Banner onto a Unit during the first turn, does it return to your hand for use during the second turn? The majority opinion is no, it does not. [Others rule yes, for you get to use other types of Artifacts twice, so why shouldn't you be able to use Banners twice?] See S7 above.⁷⁰²

S13:—*Casting It Twice*—You are not permitted to take two *Time Bending* turns in a row, no matter what combination of effects you play nor what arguments you make. Think of the *Time Bending* Spell as having this additional text: "*Time Bending* is rendered powerless when attempting to cast it during a *Time Bent* turn".⁷⁰³

S14:—*Skills*—At the start of the *Time Bent* turn, previously used Once-a-Turn Skills are "refreshed" and available for use again. Once-a-Round Skills, however, do not automatically get unflipped. Persistent Skills that were played during the immediately preceding turn expire at the start of the *Time Bent* turn (except Cooperative Skills, which can be used in the *Time Bent* turn as normal). See Skill Tokens S5.⁷⁰⁴

Cross References: *Meditation* O3; *Bow of Starsdawn* Q1; *Mana Suppression* S2; *SOURCE Freeze* S3.

Tornado

Cross References: PvP S9.

Trance

S1:—*End of Round*—The gain to your hand limit will carry over to the next Round if *Trance* is played on your last turn of a Round (but not the ability to reorder cards in your deck). See *Meditation* S1 and O3.⁷⁰⁵

Cross References: *Meditation* O3.

Tremor

S1:—*All Enemies*—When this card says "all enemies", it means all enemies that you're facing, not just those that you're grouping together for a single combined attack. (The same applies for *Earthquake*.) In cooperative assaults, the phrase "all enemies" means all the enemies that you yourself are facing.⁷⁰⁶ But even if you group enemy tokens together, only one enemy token can receive a -3 to its armor value.⁷⁰⁷

S2:—*Always Playable in Combat*—Even if this Spell would have no effect in the present Combat, such as when facing a single enemy with Arcane Immunity, it can still be played.

Cross References: *Combat* S28; *PvP* Q1; *Earthquake* S6.

Underground Attack

S1:—*Arcane Immunity*—You ignore site fortifications even for those enemies that have Arcane Immunity, as in *Demolish* S3.⁷⁰⁸

S2:—*Moving Through Obstacles*—You are allowed to move underneath Rampaging Enemies, CITIES, KEEPS, Mage Knights, etc. This movement will not provoke Rampaging Enemies.⁷⁰⁹

S3:—*To Move to an Empty Site*—To end on an already conquered fortified site that is empty of opposing Mage Knights, simply use *Underground Travel*.⁷¹⁰

S4:—*Green CITY*—You are allowed to attack the green CITY even though it appears to be on a swamp space because all CITIES are actually in "CITY" terrain.⁷¹¹

O5:—*PvP*—Can you use *Underground Attack* to attack an opposing Mage Knight who is standing on a mountain space after his having used the advanced action *Mountain Lore* to legally stop there?

A5: *Underground Attack* likely assumes that your movement must be to a space you're otherwise able to enter via ordinary movement—and it has to be a fortified site! If you can't physically tunnel into such a space by *Underground Travel*, then you probably shouldn't be able to do so by *Underground Attack* either—see *Underground Travel* O2.⁷¹²

O6:—*VOLKARE*—Some argue for allowing *Underground Attack* to attack VOLKARE in his camp tile when it's being used in place of a CITY, but this argument feels tenuous at best. In any event, you can't use *Underground Attack* to attack VOLKARE when he's on, say, a mountain, for a mountain isn't a fortified site.⁷¹³

Cross References: *Earthquake* S1; *Wings of Wind* S1; *Flight* S2.

Underground Travel

S1:—*Movement is Free*—You don't expend movement points to move these three spaces: it's free.⁷¹⁴

O2:—*Safe Space*—When it says "end your move on a safe space", is it talking about the *Underground Travel* portion of your move, or is it talking about the end of the Movement Phase as a whole?

A2: It appears to mean "your *Underground Travel* movement of up to three spaces".⁷¹⁵

S3:—*Combining with other Movement*—During the Movement Phase you're allowed to move by expending Move points both before and after playing *Underground Travel*, but you can't move one or two spaces by *Underground Travel*, then do a regular move, then move more spaces by *Underground Travel*.⁷¹⁶

S4:—*Moving through CITIES*—Since CITIES are never in swamps or lakes (including the green CITY), you can move through them.⁷¹⁷

Cross References: Movement S2, S5, O9; *Savage Harvesting* O2; *Mountain Lore* O3; *Space Bending* S4; *Underground Attack* S3, O5; *Wings of Wind* S1; *Flight* S2.

Veil of Mist

S1:—*Only One Wound Is Ignored*—*Veil of Mist* ignores the first Wound received from any enemy this turn, not the first Wound from *each* enemy. And it only ignores a Wound to your Mage Knight, not to a Unit.⁷¹⁸

S2:—*Brutal*—If your Mage Knight herself must take damage from an Attack 7 that is Brutal, and her armor is 3, she will take a total of 4 Wounds: $(7 \times 2 \div 3) - 1 = 3.67$, which rounds to 4.⁷¹⁹

O3:—*VOLKARE*—VOLKARE does count as an enemy.⁷²⁰

S4:—*Additional Effects*—The phrase "ignore any additional effects of that wound" applies only to the Mage Knight herself, not to her Units.⁷²¹

S5:—*Combat Example*—If a player is facing FREEZERS (Cold Attack 3, Paralyze, Swiftess), and plays *Veil of Mist*, this will allow a GUARDIAN GOLEMS Unit (Armor 3, Physical Resistance) to avoid any damage because in this case *Veil* conveys Ice Resistance to the GUARDIAN GOLEMS and the damage inflicted by the FREEZERS (3) is less than or equal to the GUARDIAN GOLEMS armor value (3).

If the FREEZERS' Cold Attack had a value of 4 instead, then the GUARDIAN GOLEMS would take a wound and thereby be destroyed, due to the Paralyze effect (per S4 just above).⁷²²

Whirlwind

S1:—*Elusive*—Using *Whirlwind* to prevent an enemy token with the Elusive ability from attacking does not cause that enemy token to drop to its lower armor value. See *Banner of Fear* Q1.⁷²³

Cross References: *Dueling* S4.

Wings of Night

S1:—*Movement Points Needed*—To prevent, say, four enemy tokens from attacking during this combat, you need to pay six Move points: the first enemy token is free, the second enemy costs 1 Move point, the third costs 2 Move points, and the fourth costs 3 Move points: $0 + 1 + 2 + 3 = 6$ Move points.⁷²⁴

S2:—*Arcane Immunity*—*Wings* has no effect on Arcane Immune enemies: see Arcane Immunity S1.

Cross References: *PvP* S7.

Wings of Wind

S1:—*Flight*—See *Flight* S2 and Movement S5. For obvious thematic reasons, *Wings of Wind* will not work with *Underground Travel/Attack*.

S2:—*Exploring Tiles*—You cannot pause *Wings of Wind* movement, explore new tiles, then continue to move with *Wings of Wind*. Nor can you use any of the 1-to-5 spent movement points to explore new tiles (nor use previously banked movement points to do so).⁷²⁵

O3:—*Safe Space*—When it says "end your move in a safe space", *Wings of Wind* is talking about the movement provided by *Wings of Wind* itself, not about the end of your Movement Phase.⁷²⁶

O4:—*Reacting to New Information*—(a) As you move with *Wings of Wind*, can new enemy tokens be revealed? (b) Can you change the distance you will move (and the number of Move points you spend) on the basis of any newly revealed enemy tokens? (c) Can you change your movement path on the basis of newly revealed tokens? (d) Could you move back and forth between two spaces, if you're forced to move exactly the previously-chosen number of spaces?⁷²⁷

A4: Question (a) is the tricky one: but it should be answered no, via the argument in Movement O9.⁷²⁸

S5:—*Water*—You can move over water with *Wings of Wind*. And you can also move over KEEPS and MAGE TOWERS and Rampaging Enemies.⁷²⁹

Cross References: Movement S2, S5, O9; Combat Q30; *Mountain Lore* O3; *Space Bending* S4; *Underground Travel* O2; *Flight* S2.

Artifact Cards

S1:—*Assigning Banners*—You can assign Banners to Units at any time during your turn. But the strong effect of a Banner card—which causes it to be thrown away—has to be played from your hand, not while the Banner is attached to a Unit. And Banners, like all Artifacts (even those purchased at the red CITY), are gained during the End-of-Turn sequence and so cannot immediately be assigned to Units: see End of Turn S2.⁷³⁰

Q2:—*Multiple Use of Banners*—The rules say that when preparing for a new Round, flip all Banner Artifacts face up. When do Banners get flipped face down? Can Banners be used more than once per Round?

A2: Follow the instructions on each specific Banner card. For instance if you somehow re-ready a Unit with the *Banner of Fear*, you can use the Banner again. The *Banner of Fortitude*, though, says "once a Round", so ordinarily this Banner cannot be reused during the same Round.⁷³¹

Cross References: Influence S8; CITIES S21; End of Turn S5, S6; Miscellaneous S1; Basic Action Cards S1; Concentration S6; Crystal Joy S1; Magic Talent S3; Offering S1; Time Bending S7, S9.

Amulet of Darkness

S1:—*Gold and Black Mana*—You can gain black mana token(s) if you wish. And when you're otherwise entitled to mana dice from the SOURCE, you're allowed to take black mana dice. And you're allowed to use black mana, day or night, no matter its source, including using it to cast the strong spell on Spell cards. But gold mana, although still usable during the day, remains unusable at night. And note that "Night Rules" don't necessarily apply while using the *Amulet of Darkness*—see Miscellaneous S10. See *Amulet of the Sun* S1.⁷³²

S2:—*Duration*—The effects of both *Amulets* apply until the end of the turn in which they're played.⁷³³

Amulet of the Sun

S1:—*At Night*—The Movement cost for desert remains three at night. And you can still use black mana at night, but remember that gold mana cannot be turned into black mana. Skills that have differing effects during day and night (*Day Sharpshooting*, *Dark Negotiation*, etc.) use their night values at night. See Miscellaneous S10, and *Amulet of Darkness* S1 and S2.⁷³⁴

Banner of Command

S1:—*General*—*Lost Legion* p. 5 discusses this specific banner: read that section. If you reclaim this banner at the End of a Round, the Unit is thrown away. You cannot replace the Unit having this banner with a newly recruited Unit. A Unit with this *Banner* can be wounded and spent like ordinary Units.⁷³⁵

S2:—*Recruiting a Unit*—It's permissible, all in one turn, to play *Banner of Command*, use the Influence it grants to recruit a Unit, and then assign the *Banner of Command* to that same Unit.⁷³⁶

S3:—*No Location Restrictions*—Just as with *Call to Glory*, you don't have to be on a site with Locals to recruit a Unit through the strong effect of the *Banner of Command*. See S4.⁷³⁷

S4:—*Strong Effect*—The card text exactly matches that of *Call to Glory*, so it should work similarly, including in Combat and in allowing recruitment from any tile space. See *Call to Glory* S2 and S5.⁷³⁸

Cross References: Influence S9; *Mysterious Box* S2; MAGIC FAMILIARS S2; DELPHANA MASTERS S1.

Banner of Courage

S1:—*Wounded Units*—You can use this Banner to ready the Unit even while it is wounded.⁷³⁹

Cross References: *Time Bending* S7.

Banner of Fear

Q1:—*Does Not Count as Blocking*—Does using *Banner of Fear* count as Blocking an enemy?

A1: *Banner of Fear* is not blocking an Attack—it is *canceling* an Attack. Reducing an Attack to zero is blocking it; preventing it from attacking is *not* blocking it—so the higher armor value of Elusive still applies.⁷⁴⁰

Q2:—*Multiple Attacks*—Does *Banner of Fear* prevent *all* attacks from an enemy with Multiple Attacks?

A2: The basic effect does not: the Banner cancels only one of the attacks. But the strong effect—which must be played directly from your hand—completely stops three enemy tokens from attacking at all.⁷⁴¹

S3:—*Spending the Unit*—When a Unit gains the *Banner of Fear*, it gains an additional ability: the ability to cancel one enemy attack. Using this Banner's ability spends the Unit but does not "use up" the Banner: if you can re-ready the Unit somehow, you can use the Banner again. You cannot use any other ability of this Unit at the same time that you use the *Banner of Fear* ability. [I'm not sure this last limit applies when it's attached to DELPHANA MASTERS, so I allow DELPHANA MASTERS to use their other abilities as well.]⁷⁴²

S4:—*Wounded Unit*—A wounded Unit with the *Banner of Fear* cannot use the Banner's ability.⁷⁴³

Q5:—*SUMMONERS*—Can the *Banner of Fear* prevent a SUMMONER from summoning a MONSTER?

A5: Yes—if the SUMMONER doesn't have Arcane Immunity. See Q7 below.⁷⁴⁴

Q6:—*SUMMONERS*—If you don't use the *Banner of Fear* to cancel a SUMMONER's summoning of a MONSTER), can you use the *Banner of Fear* to cancel the Attack of the MONSTER that is summoned?

A6: No, per an official ruling: "The summoning of the MONSTER" and "the MONSTER launching its attack" are essentially the same simultaneous effect—they're both "the Attack of the SUMMONER". The SUMMONER'S Attack is to hit you with the attack of a MONSTER whose attack it has summoned. (Perhaps the SUMMONER summons the MONSTER inches from you, its claws ripping. Or perhaps the SUMMONER only summons the Attack of the MONSTER, not the MONSTER itself.) In any event you don't get two bites at the apple: a chance to cancel the summoning and then a chance to cancel the attack of the thing summoned: they're one-in-the-same event. You can reduce a summoned MONSTER'S attack, you can block it, but once you've drawn a MONSTER you've missed your chance to cancel its attack. See Combat S23.⁷⁴⁵

Q7:—*Arcane Immunity*—Can a Unit with the *Banner of Fear* prevent an attack by an enemy with Arcane Immunity, such as that of the DRAGON SUMMONER?

A7: No. See Arcane Immunity S1.⁷⁴⁶

[Some players rule that the canceling an enemy attack is effective against enemies with Arcane Immunity because Arcane Immunity permits effects that "*reduce an enemy attack or that affect it in any other way*".⁷⁴⁷ But to me, canceling the attack of a token with Arcane Immunity seems in violation of the first part of the rule: they "*are not affected by any non-Attack/non-Block effects* . . . [and ignore effects that] *prevent it from attacking*". Arguing that "canceling an enemy attack" and "preventing an enemy from attacking" are fundamentally different[†] appears to me to be parsing the language of the rule too finely. Plus, I can't envision how "canceling" a monster's punch would look any different from "preventing" a monster's punch. See Arcane Immunity S1.

[†] - Except of course with regard to the *number* of attacks that are annulled when you prevent an enemy with multiple attacks from attacking altogether.]⁷⁴⁸

S8:—*VOLKARE*—You cannot use the *Banner of Fear* against VOLKARE. See Q7 just above.⁷⁴⁹

Banner of Fortitude

S1:—*Assigning Damage*—Using *Banner of Fortitude* "to ignore the Wound and any additional effects" does count as using the Unit's one allowable "assigning of damage" for this combat.

And you do have to pay THUGS two influence to have them use the *Banner* in this way.⁷⁵⁰

S2:—*Additional Effects*—The "additional effects" prevented by the *Banner of Fortitude* include Paralyze (destruction) and Poison (an additional Wound) and Vampiric (+1 armor bonus for the attacker), but not Brutal of course (which doubles the damage just *before* Wounds get assigned).⁷⁵¹

Cross References: PvP Q1.

Banner of Glory

Cross References: Miscellaneous S12.

Banner of Protection

Q1:—"All Wounds"—Is the strong effect of *Banner of Protection* referring only to Wounds received into your hand, or does it also include Wounds put into your discard pile (from Poisonous Attacks)? And does it include Wounds your Units received? And must you throw away all such Wounds—or can you keep some?

A1: Wounds placed into the discard pile this turn due to Poisonous Attacks may be thrown away. In fact any new Wounds placed into your discard pile this turn—either before or after playing the strong effect of this banner—due to effects like those of *Power of Pain*, *Invocation*, or *I Feel No Pain*, may be thrown away.

But no, it doesn't apply to Wounds your Units have received, nor Wounds you drew from your deck.⁷⁵²

[Regarding whether you must throw away all Wounds you received this turn, the word "may" appears to allow wiggle room, so I'd let players retain some of their new Wounds if they wish.]⁷⁵³

S2:—*Timing*—The strong effect of *Banner of Protection* can be played during combat, as indicated by the crossed swords icon. So you can play it before you get knocked out (which it doesn't prevent), but then remove all of the Wounds your hero himself took this turn when you get to the end of your turn—see Q1.⁷⁵⁴

Book of Wisdom

S1:—*Dual-Colored Advanced Action Cards*—I would allow a player to match either one of the colors of dual-colored Advanced Action cards to draw them.⁷⁵⁵

Bow of Starsdawn

Q1:—*Discards*—Does the Attack bonus gained from the basic effect of *Bow of Starsdawn* count the *Bow* itself as one of the discarded cards? Do the discarded cards get returned with *Time Bending*?

A1: No. No. And you can't discard Wounds for use with the *Bow*.⁷⁵⁶

S2:—*Applies to All Attacks*—The strong effect also applies to Ranged Attacks and Siege Attacks provided by Units and Skills. (With the strong effect, the discard ability of the basic effect does not apply.)⁷⁵⁷

Q3:—*Attack Points Must Be Combined*—Must the Ranged Attacks gained with the basic effect of the *Bow* be used together in one large Ranged Attack, or can they be used separately against different groups of enemies? And can some cards be discarded during the Ranged Attack Phase, and others during the Attack Phase?

A3: They must all be used together in one large Ranged Attack. As for the latter question, no, for the *Bow* says, "When you play this, discard . . ." ⁷⁵⁸

Q4:—*Attack Phase*—Does the strong effect also apply during the Attack Phase?

A4: No. See Combat S6 and *Leadership* S2: there is no difference between Attacks, Ranged Attacks, and Siege Attacks during the Attack Phase—they are all treated as plain old "Attacks".⁷⁵⁹

O5:—ALTEM MAGES—IMO you can use both the strong effect of the *Bow of Starsdawn* (double your Siege Attacks and make them Ranged Attacks, or double your Ranged Attacks) and the black-mana ability of the ALTEM MAGES (all your Attacks become Siege Attacks), but each effect can be applied to an Attack only once, not recursively. And both effects should be played *before* the Attack points are played.

IMO you get to choose the order in which to apply the two effects (that of the *Bow* and that of the MAGES), and you can **choose a different order for each** Attack-point *effect* that you play.⁷⁶⁰

Neither of the effects apply during the Attack Phase because in that phase all Ranged Attacks and all Siege Attacks are treated as ordinary Attacks. See Combat S6 and *Leadership* S2.

IMO you can play Ranged Attacks and assign them to a Fortified enemy (which ordinarily wouldn't be allowed), then double those Ranged Attack points with the previously played *Bow*, and then with a previously-powered MAGES ability convert those doubled Ranged Attacks into Siege Attacks (which now will be effective against a Fortified enemy): see Combat S13 and S49.⁷⁶¹ [Other players don't permit any doubling from the *Bow* to be applied in between "the playing of Ranged Attack points against a Fortified target" and "the conversion of those Ranged Attack points into Siege Attack points" by the MAGES.]

The black mana ability "*all attacks ... become Cold Fire Attacks*" of ALTEM MAGES combines just fine with the basic effect of the *Bow*, and also with the strong effect of the *Bow*.⁷⁶²

S6:—Separate Attacks—With the strong effect, if you have two cards that provide Ranged Attacks, you are allowed to double one of the Ranged Attacks and turn the other Ranged Attack into a Siege Attack. And if you have two cards that provide Siege Attacks, you can double one of the Siege Attacks and turn it into a Ranged Attack, while keeping the other Siege Attack as a Siege Attack.⁷⁶³

Cross References: Miscellaneous S12; *Ambush* Q8; *Deadly Aim* Q4.

Circlet of Proficiency

S1:—General—The *Circlet of Proficiency* is to be "*evaluated as playing a single effect*"—*Lost Legion*, p. 9. The most straightforward approach for using the basic effect of the *Circlet* with once-a-turn Skills is to "play the skill twice" at the moment that you play the card: e.g., have all of the targets or Units or whatever be determined at the moment the card is played, which generally limits the Skill to the Phase in which the *Circlet* is played (although persisting or ensuing effects will work as they usually do).

Another issue is whether to restrict the "use its effect twice" to the same target, thereby treating the two uses of the Skill as a single doubled effect. Generally, Attack points and Block points should be restricted to a single group or target (respectively): so *Cold Swordsmanship* would be (Ice) Attack +4 against a single target, and *Shield Mastery* would be a single Block of +6 or +4. See Basic Action Cards S2.⁷⁶⁴

S2:—Battle Frenzy / Shield Mastery / Forked Lightning—With *Battle Frenzy*, you must play the Attack 2 plus Attack 2 against the same group of enemy tokens. A similar thing goes for *Shield Mastery*: it has to be used against a single enemy Attack. With *Forked Lightning*, you could stack the six Attack 1's to a maximum of Attack 2 per any given enemy token.⁷⁶⁵

S3:—Battle Hardened / Elemental Resistance—With *Battle Hardened* apply both effects to the current Attack unless the current Attack produces ≤ 2 points of physical damage or only 1 point of non-physical damage, in which case the second usage of the Skill will apply the next time one or more points of damage would otherwise be assigned to your Mage Knight. A similar thing goes for *Elemental Resistance*.⁷⁶⁶

O4:—Bonds of Loyalty—How does the basic effect interact with *Bonds of Loyalty*?

A4: The best course is to disallow using the basic effect of the *Circlet* with *Bonds of Loyalty*.⁷⁶⁷

S5:—*Burning Power*—With *Burning Power*, you could get Siege Attack 1 for the first use and get Fire Siege Attack 1 for the second, but since you must use both Attacks against a single group of enemies (because the *Circlet* is evaluated as a single effect), it would never make sense to mix both types of Attack.⁷⁶⁸

S6:—*Curse*—With *Curse*, you can use its effects (a) on two different attacks from the same enemy token, (b) on a separate attack from two different enemy tokens, (c) on the same attack twice, (d) on the armor value of two different enemy tokens, (e) on the armor value of one enemy token twice, (f) against one enemy attack and against the armor of the same enemy token, or (g) against one enemy attack and against the armor of a different enemy token.⁷⁶⁹

S7:—*Dark Paths*—With *Dark Paths*, you gain the doubled Move points immediately; you cannot gain some during the Movement Phase and the rest during the Action Phase.⁷⁷⁰

S8:—*Deadly Aim*—This combination will affect two different cards and both should be used against the same group of enemy tokens (because *Circlet* should be evaluated as a single effect, if possible). It's equivalent to playing a single Skill that says "Add +1/+2 to a card. Add +1/+2 to a card.", i.e., to two different cards and to do so immediately. [You could argue for applying the effect twice to the same card, or to cards in two different Attacks, but the above interpretation seems more consistent with other rulings. See S14 and S16 below.]⁷⁷¹

S9:—*Dueling*—With *Dueling*, you use the effect during the Block Phase and must use it twice against the same enemy Attack. So it gives you Block 2 against a single enemy token, then Attack 2 against that same enemy token, then Fame +2.⁷⁷²

S10:—*Feral Allies* / *Hawk Eyes*—With *Feral Allies*, you're allowed to reduce the Attack of two different enemies by one, or the Attack of one enemy twice, but if your first use of the *Circlet* comes during the Attack Phase, you must use both Attack 1's then, which means using both together for an Attack 2. Both uses of *Feral Allies* must occur in the same phase: either two Attack reductions or one Attack of 2—not one of each.

As for the cost of exploring tiles, it should only be reduced by 1 because the tile-exploring portion of the Skill isn't restricted to "once a turn". The same is true for *Hawk Eyes*.⁷⁷³

S11:—*Leadership*—With *Leadership*, you don't apply the bonus twice to the same Unit: you apply the bonus to two *different* Units. These Units can be activated at different times during your turn, perhaps one Unit during the Block Phase and the second Unit during the Attack Phase. Nor do you need to predesignate the second of the two Units you'll be activating.⁷⁷⁴

Q12:—*Master of Chaos*—How does the basic effect of the *Circlet* interact with *Master of Chaos*?

A12: Roll a spare mana die, then take the next two clockwise effects. You have to play them in order, but you can skip either or both of them. You then remove your shield token from the Skill token.⁷⁷⁵

S13:—*Shapeshift*—With *Shapeshift*, you use it on two different cards, which you can use at any time during your turn. [A stickler would rule that you must use *Shapeshift* exactly twice, and that if you can't, then you can't play this combination.]⁷⁷⁶

S14:—*Spirit Guides*—*Spirit Guides* can already span the Movement Phase and Action Phase, so when *Circlet* is used with *Spirit Guides*, you get Move 2 in the current phase (in either the Movement Phase or the Action Phase—not 1 in each) and in the Combat Phase you get +1 Block to two separate Blocks (perhaps from *Determination*, say, and from a Block provided by the GUARDIAN GOLEMS). Both Blocks can be used together against the same enemy Attack if you wish. [Allowing two "+1 Blocks" to be applied to a single card/Skill/Unit ability feels contrary to MKBG mechanics: in MKBG, we often stack multiple effects against enemy armor or against enemy attacks or to affect terrain costs, but we seldom stack more than one modification directly onto a single base effect. See *Circlet of Proficiency* S8 and S11, and *Who Needs Magic* S2.]⁷⁷⁷

S15:—*Taunt*—With *Taunt*, you can use it on two different enemy tokens, or twice on the current enemy attack (choosing either the same effect twice—"Attack -2" or "Attack +4 and Armor -4"—or choosing each effect once for a composite "Attack +1 and Armor -2"). In neither case can you use it to increase a token's attack after you have blocked it.⁷⁷⁸

S16:—*Cards Played Sideways*—With *I Don't Give a Damn*, *Power of Pain*, or *Who Needs Magic*, you have to play the Skill on two *different* cards/Wounds, but you don't need to play both cards immediately: you can play the second card later in the turn. Similarly, *Universal Power* is played on two different sideways cards.

Q: Why can you delay one of *these* cards, but not delay one of the cards in S8 above?

A: Because unlike in S8, *these* cards can also be used for things other than Attack or Block—things like Move or Influence, things that don't have to be enacted immediately. See S1 above.⁷⁷⁹

S17:—*Strong Effect*—Where the strong effect of the *Circlet* says "as if acquired through a Level Up", it does not mean that you have to wait until the end of your turn before you can use the newly gotten Skill.⁷⁸⁰

S18:—*Shield Mastery*—Both Blocks must be used together in one composite Block. And choosing Ice Block 2 plus Fire Block 2 does not give you Cold Fire Block 4: it gives you Ice Block 2 plus Fire Block 2—both, neither, or one of which might be efficient against the current attack. For combining different types of Blocks, see Combat S4.⁷⁸¹

S19:—*Resistance Break*—As with *Taunt* discussed in S15 above, I'd allow a player to reduce one enemy token's armor twice, or the armor of two separate enemy tokens once.⁷⁸²

S20:—*Puppet Master*—One enemy that you defeat in the Ranged-and-Siege-Attack Phase, Block Phase, or Attack Phase can be used against a different (group of) enemy tokens during the Attack Phase.

Cross References: *Bonds of Loyalty* S4; *Tome of Relearning* S2.

Diamond Ring, Emerald Ring, Ruby Ring, Sapphire Ring

S1:—*Black Mana*—With the strong effects of these *Rings*, you get an endless supply of black mana, but you're still bound by the usual restrictions on when that black mana can be used. See Mana S3.⁷⁸³

Cross References: PvP S1; Resting S3.

Druidic Staff

S1:—*Timing*—Once the Action portion of your turn has begun, you're no longer allowed to use the *Druidic Staff* to move up to two revealed spaces. See S5 below.

S2:—*Moving Through Obstacles or Rampaging Enemies*—With the white card option, you may move through impassable terrain, including spaces occupied by Rampaging Enemies and fortified sites. You also do not provoke Rampaging Enemies when you use the *Druidic Staff* to move. [This latter point isn't explicitly stated on the card, likely due to space limitations, but it parallels the effects of other cards.]⁷⁸⁴

S3:—*Readying Units*—You may not "Ready a Unit" or "Heal 3" during Combat. See S5 below.

S4:—*Strong Effect*—With the strong effect, you choose two different options from the basic-effect portion of the card. And, except for Heal points, both options must be used at the moment you play the Artifact.⁷⁸⁵

S5:—*Combat*—If used during Combat, only the "Get 2 crystals" ability should be allowed.⁷⁸⁶

S6:—*Color of Artifact*—If you discard an Artifact with the basic effect, it has no color and gives you nothing.⁷⁸⁷

Cross References: Movement S2, O9; Ultimate Edition Dual-Colored Action Cards O4.

Endless Bag of Gold

Q1:—*Timing*—Can you play this Artifact to gain 2 Fame, thereby gaining a level and acquiring a new command token, and then use the Influence to buy a new Unit to place under that command token?

A1: No. Level ups happen during your End-of-Turn sequence, so you haven't yet leveled up. (The only exception to that strict sequence occurs when you gain a Unit as a combat reward at a RUINS.)⁷⁸⁸

Q2:—*Unspent Points*—Can you use the *Bag* anytime, not spending the Influence, simply to gain Fame?

A2: Yes, as it doesn't say you have to be Interacting with the Locals. See Influence S1.⁷⁸⁹

Endless Gem Pouch

S1:—*DUNGEONS / TOMBS*—If you play the strong effect in the darkness of a DUNGEON/TOMB, you gain the black mana token, not the gold. See Miscellaneous S10.

Cross References: Scenarios S6.

Golden Grail

S1:—*Fame*—The wording on this card is a little awkward. With the basic effect, if you use the Heal 2 to remove a Wound from a level-II Unit, you gain 2 Fame, since this card refers to "each Healing point" you use, not to each Wound you remove. If you use another Healing effect together with the 2 Heal points of this card to heal a level-III or -IV Unit, you also gain 2 Fame.⁷⁹⁰

Horn of Wrath

S1:—*Timing of Wounds*—Wounds are gained immediately. So you can play *Horn* in the Attack Phase, gain a wound, then pair *Power of Pain* with that Wound to create a combined *Horn-plus-Power* Attack of 7.⁷⁹¹

S2:—*Timing of Wounds*—With the strong effect, you announce how much extra damage you'll be adding to the Attack before you roll any dice.

Mysterious Box

S1:—*Effect*—This *Ultimate Edition* Artifact allows you to reveal an Artifact and use the *Mysterious Box* as that Artifact. Then "if [you] did not use [the] *Mysterious Box*, put [the *Mysterious Box*] back [into] your hand; if you placed [the *Mysterious Box*] on a Unit as a banner, discard [the *Mysterious Box*]"⁷⁹²

S2:—*Usage*—⁷⁹³

(a) If you use the *Box* for the basic effect of a revealed Artifact, discard the *Box* at the end of your turn.

(b) If you use the *Box* as a Banner on a Unit, (which you do by placing the *Box* itself on that Unit), you discard the *Box*—i.e., "the Banner"—at the end of your turn.

(1) For using the *Box* as the *Banner of Command*, see S1 under that topic.

(c) There is no separate strong effect: if you use the revealed Artifact for its strong effect, you throw away the *Box*.

(d) If you don't use the revealed Artifact at all, you put the *Box* back into your hand.

And no matter what you do, the revealed Artifact always goes to the bottom of the Artifact deck at the end of your turn.

Q3:—*Timing*—Do you reclaim the *Box* before drawing up to your hand limit, or after?

A3: Return it to your hand at the same time that you discard your played cards, during End of Turn step 3b, before drawing back up to your hand limit.⁷⁹⁴

S4:—*Minimum Turn*—Playing the *Box* and then taking it back into your hand on the same turn does not in itself meet the requirements of "having played at least one card". See Minimum Turn S1.

S5:—*Playing it Sideways*—You can play the *Box* sideways the same as you could if it were any other Artifact in your hand. But you don't get the +1 Fame if you do so and the *Box* gets discarded afterwards.⁷⁹⁵

S6:—*Timing*—When you play the *Box* from your hand, its effect merely activates your ability to use it as the revealed Artifact. But when you actually do use the *Box* as that revealed Artifact, you must follow all of the normal timing rules that would otherwise apply to your *playing* that revealed Artifact from your hand.⁷⁹⁶

Shield of the Fallen Kings

S1:—*Ambush*—See *Ambush* Q7.⁷⁹⁷

Soul Harvester

S1:—*Timing of Rewards*—The crystal reward(s) for killing enemy tokens are gained immediately on killing them. Accordingly, you could then immediately use that crystal in attacking another enemy token, even during the same sub-phase of Combat. (Note: you can't gain a crystal for killing a summoned MONSTER.)⁷⁹⁸

S2:—*Timing*—You cannot play the basic effect during the Ranged-and-Siege-Attack Phase (unless pairing it with, say, the black-mana ability of the ALTEM MAGES: see *Bow of Starsdawn* O5). The same restriction generally applies to the strong effect, except that you could play the strong effect during the Ranged-and-Siege-Attack Phase, forego the Attack 8 entirely, and still gain crystals for any enemies defeated during the Ranged-and-Siege-Attack Phase.⁷⁹⁹

O3:—*VOLKARE*—You do not gain a crystal for killing VOLKARE with the strong effect of *Soul Harvester* because you aren't directly killing him.⁸⁰⁰

Sword of Justice

S1:—*Timing*—The doubling of physical attacks with the strong effect applies only during the Attack Phase, not during the Ranged-and-Siege-Attack Phase. The loss of physical resistance, though, applies to the whole turn. If you break the *Sword* during the Ranged-and-Siege-Attack Phase, the doubling of physical attacks will still happen when you get to the Attack Phase.⁸⁰¹

S2:—*Timing*—If you know you're going to be knocked out during the Assign Damage Phase, you are allowed to break the *Sword* before then and so enable all of your Units and Skills to double their physical attacks during the Attack Phase. Contrarily, the basic effect cannot be played before the Attack Phase (unless coupled with, say, the black mana effect of ALTEM MAGES: see S6 below and *Soul Harvester* S2).⁸⁰²

S3:—*All Attacks are Affected*—The strong effect does double physical attacks from Units and Skills in addition to those from Deed cards.⁸⁰³

Q4:—*Attack Points Must Be Combined*—Must the Attacks gained through the basic effect of the *Sword* be used together in one large Attack, or can they be used separately against different enemies?

A4: They must all be used together in one combined Attack against one group of enemies.⁸⁰⁴ That isn't the case, though, with the strong effect where Attacks from separate deed cards, Units, and Skills can be doubled and used against different targets.

S5:—*Fame*—You gain +1 Fame for every enemy you defeat this turn, by any means, including any defeated before you played the *Sword*. Summoned MONSTERS and VOLKARE (*Soul Harvester* O3) do not count.⁸⁰⁵

S6:—*ALTEM MAGES*—The strong effect of the *Sword* cannot be combined with the black-mana ALTEM MAGES ability (to allow all Attacks to become Siege Attacks) because the strong effect of the *Sword* specifically limits its effect to the Attack Phase, when there are no Siege Attacks. However the other combinations are permitted: all physical attacks doubled in the Attack Phase by the strong effect of the *Sword* can be made into Cold Fire Attacks by the ALTEM MAGES; and all Attacks gotten through the basic effect of the *Sword* can be made into either Siege Attacks (see *Bow of Starsdawn* O5) or Cold Fire Attacks by the ALTEM MAGES.⁸⁰⁶

S7:—*Combining Effects*—If you've played the strong effect of *Ambush* (+2 to the first Attack), and the strong effect of the *Sword* (double all physical Attacks), and then play the basic effect of *Rage* (Attack 2), the final strength will be $2 \times (2 + 2) = 8$ Attack points, which must all be used against a single group of enemy tokens. The *Sword* doubles the final result of this combination because the "double . . . all" phrasing indicates it is applied last. A second *Rage* card that is played after this point will also be doubled and can be used against a different (group of) enemy target(s).⁸⁰⁷

S8:—*Wound Cards*—As always, Wounds cannot be discarded when using the basic effect text that says, "discard any number of cards."⁸⁰⁸

S9:—*Arcane Immunity*—The strong effect of the *Sword* does not remove the physical resistance of enemies with Arcane Immunity.⁸⁰⁹

Cross References: Combat S5; Miscellaneous S12; *Ambush* Q8; *Deadly Aim* Q4.

Tome of All Spells

S1:—*Mana Costs*—The strong effect permits a player to forgo paying both the basic-color mana and the black mana. Any additional cost, though, such as with *Mana Thunderbolt*, still has to be paid (as would also be the case when playing the basic effect of *Mana Bolt*). See *Blood of Ancients* S6.⁸¹⁰

S2:—*General*—When you cast a Spell from the Spell Offer, treat that Spell as if it substitutes for the *Tome*. For instance, if you've played *Ambush*, and then you cast *Exploding Shield* through the *Tome*, *Exploding Shield* will count as a played Fire Block and can meet the requirements of *Ambush*.

[Some players argue that you didn't actually play *Exploding Shield*, and thus it doesn't meet the requirements of *Ambush*. They argue that *Magic Talent* works with *Ambush* because *Magic Talent* uses the phrase "play one Spell card", unlike the *Tome* which uses the phrase "use the basic/strong effect of a Spell." I think this is parsing the text too finely, for in either case—*Tome* or *Magic Talent*—you're casting a Spell from the Spell Offer as if it were in your hand.]

A similar argument allows *Ambush* to apply to an Advanced Action card put into play through the strong effect of *Blood of Ancients*.⁸¹¹

S3:—*No Healing Effects during Combat*—If you use the *Tome* during Combat, you cannot cast a Healing spell like *Restoration* or *Rebirth*.⁸¹²

S4:—*Discarding an Artifact*—An Artifact has no color: discarding it is of no use.⁸¹³

S5:—*Magic Talent*—You can contrive to cast a specific Spell twice from the Spell Offer: once with *Magic Talent* and once with the *Tome*.⁸¹⁴

Cross References: *Ambush* O10; *Blood of Ancients* S3; *Disintegrate* S2; *Deadly Aim* Q2.

Skill Tokens

S1:—*Timing*—Skills can be used only during your own turn unless the Skill description explicitly says otherwise (e.g., *Motivation*). Using a Skill does not count as your Action Phase unless it says so.⁸¹⁵

S2:—*Single-Use*—As you flip a Skill token, you can use its ability only once. For instance *Polarization* lets you change one mana token, and one mana token only. *Deadly Aim* modifies only one card. *Regenerate* lets you throw away only one Wound. *Leadership* can affect only one Unit each turn. Etc.⁸¹⁶

S3:—*Skills Offer*—In general, you may not take one of your own Skills from the Skills Offer.⁸¹⁷

S4:—*Interactive Skills*—Competitive and cooperative Skills that are put into play in the center of the table always expire on your normal turn order, regardless of whether your Round Order token is face-up or face-down (e.g., regardless of whether you've participated in a PvP Combat or a Cooperative Assault in the interim). Exception: all Skills expire when a Round ends. See *SOURCE Freeze S3*.⁸¹⁸

S5:—*Interactive Skills*—You cannot affect other players with competitive Skills either (a) after the end of a Round has been announced, or (b) after the end of a scenario has been triggered by a game ending condition being met (e.g., in Full Conquest after the last CITY has been conquered). Skills put into play before the end of the Round was announced/before the game end was triggered will continue to affect players as usual even after the end of the Round is announced/the end of the game is triggered. See End of Round S2.

Every Mage Knight has eleven Skill tokens. Of these, two are Interactive: one is competitive (black helmet icon) and one is cooperative (white helmet icon). Players include only one of these two Interactive Skills in their playable pool of ten Skills, depending on the scenario.

—In competitive scenarios, you use the competitive Skill. If you're playing with Team Rules, your teammates ignore the negative effects of competitive Skills.

—In cooperative or solo scenarios, you use the cooperative Skill. In solo games, the secondary advantage accrues to you during your ensuing turn; in cooperative games, it accrues to other players.⁸¹⁹

The above applies to all scenarios, even those that make no mention of Interactive Skills.

Where the Team Rules talks about "Interactive Skills", they mean "competitive Skills", for there were no cooperative Skills when the base game rulebook was written.⁸²⁰

S6:—*Interactive Skills*—Some Interactive Skills affect other players "during their turn" or "on their turn," such as *Mana Suppression* and *Mana Exploit*. If, while these Skills are in effect, other players partially attend a PvP combat, they are—strictly speaking—not taking their turn during that combat, and consequently are not affected by these Skills.

But other Interactive Skills, such as *Wolf's Howl* (which says "*Until the start of your next turn . . .*"), do apply to other players even if only partially attending a Combat. Let the text of the Skill guide you. And note that when a player participates in a Cooperative Assault or fully attends a PvP Combat, she is taking her turn ahead of time and so will be affected by Interactive Skills during that Cooperative Assault or PvP Combat.⁸²¹

S7:—*Flip-Back Skills*—Three of the Skills in the KRANG expansion have a new ability: Flip Back. These Skills are *Arcane Disguise*, *Battle Frenzy*, and *Shamanic Ritual*. Once a turn, these Skills can be flipped back to be face up under a specific condition; they also flip back at the start of each Round.

With *Shamanic Ritual*, you could use it once, meet the special condition to flip it face-up, and then use the Skill a second time—all in the same turn. This multiple-use possibility can't occur with the other Flip-Back Skills seeing as their descriptions explicitly state "once a turn".⁸²²

Arcane Disguise (KRANG)

S1:—"X" Reputation—With this Skill, KRANG can even Interact with the Locals while his Reputation is on the "X" spot of the Reputation track.⁸²³

Cross References: Miscellaneous S12; Skill Tokens S7.

Battle Frenzy (KRANG)

S1:—*A Stand-Alone Effect*—The Attack 2 or 4 given by this Skill doesn't need to be tacked onto another Attack: it can be used all by itself as an Attack 2 or 4. The same goes for *Day Sharpshooting* and other similarly worded Skills. See Miscellaneous S12.⁸²⁴

S2:—*Resting without Wounds*—You are allowed to take a Standard Rest even if you have no Wounds, and can thereby flip this Skill back. See Skill Tokens S7, and Resting Q1 and S3.⁸²⁵

S3:—*Flip-Back*—If you don't use the Flip-Back ability of a Skill, it will nevertheless still be flipped back up at the start of every Round.⁸²⁶

Cross References: Miscellaneous S12; *Circlet of Proficiency* S2.

Battle Hardened (KRANG)

Q1:—*Brutal*—Against a Brutal enemy, does the damage reduction happen before damage doubling?

A1: No. You double the damage for the Brutal ability first, then reduce the applied damage.⁸²⁷

Q2:—*Damage Reduction*—What happens if an enemy token has a 4 physical Attack, you don't Block it, and you assign the damage to your Mage Knight who has an armor of 3?

A2: When an Attack is unblocked it becomes damage. The Attack 4 becomes four damage, which *Battle Hardening* reduces to two, and this is then compared to your armor. So in this case you take one Wound.

Notice the difference between reducing damage points and reducing Attacks (c.f., *Dodge and Weave*). If the enemy above had had Brutal, the 4 Attack points would've become 8 points of damage, which would've then been reduced by *Battle Hardening* to 6, which would've resulted in two Wounds against your three armor. This is different than if an effect had *reduced the enemy Attack* by two: in that case there would have been 4 - 2 = 2 points of damage, which Brutal would have doubled to 4, but which also would have left us with two Wounds against our three armor—the same end result in this case, but through different math.⁸²⁸

S3:—*PvP*—In Melee, if a BLOCKER's Mage Knight has an armor of 3, and the ATTACKER plays a physical Attack of 8, and the BLOCKER decides not to play any Blocks, and if the ATTACKER decides to assign 2x3 damage to the BLOCKER's Mage Knight and to use the remaining 2 damage to force the BLOCKER to retreat to an adjacent spot, the BLOCKER could then play *Battle Hardened* to reduce his outcome from two Wounds to one.⁸²⁹

Cross References: PvP Q1, O12; *Circlet of Proficiency* S3.

Beguile (BRAEVALAR)

S1:—*Fortified Site*—When you're in a fortified site, you gain only 2 Influence, not 3.⁸³⁰

Cross References: Miscellaneous S12.

Bonds of Loyalty (NOROWAS)

Q1a:—*DUNGEON/TOMB*—Can you use this Unit in a DUNGEON/TOMB? A1a: Yes.

Q1b:—*MAZE/LABYRINTH*—Can you use this Unit along with another in a MAZE/LABYRINTH? A1b: No.

Q1c:—*MONASTERIES*—Can you use this Unit for burning MONASTERIES? A1c: Yes.⁸³¹

Q2:—*End of Round*—If you level-up on your last turn of a Round and choose *Bonds of Loyalty*, are the two new Units added to the Unit Offer at that point—or do you delay them till the beginning of the next Round?

A2: They're added immediately, and they will not be replaced in the next Round.⁸³²

Q3:—*If the Unit Dies*—If a Unit under *Bonds of Loyalty* is removed (due to Paralyze), can you recruit a new Unit under it? If so, do you gain the 5 Influence discount all over again?

A3: Yes. Yes.⁸³³

S4:—*Circlet of Proficiency*—Using the *Circlet* to play *Bonds of Loyalty* will result in nothing happening. See *Circlet of Proficiency* O4.

S5:—*Recruiting*—You're allowed to recruit either a silver (regular) or a gold (elite) Unit. Other than the Influence discount, recruiting a Unit for *Bonds of Loyalty* is done via the normal recruiting processes.⁸³⁴

S6:—*Wounded / Spent*—A *Bonds* Unit cannot be used when it's wounded or when it's unready.⁸³⁵

S7:—*Timing*—If you're gaining a new Unit as a combat reward, but you don't have an open command token, you cannot delay taking the new Unit until you level up in the hopes of gaining *Bonds of Loyalty*.⁸³⁶

S8:—*Unit Offer*—You aren't restricted to recruiting one of the two Units that get added to the Unit Offer by *Bonds*. Similarly, other players can recruit those two Units normally during their own turns. The extra two Units, if not recruited before the end of the Round, are removed and are not replenished in the next Round.⁸³⁷

S9:—*MAGIC FAMILIARS*—If you have *MAGIC FAMILIARS* under *Bonds of Loyalty*, and you have a crystal, you are not forced to use that crystal to keep them happy, although they'll still be removed from the game if you don't.⁸³⁸

Cross References: Variants S2; *Call to Arms* S3; *Circlet of Proficiency* O4; *Howl of the Pack* S4; *DELPHANA MASTERS* S1; *HEROES* S3.

Bright Negotiation (NOROWAS)

S1:—*DUNGEON / TOMB*—You cannot use *Bright Negotiation* to generate Influence just before entering a *DUNGEON* and then use that 3 Influence along with *Diplomacy* while in the *DUNGEON* for a Block, because all Influence points disappear the moment you begin your Action for the turn. Instead, you would have to settle for the 2 Influence which *Bright Negotiation* provides while in the night of a *DUNGEON*.⁸³⁹

Cross References: Combat Q2; Miscellaneous S12; Scenarios S6.

Burning Power (ARYTHEA)

Cross References: Miscellaneous S12; *Circlet of Proficiency* S5.

Cold Swordsmanship (TOVAK)

Cross References: Miscellaneous S12; *Circlet of Proficiency* S1.

Curse (Krang)

S1:—*Arcane Immunity*—Enemy tokens with Arcane Immunity are not affected by armor reductions, but they can be affected by Attack reductions.⁸⁴⁰

Cross References: Arcane Immunity S1; *Circlet of Proficiency* S6, S15.

Dark Fire Magic (ARYTHEA)

Q1:—*Black Mana*—Can you use the black mana token during the day?

A1: Only if otherwise permitted, as when in a *TOMB/DUNGEON*. Or, say, with *Polarization* to turn the gained black mana into gold mana.⁸⁴¹

Dark Negotiation (ARYTHEA)

S1:—*DUNGEON / TOMB*—You can use *Dark Negotiation* to generate 3 Influence points after entering a DUNGEON (even during the day), and then use those 3 Influence points along with, say, *Diplomacy* as a Block.⁸⁴²

Cross References: Combat Q2; Miscellaneous S12.

Dark Paths (ARYTHEA)

Cross References: Miscellaneous S12; *Circlet of Proficiency* S7.

Day Sharpshooting (NOROWAS)

S1:—*DUNGEON / TOMB*—If used down in a DUNGEON/TOMB during the day, it provides only 1 Ranged Attack, as it's always night in a DUNGEON/TOMB.⁸⁴³

Cross References: Combat Q2; Miscellaneous S12; Scenarios S6; *Battle Frenzy* S1.

Deadly Aim (WOLFHAWK)

Q1:—*Units*—Can this Skill be used to affect Unit "cards"?

A1: No. See Silver Units S5.⁸⁴⁴

Q2:—*Use with Indirect Effects*—Does this Skill work with *Concentration* or *Maximal Effect* and similar cards if the composite effect ultimately provides Attack points?

A2: The Skill description reads, "*Add +1 to a card that provides any type of Attack . . .*" The text effect doesn't say that the card must provide these points directly, so you can permit those combinations. See *Maximal Effect* S13 and *Mana Overload* S6. But you can't play *Deadly Aim* on the cards that *Concentration* or *Maximal Effect* empower because you can't interrupt the execution of one effect to play another effect.⁸⁴⁵

You can't play *Deadly Aim* on Attack points gotten through *Agility*. The card *Agility* isn't providing Attack points itself; it's providing an ability to convert Move points *into* Attack points, an ability that can be used multiple times. Nor can you play *Deadly Aim* on cards that will provide the converted Move points. See Miscellaneous S9.⁸⁴⁶

But you can play *Deadly Aim* with a card played via *Magic Talent* or *Tome of All Spells* or *Blood of Ancients* because the enabling card is triggering the effect of a secondary card, and so it is giving you Attack points. See *Tome of All Spells* S2.⁸⁴⁷

Q3:—*Dodge and Weave*—Does *Deadly Aim* work with *Dodge and Weave* plus *Fire Gem*?

A3: *Dodge and Weave* gives you Attack points, so *Fire Gem* ("*add the Fire element to an attack . . . from a single action card*") can modify a *Dodge and Weave* attack.

Can *Deadly Aim* ("*add +1 to a card that provides any type of attack*") then increase this compounded Fire Attack? Yes. And you can even play the faction token and the Skill in a later phase than when *Dodge and Weave* was played.⁸⁴⁸

Q4:—*Burning Shield / Bow of Starsdawn / Sword of Justice*—Does *Deadly Aim* work with *Burning Shield*, or with the basic effect of *Bow of Starsdawn / Sword of Justice*?

A4: The Fire Attack from *Burning Shield* is like the Attack of *Dodge and Weave* (see Q3 above), so yes. The basic effect of *Bow of Starsdawn* should be eligible for the +1 of *Deadly Aim*, whether that Bow Attack is 2, or 4, or 6, etc. Similarly for *Sword of Justice*.⁸⁴⁹

S5:—*Swiftness in Attack Phase*—Playing *Deadly Aim* on the strong effect of *Swiftness* provides a +2 to the Attack points in the Attack Phase. See Combat S6.⁸⁵⁰

S6:—*Ritual of Pain—Deadly Aim* can be played on a Wound card played sideways with *Ritual of Pain* to give a total of $3 + 2 = 5$ Attack points during the Attack Phase. *Deadly Aim* works similarly with *I Don't Give a Damn*, *Power of Pain*, *Universal Power*, *Who Needs Magic*, and *Wolf's Howl*.

Cross References: Combat S5; Miscellaneous S12; *Maximal Effect* S13; Skill Tokens S2; *Circlet of Proficiency* S8.

Double Time (TOVAK)

Cross References: Miscellaneous S12.

Dueling (WOLFHAWK)

S1:—*General*—This Skill isn't used until the Block Phase: if the enemy is dead by that time (having been killed in the Ranged-and-Siege-Attack Phase), you can't use this Skill on it.

If you apply the Block 1 against an enemy, you don't have to *successfully* Block its Attack(s) to qualify for the Attack 1 or the Fame +1.⁸⁵¹

S2:—*SUMMONERS*—If this Skill is used as a Block against a summoned MONSTER, the 1 Attack *will* apply in the Attack Phase against the SUMMONER.⁸⁵² [Remember that with SUMMONERS, the attack itself isn't a separate enemy: see Combat S23. Nevertheless, some players don't allow the 1 Attack to apply to SUMMONERS. See further discussion in *Taunt O2*.]

S3:—*Assigning Damage*—You're still considered to be "assigning damage" to a Unit even if the Unit has a matching Resistance and enough armor to avoid receiving a Wound from the attack. See Combat S35.⁸⁵³

S4:—*When No Block is Needed*—If an effect like *Whirlwind* prevents an enemy token from attacking, there's no Block Phase for this enemy, so *Dueling* cannot be used against it. If an effect like *Swift Reflexes* reduces an attack to zero, that attack is considered to have been successfully blocked, but you may still play additional Block points against it and thereby use *Dueling* to gain an Attack 1 against it during the Attack Phase.⁸⁵⁴

Cross References: Combat S23; PvP Q1; Miscellaneous S12; *Circlet of Proficiency* S9; *Howl of the Pack* S3; *Spirit Guides* S2.

Elemental Resistance (BRAEVALAR)

Q1:—*Brutal*—When used against an enemy that does Brutal damage, does the damage reduction occur before doubling it for being Brutal?

A1: No: you double the damage first, then you reduce the applied damage. See *Battle Hardened* Q2.⁸⁵⁵

S2:—*Cold Fire Attack*—*Elemental Resistance* reduces a Cold Fire Attack by 1.⁸⁵⁶

Cross References: *Circlet of Proficiency* S3.

Feral Allies (BRAEVALAR)

Q1:—*Tile Exploration*—The exploring cost reduction applies for the whole turn and applies to every tile that is explored.⁸⁵⁷

S2:—*Arcane Immunity*—Enemy tokens with Arcane Immunity can be affected by attack reductions. See Arcane Immunity S1.⁸⁵⁸

Cross References: Miscellaneous S12; *Circlet of Proficiency* S10.

Flight (GOLDYX)

Q1:—*Space Bending*—If you use *Space Bending* then *Flight*, can you move 4 spaces for 2 Move points?

A1: Unlike *Space Bending* (which produces an effect that stays in play for the entire turn—see *Space Bending* Q1), *Flight* produces an effect that's enacted immediately. So if *Flight* is used after *Space Bending*, the first option for *Flight*—"move to an adjacent space for free"—becomes "move to a hex that is 1 or 2 spaces away for free." The second option for *Flight*—"move 2 spaces for 2 Movement points"—allows each of those spaces to be "bent", so you can effectively move up to 4 spaces for 2 Move points. When using *Flight*, you choose only one of the two *Flight* options. See Movement O9.⁸⁵⁹

S2:—*Wings of Wind*—You can't combine *Wings of Wind* with *Flight* because *Flight* says, "flip this Skill to move to . . . a space," while *Wings of Wind* says, "when you play this . . . move". Both are instantaneous effects.⁸⁶⁰ And for obvious thematic reasons, *Flight* will not work with *Underground Travel/Attack*.

S3:—*Obstacles*—You are allowed to fly over mountains and lakes and unconquered fortified sites, and even over or around Rampaging Enemies without provoking them.⁸⁶¹

S4:—*Revealing Tiles*—You can't use *Flight* to move onto tiles that haven't previously been revealed. Nor can you use *Flight* to reveal new tiles.⁸⁶²

Cross References: Movement O9; Resting S4; *Mountain Lore* O3; *Space Bending* S4; *Underground Travel* O2; *Wings of Wind* S1; *Prayer of Weather* S1.

Forked Lightning (BRAEVALAR)

S1:—*PvP*—In PvP combat, you get Cold Fire Ranged Attack 1 against each enemy you're facing, up to a maximum of 3 enemies. When assigning damage you must, if possible, assign at least 1 damage to that many different enemies even if the damage has no effect. So if you're facing a Mage Knight with 4 armor who has two Units of 3 and 5 armor, and if after Blocking you are left with 5 points of damage to assign, you would only be able to wound the Unit with 3 armor and then to assign 1 useless point of damage each to the Mage Knight and to the second Unit.⁸⁶³

S2:—*Faction Leaders*—Faction Leaders do count as enemies. VOLKARE isn't attacked directly, so he does not count.⁸⁶⁴

S3:—*Combining Prohibited*—If you're facing only one enemy token, you can use only one of the three Ranged Cold Fire Attack points against it.⁸⁶⁵

Q4:—*Grouping Enemies*—If you're attacking three enemy tokens in a group of two and a group of one (if, say, you're grouping them by their Resistances), can you use *Forked Lightning* against all three tokens?

A4: You can use Cold Fire Ranged Attack 2 against the group of two and Cold Fire Ranged Attack 1 against the single token, just so long as all of the Attacks are in the Ranged-and-Siege-Attack Phase or all of the Attacks are in the Attack Phase.⁸⁶⁶

S5:—*Timing*—All three Attacks need to be used in the same sub-phase of combat.⁸⁶⁷

Cross References: Combat O46; Miscellaneous S12; *Circlet of Proficiency* S2.

Forward March (NOROWAS)

Q1:—*Adventure Sites*—Can this Skill, "Move 1 for each ready unwounded Unit you control, up to 3", be used in a MAZE/LABYRINTH? Can it be used in a TOMB/DUNGEON?

A1: You're restricted to a maximum of 1 Movement point in a MAZE/LABYRINTH, and would get no Movement points in a TOMB/DUNGEON.⁸⁶⁸ [If you go by a literal reading of the Skill description, there seems to be no such restrictions—but that doesn't seem to be in the spirit of the rules.]

S2:—*Ready Units*—You could activate *Forward March* while you have two ready unwounded Units (gaining 2 movement points), and then activate one of those Units (say, a SCOUTS or a FORESTER) for an additional 2 movement points, and then use those combined 4 movement points to enter, say, a wasteland hex.⁸⁶⁹

Cross References: Miscellaneous S9.

Freezing Power (GOLDYX)

Cross References: Miscellaneous S12.

Glittering Fortune (GOLDYX)

S1:—*Timing*—When this skill is triggered, that's when the crystals in your inventory are examined. It is acceptable to then spend those crystals alongside the gained Influence and use them to power other effects.⁸⁷⁰

Hawk Eyes (WOLFHAWK)

S1:—*Duration*—The exploring cost reduction and the garrison revealing distance are altered for the full duration of the turn, not just for a once-a-turn use.

Cross References: Miscellaneous S12; *Circlet of Proficiency* S10; *Feral Allies* Q1.

Healing Ritual (ARYTHEA)

Q1:—*Closest Opponent*—How do you determine which Mage Knight is closest?

A1: Count the distance on the map, in hexes. The movement cost of hexes, whether or not those hexes are passable, or whether a tile for those hexes has yet to be placed, is immaterial: magic travels in a beeline.⁸⁷¹

S2:—*Wounds*—If you have more than one Wound card, you can decide to get rid of only one.⁸⁷²

Q3:—*Wounds*—If you discard only one Wound card, can you decide whether it goes to the Wound deck or to the closest Mage Knight?

A3: Yes. [The effect doesn't explicitly demand that it go into the hand of another Mage Knight, though a few players argue that it must.]⁸⁷³

Q4:—*Timing*—Is this Skill "Healing"? Can you use it during Combat?

A4: Yes: it's called *Healing Ritual* and has a hand symbol shown on the reference card.

No, as there's a hand symbol on the Skill description card. See *Cure* O3.⁸⁷⁴

O5:—*End of Round*—Can you use *Healing Ritual* after the end of the Round has been announced?

A5: Yes, and both Wounds would go back to the Wound deck. [Some could argue you can't separate the "throwing away of a second Wound" from its "going into the hand of another hero". But for most Interactive Skills, the portion of the effect that harms other players is not coupled to the portion that benefits the skill owner, so I feel it's fair in this situation to decouple the throwing away of the second Wound from its destination.]⁸⁷⁵

Cross References: Minimum Turn S3; Miscellaneous S9; *Cure* O3.

Hot Swordsmanship (ARYTHEA)

Cross References: *Miscellaneous S12*.

Howl of the Pack (WOLFhawk)

S1:—*Minimum Armor*—Armor can never drop below one.⁸⁷⁶

S2:—*SUMMONERS*—When fighting SUMMONERS, you can use the armor reduction on the SUMMONER, and the Attack reduction on the Summoned MONSTER. [Some dispute this, but it seems legitimate to me. See the discussion in *Dueling S2* and *Taunt O2*.]⁸⁷⁷

S3:—*Cooperative Assaults*—In a cooperative CITY assault, a player earlier in round-order may put *Howl* into play, and a player later in round-order could use its secondary ability, all in the same fight.⁸⁷⁸

S4:—*Dismissing Units*—You cannot dismiss recruited Units: you can replace them (if you have no free command tokens) and they can be killed by Paralyzing wounds, but that's it. See *Bonds of Loyalty S9*.

S5:—*Arcane Immunity*—Enemy tokens with Arcane Immunity are not affected by armor reductions, but they can be affected by attack reductions. See *Arcane Immunity S1*.

I Don't Give a Damn (TOVAK)

S1:—*Not Cumulative with Similar Skills*—You cannot play more than one of the *I Don't Give a Damn*, *Universal Power*, *Who Needs Magic*, and *Wolf's Howl* Skills on the same sideways card. See *Who Needs Magic S2*.

S2:—*Advanced Action Cards*—The character-specific Basic Action cards that include *Cold Toughness*, *Tirelessness*, etc., are not Advanced Action cards—they are Basic Action cards.⁸⁷⁹

S3:—*Wounds*—This Skill cannot be used with Wound cards.⁸⁸⁰

Cross References: *Circlet of Proficiency S16*; *Deadly Aim S6*; *Power of Pain S2*; *Universal Power S2*; *Who Needs Magic S2*; *Wolf's Howl S1*.

I Feel No Pain . . . (TOVAK)

Cross References: *Combat Q22*; *Minimum Turn S3*; *Miscellaneous S9*; *Banner of Protection Q1*.

Invocation (ARYTHEA)

S1:—*Black Mana*—If you discard a Wound to gain a black mana token during the day, you can use that mana token only if you're otherwise allowed to do so, like while you're in a DUNGEON/TOMB.⁸⁸¹

S2:—*Timing of Wounds*—The following play is legal: at night you (a) play *Blizzard* and take a Wound, (b) use *Invocation* to gain a black mana token, and then (c) cast *Earthquake* with that black mana token.⁸⁸²

You cannot, however, play the basic effect of *Blood of Ancients* to gain a Wound, then interrupt *Blood of Ancients* to use *Invocation* to turn the newly gained Wound into mana, and then use it to "Pay one mana of any color" as required by *Blood of Ancients*.⁸⁸³

Invocation is a Special Effects Skill (see the icon on the Skill description card) and usable in Combat.⁸⁸⁴

S3:—*Polarization*—You are allowed to gain a mana token with *Invocation*, and immediately transform that token into its opposite color with *Polarization*, and immediately use it.⁸⁸⁵

Cross References: *Minimum Turn S3*; *Blood Rage S2*; *Banner of Protection Q1*.

Inspiration (NOROWAS)

Q1:—*Timing*—Can this Skill be used to Heal a Unit during Combat?

A1: No, for it says "Heal" and the description card shows a "hand" symbol.⁸⁸⁶

S2:—*Healing Units*—If you use *Inspiration* on a Unit with two Wounds, it heals only one of them.⁸⁸⁷

Cross References: *Combat S3*; *Call to Arms S14*.

Know Your Prey (WOLFHAWK)

Q1:—*General*—What is an ability? What if, for example, you face the ALTEM GUARDSMEN that has all 3 Resistances? Can *Know Your Prey* also remove the bonus that a CITY gives?

A1: You can remove:

- Any offensive ability: Assassination, Brutal, Paralyze, Poison, Swift, or Vampiric.
- Any defensive ability: Defense (from *TEZLA*), Elusive, Fortified, or a Physical/Fire/Ice Resistance (one of them).⁸⁸⁸
- Any color of a single attack: Fire or Ice become Physical; Cold-Fire becomes Fire or Ice (your choice).

So you can use *Prey* to remove one of the ALTEM GUARDSMEN'S Resistances, effectively reducing their armor by 7 (since whatever your type of Attack is, it can now be *fully* effective against them).

—To remove the Fortified ability, the ability has to be printed on the token. Defenders in a fortified site or behind a WALL are not endowed with the Fortified ability: rather, their location prevents you from playing Ranged Attacks against them during the Ranged-and-Siege-Attack Phase. Similarly, the Brutal bonus which the red CITY confers and the Poison bonus which the green CITY confers cannot be ignored by this Skill, as they're not physically printed on the enemy token.⁸⁸⁹

—The Summon Attack is not an ability, and thus cannot be canceled. Nor is a Multiple Attack something you can remove with this Skill.⁸⁹⁰

—Cumbersome and Unfortified are also Offensive and Defensive abilities, respectively, but usually you won't want to remove these, barring edge cases like with *Earthquake*.

—Remember you cannot use *Prey* on enemies with Arcane Immunity (which is miswritten as "magic immunity" on the Skill description card), nor can you use *Prey* on the opposing Mage Knight in PvP combat (because Mage Knights can never be targeted).⁸⁹¹

O2:—*CITY Bonuses*—If you use this Skill to remove the Ice or Fire element of an enemy inside the Blue CITY—the CITY that adds strength to Ice/Fire Attacks—does the enemy also lose this +1 or +2 Attack bonus? Conversely, if you use this Skill to remove the Ice element of an Ice Attack from an enemy in the Green CITY—the CITY that adds the Poisonous ability to Physical Attacks—does that enemy gain the Poisonous ability?⁸⁹²

[IMO the better approach is to say that enemy tokens receive the CITY bonus as soon as those enemy tokens are revealed, and that any changes which occur after that point cannot add or remove a CITY bonus, so the answers to the above questions are no and no. See *Resistance Break S2* and *CITIES S7* (where the armor bonus from the white CITY is the first thing to be added).

The opposite approach is to add and remove the bonuses as the abilities and Resistances of the enemy tokens change, in which case the answers would be yes and yes. *Prey* changes the values of the enemy tokens themselves, which is what the CITY bonuses modify—so in this view it's almost as if starting over again with a new token draw. One of the playtesters sides with this view.]

O3:—*PvP*—How does *Know your Prey* work in PvP combats?⁸⁹³

[Opinions vary. I'd disallow it against Attacks coming from a Mage Knight, either directly from Deed cards or from Skills, for I like treating Mage Knights as if they have Arcane Immunity—per PvP Combat O8. On the other hand, allowing *Prey* to "remove one element of one attack" could be viewed as affecting the Attack, not the Mage Knight himself—if it weren't for the "not applicable to arcane immunity" symbol on the Skill. When using *Prey* against Units, I'd let it remove one ability of one Unit or affect one attack of one Unit.]

Q4:—*Summoned MONSTERS*—Can you use this Skill to remove an offensive ability from a MONSTER that has been summoned by an enemy token that itself has Arcane Immunity (e.g., DRAGON SUMMONER)?

A4: The summoned MONSTER replaces the SUMMONER during the Block and Damage phases, so if the summoned MONSTER itself doesn't have Arcane Immunity, it is a fair target for this Skill during those phases.⁸⁹⁴

Cross References: PvP O8, O10; CITIES S5.

Leadership (NOROWAS)

S1:—*Base Ability Required*—This Skill boosts the abilities that a Unit already has. You can give +3 Block only to Units that already have a Block value. And it applies to only one Unit per turn. See Miscellaneous S12.⁸⁹⁵

S2:—*The Attack Phase*—During the Attack Phase there is no difference between Attacks, Ranged Attacks, and Siege Attacks, so if you use *Leadership* during the Attack Phase you get +2 regardless of what type of Attack is shown on the Unit. See Combat S6.⁸⁹⁶

If you have CATAPULTS (Siege Attack 3/5/5), and you have *Leadership*, you can't use it on them in the Ranged-and-Siege-Attack Phase (because they are Siege Attacks, not Ranged Attacks); however you can use *Leadership* to raise their Attack in the Attack Phase.⁸⁹⁷

Q3:—*Call to Arms*—Can you use *Leadership* with a Unit activated by *Call to Arms*?

A3: Sure. [Some players question this play, but it seems legitimate to me.]⁸⁹⁸

S4:—*Different Types of Blocks*—If *Leadership* (Block +3) is applied to an UTEM GUARDSMEN'S Block 4 that counts twice against Swiftiness, the +3 is also doubled against Swiftiness so the combined Block ends up being a Block 14. Similarly, if the Block +3 is applied to an inefficient Block, the +3 will also be halved.⁸⁹⁹

Cross References: Combat S6; Miscellaneous S12; *Call to Arms* O11; *Bow of Starsdawn* Q4, O5; *Circlet of Proficiency* S11; Skill Tokens S2.

Mana Exploit (TOVAK)

S1:—*Timing*—If a player takes a Wound from *Mana Exploit* while paying a green mana to power *In Need*, the newly gained Wound does give the player an additional 2 Influence from *In Need*.⁹⁰⁰

Cross References: Skill Tokens S6; *Polarization* S3.

Mana Overload (TOVAK)

S1:—*Units*—For the purpose of this Skill, a Unit is *not* "a card". Preferably the Skill description should have said "played card" or "Deed card". See Silver Units S5.⁹⁰¹

S2:—*Powering Cards*—When this Skill is in the center, and you play the basic effect of *Pure Magic* or *Mana Bolt*, and you pay a mana to get the desired result, the mana that you pay is *not* considered to be "powering a card" and therefore the +4 bonus from *Mana Overload* does not kick in.⁹⁰²

S3:—*Powering Cards*—If you use mana of the indicated color to power a card—and that card *doesn't* give Influence, Move, Attack, or Block—then the *Mana Overload* Skill *stays* in the center of the table until someone *does* use a same-colored mana to power a card that gives those types of points. See S6 below.⁹⁰³

O4:—*Cards with Multiple Effects*—What happens if you use *Mana Overload* to give you +4 with a card that gives both Block and Attack points (like *Burning Shield*)—which ability gets the +4?⁹⁰⁴

[No one could argue against your using the +4 with the first points that end up getting used, although the wording seems to allow you to add the +4 to any one of the specified point types that you gain from the card.]

S5:—*Use Not Required*—The owner of the *Mana Overload* Skill doesn't *have* to use the mana he gains. And if he doesn't, he's still allowed to put this Skill into play.⁹⁰⁵

S6:—*Indirect Effects*—A card which only indirectly provides Influence, Move, Attack, or Block points (*Into the Heat*, *Concentration*, *Maximal Effect*) does not trigger the +4 special effect. Similarly, the strong effect of *Blood of Ancients* doesn't trigger *Mana Overload* no matter what color mana is on the *Mana Overload* token: *Blood of Ancients* doesn't give Move, Attack, or Block points itself, so the red mana used doesn't meet the requirements, and the Advanced Action card you trigger isn't being directly powered by a mana of any color.⁹⁰⁶

Cross References: *Concentration* Q1; *Maximal Effect* S13; *Polarization* S3.

Mana Suppression (KRANG)

S1:—*General*—This interactive Skill applies to mana no matter what form that mana is in: the first time a player uses a mana die, expends a mana token, or expends a mana crystal of a basic color, she must pay one extra mana (in whatever form she wishes) to do so. If she uses a gold mana, it's treated as whichever basic color she uses that gold mana for. The extra mana must be paid immediately: she can't use mana to power an effect that creates the extra mana that she needs to pay the cost of *Mana Suppression*.⁹⁰⁷

S2:—*Multiple Turns*—If a non-KRANG player takes two turns in a row (say, by using the Tactic *The Right Moment* or by using the Spell *Time Bending*), turns that fall in between the turn in which KRANG plays *Mana Suppression* and KRANG's next turn, then that player would be subjected to *Mana Suppression* twice!⁹⁰⁸

Cross References: Skill Tokens S6.

Master of Chaos (KRANG)

S1:—*Start of Round*—If you didn't use *Master of Chaos* in your last turn of the previous Round, and you're going first in this Round, you can draw your hand and your Tactic card before you decide whether to move the shield token ahead, similarly to how *Motivation* works: see *Motivation* S6.⁹⁰⁹

S2:—*Cost*—You don't pay the marked mana color to use this Skill: the mana colors are present only to allow a mana die to randomly select the initial ability.⁹¹⁰

Cross References: Turn Start S1; Miscellaneous S12; *Circlet of Proficiency* Q12.

Motivation (several)

S1:—*Solo Games*—In solo games, you're considered to have the least Fame of any player. You're also considered to have the most Fame. So if you use *Motivation* in solo games, you gain the mana (or the Fame).⁹¹¹

S2:—*Timing*—You can use *Motivation* during your own turn, even during Combat. And any Wounds drawn from your deck this way do not contribute toward reaching the knockout threshold.⁹¹²

S3:—*Draw Deck Empty*—Even if you have fewer than two cards in your draw deck, you're still allowed to play *Motivation*. It does not, however, cause you to reshuffle your draw deck: if your draw deck is empty, you get no card draws but you can still get the mana or Fame bonus, etc., if you qualify.⁹¹³

S4:—*Knockout / Paralyze*—See Combat Q22.

S5:—*Multiple Motivation Skills*—Some players take the text literally and do not play another *Motivation* Skill "until the end of their next turn", yet the wording is likely simply meant to prevent players from drawing more than two cards in a turn from *Motivation* Skills.⁹¹⁴ Either way, the restriction resets at new Rounds.

S6:—*Start of Round*—At the start of a Round, you cannot use your *Motivation* Skill until after everyone has drawn their Tactic card.⁹¹⁵

Cross References: Turn Start S1; Mana Q8; Combat Q22; PvP Q1; Influence S8; End of Turn S10; *Mind Read* S2; Skill Tokens S1; *Master of Chaos* S1.

Nature's Vengeance (BRAEVALAR)

S1:—*Increased Attack Strength*—The owner of this Skill isn't affected by the increased Attack strength of enemy tokens: that adverse effect applies only to other players. And the +1 increased Attack strength applies only during the Block Phase (as verified by the co-designer of *TEZLA*); it doesn't apply when players are assigning damage. For enemies with multiple attacks, the strength of each attack is increased by one.⁹¹⁶

S2:—*Combining Effects*—When an opposing player who is under the competitive effect of this Skill faces PROWLERS (Armor 3, Attack 4, Fame 2) and uses the strong effect of *Dodge and Weave* to "reduce one enemy attack by 4", then during the Block Phase the PROWLERS will have an attack of 1. If this reduced attack of 1 goes unblocked, then no damage will be assigned during the Assign Damage Phase per S1 just above—but the attack will not count as having been successfully blocked.⁹¹⁷

S3:—*SUMMONERS*—*Nature's Vengeance* cannot target a SUMMONER enemy token, but it can target a summoned MONSTER. For the Skill owner, that MONSTER gains -1 to one of its Attacks and all its Attacks become Cumbersome. Against a DRAGON SUMMONER, only one of the summoned MONSTERS would be affected.⁹¹⁸

O4:—*Arcane Immunity*—Attacks from enemy tokens with Arcane Immunity can gain Cumbersome. [Other players rule oppositely: see the endnote references.]⁹¹⁹

Cross References: PvP O14; Combat S25.

Night Sharpshooting (TOVAK)

S1:—*DUNGEON / TOMB*—If used in a DUNGEON/TOMB during the day, it provides Ranged Attack 2.⁹²⁰

Cross References: Combat Q2; Miscellaneous S12.

On Her Own (WOLFHAWK)

S1:—*Weak*—As Skills go, *On Her Own* feels weak. One possible enhancement would be to give it a base of two Influence, plus an additional 2 Influence if you do not recruit any Unit for Influence this turn.

Cross References: Miscellaneous S12.

Polarization (ARYTHEA)

S1:—*Black / Gold Mana*—You're permitted to take a depleted dice from the SOURCE and turn it into its opposite color. The abilities and restrictions on gold and black mana, however, still apply if you change the die into one of those two colors. If the die was depleted, you still reroll it at the end of your turn.⁹²¹

S2:—*Die Must Be Used*—You cannot change a die in the SOURCE with *Polarization* if you won't be using that die (e.g., you can't change a die simply to be able to re-roll it at the end of your turn).⁹²²

S3:—*Gold Mana*—Using gold mana is "the same as using mana of the desired color . . . for all purposes." If we apply this to *Polarization*, then using a black mana as a gold mana during the day requires you to then use that gold mana as a basic color mana. See Mana S5. So the original black mana should be considered to be the basic color mana it ultimately gets changed into (red, blue, white, or green), including when applying Skills like *Mana Exploit* and *Mana Overload* to that mana's use.⁹²³

S4:—*Mana No Matter the Form*—You can use *Polarization* on mana no matter its form: crystal, mana token, or SOURCE die (assuming you're otherwise allowed to use the SOURCE die). You then must use the changed mana!⁹²⁴

S5:—*Mana Pull*—You cannot interrupt the execution of one effect to execute a different effect. At night you can use *Mana Pull* to gain access to a gold mana from the SOURCE and then (having finished with *Mana Pull*), use *Polarization* to turn it into a black mana. This is fine—just so long as you immediately use that black mana (see Mana S5). What you can't do is then go back to *Mana Pull* and try to use the newly created black mana as if it were a "mana of any color".

Nor would the opposite order work: if you take (as your one-allowed free mana) a gold mana from the SOURCE, and then use *Polarization* to change it into black mana, you now have to use that black mana. In any event it's no longer in the SOURCE, so playing *Mana Pull* at this point will have no effect on it.⁹²⁵

Cross References: Skill Tokens S2; *Invocation* S3; *Who Needs Magic* Q1; ALTEM MAGES Q3.

Power of Pain (ARYTHEA)

Q1:—*Timing of Wounds*—Can you take a Wound from a single enemy with Multiple Attacks, then use that Wound with *Power of Pain* and use it to Block a second Attack from the *same* Enemy?

A1: No, because all blocking occurs in the Block Phase, and only after all blocking is done does the Assign Damage Phase occur.⁹²⁶

S2:—*Not Cumulative with Similar Skills*—You can't combine *Power of Pain* with *Universal Power* on the same Wound card. A sideways Wound card augmented by *Power of Pain* won't work with *Universal Power* as it's now +2, not +1—and because you can't interrupt one effect to execute another. Similar arguments hold for *I Don't Give a Damn*, *Who Needs Magic*, and *Wolf's Howl*. See *Who Needs Magic* S2.⁹²⁷

S3:—*Knocked Out*—If you begin the Combat Phase with no Wounds, then take a Wound during combat, then use *Power of Pain* to discard that Wound, then take more Wounds until you have in your hand one Wound less than your hand size, you'll still be knocked out despite your having discarded the early Wound.⁹²⁸

Cross References: Minimum Turn S2; *Blood Rage* S2; *In Need* S1; *Rush of Adrenaline* O4; *Banner of Protection* Q1; *Circlet of Proficiency* S16; *Horn of Wrath* S1; *Deadly Aim* S6; *Ritual of Pain* S2; *Universal Power* S3; *Wolf's Howl* S1.

Prayer of Weather (NOROWAS)

S1:—*General*—This Skill affects the movement cost of terrain. *Flight* ignores the cost of terrain, so *Prayer of Weather* has no effect on *Flight*. And note that *Prayer of Weather* doesn't change the cost of exploring tiles—but it does change the cost of entering CITIES.⁹²⁹

S2:—*Order of Effects*—*Prayer of Weather*, when used against other players, applies after all other effects that affect the Movement cost of terrain. This ruling is from the game designer. So if you play *Frost Bridge* when *Prayer of Weather* is in effect, you pay two Move points to enter swamps: *Frost Bridge* reduces the cost to one, then *Prayer of Weather* (for players hurt by this competitive Skill) raises it by one. See Movement S10.⁹³⁰

Cross References: Movement S10.

Puppet Master (KRANG)

S1:—*General*—The only properties of "kept" enemy tokens that still apply are their Attack(s), armor, and elemental types. See S5 below. Arcane Immunity no longer protects the enemy, and the higher armor from Elusive doesn't apply. That said, you can collect enemy tokens that have Arcane Immunity, and you can use *Puppet Master* effects against enemy tokens that have Arcane Immunity.⁹³¹

S2:—*SUMMONERS*—If you want to use *Puppet Master* to Block with a previously collected enemy token that had the summoning ability, you use the dead SUMMONER'S armor. If you want to use the dead SUMMONER to make an attack, you must reveal a randomly Summoned MONSTER (two MONSTERS, if the dead enemy token is a DRAGON SUMMONER): from this point on you can no longer use *Puppet Master* to attack with a different dead enemy token (since new information has been revealed); and when this sub-phase of combat ends, the dead SUMMONER token will have to be discarded regardless of whether or not you were able to make good use of its attack. But you can wait until after you have drawn the Summoned MONSTER(s) to decide which enemy token(s) or group(s) of enemy tokens you'll use the dead SUMMONER'S attack(s) against.⁹³²

Another fact to note is that if you wish to combine a dead SUMMONER'S Attack(s) with the black-mana ability of an ALTEM MAGES Unit, you must first decide how you'll be using the ALTEM MAGES's ability: to generate Cold Fire Attacks during the Attack Phase, or to generate Siege Attacks during the Ranged-and-Siege-Attack Phase. Only after making that decision do you draw the Summoned MONSTER token(s): you don't draw the MONSTER token until actually making the Summon Attack, and you can only use the Summon Attack in the Ranged-and-Siege-Attack Phase if you're committed to turning its plain Attack into a Siege Attack.

S3:—*Multiple Attacks*—When enemy tokens have Multiple Attacks, you can apply them all against the same enemy or split them among different enemies. Whichever you choose, they must all be used during the same Ranged-and-Siege-Attack Phase (if using them, say, in concert with the ALTEM MAGES's ability as discussed in S2 above), or they must all be used during the same Attack Phase.⁹³³

S4:—*Faction Leader*—A Faction Leader can be taken once it is fully defeated, but you must use its Attacks and armor as they are at level 1.⁹³⁴

S5:—*Elements*—If the enemy token has a Cold Fire Attack, the Attack you gain is also a Cold Fire Attack. If the enemy token has both Ice and Fire Resistance, the Block you gain is a Cold Fire Block.⁹³⁵ If the enemy has Physical Resistance, it doesn't affect *Puppet Master*'s Attacks or Blocks.⁹³⁶

S6:—*Sites*—Enemy tokens are not Units, so you can use them without restriction whenever in DUNGEONS/TOMBS, or MAZES/LABYRINTHS, and whenever you burn MONASTERIES.⁹³⁷

S7:—*Accumulating Enemies*—You may, with *Puppet Master*, accumulate more than one enemy token, but you can only use this Skill once a turn, either to collect one enemy token or to expend one enemy token, not for both. Other than that restriction, you get to decide when (or if) to use this Skill.⁹³⁸

S8:—*First Use*—If you gain this Skill through an End-of-Turn level up, you can't use it during that same turn to collect an enemy token that you killed earlier during the turn because your turn at this point is officially over, making the Skill unusable. See Skill Tokens S1, and End of Turn S2.⁹³⁹

S9:—*Attack Points*—The Attacks you gain are not Ranged Attacks nor Siege Attacks: they're just "Attack points", so they ordinarily can't be used during the Ranged-and-Siege-Attack Phase. See S2 above.

Puppet Master Attack (or Block) points can be played all by themselves: you don't need to combine them with Attack (or Block) points from other cards or Units—see Miscellaneous S12.⁹⁴⁰

Cross References: Miscellaneous S12; *Circlet of Proficiency* S20.

Refreshing Bath (WOLFhawk)

Cross References: Miscellaneous S12.

Refreshing Breeze (WOLFhawk)

Cross References: Miscellaneous S12.

Regenerate (BRAEVALAR, KRANG)

S1:—*Wound Required*—You can't simply pay a red (or green) mana to draw a card: you must also throw away a Wound.⁹⁴¹

S2:—*Black Mana Permitted*—At night you can pay a black mana to throw away a Wound. You cannot, however, use black mana when day conditions are in effect.⁹⁴²

S3:—*Healing Effect*—*Regenerate* is a Healing Effect (as indicated by the hand symbol on the Skill description card) and therefore cannot be used during Combat.⁹⁴³

Cross References: Minimum Turn S3; Skill Tokens S2.

Resistance Break (TOVAK)

S1:—*Arcane Immunity*—This Skill will not work against an enemy with Arcane Immunity.⁹⁴⁴

S2:—*Timing*—This Skill will stack with *Expose* so long as you play *Resistance Break* first.⁹⁴⁵

S3:—*Resistances*—The Resistances affected by this Skill are on the plaque: Physical, Ice, and Fire.⁹⁴⁶

Cross References: *Know Your Prey* O2; DELPHANA MASTERS S8.

Ritual of Pain (ARYTHEA)

S1:—*General*—ARYTHEA can choose to throw away zero Wounds when she puts this Skill into play. Other knights may play only one Wound card sideways—no more, but it can be played during Combat.⁹⁴⁷

S2:—*Wound Played Sideways*—At the end of the turn, a Wound card played sideways does not get put back into your hand or thrown away: it goes into your discard pile.⁹⁴⁸

Cross References: Minimum Turn S3; *Deadly Aim* S6.

Secret Ways (BRAEVALAR)

S1:—*Mountains / Lakes*—Owning this Skill, a Mage Knight could make mountains safe for herself indefinitely, but she can treat lakes as safe spaces only for those turns in which she pays a blue mana.⁹⁴⁹

S2:—*WALLS*—To cross a WALL, you have to pay the additional movement point.⁹⁵⁰

Cross References: Movement O9; Miscellaneous S12.

Shamanic Ritual (KRANG)

S1:—*Resting*—You cannot use an Action to re-flip *Shamanic Ritual* on a turn during which you Rest, because you do not take an Action when you Rest. See Resting S3 and Skill Tokens S7.⁹⁵¹

S2:—*Mana Token*—When it says gain a mana token of any color, that includes gold and black.⁹⁵²

Cross References: Minimum Turn S1; Skill Tokens S7.

Shapeshift (BRAEVALAR)

S1:—*Cold Toughness*—If TOVAK somehow gains *Shapeshift*, the strong effect of *Cold Toughness* can only give 5 Move or 5 Ice Attack—never more, because *Shapeshift* works only with "fixed amounts of Move, Attack, or Block."⁹⁵³

S2:—*Concentration*—The bonus from the strong effect of *Concentration* is not a fixed amount, so *Concentration* doesn't work with *Shapeshift*.⁹⁵⁴

S3:—*One with the Land*—Despite the word "fixed" in the Skill description, you can use *Shapeshift* on the Block that BRAEVALAR gets with the strong effect of *One with the Land* and turn that into a Move or an Attack. The word "fixed" is to prevent *Shapeshift* from being used with *Concentration*, or from benefiting from variable amounts of Block depending on the target, such as with *Cold Toughness*.⁹⁵⁵

S4:—*Basic Action Card*—The "Basic Action card" phrase is easily overlooked: it limits this Skill to use with those Action cards that a Mage Knight begins the game with (or possibly takes with *Mind Steal*).⁹⁵⁶

Cross References: Combat S5; Miscellaneous S12; *Circlet of Proficiency* S13.

Shield Mastery (TOVAK)

Cross References: Miscellaneous S12; *Circlet of Proficiency* S1, S2.

SOURCE Freeze (GOLDYX)

S1:—*Using Mana Dice*—If *SOURCE Freeze* is in play, you're denied your usual one free die from the SOURCE, but you can still play cards like *Mana Draw* to take "additional" mana dice from the SOURCE.⁹⁵⁷

S2:—*End of Round*—If *SOURCE Freeze* is in play when a Round ends, all of its effects immediately cease, including the effect which allows the owner to receive a crystal on his next turn.⁹⁵⁸

S3:—*Timing*—On GOLDYX's next turn after having played this Skill, he doesn't have to retrieve it at the start of his turn, but can manipulate the SOURCE dice through other means—if he's able—and so influence what color crystal he ends up with "on that next turn". And note that a gold dice does not represent any basic color.⁹⁵⁹

Cross References: *SOURCE Opening* S5; *Who Needs Magic* Q1.

SOURCE Opening (GOLDYX)

S1:—*Solo Games*—In solo scenarios, on the first turn in which you put this Skill in play, you reroll a mana die. On your next turn, you may use a second mana die from the SOURCE, and if you do so you also gain a crystal of that color. You may then decide to re-roll this second die at the end of the turn or leave it as is.⁹⁶⁰

S2:—*Cooperative Games*—In cooperative scenarios, the crystal you gain comes from the bank, not from the player who uses the extra die.⁹⁶¹

S3:—*Re-rolling the Die*—You decide whether or not to re-roll this mana die before any of the other mana dice in the SOURCE are re-rolled. All mana dice should be re-rolled at the same time.⁹⁶²

S4:—*Extra Mana Die*—The other player can use "an extra die from the SOURCE" before he uses his free mana die from the SOURCE, and he can do so even if he never uses his one free mana die from the SOURCE.⁹⁶³

S5:—*Gold Mana Die*—You can't use a gold die as "an extra die of a basic color", because it isn't.⁹⁶⁴

Spirit Guides (KRANG)

S1:—*Any Type of Block*—The "Block of any type" gives +1 to the Block of a card you play, or to a Skill that provides Block, or to the Block value of a Unit you use to Block. See Combat S5.⁹⁶⁵

S2:—*Diplomacy*—If you play *Diplomacy*, which allows you to use Influence points as Block points, you are permitted to couple *Spirit Guides* with those Influence-Block points to increase the Block even though the Block in question isn't coming directly from a card, but rather from Influence. That also applies to the strong effect of *Diplomacy* which creates Ice Blocks or Fire Blocks.⁹⁶⁶

S3:—*Timing*—Since the text of this Skill contradicts the general rule of "you have to generate Block/Attack points at the moment you use them," the Skill text prevails (as it does with *Burning Shield*, *Dueling*, etc.), so you immediately generate a Move point (that you can use in the Movement Phase of your turn if you generated it then; or in the Action Phase of your turn if you generated it then), and the +1 Block that you gain can be used any time during your Block Phase.⁹⁶⁷

Cross References: Combat S5; Miscellaneous S12; *Circlet of Proficiency* S14.

Taunt (WOLFHAWK)

Q1:—*Arcane Immunity*—Can you use *Taunt* to reduce the Attack of an enemy with Arcane Immunity?

A1: Yes. You cannot reduce its armor, though.⁹⁶⁸

O2:—*SUMMONERS*—You can use the Attack -1 against a summoned MONSTER. I believe you should also be able to use the other option—Attack +2, armor -2—against a SUMMONER and its summoned MONSTER, especially if you accept the view that that SUMMONER is "attacking you with the attack of the summoned MONSTER token" (per Combat S23) and if you picture *Taunt* as angering the SUMMONER into exposing himself more dangerously in an effort to direct his summoned attack against you more ferociously.

[Other players rule oppositely, arguing that the armor reduction won't affect the SUMMONER for it isn't "the same enemy". Or they rule that the Attack effect and the armor effect are inextricably linked together as a single simultaneous effect, and as such it can't affect the SUMMONER while the summoned MONSTER is present.

In my view, though, the *Taunt* effect is composed of two sub-effects, both resulting from a longer-lasting activity, one sub-effect taking hold during the Block Phase and the other taking hold during the Attack Phase. See *Dueling* S2, *Howl of the Pack* S2, and *SHOCKTROOPS* O9 for effects that face similar questions. In this view, the wolf's howl is lingering in the air, WOLFHAWK's dueling prowess is sticking in her enemies' minds,

the SHOCKTROOPS are continually slamming into their opponents, and the ongoing taunting is still baiting the SUMMONER out from behind his defenses.]⁹⁶⁹

Q3:—*Timing*—If you use *Taunt* to increase an enemy's attack *and* reduce its armor (e.g., if the enemy's armor goes from 5 to 3), can you kill it in the Ranged-and-Siege-Attack Phase with a Ranged Attack of 3?

A3: No. As stated in the Skill description, it has to be used in the Block Phase. So during the Ranged-and-Siege-Attack Phase the enemy will still have its full armor. And note that you cannot increase the enemy token's Attack *after* you have blocked it.⁹⁷⁰

Q4:—*Possess*—If you play *Taunt* to "increase one attack . . . and reduce [the] Armor of the same enemy", can you then play *Possess* to use the increased attack against another enemy token?

A4: No. *Taunt* negates the Armor reduction "if that enemy is prevented from attacking", and *Possess* clearly says, "One enemy does not attack." So whether the first half of the *Taunt* effect (increasing one attack by 2) applies is wholly irrelevant: the enemy in this situation never attacks (per *Possess*). Rather, with *Possess*, you gain an Attack equal to whatever is printed on the enemy token.⁹⁷¹

Cross References: *Circlet of Proficiency* S6, S15.

Universal Power (GOLDYX)

S1:—*Sideways Cards*—In all other respects except its strength, a card played sideways for use with *Universal Power* only grants those things that a sideways card can grant: Influence points, or Move Points, or non-elemental Block points, or non-elemental non-siege non-ranged Attack points.⁹⁷²

S2:—*Not Cumulative with Similar Skills*—You cannot play more than one of *I Don't Give a Damn*, *Universal Power*, *Who Needs Magic*, and *Wolf's Howl* on the same sideways card. See *Who Needs Magic* S2.⁹⁷³

S3:—*Not Cumulative with Similar Skills*—*Universal Power* does not stack with *Power of Pain*: see *Power of Pain* S2.⁹⁷⁴

S4:—*Depleted Dice*—You cannot use depleted dice from the SOURCE (i.e., you cannot use a black mana during the day or a gold mana at night) to place on a sideways card.⁹⁷⁵

S5:—*Black Mana*—If you add black mana at night to a sideways card, that card gives only +3, even if that card is a Spell card.⁹⁷⁶

S6:—*Artifacts*—Artifacts have no color, so they only ever give +3 with *Universal Power*.⁹⁷⁷

Cross References: *Deadly Aim* S6; *I Don't Give a Damn* S1; *Power of Pain* S2; *Who Needs Magic* S2; *Wolf's Howl* S1.

Who Needs Magic (TOVAK)

Q1:—*Mana Dice*—If you use *Who Needs Magic* and have not used a die from the SOURCE yet, you get +3 instead of +2. Can you then use a mana die later in your turn?⁹⁷⁸

A1: No.

[The Skill reads, "*If you use no die from the SOURCE . . .*" Two further questions arise: (1) Is this sentence—by using the singular declension of "dice"—referring solely to the single free die that all players get from the SOURCE every turn, or does it prevent the player from using any dice in the SOURCE whatsoever? (2) What does "use" mean: to directly use a mana die as "mana", or to make any use whatsoever of any mana die?

(1) The argument based on the singular declension of the word "dice" to argue that this Skill refers only to the free mana die every player gets each turn seems tenuous at best, especially given the phrase "no die".

(And if that's what was intended, why not have written more clearly, "*If you don't use your free mana die from the SOURCE . . .*") There seems to be general agreement that you can't use any dice that are in the SOURCE.

(2) Regarding the second question, I take a narrow interpretation of the word "use" to mean "actually using it for mana". If you search the base game and *Lost Legion* rulebooks, you'll see that in every place where you encounter the phrase "use a die from the SOURCE", it's clearly talking about using a mana die as mana.

Therefore, when abiding by the "if you use no die from the SOURCE this turn" clause, I would disallow the basic effects of *Mana Draw* and *Mana Pull*, but I would allow their strong effects, seeing as the strong effects are only "manipulating" the mana dice and then providing mana tokens that match those manipulated dice. I would also allow both effects of *Mana Storm* (as these are also manipulations), but of course prohibit the player from using the (optional) "three extra dice" that're allowed through the strong effect. I would also prohibit the use of *Polarization* on mana dice in the SOURCE, per *Polarization* S2.

Some players, in regard to question (2), prohibit any use whatsoever of the dice in the SOURCE.

- a) I don't know, though, how they treat the last sentence of *SOURCE Freeze*—"gain one crystal of any basic color represented in the SOURCE"—if they would consider even this to be the use of a mana die. Nor do I know if they would allow a player to voluntarily forgo this *SOURCE Freeze* crystal in order to allow that person to play *Who Needs Magic* for its +3 effect at some point later in the turn. See Basic Action Cards O5.
- b) And what about *Orb of Twilight*: with this faction token you're not really using a mana die, you're simply changing a black die to gold or a gold die to black—does that count as "use"?
- c) Another question that arises is, if an effect requires manipulation of SOURCE dice, are only those portions of the effect voided, or does *Who Needs Magic* prohibit the playing of the entire effect in the first place?

To avoid having to render additional rulings in these (and possibly other) cases, it seems advisable to limit the meaning of the phrase "use a die from the SOURCE" to the way the rulebook itself uses the phrase: that is, to "use a mana die as [pure] mana"—see *Mana* Q10.]

S2:—*Not Cumulative with Similar Skills*—You cannot play *I Don't Give a Damn*, *Universal Power*, *Who Needs Magic*, and *Wolf's Howl* on the same sideways card: these Skills specify a replacement effect ("+2 instead of +1"), not an addition effect ("increase it by +1"). So even if you could play a second Skill of this category, it would merely *replace*—not complement—whatever effect the first Skill gave you.⁹⁷⁹

S3:—*Mana Steal*—If you use *Who Needs Magic* for its +3 effect, you can still use a mana die that is sitting on the Tactic card *Mana Steal*. See *Mana Steal* Q1.⁹⁸⁰

Cross References: *Circlet of Proficiency* S16; *Deadly Aim* S6; *I Don't Give a Damn* S1; *Universal Power* S2; *Wolf's Howl* S1.

Wolf's Howl (WOLFHAWK)

S1:—*Not Cumulative with Similar Skills*—This Skill reads, "One card played sideways gives +4 instead of +1." This skill cannot be combined with *Universal Power* or *Power of Pain* or *I Don't Give a Damn* or *Who Needs Magic* on the same sideways card. See the discussion in *Power of Pain* S2 and *Who Needs Magic* S2.⁹⁸¹

Cross References: Skill Tokens S6; *Deadly Aim* S6; *I Don't Give a Damn* S1; *Power of Pain* S2; *Universal Power* S2; *Who Needs Magic* S2.

Faction Tokens

S1:—*Drawing Faction Tokens*—Faction tokens are drawn during the End-of-Turn sequence at the same time as other rewards from combat. Since faction tokens may only be used during your turn (unless otherwise noted), you'll have to wait until your following turn to use any faction tokens that are earned during this turn.⁹⁸²

S2:—*Exchanging Faction Tokens*—If you discard a faction token for 1 Fame or 3 Influence, you must do so while Interacting with the Locals, on a space where there are Locals. You can discard more than one Faction Token at the same time, even Faction Tokens with identical names, since you're "discarding" them, not "using" them.⁹⁸³

S3:—*When Partially Attending*—When you partially attend a PvP Combat or an attack by VOLKARE, you may not use Faction Tokens unless the Faction Token text states otherwise.⁹⁸⁴

Amulet of Reawakening

S1:—*No Discard Pile*—If your discard pile is empty, you can still play this faction token, which will then have the sole effect of increasing your hand limit by one during your next draw phase.

S2:—*Random Card is Known*—Your Discard Pile is known information, so you can look to see which card was randomly placed at the bottom of your Deed Deck. See Miscellaneous S2.

Cloak of Shielding

S1:—*Arcane Immunity*—You can use the *Cloak* even if you're being attacked by an enemy token with Arcane Immunity.⁹⁸⁵

S2:—*Additional Effects*—Brutal takes effect prior to Wounds being assigned, and therefore doesn't fall under the "additional effects" phrase. Poison, Paralyze, and Vampiric, however, do fall under "additional effects" and so do not take effect due to the Wound that was avoided. If more than one Wound would've been caused by the attack (other than the extra Wound caused by Poison that was avoided per the previous sentence), those additional Wounds hit with their full and usual effect.⁹⁸⁶

Fire Gem

S1:—*Elements*—This token adds an element to an Attack or Block. For example a *Rage* card played with red mana is Attack 4; using an *Ice Shard* with it will make it an Ice Attack 4. Using a *Fire Gem* combined with the basic effect of *Ice Shield* (Ice Block 3) will make it a Cold-Fire Block 3.⁹⁸⁷

Q2:—*From a Single Action Card*—Can *Fire Gem* / *Ice Shard* be used with *Diplomacy* or *Agility*?

A2: No. Also note that Spell cards and Artifact cards are not Action cards.⁹⁸⁸

S3:—*From a Single Action Card*—Attack and Block points from the strong effect of *Concentration* paired with another Action card are not attacks or blocks gotten "from a single action card". Neither are Attack or Block points gotten through the play of *Maximal Effect*. However *Improvisation* is acceptable with *Fire Gem* because the second card is not the playing of an additional card but the paying of a cost.⁹⁸⁹

O4:—*Ranged and Siege Attack Phase*—Can *Fire Gem*/*Ice Shard* add Fire/Ice to Ranged Attacks or Siege Attacks?

A4: *Into the Heat* does apply to Ranged and Siege Attacks (see *Into the Heat* S2), so *Fire Gem*/*Ice Shard*—which has similar wording—should also.⁹⁹⁰

O5:—*Cards Played Sideways*—Can *Fire Gem*/*Ice Shard* be used on cards played sideways?

A5: You could argue this either way, but I think the better answer is "no" so as to be consistent with *Ghostly Elixir* S3. In any event, you can't use them on a Spell or Artifact or Wound played sideways because those aren't "Action cards"—which is another good reason to disallow its use on cards played sideways.⁹⁹¹

Cross References: *Deadly Aim* Q3.

Ghostly Elixir

S1:—*Timing*—Like the black-mana effect of *ALTEM MAGES*, the Attack-transforming effect of *Ghostly Elixir* should be played *before* the Attack which it will affect because, without it, you cannot play plain Attack points during the Ranged-and-Siege-Attack Phase.⁹⁹²

Q2:—*On a Single Action Card*—Can this ability be used on Movement points changed into Attack points via the *Agility* card?

A2: No, because it is not an "attack on a single Action card", but rather an attack coming from the pool of Movement points. See *Fire Gem* Q2 and S3.⁹⁹³

S3:—*Cards Played Sideways*—The effect text of *Ghostly Elixir* restricts its use to Basic Action cards and Advanced Action cards, so it's likely not intended for use with Deed cards played sideways since that would necessarily have to also include Spell cards and Artifact cards. This ruling was confirmed by the designer.⁹⁹⁴

Cross References: *Vial of Toxin* S2.

Healing Herbs

S1:—*Timing*—You can use Healing points after combat is over, but you draw Faction Tokens during the End-of-Turn sequence, so you can't use *Healing Herbs* in the same turn that you draw it. See End of Turn S2.⁹⁹⁵

S2:—*Healing*—The Faction Token explanation card shows this Token as being an Influence effect, but that's an error: it should show a hand symbol not a head symbol. You cannot use this token during Combat.⁹⁹⁶

Ice Shard

Cross References: *Fire Gem* S1, Q2, S3, O4, O5.

Mystical Map

S1:—*Timing*—This token must be used during the Movement Phase of your turn. You don't, though, have to actually move anywhere, or even have Move points available to be used.⁹⁹⁷

Orb of Twilight

S1:—*Day / Night*—Either option is available during the day; either option is also available at night.⁹⁹⁸

Cross References: *Who Needs Magic* Q1.

Tome of Relearning

S1:—*Choosing Skills*—The Skill you trade into the Skill Offer may already be flipped. You may even trade in a Competitive or Cooperative Skill that's currently in play in the center of the table. Either way, the Skill you take in exchange comes to you unflipped. You're also allowed to take one of your own Skills from the Common Skill Offer. And this Skill swapping is permanent: you don't unswap it after one use.⁹⁹⁹

S2:—*Complex Example*—You could potentially use a once-a-turn Skill, trade it in for a different Skill through the *Tome of Relearning*, re-learn it with the strong effect of *Circlet of Proficiency* (receiving it in its unused state), and then use it again, all in the same turn.¹⁰⁰⁰

Vampiric Chalice

S1:—*Knocked Out*—This token does not prevent you from being knocked out.¹⁰⁰¹

S2:—*Wound Card*—The Wound cards to be discarded must come from your current hand; they cannot come from your draw pile or your discard pile, nor can they come from your Units.¹⁰⁰²

Vial of Toxin

S1:—*Applicability*—The bonus can be added to any source of physical Attack, including an Attack by a Unit or an Attack from a Deed card played sideways.¹⁰⁰³

S2:—*Sequence Matters*—During the Ranged-and-Siege-Attack Phase you cannot play *Rage* (Attack 2), then *Vial of Toxin* (+3 Attack), then *Ghostly Elixir* to generate a Ranged Attack of 5, for you cannot play plain "melee" Attacks during the Ranged-and-Siege-Attack Phase. Instead you would have to play *Ghostly Elixir*, then *Rage*, giving you a Ranged Attack of 2, and then *Vial of Toxin* (+2 Ranged Attack), making it a Ranged Attack of 4.¹⁰⁰⁴

S3:—*The Attack Phase*—During the Attack Phase, there's no difference between Attacks, Ranged Attacks, and Siege Attacks. So if you use *Vial of Toxin* during the Attack Phase, you gain +3 to the Attack regardless of what type of Attack it is being applied to—Ranged, Siege, or a plain Attack—just so long as it's a *physical* Attack. See Combat S6.¹⁰⁰⁵

S4:—*Attack No Longer Physical*—As stated on the description card, if after playing *Vial of Toxin* another effect makes the attack elemental (i.e., non-physical), then the bonus from *Vial* is lost.

Cross References: Combat S6; Miscellaneous S12.

Silver Units

S1:—*Unit Offer*—After the first core tile has been placed onto the map, when dealing Units into the Unit Offer at the start of every Round, you always begin with an elite (gold) Unit and then alternate. You begin with an elite Unit each Round, even if it's been an odd number of Rounds since a core tile was first placed.¹⁰⁰⁶

S2:—*Recruiting Units*—In general, if an effect allows you to recruit a Unit but doesn't say that you need to be at a VILLAGE or KEEP or CITY or MAGE TOWER or inhabited space, then you don't need to be there.¹⁰⁰⁷

Q3:—*Recruiting Multiple Units*—Can you recruit multiple Units during the same Interaction? E.g., can you recruit a Unit, and then activate that new Unit to get enough Influence points to recruit a second Unit?

A3: Yes. Yes. You get the things you buy (or acquired by some card effect) immediately—only combat rewards are delayed (they're received in the End-of-Turn sequence step 5). New Units can be used immediately, to generate more Influence or Healing points, etc. And unless you're directed otherwise, new Spells and Advanced Actions go on top of your draw pile—though you might be able to draw them on the same turn that you acquire them if you play an effect like *Motivation* that allows you to draw cards. Artifacts, though, are always gained during the End-of-Turn sequence. See Influence S8.¹⁰⁰⁸

S4:—*Disbanding Units*—You can only voluntarily disband a Unit (exception: MAGIC FAMILIARS S6) when you're recruiting a new Unit; and even then, only when you don't have a free command token.¹⁰⁰⁹

S5:—*"Any Card"*—When a rule or effect refers to "any card" (or generically to "a card"), it's referring to any non-Wound card currently in your hand (e.g., one not yet played). It's never referring to a Unit "card". An effect that gives you "+X to the next card you play" does not affect the abilities of Units.¹⁰¹⁰

S6:—*Playing against Fire and Ice Resistance*—Any non-Attack/non-Block effect from a Unit ability that's powered by red or blue mana has no effect against enemies with Fire or Ice Resistance, respectively. This restricts the abilities of only two Units: DELPHANA MASTERS and AMOTEP FREEZERS.¹⁰¹¹

S7:—*Unit Ability Icons*—The Shield symbol that's printed to the left of some Unit effects indicates that *Block points* are provided (if it's solid black), or that *other Block-phase effects* are provided (if it's hollow). [Some players also see the Shield symbol as a restriction: see O8 just below.]¹⁰¹²

O8:—*Unit Ability Icons*—There's a curious statement in the *Walkthrough*. When discussing the abilities of Units, it says "*Each of these options has an icon showing when you can use them.*" This rule—if it is a rule—isn't mentioned anywhere in the rulebook, and the icons themselves are never explicitly defined.¹⁰¹³ By comparison, the gold icons on Deed cards that limit when they can be played are described in detail in the base game rulebook and are expanded on in *Lost Legion*. The contrast in the treatment of these two sets of icons is startling. Consider also that the *Walkthrough* often uses looser language to describe the workings of the game, and consider further how the designer talks about the *Walkthrough* booklet itself: "[T]he right use of [the *Walkthrough* is] 'Read it, play the first scenario, and then never open it again, unless you want to explain the game to other people.' There is nothing more for you [in it]. All [of] the rules are in [the] Rulebook."¹⁰¹⁴ Many players, therefore, don't see these icons as limiting when Unit abilities can be played: they see the *Walkthrough* sentence quoted above as merely saying that the icons which precede the Unit abilities are simply visual cues, flags seen at a glance to show you which Unit abilities might be germane to the current Phase.¹⁰¹⁵

Consider also the third set of icons used in the game: the icons that appear on Skill tokens. These icons are not defined either, but are clearly meant to visually summarize the Skill effect so that players can be reminded with a glance what each Skill does. The use of each Skill is fully described on the Skill description card: aside from the flip icons, the icons on the tokens provide no additional information. There *are* icons on the Skill description cards themselves that *do* limit when these Skills can be used: these icons, however, are the same gold icons that're used on Deed cards.

Accordingly, I don't think the Unit ability icons are meant to restrict when those abilities can be used.

[Some players, however, do believe that the Unit icons limit when Unit abilities can be played. In non-PvP gameplay, these icons affect only two Units: AMOTEP FREEZERS and SHOCKTROOPS. And what these icons do is prevent those Units from using their armor-reducing ability *before* the Block Phase begins, meaning that those two Units can't affect the armor of enemy tokens during the Ranged-and-Siege-Attack Phase. Based on their artwork, the Units *do* appear to lack volley capability, a circumstantial point in favor of this view. Players who treat the Unit icons as a restriction, nevertheless do allow any Unit ability preceded by a bow- or catapult-icon to be used either in the Ranged-and-Siege-Attack Phase or in the Attack Phase. See SCOUTS Q2.]

S9:—*Wounds and Readiness*—A Unit has two independent binary states: (a) unwounded or wounded, and (b) ready or spent. These states exist independently of each other: a Unit can be unwounded and ready; unwounded and spent; wounded and ready; or wounded and spent.

A Unit becomes spent when you use one of its abilities; a Unit may become wounded when you Assign Damage to it (see Combat S34 and *Dueling* S3). Assigning Damage to a Unit does not make it spent (although to spend a Unit, not only must the Unit be ready, it must also be unwounded).

You can assign damage to a Unit only once per turn (regardless of whether the "assigning of damage" results in Wounds being placed on the Unit). Blocking, for instance, is an ability that spends a Unit; Assigning Damage is *not* the use of an ability and so does not "spend" the Unit.¹⁰¹⁶

S10:—*Readying Units and Re-use*—If a player has PEASANTS and HERBALIST, he could expend the PEASANTS for 2 movement points, then (if not in Combat) expend the HERBALIST to re-ready the PEASANTS, then expend the PEASANTS again for 2 more movement points, and then (if in the Movement Phase) use the 4 movement points to enter, say, a wasteland space. See Movement S1 and Miscellaneous S9.¹⁰¹⁷

FORESTERS

S1:—*MAZE / LABYRINTH*—When you decide to enter a MAZE, any unspent Movement points disappear. If you want to use the Move effect of FORESTERS to travel through a MAZE, you can do so—but you can't take any other Units with you. Your FORESTERS become spent, and unless you refresh them (you're not yet in Combat, so Healing effects are playable), you'll be able to assign damage to them but not use their Block ability. See Combat Q1.¹⁰¹⁸

Cross References: Movement O9; Miscellaneous S9; *Forward March* S2.

GUARDIAN GOLEMS

Cross References: *Veil of Mist* S5; *Circlet of Proficiency* S14.

HERBALIST

S1:—*Readying Units*—The ability to Ready a level-1 or level-2 Unit applies only to *that player's* Units. And, as usual, this effect cannot be used in Combat.¹⁰¹⁹

Cross References: Resting Q2; Silver Units S10.

ILLUSIONISTS

Q1:—*SUMMONERS / Arcane Immunity / Multiple Attacks*—The ILLUSIONISTS Unit's white-mana ability reads: "*Target unfortified enemy does not attack this combat.*" Regarding this ability:

- (1) Can ILLUSIONISTS prevent Attacks from an enemy that has the Summon Attack ability?
- (2) Can ILLUSIONISTS prevent Attacks from an enemy that has Arcane Immunity?
- (3) Can ILLUSIONISTS prevent all Attacks from an enemy that has Multiple Attacks?

A1: This ILLUSIONISTS Unit's ability interacts with numerous other rules, some of which involve questions that have puzzled players on several levels, so be sure to see the related discussions in this Compendium.

- (1) Summon Attack: yes, if played before the summoned MONSTER token is drawn, in which case no enemy MONSTER will be Summoned. See Combat S23, and also S2 below.¹⁰²⁰
- (2) Arcane Immunity: no. Thematically this effect is tied to white mana, so it's a magical effect and therefore negated by Arcane Immunity.¹⁰²¹ So DRAGON SUMMONERS, despite the answer given immediately above, are immune to the white-mana ability of ILLUSIONISTS. See Arcane Immunity S1 and Combat Q24.
- (3) Multiple Attacks: yes. This Unit ability clearly states the "enemy does not attack".

S2:—*Types of Attack*—There are 5 types of Attack: Physical, Fire, Ice, Cold Fire, and Summon Attacks. All of these can be canceled by an ILLUSIONISTS Unit. So when you're facing a SUMMONER, you can use ILLUSIONISTS at the very beginning of the Block Phase just before you draw a MONSTER token: at that point you decide either to (a) draw the MONSTER token and face it, or (b) exhaust the ILLUSIONISTS Unit, pay a white mana, and cancel the summon attack. Once a MONSTER token is drawn, it's too late to cancel its attack: the MONSTER will attack. See Combat S23 and *Banner of Fear* Q6.¹⁰²²

S3:—*Demolish*—It is permissible to use *Demolish* to ignore the site fortifications of an enemy token, and then to have an ILLUSIONISTS cancel the Attack of that enemy token.¹⁰²³

Cross References: Combat S10, S23, S34 (enemy token); PvP Q1; *Call to Arms* S7; *Earthquake* S4.

MAGIC FAMILIARS

S1:—*Recruiting*—The first two paragraphs under "MAGIC FAMILIARS" (*Lost Legion* p. 5) are not contradictory. What they are conveying when taken together is that (a) if you recruit FAMILIARS in a MAGICAL GLADE, your Reputation does not apply, and (b) you cannot gain FAMILIARS through card effects or combat rewards: you *must* recruit them using Influence only. See also DELPHANA MASTERS S1. You are permitted to recruit *both* FAMILIARS Units that come in the game during the *same* Action Phase if otherwise able to do so: i.e., if they're both present and you pay the combined Influence points and mana costs.

The "or use them" phrase in the second paragraph applies to using FAMILIARS while they're in the Unit Offer: see S2 just below.¹⁰²⁴

S2:—*Gaining MAGIC FAMILIARS by other Means*—The parenthetical sentence in the second paragraph under "MAGIC FAMILIARS" (*Lost Legion* p. 5) is saying that *Call to Arms* and *Call to Glory* have no effect on FAMILIARS. FAMILIARS also cannot be claimed as a combat reward, and they cannot be recruited through the strong effect of the *Banner of Command*. See S1 above and DELPHANA MASTERS S1.¹⁰²⁵

S3:—*Gold Mana*—MAGIC FAMILIARS can be paid with gold mana, but you must immediately specify which basic color you're using that gold mana as, and indicate this by placing a basic mana token on them.¹⁰²⁶

Q4:—*Start of the Round*—In paying MAGIC FAMILIARS a crystal, when is "at the start of the Round"?

A4: Immediately before choosing Tactics.¹⁰²⁷ And you do have to pay FAMILIARS a crystal each Round, as clearly stated on the FAMILIARS Unit card.¹⁰²⁸

S5:—*Unit Abilities*—MAGIC FAMILIARS, once recruited, always have exactly one mana token on their card: no more, no less. You don't pay mana when you use an ability of the FAMILIARS, but if the ability you use has a mana token of the matching color sitting on the card, then that ability receives the additional bonus specified. For instance, if there's a blue mana token on the Unit when you activate the Block ability, you'll receive Block 7. If instead there's a red mana token on the card, you'll receive only Block 4.

When activating FAMILIARS, you may select any of the abilities on the card, regardless of which is currently enhanced by the presence of a mana token. And the mana on the card is *not* consumed by this use of its ability: after using FAMILIARS, if you ready them again by some means, the strengthened ability still applies.

The mana on the FAMILIARS card is discarded at the start of the next Round when "you have to pay a crystal". When this happens, the old mana is not recovered to your mana token pool or to your crystal inventory, nor does it remain on the card: it goes back to the bank.¹⁰²⁹

S6:—*Voluntarily Disbanding*—With MAGIC FAMILIARS, you can choose not to pay them a mana crystal at the start of a Round even if you have crystals in your inventory. If, for whatever reason, you don't pay them a crystal, the Unit is thrown away (along with any Wounds it has), but there is no other penalty for the player. The command token immediately becomes available again, just as when a Unit takes a Paralyze wound.¹⁰³⁰

S7:—*Use Against Resistances*—When a MAGIC FAMILIARS unit has a red or a blue crystal on it, the increased Attack points and Block points are considered physical attacks and blocks, and they apply normally against enemy tokens with Fire Resistance and against Ice Attacks (even if from an Ice Resistant enemy), although the Block points in the latter case will be inefficient against the Ice Attack and be halved as usual.¹⁰³¹

Cross References: Variants S1; Scenarios O14; Miscellaneous S11; *Call to Arms* S8; *Call to Glory* S3; *Possess* O2 (Enemy Token); *Bonds of Loyalty* S9.

PEASANTS

Cross References: Miscellaneous S1; Silver Units S10.

SCOUTS

Q1:—*Explore Once Only*—How many times may you use the "reveal a new tile at a distance" ability?

A1: The wording on the card—"a new tile"—means you can do this once each time you activate the SCOUTS Unit. And, just the same as always, it costs 2 Movement points to reveal that tile.¹⁰³²

Q2:—*When Resting*—The middle SCOUTS ability that lets you look at an enemy token has a Movement (foot) icon next to it. When Resting, you don't get a Movement Phase, so can you use this ability on a turn during which you decide to Rest?

A2: Yes. See Silver Units O8.¹⁰³³

Cross References: Movement S2, *Forward March* S2.

SHOCKTROOPS

S1:—*Timing*—The first ability (+1 Attack to all other Units) does apply to Ranged Attacks and Siege Attacks. If activated during the Ranged-and-Siege-Attack Phase, the +1 also applies during the Attack Phase.

You are allowed to play this ability during the Ranged-and-Siege-Attack Phase even if all enemy tokens are fortified: in this case the "Ranged Attack 1" has no effect (and cannot be delayed for use in the Attack Phase) but the other part ("+1 to Unit Attacks") does apply. See SORCERERS S2.¹⁰³⁴

O2:—*Timing*—The middle SHOCKTROOPS effect (reduce Armor and one attack) can be played during the Ranged-and-Siege-Attack Phase even though the icon to the left of it shows a shield icon. **[This is contrary to how some players play it: see Silver Units O8.]**¹⁰³⁵

S3:—*Minimum Armor*—Armor can never drop below 1.¹⁰³⁶

S4:—*Into the Heat / Call to Arms*—Even if *Into the Heat* or *Call to Arms* is active, if SHOCKTROOPS reduce one enemy Attack by 3, any damage from that Attack *must* be assigned to those SHOCKTROOPS. Any Unit wounded while in the Unit Offer still receives a Wound, but since any Unit recruited from the Unit Offer is recruited ready and healthy, when recruited, any Wounds are healed. It's also my opinion that if SHOCKTROOPS are to be assigned damage, then the play of *Into the Heat* is not permitted.¹⁰³⁷

S5:—*Multiple SHOCKTROOPS*—If you have two SHOCKTROOPS and activate them both for the "Range Attack 1; all Units get +1 Attack" ability, only the second SHOCKTROOPS will have its Attack increased, and by only +1. All non-SHOCKTROOPS Units thereafter receive +2 to their Attacks.¹⁰³⁸

S6:—*Damage Assigned First*—If you choose the third ability that says damage from the reduced attack must be assigned to this Unit, and if the SHOCKTROOPS somehow gets wounded before you can assign that damage, then that damage must be assigned elsewhere, for you can't assign damage to an already wounded Unit.¹⁰³⁹

[I also argue that you must assign any damage from that reduced enemy attack to SHOCKTROOPS, and that you cannot assign other damage to SHOCKTROOPS first.]

S7:—*Swift Attack Reduced to Zero*—If you use SHOCKTROOPS to reduce an attack of an enemy token to zero (or less), and that enemy token also has Swiftiness, the attack value for purposes of blocking remains zero, so this attack is still considered to have been successfully blocked.¹⁰⁴⁰

S8:—*Affected Attacks*—You can reduce physical, ice, fire, and cold-fire Attacks, even from an enemy with Arcane Immunity: see Arcane Immunity S1. Other enemy token abilities like brutal, swiftiness, poison, and paralyze still apply to the now-reduced attack strength.¹⁰⁴¹

O9:—*SUMMONERS*—I allow using the middle ability against SUMMONERS, with both the attack of the summoned MONSTER and the armor of the SUMMONER being reduced. See *Taunt* O2.

Cross References: Combat S5; PvP O8; Arcane Immunity S1; Miscellaneous S12; *Into the Heat* S3; *Shield Bash* O3; *Call to Arms* Q4, S5; Silver Units O8.

THUGS

S1:—*Low Reputation*—Even THUGS can't be recruited while your Reputation is on the "X".¹⁰⁴²

S2:—*Force of Nature*—If you use *Force of Nature* to give THUGS Physical Resistance and want to assign 5 or less damage to them (too little to wound them), you still need to pay them 2 Influence points to allow that. See Combat S34 and *Dueling* S3.¹⁰⁴³

O3:—*Timing of Reputation Adjustments*—If you use a THUGS Influence ability before your Action Phase, your Reputation decreases by one. Does this decrease happen immediately, or at the end of your turn?

A3: Immediately.¹⁰⁴⁴ [Others infer that all Reputation changes are to be delayed until the end of the turn even if cards don't explicitly say so, but that's not rigorously indicated in the rules.]

Cross References: Combat Q16 (Enemy Tokens); Influence O3; *Ruthless Coercion* O3; *Banner of Fortitude* S1; Enemy Tokens: HEROES S1.

UTEM GUARDSMEN

S1:—*Counts Twice*—The phrase "counts twice" only means that the Block points are doubled against an Attack that has Swiftiness. It doesn't mean you can use the Block 4 against two *different* Attacks, such as when defending against a HEROES enemy token that has both Swiftiness and Multiple Attacks.¹⁰⁴⁵

Cross References: Leadership S4.

UTEM SWORDSMEN

S1:—*Into the Heat / Call to Arms*—If you use *Call to Arms* or *Into the Heat* with UTEM SWORDSMEN and choose its bottom ability, the SWORDSMEN become wounded (though you are not, strictly speaking, "Assigning

Damage" to it). Any Unit wounded while in the Unit Offer still receives a Wound, but since Units recruited from the Unit Offer are recruited ready and healthy, when recruited they are immediately healed.¹⁰⁴⁶

S2:—*Paralyze*—If you use the lower ability of UTEM SWORDSMEN to Block MEDUSA, the Unit is not killed due to the paralyze ability: it is only wounded. The Wound the SWORDSMEN receive comes from activating the Unit during the Block Phase, not from any damage taken from an enemy token during the Assign Damage phase. Similar reasoning applies if you use SWORDSMEN to Block the poisonous MONKS: only one Wound is assigned to the SWORDSMEN.¹⁰⁴⁷

S3:—*Vampiric*—Similarly to S2, if you use the lower ability of UTEM SWORDSMEN against an enemy token with the vampiric ability, the enemy token does not increase its armor value due to the resulting Wound to the SWORDSMEN.¹⁰⁴⁸

Cross References: *Into the Heat* S3; *Refreshing Walk* S1; *Call to Arms* Q6.

Gold Units

ALTEM GUARDIANS

Cross References: PvP O10.

ALTEM MAGES

Q1:—*Affects Units*—Does the "make everything a Siege Attack" ability apply to Attacks by Units?

A1: Yes: it makes all Attacks conducted by that player better, even cards played sideways.¹⁰⁴⁹

Q2:—*Affects Units and Skills*—Does the black-mana ability include Attacks made by your Units too? And your Skills? And any Attack points that were played before you played the ALTEM MAGES ability?

A2: Yes. Yes. No: retroactive effects rarely apply in MKBG.¹⁰⁵⁰

Q3:—*Black Mana*—Can you use the top ability of the ALTEM MAGES to create a black mana during the day, and then take that black mana token into a TOMB/DUNGEON to cast the strong effect of a Spell there?

A3: Yes. In general you *can* gain black mana tokens during the day—you just can't use them except in specific situations (such as with *Polarization* or upon entering TOMBS).¹⁰⁵¹

O4:—*PvP*—If you adhere to the alternate interpretation discussed above under Silver Units O8, then the shield icon before the black mana ability indicates it can be used during PvP when blocking, perhaps allowing you to use it before the opponent gets a chance to wound the ALTEM MAGES.¹⁰⁵²

Q5:—*Black Mana during Day*—Can black mana enable the bottom ability of ALTEM MAGES during the day?

A5: In general no, not unless you're standing on the NECROPOLIS or a GRAVEYARD where night rules apply, or if using the *Amulet of Darkness*. Remember Units cannot join you in a DUNGEON/TOMB.¹⁰⁵³

S6:—*Ranged and Siege Attacks*—Ranged Attacks and Siege Attacks can be made into Cold Fire Attacks with the black mana ability. But turning Attacks into Siege Attacks has no effect during the Attack Phase: see Combat S6.¹⁰⁵⁴

S7:—*Plain Attacks*—Not only can Ranged Attacks be turned into Siege Attacks during the Ranged-and-Siege-Attack Phase by the black-mana ability of ALTEM MAGES, but regular Attack points can be too (see *Bow of Starsdawn* O5).¹⁰⁵⁵

Cross References: *Bow of Starsdawn* O5; *Soul Harvester* S2; *Sword of Justice* S6; *Puppet Master* S2; *Ghostly Elixir* S1.

AMOTEP FREEZERS

S1:—*Ice Resistance*—The bottom ability has no effect against enemies with Ice Resistance.¹⁰⁵⁶

O2:—*Timing*—Players who adhere to the *Walkthrough* icon rule (Silver Units O8) prohibit the FREEZERS' blue-mana ability from being used during the Ranged-and-Siege-Attack Phase. They also prohibit it from having any effect during the Attack Phase if the ability wasn't activated during the preceding Block Phase. But I permit both FREEZERS and the Spell *Chill* to be played with wider latitude. (Contrast this FREEZERS ability with that of the very similar *Chill*.)¹⁰⁵⁷

Cross References: *Combat* S33; *Chill* Q2; *Silver Units* S6, O8.

AMOTEP GUNNERS

Cross References: *Combat* S4, *Ice Shield* S1.

CATAPULTS

Cross References: *Leadership* S2.

DELPHANA MASTERS

S1:—*Recruiting*—DELPHANA MASTERS have limitations on how they can be recruited (see *Call to Arms* S9 and *Call to Glory* S4). The Unit can, however, be recruited through *Bonds of Loyalty*, and if it is, then the Influence discount *will* apply.¹⁰⁵⁸

S2:—*Multiple Uses*—You have the entire Combat Phase during which you activate the DELPHANA MASTERS to use as many of their abilities as you wish, across multiple sub-phases if you wish. But each ability can be used only one time each turn.¹⁰⁵⁹

S3:—*Multiple Uses*—With each ability, you can target the same enemy or a different enemy.¹⁰⁶⁰

S4:—*Arcane Immunity*—Enemies with Arcane Immunity will not be affected by any of the printed abilities of DELPHANA MASTERS.¹⁰⁶¹

S5:—*Red-Mana Ability*—The red-mana effect will destroy an enemy only if that enemy is successfully Blocked, which means that if it has Multiple Attacks that all of its Attacks must be successfully Blocked.¹⁰⁶²

S6:—*White-Mana Ability*—Arcane Immunity is not a Resistance, so the white mana ability can't cancel it. See S4 above.¹⁰⁶³ And *both* elements don't need to be present (Fortifications and Resistances) in order to remove the single element that is present. See *Earthquake* S4.¹⁰⁶⁴

S7:—*Enemies with Fire/Ice Resistance*—Enemy tokens with Ice Resistance are unaffected by the blue-mana ability; enemy tokens with Fire Resistance are unaffected by the red-mana ability. But if you use the white mana ability on an enemy token first, it will remove their Resistances and render them susceptible.¹⁰⁶⁵

S8:—*Resistance Break*—When used with TOVAK'S *Resistance Break*, you can choose the order. So reduce the armor of the chosen enemy token first with *Resistance Break*, then remove its Resistances with the white mana ability of DELPHANA MASTERS.¹⁰⁶⁶

Cross References: Combat S33; Miscellaneous S11; *Cold Toughness* S1; *Call to Arms* S9; *Call to Glory* S4; *Sacrifice* S4; *Banner of Fear* S3; Silver Units S6; MAGIC FAMILIARS S1, S2.

FIRE MAGES

Cross References: Miscellaneous S9; *Disintegrate* S1 (Enemy Token).

HEROES

S1:—*VOLKARE*—If you attack VOLKARE, it is an Assault and any HEROES must be paid Influence to participate. If, however, VOLKARE attacks a Mage Knight, it is not an Assault and HEROES don't need to be paid.¹⁰⁶⁷

S2:—*During Assaults*—If while Assaulting a KEEP/MAGE TOWER/CITY, you're also fighting Rampaging Enemies, and if you use HEROES to fight those Rampaging Enemies and fight only them, you still must pay the Influence points. See Combat S43.¹⁰⁶⁸

S3:—*Bonds of Loyalty*—If you're making an Assault with HEROES that're under the *Bonds of Loyalty*, you still must pay the Influence points.¹⁰⁶⁹

Cross References: Combat Q16 (Enemy Token), S43; Influence O3; Scenarios S1; *Ruthless Coercion* S3; *Diplomacy* S1; *Maximal Effect* S8; *Call to Arms* S16.

ICE MAGES

Cross References: Combat S4.

SORCERERS

S1:—*Arcane Immunity*—Enemies with Arcane Immunity will not lose fortifications. See *Expose* S1.¹⁰⁷⁰

S2:—*Cannot Delay Ranged Attacks*—The white-mana ability of SORCERERS also gives a Ranged Attack. If you use this white-mana ability during the Ranged-and-Siege-Attack Phase (the only phase where it makes sense to remove fortifications), the Ranged Attack must also be used then. You needn't use the Ranged Attack against the same enemy token affected by the "loses all fortifications" ability, but if you're going to use the Ranged Attack, it must be used during the Ranged-and-Siege-Attack Phase.¹⁰⁷¹

You can also use the white-mana ability during the Attack Phase and gain an Attack (Combat S6), but stripping fortifications from an enemy during the Attack Phase is unlikely to be of benefit.

The green-mana ability of SORCERERS, (that causes an enemy to lose all Resistances, noting that Arcane Immunity is not a Resistance), can be helpful both in the Ranged-and-Siege-Attack Phase and in the Attack Phase. If you activate it during the Attack Phase, you can use the Ranged Attack then, but it's treated as a plain Attack (Combat S6). But if you activate the green-mana ability during the Ranged-and-Siege-Attack Phase, you must use the accompanying Ranged Attack in that same sub-phase or forfeit it.

Similar arguments hold for the Spell *Expose*/Mass *Expose*. See Combat O46.¹⁰⁷²

Cross References: Combat O46; PvP O10; Arcane Immunity S1 (Enemy Token), S2 (Enemy Token); *Expose* S1; *Mass Expose* S1.

Tactic Cards

S1:—*Use Outside of a Regular Turn*—There are several situations in which players take actions or even a whole turn outside of their normal slot (as when Fully Attending a PvP Combat, when joining a Cooperative Assault on a CITY, or when participating in Cooperative Assaults on VOLKARE or Cooperative Defenses against VOLKARE), and there are other situations in which players take limited actions (like actions taken during other players' turns, or when only Partially Attending a PvP Combat, or when Retreating from an Attack by VOLKARE). Players may wonder if they can use their Tactic card during these moments.

Several Tactic cards have effects that apply only at the moment that you select the Tactic card: *Early Bird*, *From the Dusk*, *Preparation*, *Rethink*, and *Great Start*. Another Tactic, *Long Night*, can be used at any time no matter whose turn it is. And one Tactic—*Planning*—takes affect during your End-of-Turn Sequence. There's usually no uncertainty regarding the use of these Tactic cards in the above situations.

Of the remaining Tactics, two of them—*Sparing Power* and *Midnight Meditation*—are used "before [the start of] your turns". The permissible timing for using these Tactics seems very broad: see Turn Start S1 and the corresponding entries for these two Tactic cards below. You cannot, however, use them during your turn.

The remaining three Tactic cards—*Mana Steal*, *Mana Search*, and *The Right Moment*—have a special effect that must be taken during your turn. For *The Right Moment*, see the entries below. With *Mana Search*, since you're manipulating mana dice in the SOURCE, it's probably better to permit its use during the first group of situations listed above but not during the second group of situations. With *Mana Steal*, you can certainly use it during the first group of situations, and I would also permit it when only Partially Attending a PvP Combat.¹⁰⁷³

Great Start

S1:—*No Discarding*—When you select *Great Start*, you immediately draw two additional cards into your hand; you do not discard anything. And you do this only once, at the very start of the Round.¹⁰⁷⁴

Long Night

Q1:—*Timing*—Can this Tactic be used any time?

A1: Yes. You can use it whenever your deck is empty, even during the middle of drawing cards. And since the discard pile is usually considered open information, a player has the ability to discover which cards have been placed into the draw deck: see Miscellaneous S2.¹⁰⁷⁵

Q2:—*Timing*—Can you use this Tactic during the middle of discarding cards? (E.g., if you want to put some of your discarded cards into the potential draw stack, but not others?)

A2: No, because the End-of-Turn rules say, "*put all cards into your discard pile*": it isn't done individually, one card at a time, so it can't be broken down into sub-parts—it's a single composite action.¹⁰⁷⁶

Mana Search

S1:—*Re-rolling Dice*—You must choose how many dice you'll re-roll before you re-roll any dice.¹⁰⁷⁷

S2:—*Timing*—You have to re-roll the mana dice before you use any dice from the SOURCE, whether the dice being used are gained through your free once-per-turn mana die or through any other effect or ability. But this re-rolling of dice is permitted even if you don't plan on using any of them during your turn.

If you roll poorly and end up with no usable dice after the roll, that's too bad: you're stuck with them.¹⁰⁷⁸

Mana Steal

Q1:—*Mana Dice*—Does using the mana die from *Mana Steal* count as using a die from the SOURCE?

A1: No. It's no longer in the SOURCE after you steal it and place it on the Tactic card. So you can use both it and your free mana die from the SOURCE during the same turn. While the stolen mana die is sitting on *Mana Steal*, there will be one fewer die than usual in the SOURCE.¹⁰⁷⁹

Cross References: *Who Needs Magic* S3.

Midnight Meditation

S1:—*Timing*—You can play this tactic after a player announces he is using *Mind Read* / *Mind Steal*, but before he announces which color he is choosing.¹⁰⁸⁰

S2:—*Cards*—You choose which cards are reshuffled into your deck: they're not chosen randomly.¹⁰⁸¹

Cross References: Turn Start S1; *Mind Read* S2.

Planning

Q1:—*Wound Cards*—Do Wound cards count toward the "two cards in hand" requirement that must be met in order to draw as if your hand limit is one higher?

A1: Yes.¹⁰⁸²

S2:—*Hand Limit*—*Planning* essentially increases your hand limit by one.¹⁰⁸³

S3:—*End of Round*—This Tactic does not increase your card draws during an *ensuing* Round.¹⁰⁸⁴

S4:—*Cumulative Draw Benefit*—The *Planning* card-draw benefit does stack with other card-draw bonuses from KEEPS or CITIES and from other sources.¹⁰⁸⁵

Preparation

S1:—*Wound Cards*—You are allowed to select a Wound card.¹⁰⁸⁶

S2:—*Timing*—*Preparation* is used only once: the moment you draw it. For the rest of the Round it does nothing.¹⁰⁸⁷

Rethink

S1:—*Timing*—*Rethink* is triggered the moment you choose it as your Tactic card, so the only cards you shuffle back into your deck are the three cards you just discarded.¹⁰⁸⁸

The Right Moment

S1:—*Timing*—You must make the choice of taking another turn before you begin your End-of-Turn sequence. See End of Turn S5.¹⁰⁸⁹

S2:—*Cooperative Assaults*—If you play *The Right Moment* while participating in a Cooperative Assault that has been proposed by another player, the (only) effect will be that your Turn Order token is immediately flipped back up again, so that when it's once again your chance to take your turn, you'll be able to take a normal turn instead of just flipping your Turn Order token up at that time.

If you play *The Right Moment* while participating in a Cooperative Assault that you yourself proposed, then after all of the players participating in the Assault have finished their assaults, you get another turn.¹⁰⁹⁰

S3:—*End of Game*—In many scenarios, after you conquer the final CITY, you're allowed one more turn. If you delay using *The Right Moment* until that point, you could play it and get two additional turns instead of just one. See Scenarios O30.¹⁰⁹¹

S4:—*Full Turn*—The turn you gain is a full turn. You finish your present turn the same as always, including the entire End-of-Turn sequence. Then you take a whole new full turn.¹⁰⁹²

Cross References: *Mana Suppression* S2.

Sparing Power

S1:—*Timing*—When you're attacked by another player (whether you're fully attending or not) or when you're attacked by VOLKARE (whether fully attending or not), you can use *Sparing Power* to draw the extra cards that're stored under it. See Turn Start S1. But if you decide to place another card under *Sparing Power* immediately before you're attacked by another player or by VOLKARE, and then decide to only partially attend the resulting combat, you cannot use *Sparing Power* (in either mode) before the start of your upcoming full turn.¹⁰⁹³ [The Tactic card could be read to mean "*Once immediately before the start of each of your turns . . .*". But that reading would limit the Tactic's use to when fully attending a combat, never when only partially attending. See Turn Start S1.]

S2:—*First Use*—You choose one of this Tactic's two effects before the start of every turn until it is flipped, and this includes during your first turn of the Round. Once you flip this card and put all of the Deed cards that're under it into your hand, you may no longer place any more Deed cards under it.¹⁰⁹⁴

Cross References: Turn Start S1.

Enemy Tokens**CRYPT WORM**

Cross References: CITIES Q2; Combat S13.

CRYSTAL SPRITES

S1:—*Elusive*—The CRYSTAL SPRITES token shows the Elusive symbol, then the Ice Resistance symbol overlapping that, then the Defend symbol overlapping that. This doesn't mean that these latter traits bear any dependency on the Elusive trait. SPRITES have Ice Resistance even if both of its attacks are fully blocked and its higher Armor value is negated. The same goes for the Defend ability: it's present whether or not the Elusive trait has been negated. The three abilities—Elusive, Ice Resistance, Defend—are each independent of the other two.¹⁰⁹⁵

Cross References: Combat S26, S27.

DRAGON SUMMONERS

S1:—*Summons Attack*—The DRAGON SUMMONERS draws two MONSTER tokens and uses the attack of each MONSTER token once; it doesn't draw one MONSTER token and use its attack twice.¹⁰⁹⁶

Cross References: Combat S23; Arcane Immunity S2; *Cold Toughness* O4; *Counterattack* S4; *Banner of Fear* Q7; *Know Your Prey* Q4; *Nature's Vengeance* S3; *Puppet Master* S2; ILLUSIONISTS Q1; ORC SUMMONERS S1.

HIGH DRAGON

Cross References: *Cold Toughness* S1.

HYDRA

Cross References: *Burning Shield* Q1; *Puppet Master* S2.

ICE CATAPULT

S1:—*Cumbersome*—Each Move point used to reduce the Ice Attack of ICE CATAPULT reduces the Attack by one: elements don't make Move points inefficient. The same goes for FIRE CATAPULT.¹⁰⁹⁸

ILLUSIONISTS

Cross References: Combat S23.

IRONCLADS

Cross References: Combat S34.

MAGIC FAMILIARS

S1:—*Recruitment Restrictions*—Recruitment restrictions do not apply to enemy token FAMILIARS.¹⁰⁹⁹

Cross References: *Possess* O2.

MEDUSA

Cross References: Combat S47; UTEM SWORDSMEN S2.

MONKS

Cross References: UTEM SWORDSMEN S2.

ORC SUMMONERS

S1:—*Summons Attack*—If you defeat ORC SUMMONERS during the Ranged-and-Siege-Attack Phase, no MONSTER token is summoned during the Block Phase or the Attack Phase. This is true for every type of SUMMONER, including DRAGON SUMMONERS and SHROUDED NECROMANCER.¹¹⁰⁰

Cross References: Combat S23; SHROUDED NECROMANCER S1.

PROWLERS

Cross References: *Nature's Vengeance* S2.

SHADOW

Cross References: Combat S29; Arcane Immunity S1.

SHROUDED NECROMANCER

S1:—*Summoning a SUMMONER*—The SHROUDED NECROMANCER summons an ORC MARAUDER. That token should, if possible, come from the NECROMANCER's faction: the DARK CRUSADERS. If there're none available, then you could end up drawing an ORC SUMMONERS for the NECROMANCER's attack, which in turn will draw a summoned MONSTER to resolve its attack.¹¹⁰¹

If the above happens, which MONSTER token type should the ORC SUMMONERS draw? You could argue this either way, but I'd draw the MONSTER from the DARK CRUSADERS faction, if they're available.

General Questions

- **What Products are Available from Wizkids?**

- *Mage Knight Board Game* (2011): the base game, includes four Mage Knights.
- *The Lost Legion* (2012): one Mage Knight, new components and scenarios, and VOLKARE.
- *KRANG Character Expansion* (2013): one Mage Knight.
- *Shades of TEZLA* (2015): one Mage Knight, two boss enemies, and new scenarios.
- *Ultimate Edition* (2018): combines the content of the four previous entries, plus five new cards.
- *The Apocalypse Dragon* (2026): one Mage Knight, one boss enemy, new scenarios.

- **How can I tell the Manufacturing Date?**

Look under the UPC code on the box. For instance, one print run of *Shades of TEZLA* shows the code 739W050216. The last six digits correspond to May 2, 2016.¹¹⁰²

- **Latest Rules - without the Expansions:**

Q: *If you don't have the latest printing of the base game or of the expansions, or lack some of the expansions altogether, are you playing by the latest rules and with the latest components?*

Short answer: If you own *Lost Legion* (whichever printing of it you have) then you are playing with the latest components and by the latest rules.

KRANG adds a new Mage Knight. *TEZLA* adds a new Mage Knight and some additional components and rules—but these rules apply only to the new material included in *TEZLA*. So if you own *Lost Legion* but not *KRANG* or *TEZLA*, you'll be missing a couple of Mage Knights and some enemy tokens and scenarios, but you'll be playing by the latest rules. When you draw an enemy token or look at a card, you'll be looking at the same enemy token and the same card that players who own all of the expansions look at, and you'll be playing them according to the same rules.

Long answer: All printings of the Mage Knight expansions are identical to each other except for component quality, perhaps different-sized disks for the enemy tokens in early printings, or different color hues on the backs of some of the cards, etc.

With regards to the Mage Knight base game, the early printings did have some misprints, but those components were replaced in *Lost Legion*. (The rulebook was also updated early on—the newer version having a Table of Contents on the first page.)¹¹⁰³ In addition, *Lost Legion* has a few but important rule changes that apply to the base game; and some of the base game cards and enemy tokens were rebalanced and replaced. So if you don't own *Lost Legion*, you may be playing with some misprinted components, and you will be playing by a few different rules than players who've bought *Lost Legion*. (Exception: the latest printing of the MKBG base game now includes improvements from *Lost Legion*.¹¹⁰⁴)

Conclusion: If this bothers you, buy *Lost Legion* and your worries'll be over.¹¹⁰⁵

- **Latest Rules - without the *Ultimate Edition*:**

Q: *If you didn't buy the *Ultimate Edition*, are you playing with the latest rules and components?*

A: If you own *Lost Legion*, you're good: see the previous entry. There were no component changes in the *Ultimate Edition* that affect play, other than the inclusion of five new cards.

The rules were reorganized and you can download them from the Wizkids website, but as for me, I'm happy with the originals. No text changes were made to the cards.¹¹⁰⁶

The November 17, 2021 printing of the *Ultimate Edition* includes larger, more-detailed models for all of the miniatures (with subjectively superior paint jobs). There are other improvements, too: the colored enemy dots on the click bases are more decipherable, the card backs and token backs appear very uniform in color, there's an improved insert, and there're bigger mana dice.¹¹⁰⁷

- **Playing Correctly:**

It's common to get some of the rules wrong during your first plays, but it's difficult knowing *which* rules you've messed up. Here're some evaluative questions about your play that might pinpoint play errors. These questions should all be answered yes except where indicated otherwise.¹¹⁰⁸

- Are you certain you know the difference between "Throw Away" and "Discard", between "Turn" and "Round", and between "mana token" and "mana crystal"?
- Are you taking only one mana die (for free) from the SOURCE every turn, and using it only once that turn?
- Are you using only the top half or the bottom half of each Deed card?
- Are you using only one option of your Units, and using each individual Unit only once per Round?
- Are you Blocking each enemy attack separately, losing any surplus Block points?
- Are you shifting excess Attack points to other (groups of) enemy tokens? [You shouldn't be.]
- Are you taking only one Action every turn (e.g., either combat or interacting with the locals), and not moving or exploring after that Action?
- When you play a mana crystal, do you throw away the crystal after you use it?
- Are you treating black mana as being wild at night? [It isn't.]
- For each attack, are you assigning damage to Units first, and to your Mage Knight last?
- When you assign damage to a Unit with Resistance, are you doing so according to Combat S34 and S35?
- Are you using the Dummy correctly: that is, are you getting only about five or six turns every Round?
- Most Tactic cards are one-use only.
- Many Skills are one-use-a-Round only, and almost all Skills are only usable once during any given turn.
- Are you certain which of your Attacks and which of your Blocks are inefficient, and thus halved?
- At game end, do you have more than 5 Skills or more than about 25 Deed cards? [You likely shouldn't.]
- On your even-row level-ups, are you doing anything other than flipping over the next level token? [You shouldn't be.]
- Was it difficult moving onto CITY tiles? (That is, were mountains, or lakes, or DRACONUM in the way?) If not, you may be laying out your map incorrectly. (CITY spaces themselves, contrarily, are always two movement points to enter.)
- Is there one Site type that you always rush to enter? [If so, you may have the rules for that Site wrong.]
- If you take the Dummy player Skill during a level up, do you restrict yourself to taking only the bottom Advanced Action card from the Offer?

And remember . . .

- If enemies are in a CITY and those enemies have the fortification ability, they generally cannot be defeated during the Ranged-and-Siege-Attack Phase even if you use Siege Attacks.
- The white CITY gives +1 armor to all enemy tokens: this bonus is often forgotten.
- In solo play, the two chosen Tactic cards are removed at the end of every Round.
- You cannot claim your own Skills from the Common Skill Offer.

Cross References: *Forward March* S2; Silver Units S10.

Copyright

Much of the limited artwork in this file belongs directly or indirectly to WizKids/NECA, LLC, 693 Sweetland Ave, Hillside, NJ 07205 USA, www.wizkidsgames.com. (Cover & Card Illustrations by J. Lonnee; Additional Illustrations by Milan Vavron; Art/Graphic Design by Chris Raimo; Layout and Typesetting by Filip Murmak).

Fair Use Assessment:

--The artwork used herein is a very small percentage of that used in Mage Knight Board Game, does not constitute the heart of the product, and is lower in quality and in size than the originals. This use should have no negative impact on the market for the game. The artwork used has previously been published, most of it being freely available on the WizKids website in a higher resolution, and so already has widespread availability.

--This compilation is no substitute for the full product and is valueless to anybody not having access to the full product. If anything, this compilation should tend to increase the market for WizKids products by making the game more accessible to players.

--This compilation is for noncommercial use. In places it quotes from rulebooks that're freely available on WizKids website, but the quotations are intentionally kept very short.

--This compilation is factual in nature, helping to clear up questions about the rules of mechanic of the game, much as one might with the rules of chess. Yet this compilation doesn't reproduce existing documents: it adds something new--an explanation of complex game situations. It is intended to serve as an in-game reference, to help newcomers learn the game, and to help longtime players handle the complex interactions that might arise.

--All that being said, should WizKids ever request that this compilation be removed for any reason, I ask BoardGameGeek to promptly do so.

From the **U.S. Copyright Office Website** (www.copyright.gov):

Fair use is a legal doctrine that promotes freedom of expression by permitting the unlicensed use of copyright-protected works in certain circumstances. Section 107 of the Copyright Act provides the statutory framework for determining whether something is a fair use and identifies certain types of uses--such as criticism, comment, news reporting, teaching, scholarship, and research--as examples of activities that may qualify as fair use. Section 107 calls for consideration of the following four factors in evaluating a question of fair use:

Purpose and character of the use, including whether the use is of a commercial nature or is for nonprofit educational purposes: Courts look at how the party claiming fair use is using the copyrighted work, and are more likely to find that nonprofit educational and noncommercial uses are fair. This does not mean, however, that all nonprofit education and noncommercial uses are fair and all commercial uses are not fair; instead, courts will balance the purpose and character of the use against the other factors below. Additionally, "transformative" uses are more likely to be considered fair. Transformative uses are those that add something new, with a further purpose or different character, and do not substitute for the original use of the work.

Nature of the copyrighted work: This factor analyzes the degree to which the work that was used relates to copyright's purpose of encouraging creative expression. Thus, using a more creative or imaginative work (such as a novel, movie, or song) is less likely to support a claim of a fair use than using a factual work (such as a technical article or news item). In addition, use of an unpublished work is less likely to be considered fair.

Amount and substantiality of the portion used in relation to the copyrighted work as a whole: Under this factor, courts look at both the quantity and quality of the copyrighted material that was used. If the use includes a large portion of the copyrighted work, fair use is less likely to be found; if the use employs only a small amount of copyrighted material, fair use is more likely. That said, some courts have found use of an entire work to be fair under certain circumstances. And in other contexts, using even a small amount of a copyrighted work was determined not to be fair because the selection was an important part—or the "heart"—of the work.

Effect of the use upon the potential market for or value of the copyrighted work: Here, courts review whether, and to what extent, the unlicensed use harms the existing or future market for the copyright owner's original work. In assessing this factor, courts consider whether the use is hurting the current market for the original work (for example, by displacing sales of the original) and/or whether the use could cause substantial harm if it were to become widespread.

A Further Note on Copyright

This Compendium contains some images taken by camera: in I believe all instances these images were either taken by the author, or the use of these images was granted by the taker of the image.

This Compendium quotes at times from the text of the MKBG Rulebooks or from the cards that come with the game. This text is freely available for download on the WizKids site or elsewhere on the internet and is deemed to be both incidental in nature and unable to substitute for the full product. Again, it's standard practice to quote short rule sections when discussing rule questions pertinent to those quoted rules.

The factual information in this Q&A Compendium was derived in large part from the knowledge shared in rules questions and discussions held on the relevant game forums on BoardGameGeek.com. As mentioned on p. 2 of this Compendium, many many players have contributed to these discussions, insights, rule examinations, and in-play examples, and I've done my best to provide links to the pertinent forum threads. The information conveyed in these threads is primarily factual in nature, that information being posted in a public venue that's freely viewable by anybody with internet access.¹¹⁰⁹ Nevertheless this Q&A Compendium is intended to be posted only on BoardGameGeek—the same internet site where these many, many discussions can still be viewed. I therefore ask MKBG enthusiasts to honor this intention: you're welcome to post links elsewhere on the internet to this Compendium, but please don't post this Compendium elsewhere. Its fit home is BoardGameGeek.

Endnotes

¹ This document provides many internet links. But as always when following internet links, beware! Just because a link is given here, there's no assurance that the link will be free of malware or viruses or whatever. Internet links come and go, and later on might be replaced with harmful material. (Also note that sometimes individual posts get deleted from Forums, which can create dead links or can inject a lot of confusion into the reading of an old Forum thread.)

² <https://boardgamegeek.com/thread/704520/official-rules-faq-thread/page/1>. Here are many of the official rulings, 54 pages of them. A mighty endeavor headed up by Paul Grogan.

³ The BGG MKBG player community has much experience playing this game. In situations where there doesn't seem to be a clear answer in the rulebook, my advice is to see what the consensus opinion on BGG is (if there is one), and then either accept it or adjust it. For a list of major questions over which there is still debate, see <https://boardgamegeek.com/thread/3108641/debated-rules>.

See also <https://boardgamegeek.com/thread/2978813/article/41237485#41237485> and <https://boardgamegeek.com/thread/2674502/article/37886385#37886385>.

⁴ In many cases a careful re-reading of the pertinent rules and of the card text, combined with some logical thought and an appreciation of the writing style and the conventions used throughout the rulebook, along with the official clarifications given in other threads, can lead you to a single defensible answer. But when you're in the middle of a game, or when you've been chasing your tail trying to ferret out an answer, or when two different players are arguing oppositely, a single defensible answer can be difficult to establish—so a summary of these Q&A threads is helpful.

For other questions that've been asked there is no clear answer. Yet even then, many times there's a consensus among BGG players as to which answer is the most reasonable. At other times, though, the consensus opinion is questionable or there simply isn't a consensus. (If you read many of the referenced BGG threads, you'll see that varying opinions are common.)

So how should players determine the best answer in these cases?

I recommend some practical guidelines: (a) try to follow the rules as written without extending them, (b) whenever several effects interact and a literal reading feels contrary to the perceived intent or "sense" of the game, then resort to commonsense pragmatism, (c) don't require players to be expert grammarians in order to play their cards correctly, and (d) prefer interpretations that're more restrictive for the player, for this makes the game more challenging and consequently more fun.

This still leaves many gray areas that need answers. Toward that end, this Q&A Compendium takes a stance on every question that it covers—even those questions over which there's some dispute, all while endeavoring to apply a systematic interpretation of the rules and a consistent approach to the game. So now, if you're called on to make decisions in the heat of the moment, you at least can see the decisions that one other player makes after having weighed the evidence, decisions that're impartial with respect to your current game. In any event, significant differences of opinion are pointed out inside square orange "[]" brackets or in "O#:" entries. If you disagree with any of the judgments that've been made, simply cross them out and insert your own.

The "reasoned" in "reasoned answers" is broadly defined: it encompasses a number of elements, including the reasoned answers that are to be found in the linked threads and it offers honor to the contribution of all of the posters (as expounded upon in the next endnote); it also encompasses the idea of a systematic interpretation of the rules as discussed in the previous paragraph of this endnote.

⁵ BoardGameGeek is a special locale where posters contribute in a collaborative effort to help new players and other enthusiasts share in the enjoyment of boardgames. If I were to attempt to document the contribution of every BGG poster who in any way contributed to the knowledgebase behind MKBG play—whether through posing thoughtful questions, or framing cogent explanations, or furnishing useful examples, or compiling pertinent data, or citing relevant rule passages, or contributing to the often far-ranging discussions of underlying principles, or evaluating the competing interpretations and thumbing the view that seems most reasonable to them—the lists and citations would be longer than this document itself. And even then, it'd be impossible to untangle the credit that each person is deserving of. So instead of that, I've tried to reference in these endnotes the chief discussion threads for each topic, where you can read for yourself what various posters have written. In addition, in the next two endnotes I list many of the standout contributors, although in doing so I'm sure to have missed several names that should've been included. To each of you—both the named and the unnamed—I say thank you, for you've increased my personal enjoyment of the boardgaming hobby and you've become my online friends.

⁶ A big "Thank you!" to WizKids and the many BoardGameGeek experts who've patiently answered so many questions! This compendium also includes information from Q&As in the rulebooks (with permission), the unofficial FAQ compiled by Paul Jefferies (with permission), and of course draws primary information from the official rulebooks and FAQ.

⁷ Ben Kyo, Ricky Royal, David desJardins, Gabriel Honore, cityofsolitude, Wayne Schultatz, Scottgun, Alison Mandible, Nigel Buckle, Magnesi, Grant Stewart, Ken (perfalbion), Mark Bauer, Tom Rojas, Pawel Bulacz, Jack Spirio, Jędrzej Jarocki, Ali Cali, RyuSora, Zeus Cat, Einmal ist keinmal, Tylarion, Baker Odom, Jorge (Picon), Bart Keys, Boris Dvorkin, Ryan Yan, Tim Sharpe, Chris Linneman, Plei Forejoy, Joseph Cochran, Vexi (Rompe), Gareth Lloyd, Christian Shelton, Tom H (Terah), Trevin Beattie, Erich Schneider, Cadae, Gene Selfish, and Vilnai are several of these helpful experts. And I know I'm missing the names of many more who also so kindly help floundering players.

Among all those already mentioned, Ben Kyo truly stands out for the frequency and quality of his answers to rule questions. He has posted hundreds and hundreds of responses on BGG regarding MKBG. My rule understanding wouldn't be anywhere near as complete if it weren't for him. Thank you, Ben!

David desJardins is another BGG member who frequently answers rule questions and he frequently gives very insightful discussion. He has helped clear up many questions for me with his keen reasoning.

Magnesi [syzygia] also often provides very in-depth viewpoints on rule issues, and also leads many cogent discussions.

In the endnotes below when a reference is listed, often it isn't the only thread where the topic has been discussed. I've tried to cite the chief thread or best thread, but it's likely I've missed a few. If you spot any threads that should be included in these endnotes, please let me know and I'll add them.

⁹ The *Ultimate Edition* didn't "change" the rules of play. *Ultimate Edition* owners, however, are encouraged to read pp. 9-10 of the original *Lost Legion* rulebook, for it gives some very useful explanations and examples of playing various card combinations. You can search this Compendium for any of the slight differences between the original releases and the *Ultimate Edition* by using Control + F and the search text "Ultimate Edition". <https://boardgamegeek.com/thread/2704408/article/38228287#38228287>.

The *Lost Legion* rulebook: <https://boardgamegeek.com/filepage/86934/english-rulebook>.

¹⁰ In the *Ultimate Edition*, rulebooks were combined and some rules were moved around, yet page numbers for the base rulebook and *Walkthrough* should be close to those given.

¹¹ Thank you to "wovenhead" for this idea, which hopefully will help smart phone users and smaller screens:

- ⁵⁰ Some players extend this principle and apply it to other situations where the rules are silent about contradicting effects. Other players apply a "last-played effect trumps earlier-played effects" rule in such cases. As for me, I have no hard and fast rule; instead I consider the cases individually—for instance, see *PvP Combat O10*, *Mist Form O4*, and the endnotes to *Bow of Starsdawn O5*.

- ⁶¹ <https://boardgamegeek.com/thread/1692631/article/24540919#24540919>. George [Picon] in this post framed an excellent summary of these ideas.
- ⁶² See *Walkthrough*, p. 14, "Assaulting an Enemy Keep" and "Conquered Mage Towers". If you move into a KEEP that has been conquered by another Mage Knight, this is considered an assault on that KEEP (unless you are playing with Team Rules, Rulebook p. 13): draw a random gray enemy token to fight (and score only half Fame if you defeat it). MAGE TOWERS work differently: you can freely enter MAGE TOWERS previously conquered by other Mage Knights.
- ⁶³ <https://boardgamegeek.com/thread/1443526/article/20465485#20465485>.
- ⁶⁴ If after entering a MAZE/LABYRINTH, he has exhausted his one-permitted Unit to generate Move points while within the MAZE/LABYRINTH, he can still play an effect to refresh that Unit (though the Unit must have been ready and unwounded when he chose to take it into the MAZE, per the instructions on the MAZE/LABYRINTH site card). <https://boardgamegeek.com/thread/1572481/readying-unit-mazelabyrinth>. <https://boardgamegeek.com/thread/1706101/article/24738406#24738406>.

<https://boardgamegeek.com/thread/1572131/article/22612610#22612610>.
<https://boardgamegeek.com/thread/1555784/article/22328235#22328235>.
- ⁶⁷ Why is the combat sequence for MKBG asymmetrical?
 You attack the enemy at long range.
 The enemy attacks you: you can block, but all unblocked damage gets assigned to you.
 You attack the enemy at short range.
- Imagine designing a game that'll include combat between two opposing groups, group A and group B. And imagine you want to include a volley phase and a hand-to-hand phase: how would you do it?
- You have at least three options:
- 1) A and B exchange long-range attacks simultaneously and remove damage simultaneously; then A and B conduct hand-to-hand combat simultaneously and remove damage simultaneously. (The drawback to this approach is having to remember the damage A does to B while figuring out the damage B does to A, and then applying all of that damage afterwards.)
 - 2) Alternatively, you could let A choose one soldier to make its long-range attack and apply the damage to B. You then let one soldier in B make its long-range attack and apply the damage to A. Back and forth you go until everybody has finished all of their long-range attacks. You then use a similar process for hand-to-hand combat. (But this will take time to work through all of the back and forth, and you also need a fair way to determine the order of attacks.)
 - 3) Finally, you could let A do all of its long-range attacks and assign the damage to B.
 Then let B do all of its long-range attacks and assign the damage to A.
 Then let B do all of its hand-to-hand attacks and assign the damage to A.
 Then let A do all of its hand-to-hand attacks and assign the damage to B.
 (Swapping execution order like this tends to even things out a bit.)
- This last option is kind of what MKBG does, but with an added efficiency that speed things up. Abstractly, B's long-range attacks and hand-to-hand attacks are combined into one (presumably larger) attack:
- A does its long-range attacks against B.
 B does all of its attacks—both long-range and hand-to-hand—against A.
 A does its hand-to-hand attacks against B.
- But why do players get to block attacks but enemies don't? Well, enemy tokens *do* get to block attacks. During the player's long-range attacks, enemy tokens can use Fortifications to prevent Ranged Attacks, and double Fortifications to prevent Siege Attacks.

And, notionally, the armor value of enemy tokens could have been increased to account for the impact that separate blocking would have had.

⁶⁸ <https://boardgamegeek.com/thread/1818129/fighting-multiple-enemies>. <https://boardgamegeek.com/thread/3403519/do-you-attack-all-enemies-in-a-city-at-once>.

⁶⁹ Imagine being attacked by a fireball. The best defense would be a big block of ice—not a wall of fire. So when you're being attacked, a Block composed of the *opposite* element will be the most effective Block you can use.

<https://boardgamegeek.com/thread/3403519/do-you-attack-all-enemies-in-a-city-at-once>.

⁷⁰ <https://boardgamegeek.com/thread/741315/article/8129643#8129643>: Paul Grogan posted these examples.

⁹⁷ Some players do allow Mage Knights to get knocked out a second time: they specify a number of additional wound cards that it takes—just one more, or maybe your hand size limit again, etc. Some players even play that the Mage Knight dies if he gets knocked out twice in the same turn, or if at any time he has more than some pre-specified number of wounds—say if more than half of the cards in his Deed deck are wound cards.

¹⁰⁰ <https://boardgamegeek.com/thread/1405206/banner-fear-vs-summoner>. How you envision what is happening in this situation—is the SUMMONER teleporting in a MONSTER to deliver an attack and then immediately dismissing the MONSTER, or is the SUMMONER temporarily summoning only "the attack" of that beast and launching that attack at you—will no doubt affect your "gut feel" as to what the correct answers are when it comes to SUMMONER questions. Understanding this difference should help you better measure the rulings of those players who hold a different mental picture than you do.

¹⁰¹ Rulebook p. 8, *As long as the summoned MONSTER is present, no effect can target the enemy that summoned it*.
<https://boardgamegeek.com/thread/1411285/vampiric-clarification-please>. <https://boardgamegeek.com/thread/2972653/what-do-people-do-when-vampiric-monster-summoned-a>. Although it's against the rules as written, I think it'd be cool—and deliciously frustrating—to see a SUMMONER's or Faction Leader's armor bump up through the vampiric ability.

<https://boardgamegeek.com/thread/2708948/assigning-damage-multiple-units>.

Early in the development of the game, the Assign Damage Phase apparently worked differently. The defender's armor reduced the damage, and only if there were any damage remaining would a wound be given. If the defender also had a thick hide under his armor (i.e., physical resistance), the attack had to penetrate both "armors" before a wound could be given. This approach was logical, but it was hard to write a set of rules for selecting which defender—the Mage Knight, or his strongest-attack Unit, or his highest-armor Unit, or his costliest Unit, etc.—would be assigned damage first. Any algorithm would be complex, yet still open to exploitation by the player. The solution the designer came to, however, was genius itself: instead of a complex set of rules, he let the player choose whichever order of assigning damage he wanted to, whichever order was to his advantage. To balance this great flexibility, there would be a price: the process would—in essence—be reversed. Instead of the armor reducing the attack and then the Unit being wounded by any remaining damage, now a wound always occurs and only after that is the attack reduced. (The minor exception being for Unit resistances, where the outer armor has to be penetrated before any damage is assigned.)

<https://boardgamegeek.com/thread/697673/article/7445792#7445792>. Vlaada Chvátil's discussion on this topic is here. See also <https://boardgamegeek.com/thread/2708948/assigning-damage-multiple-units>. <https://boardgamegeek.com/thread/3141444/does-assigning-damage-unit-spend-unit>.

¹³⁸ <https://boardgamegeek.com/thread/1707626/enemy-ignores-any-non-attack-effects-cards-or-unit>.

<https://boardgamegeek.com/thread/3106992/what-does-non-attack-effects-mean>.

¹³⁹ *Lost Legion*, p. 9.

¹⁴⁰ <https://boardgamegeek.com/thread/3122556/sacrifice-and-using-converted-crystals-order-play>.

¹⁴¹ Some players, though, argue that if you use *Sacrifice* to generate Ranged or Siege Attack points, that you can't assign them to, say, a doubly Fortified enemy, and then later use the converted crystals from *Sacrifice* to play an effect that removes that Fortification. But, rather, that you must play the two effects in the opposite order, even though that might reduce the number of Attack points created via *Sacrifice*. This situation was also discussed in January 2024 on Discord.com. See the relevant rule on p. 8 of the base game rulebook. Note that the stricter interpretation doesn't necessarily contradict the fourth paragraph under Combat S28.

¹⁴² <https://boardgamegeek.com/thread/1579581/article/22748397#22748397>. Pawel Bulacz [pabula] documented this detailed PvP flow.

-
- ¹⁴³ *Lost Legion*, p. 10. There's no restriction in the base game rulebook (p. 10, point 3) for those who only partially attend a PvP Combat with regard to "effects normally usable before his turn or in turns of other players".
- ¹⁴⁴ Things that normally occur at the start of your turn—taking a mana from a MAGICAL GLADE or from Conquer-and-Hold MAGE TOWERS—apply only to players who fully attend a PvP combat.
- ¹⁴⁵ <https://boardgamegeek.com/thread/1429295/article/23125356#23125356>. <https://boardgamegeek.com/thread/1429295/pvp-heat>.

- ¹⁵² <https://boardgamegeek.com/thread/1214147/article/16533353#16533353>.
- ¹⁵³ See PvP combat on p. 11 of the rulebook.
- ¹⁵⁴ One way out of this quandary would be to treat Mage Knights in PvP combat kind of as if they had Arcane Immunity: you cannot reduce their armor or cancel their Attacks, but you can reduce their Attacks. And that players shouldn't have to quibble over minor phrasing variations like "reduce one attack of chosen enemy" vs. "reduce one enemy attack". Another way out is to simply prohibit any effects (or portions of effects) that mention the word "enemy" from being applied against Mage Knights, period. With this interpretation, these kinds of effects can only be applied to unwounded Units. (This is the simpler approach and may sidestep some of the thornier complications.)

- ¹⁸⁶ See *Lost Legion*, p.16, the scenario end condition discussions during VOLKARE'S Return.
<https://boardgamegeek.com/thread/704520/article/10431709#10431709>. As an unofficial variant, at the start of a scenario everyone could agree that all Mage Knights whose round order tokens are facedown due to participating in a cooperative battle will get a last turn.
- ¹⁸⁷ The *Ultimate Edition* rulebook, p. 13, covers the specific steps. Step 6b suggests players may play Special Effects and Healing Effects before moving into the CITY. Step 6c, at first blush, seems to contradict this, but the phrase "no other movement and actions are allowed" is, I think, simply reiterating the point that you must move into the CITY—that you can't move around willy-nilly, or stay put and choose a different action. The word "action" here isn't referring to action cards and other effects, but to the action portion of a player turn.
- See p. 5 of the base game rulebook: "Playing a Regular turn has two voluntary parts: movement, and action." (Step 8a is referring only to the end of the turn and therefore isn't relevant.) The PvP Combat rules aren't of much help because they're vague regarding this issue (see PvP Combat Q1), but generally players permit the one who is attacked in PvP to play Special Effects before the attack begins (but not Healing Effects—see footnote ‡ in PvP Combat Q1). Consequently, I allow players in Cooperative Assaults to play both Special Effects and Healing Effects before expending movement points to enter the CITY.

- ²⁰⁰ <https://boardgamegeek.com/thread/1219487/can-you-decide-if-youre-recruting-heroesthugs-while>. Here is one thread where this topic is discussed in detail.

²⁰¹ In defense of this view, see *Lost Legion*: page 9 says you apply your Reputation "immediately once you start the interaction" and p. 5 says "your Reputation . . . counts in reverse for the entire interaction."

²⁰² An alternate approach—not sanctioned by the rules but which avoids most of the headaches—is to ignore the HEROES or THUGS modification to the Reputation altogether. The player simply takes her normal Reputation adjustment (whether positive or negative) at the beginning of her Interaction with the Locals, same as always. But then she modifies the Influence cost of the first HEROES she buys in a turn by subtracting her Reputation from its cost (a negative Reputation thereby increasing the cost of the HEROES), or of the first THUGS she buys in a turn by adding twice her Reputation to its cost (a negative Reputation thereby decreasing the cost of the THUGS). The rule about not buying both HEROES and THUGS during the same Interaction still applies.

<https://boardgamegeek.com/thread/947478/article/11717542#11717542>.

<https://boardgamegeek.com/thread/3103726/article/42488657#42488657>. One could of course come up with a house rule that says you simply need to remove at least one Action card from your hand every turn. But then you need additional rulings: what if that card is a wound card—does it still count if removed by a MAGICAL GLADE, or by a Healing Skill? And soon you might have a house rule that's every bit as complicated as the rulebook rule.

²²⁰ Rulebook p. 5, point 4.a. <https://boardgamegeek.com/thread/868019/article/10275839#10275839>.

<https://boardgamegeek.com/thread/1103295/about-end-turn>.

I view the "Minimum Turn" rule as saying this: a player has to play a card from her hand every turn, and if she fails to do that then there's a penalty—she's got to discard a card from her hand. (But remember, in MKBG you can't double use a discard: for instance, if you discard a card to enable the play of *Improvisation*, you can't also count the same discard for use with the basic effect of *Magic Talent*. So it follows that if a Skill causes you to discard a card, you can't count that discard as also meeting the requirements of the Minimum Turn rule: you didn't "play it".) Additionally—as discussed in Silver Units S5—a wound card, in general, does not meet the requirement of "play a card/play any card" or "discard a card/discard any card" unless the rules or effect explicitly allow otherwise (such as with Slow Recovery). For more nuances on Resting and playing cards, see the Resting section just above.

- ²²⁶ <https://boardgamegeek.com/thread/2008313/rolling-gold-combat-reward-crystals>. An alternate way of achieving a rigorously correct result is to roll all of the dice at once, in a stream if you can, and then process those dice one at a time starting with the die that lands closest to you. Whenever you encounter a gold die, choose its color and then reroll all of the dice that landed farther away. (If there are two dice equidistant from you, begin with the die that's closer to your dominant hand.) Using this approach, three-quarters of the time you can get all of the dice rolling done in one roll. I suspect the rule was written this way because the base game came with a limited number of mana dice. In my games I roll for all of the crystals at the same time. This does give me slightly greater control (since I don't choose the color of any gold outcomes before rolling for the remaining crystals), but usually I'd rather just roll all of the dice at once and get on with the game.

- ²⁵⁸ A player plays the basic effect of *Refreshing Walk* (Move 2 and Heal 1). He then activates the Move 2 ability of FORESTERS, which also reduces the costs of forests, hills, and swamps by 1). [At this point he has 4 Movement pool points and 1 Healing pool point.] It is night, so he moves into a desert space for 3 movement points. [Now he has 1 Movement pool point and 1 Healing pool point remaining.] He then plays the strong effect of *Regeneration*: Heal 2, and Ready a Level I, II, or III Unit. He has only one spent Unit, a wounded FIRE MAGES Unit (level III): he now both readies it and heals it. [This reduces him to 1 Movement pool point and 0 Healing pool points.] He now plays the Skill *Forward March*, giving him an additional 1 movement point. [Now he has 2 Movement pool points.] With these 2 Movement pool points, he could move into a hills space (reduced to 2 due to the FORESTERS) or reveal a new map tile. (See also Silver Units S10.)

- ²⁸⁰ *Lost Legion* p. 7 says of combat with VOLKARE: *If VOLKARE is not defeated, the attacking player returns to the space he is attacking from for free. If that space is not safe, he is subject to forced withdrawal.* Faction Leaders are very similar to VOLKARE, so the

default guess is that combat versus them is similar to combat versus VOLKARE in regards to what happens if a combat fails to kill them. Additionally, *TEZLA* p. 5 talks about cooperative attacks against Faction Leaders and talks about players having to first move onto their space, the idea seeming to be that Mage Knights cannot coexist in the same space with Faction Leaders in between turns, so the "being kicked back to the space they moved from" idea seems to be assumed here.

<https://boardgamegeek.com/thread/1403645/running-out-faction-enemy-tokens-sequence-question>.

²⁸⁷ What is written in the referenced paragraph is the consensus opinion and it is how I play, but it goes against common experience: e.g., if you're out at night, you can see into lit-up spaces just fine, so IMO you ought to be able to see into lit-up RUINS and KEEPS! So apparently GRAVEYARD night is more like octopus inkiness than it is like any ordinary nighttime absence-of-light. In any event, when you move out of the GRAVEYARD during daylight, or when the next player starts her turn, then normal daylight rules resume and apply to the revealing of tokens on RUINS and KEEPS and MAGE TOWERS. <https://boardgamegeek.com/thread/2243398/realm-dead-clarifications>. <https://boardgamegeek.com/thread/2617042/fighting-rampaging-enemies-unliberated-graveyards>.

³¹³ If you continue your last turn into the next Round, you'll miss out on the 30-point Round bonus for that Round, but gain points for a larger number of unused Dummy cards and 5 points for the end of that next Round not having been announced, in addition to the chance of scoring more points. (Note that, playing solo or cooperatively, you should be able to see the end of the Round coming and be able to time your final CITY assault accordingly.) <https://boardgamegeek.com/thread/1735145/full-coop-victory-one-more-turn-even-if-it-end-rou>. <https://boardgamegeek.com/thread/1918115/scenario-end-after-end-round-was-announced>.

³¹⁴ Victory points are mostly just for bragging rights anyway, so it's pretty inconsequential either way.

<https://boardgamegeek.com/thread/2957468/solo-scoring-conquest-scenarios-bonus>.

³¹⁶ <https://boardgamegeek.com/thread/3323043/realm-of-the-dead-sealing>.

³¹⁷ In the *Ultimate Edition* rulebook, the CAMP tile is drawn as solid green in the scenario description—which is wrong on two counts: the CAMP tile is a core tile which should be indicated by the color brown, and the CAMP tile should be face-up not facedown when you start the scenario.

You can tell that the CAMP tile orientation is incorrect on the older VOLKARE'S Quest scenario cards because tiles are always oriented according to the icons on their corners, so there's only one correct way to place the CAMP tile. If you physically build the map and follow the tile-placement rules, the CAMP tile will have to be placed with the Lake hex rotated to the lower left, not straight to the left as is incorrectly shown on the scenario card.

- ³⁸⁵ <https://boardgamegeek.com/thread/2851793/improvisation-card-combined-power-pain-skill>. <https://boardgamegeek.com/thread/704520/article/19442884#19442884>.
- ³⁸⁶ <https://boardgamegeek.com/thread/1146627/article/15337876#15337876>. <https://boardgamegeek.com/thread/3120911/mana-draw-and-how-much-mana-color>.
- ³⁸⁷ See the base game rulebook, p. 5. In general, you *could* use the gained mana die to power another deed card or Unit even if you don't gain any measurable advantage from doing so, such as playing the strong effect of *Tranquility* to draw two cards when your draw deck is empty, just so long as you respect the turn sequence—e.g., by not playing an Attack or Block effect unless you're actually in combat at the time, etc. <https://boardgamegeek.com/thread/3055114/mana-pull-question>.
- ³⁸⁸ The rule that you cannot use a SOURCE die if you do not use its mana is there to prevent players from simply messing with the mana dice in the SOURCE. And although when a player uses the strong effect of *Mana Draw*, that might be all that the player is doing—changing the mana dice in the SOURCE—the rule about the player having to use the mana die does not apply here because this is something different: this is a card effect, and *this* card effect says nothing about the player having to use the two mana tokens that are gained. <https://boardgamegeek.com/thread/704520/article/7887239#7887239>.
- ³⁸⁹ <https://boardgamegeek.com/thread/861443/article/10136220#10136220>. <https://boardgamegeek.com/thread/1641736/article/23759969#23759969>. <https://boardgamegeek.com/thread/3120911/mana-draw-and-how-much-mana-color>.

- ³⁹⁹ <https://boardgamegeek.com/thread/3353711/braevalar-card-one-with-the-land-into-dungeon-and>.
- ⁴⁰⁰ [You might consider not allowing this in competitive games when using the Friendly Mana variant.] <https://boardgamegeek.com/thread/1215454/article/16554278#16554278>.

-
- ⁴⁰¹ <https://boardgamegeek.com/thread/1534285/article/21961444#21961444>.
- ⁴⁰² <https://boardgamegeek.com/thread/2503899/rejuvenate-card-effects>.
- ⁴⁰³ <https://boardgamegeek.com/thread/1354570/article/18974187#18974187>. <https://boardgamegeek.com/thread/1059590/infinite-influence-ruthless-coercion-and-influenci>. <https://boardgamegeek.com/thread/1044829/activating-unit-more-once-turn>. <https://boardgamegeek.com/thread/3436476/ruthless-coercion-exploit-krang-am-i-getting-it-ri>.
- ⁴⁰⁴ <https://boardgamegeek.com/thread/1059590/article/23778911#23778911>.
- ⁴⁰⁵ <https://boardgamegeek.com/thread/2187256/article/31760701#31760701>.
- ⁴⁰⁶ And, of course, any card discarded for use with *Savage Harvesting* can't also be used to pay the cost for other effects, such as that of *Improvisation*. <https://boardgamegeek.com/thread/1897392/article/27644981#27644981>. KRANG FAQ.
- ⁴⁰⁷ See rulebook p. 6. In Movement S5 and O9, I argue these latter movement effects are more like teleporting, and if you agree with that interpretation, then only the terminal space of such direct movements should qualify for use with *Savage Harvesting*. <https://boardgamegeek.com/thread/1201792/dungeon-lord-can-krang-savage-havest-when-travelli>.
- ⁴⁰⁸ *Lost Legion*, p. 9. Saying that the dropping of the "at the end of your turn" phrase doesn't affect the operation of *Threaten* isn't fully accurate. If you were to use *Threaten* during the Movement Phase, say in tandem with *Learning*, and if you were to then have Interaction with the Locals as your Action Phase, then the absence of this text would be important. Players, though, should prefer the phrasing of the *Ultimate Edition* version of this card. A similar discussion can be made for *Noble Manners* and *Intimidation*. <https://boardgamegeek.com/thread/3320595/cost-to-move-into-mazelabyrinth-gaining-famereputa>. <https://boardgamegeek.com/thread/3577066/1-reputation-before-or-after-buying>. <https://boardgamegeek.com/thread/3599405/requesting-community-judgement-on-final-reputation>.
- ⁴⁰⁹ Notice the tense of the verb "gives" in the text on the card. So the answer to this question is no, because new information has been revealed at this point and you can't go back and reverse the order of play of your previous Movement cards. Also, *Lost Legion* p. 9, says with the strong effect of *Tirelessness* you get a "bonus +1 to all following Move effects". <https://boardgamegeek.com/thread/1368212/article/19212206#19212206>. <https://boardgamegeek.com/thread/1910314/3q-tirelessness-temporal-portal-source-opening-ski>. Other effects that also possibly incorporate a retro-active component: *Cure*, *Rush of Adrenaline*, *Sword of Justice*, *Veil of Mist*.
- ⁴¹⁰ <https://boardgamegeek.com/thread/1794113/wolfhawks-tirelessness-concentration>.
- ⁴¹¹ <https://boardgamegeek.com/thread/1006055/article/12845001#12845001>.
- ⁴¹² So playing the basic effect of *Agility* subsequently during combat will give you 3 Move points. <https://boardgamegeek.com/thread/1361177/article/19066955#19066955>.
- ⁴¹³ <https://boardgamegeek.com/thread/2394819/article/34371432#34371432>. <https://boardgamegeek.com/thread/811478/drawing-cards-when-deck-runs-out>. <https://boardgamegeek.com/thread/3212361/using-source-mana>.
- ⁴¹⁴ The same argument holds for playing *Concentration* with *Ambush*. <https://boardgamegeek.com/thread/1752876/will-focus-ambush>.
- ⁴¹⁵ <https://boardgamegeek.com/thread/704520/article/8633882#8633882>.

- ⁴²⁶ <https://boardgamegeek.com/thread/1357428/article/19000838#19000838>. <https://boardgamegeek.com/thread/3266537/agilityambush>.
- ⁴²⁷ The intent of *Ambush* is to give only a certain fixed amount of additional Block points (2 or 4, for the basic or strong effect respectively). *Ambush* is a base-game card whose text was set before the expansion card *Shield of the Fallen Kings* even came out, and so it wasn't worded to handle minor unforeseeable ambiguities like this. Think of *Ambush* as adding an additional X worth of Block points to the "entirety" of a card, not separately to each sub-element of a card. <https://boardgamegeek.com/thread/963066/article/12673668#12673668>: from the designer. <https://boardgamegeek.com/thread/963066/faqs-lost-legion/page/1>.

- ⁴⁹⁶ Some players take the opposite stance and argue that *Concentration* adds 2 points to this Attack, since *Concentration* says, ". . . If that effect gives you . . ." They insist that the combination of *Concentration* plus *Maximal Effect* plus *Rage* yields a 10 Attack instead of an 8 Attack; and that *Concentration* plus *Maximal Effect* plus *Swiftness* yields an 8 Ranged Attack instead of a 6 Ranged Attack. This interpretation, however, appears directly contrary to how the developers have ruled.
- ⁴⁹⁷ This particular ruling is not disputed. <https://boardgamegeek.com/thread/969814/article/23156398#23156398>. <https://boardgamegeek.com/thread/1624481/article/23493855#23493855>.

- ⁶³⁶ Justification: refer to the text of the white-mana ILLUSIONISTS ability which takes the enemy token's fortification status into account and then notice how the accompanying shield icon indicates that this ability can be played during the Block Phase, thereby indicating that an enemy token's fortification status persists at least through the Block Phase. (See Silver Units O8.) *[It's my view that an enemy token's fortification status persists through the entire Combat Phase: once the Ranged-and-Siege-Attack Phase is over, fortifications simply lose their ability to prevent certain kinds of attacks.]* <https://boardgamegeek.com/thread/3242248/question-about-fortified-enemies>.

- ⁶⁴⁷ <https://boardgamegeek.com/thread/1688310/fire-golems>. <https://boardgamegeek.com/thread/906506/article/13760327#13760327>.
 To use *Exploding Shield* to destroy an enemy, you need red mana plus black mana plus for it to be night plus for the enemy not to have Fire Resistance or Arcane Immunity. Given all that, allowing the Spell *Exploding Shield* to destroy an enemy with Multiple Attacks by blocking only one of its attacks doesn't seem especially overpowered or open to abuse.
- ⁶⁴⁸ The effect says "all fortifications" not just "site fortifications", so it would be affecting the enemy token, not just the site around the enemy token. For comparison see *Demolish* S3. Why don't site fortifications get removed by themselves? Because the "*loses all fortifications*" effect of *Expose* is a single effect, not two effects—and Arcane Immunity renders it an ineffective effect. See <https://boardgamegeek.com/thread/3339242/article/44613820#44613820>.
- ⁶⁴⁹ <https://boardgamegeek.com/thread/1692530/arcane-resistance-expose>.
- ⁶⁵⁰ The rules don't appear to allow you to create attacks that target nothing: Attack points have to directed at a specific target, unlike Influence or Movement points which can be generated without being used.

- ⁶⁶⁶ *Lost Legion*, p. 10. Some players feel this gap between someone announcing that they're playing an effect and that they're enacting that effect goes against the spirit of the game and therefore house rule it away. Although I'm sympathetic with this view, the rulebook is clear. <https://boardgamegeek.com/thread/1067489/midnight-meditation-and-mind-readsteal>.

<https://boardgamegeek.com/thread/949975/article/11776327#11776327>.
- ⁶⁷⁵ *Lost Legions* p. 9 seems to argue yes, despite the fact that the similar skill *Puppet Master* (see *Puppet Master* S3) lets a player use multiple attacks against different targets. But with *Puppet Master*, the effect text itself seems to explicitly permit using these multiple attacks against different enemy tokens, whereas *Possess* has no similar wording. I therefore think that multiple attacks gained with *Possess* must be combined and used together. <https://boardgamegeek.com/thread/1980461/know-your-prey-against-blue-city>.

⁷⁰⁰ In MKBG, card effects generally override the main rules. <https://boardgamegeek.com/thread/1241256/time-bending-game-ends>.
<https://boardgamegeek.com/thread/1873445/using-time-bending-when-beating-volkare>.

⁷⁰¹ <https://boardgamegeek.com/thread/1806186/time-bending-clarification>.

⁷⁰² Also note that playing a Banner in my view counts for the Minimum Turn rule, per Minimum Turn S2.

<https://boardgamegeek.com/thread/1136716/time-bending-apply-banners>.

⁷⁰³ Playing *Maximal Effect* to reiteratively use *Magic Talent* to cast *Time Bending* from the Spell Offer more than once would only gain you one extra turn, no matter how many times you cast it, because (by *Lost Legion* p. 9) *Maximal Effect* is "evaluated as playing a single effect". And according to the designer, contriving to cast *Time Bending* twice in a row would break the laws of the universe and make the universe implode. <https://boardgamegeek.com/thread/734525/article/9264950#9264950>. Tardigrade Matsuri pointed out this issue to me.

⁷⁰⁴ <https://boardgamegeek.com/thread/1913411/did-i-win-or-lose>. See also Cooperative Skills in *Lost Legion* p. 6.

⁷¹⁸ <https://boardgamegeek.com/thread/1343488/veil-mist>. <https://boardgamegeek.com/thread/2160360/viel-mists-night-power-dose-it-protect-units>.

⁷¹⁹ <https://boardgamegeek.com/thread/1002832/veil-mist-vs-brutal-attack>.

⁷²⁰ Faction leaders are considered enemy tokens (*TEZLA*, p. 5.), and VOLKARE'S attack is like that of faction leaders and enemy tokens, so you should be able to treat a Wound from VOLKARE just as you would treat a Wound from a faction leader or from an enemy token. <https://boardgamegeek.com/thread/1186456/volkare-enemy>.

⁷²¹ <https://boardgamegeek.com/thread/2160360/article/31385702#31385702>.

⁷²² <https://boardgamegeek.com/thread/2160360/article/31472600#31472600>.

⁷²³ <https://boardgamegeek.com/thread/1092488/if-monster-does-not-attack-it-considered-blocked-p>.

<https://boardgamegeek.com/thread/3416103/elusive-enemies-not-attacking-or-attacking-with-va>.

⁷²⁴ <https://boardgamegeek.com/thread/2945470/wings-night-move-points-interpretation>.

⁷²⁵ <https://boardgamegeek.com/thread/1972350/article/28764941#28764941>.

<https://boardgamegeek.com/thread/752403/article/10997563#10997563>.

⁷²⁶ The preceding sentence in *Wings of Wind* uses the word "move" in referring specifically to the movement provided by this card effect, so it makes sense that the succeeding sentence (quoted above) would also use "move" in the same sense. Also see p. 6 of the rulebook, point 7.c. Accordingly, you may move "*over inaccessible spaces*", but you have to end that move on a safe space.

<https://boardgamegeek.com/thread/1046696/ending-your-move-safe-place>.

⁷²⁷ <https://boardgamegeek.com/thread/1972350/it-possible-explore-end-wings-wind-spell-remaining>.
<https://boardgamegeek.com/thread/1630606/wings-wind-does-it-reveal-mage-tower-keep-and-city>.

⁷²⁸ If you answer yes to question (a)—arguing that new enemy tokens do get revealed as you move because there is no specific rule specifying otherwise, then you have to answer the remaining questions too.

Question (b): no, you can't change the number of move points you decided to spend (because new information has since been revealed, so you can't change previous decisions).

Question (c): yes, you can change which future spaces you'll move into (because you can change your decisions, back to the point at which new information was revealed, and nothing on the card insists that you must predesignate your entire movement path).

Question (d): yes, you may move back to a previously traversed space (there's no rule prohibiting this).

⁷²⁹ <https://boardgamegeek.com/thread/752403/spell-wings-wind-can-it-move-over-water>.

<https://boardgamegeek.com/thread/1046727/wings-wind>.

⁷³⁰ <https://boardgamegeek.com/thread/1811090/article/26365252#26365252>. <https://boardgamegeek.com/thread/954096/breaking-banners>.

<https://boardgamegeek.com/thread/1734363/article/25194973#25194973>. <https://boardgamegeek.com/thread/1681591/amulet-are-very-confusing>. <https://boardgamegeek.com/thread/3314248/amulets-of-darkness-vs-of-the-sun>.

<https://boardgamegeek.com/thread/2903015/tokens-any-color>. See the footnotes for *Amulet of the Sun* S1.

⁷³³ <https://boardgamegeek.com/thread/1081175/article/14157552#14157552>.

⁷³⁴ <https://boardgamegeek.com/thread/3221863/article/43594358#43594358>.

Remember to do what the card tells you to do, not what you think should happen. With the *Amulets*, you may be tempted to think that day becomes night and night becomes day (like when entering a DUNGEON/TOMB) and that Night Rules apply: but that's not what the cards say. What happens is that it remains day or night but some new effects apply: you can use gold/black mana; the movement costs of forests/deserts take on their lower value; and you might reveal garrisons/RUINS. In all other ways the normal rules still apply.

⁷³⁵ <https://boardgamegeek.com/thread/1959545/article/28576469#28576469>. See also p.4 of the base game rulebook.

⁷³⁶ <https://boardgamegeek.com/thread/1959545/article/28576469#28576469>.

⁷³⁷ <https://boardgamegeek.com/thread/933306/article/11427370#11427370>. <https://boardgamegeek.com/thread/2822479/banner-command-strong-effect>. <https://boardgamegeek.com/thread/3206516/can-i-use-strong-effect-banner-command-while-resti>. (Because you can use the strong effect to recruit from anywhere, it is not "interacting with the locals", and so can be done while resting.)

⁷³⁸ <https://boardgamegeek.com/thread/3173826/can-banner-command-be-used-middle-combat>. It is true that *Call to Glory* has a "special effects" icon in the upper left corner while the *Banner of Command* has an "influence" icon, but both card types can be played during the Combat phase (*Lost Legion*, p. 9). Also note that the text on the *Banner of Command* card is identical to that on the *Call to Glory* card, which strongly suggests that the cards are intended to work exactly the same.

⁷³⁹ <https://boardgamegeek.com/thread/1035579/article/13345745#13345745>.

⁷⁴⁰ See the *Lost Legion* rulebook, p. 5, the third paragraph under "Elusive".

<https://boardgamegeek.com/thread/1829102/article/26629350#26629350>. <https://boardgamegeek.com/thread/1151742/canceling-and-blocking>. <https://boardgamegeek.com/thread/2789293/armor-rating>. <https://boardgamegeek.com/thread/3416103/elusive-enemies-not-attacking-or-attacking-with-va>.

⁷⁴¹ Read the basic effect as "one attack of one enemy"—see *Lost Legion* p. 5. <https://boardgamegeek.com/thread/1416332/targetting-attacks-summoners-and-enemies-arcane-im>.

⁷⁴² *Lost Legions*, p. 5. <https://boardgamegeek.com/thread/2660988/can-i-use-banner-artifact-twice-round>.

<https://boardgamegeek.com/thread/2187158/banner-fear-spend-unit>.

⁷⁴³ <https://boardgamegeek.com/thread/1035579/banners-and-wounded-units>.

⁷⁴⁴ *Lost Legion* p. 5 defines the Summon Attack as a "type of attack".

<https://boardgamegeek.com/thread/1923078/article/28019490#28019490>. <https://boardgamegeek.com/thread/3093478/dragon-summoner-and-banner-fear>.

⁷⁴⁵ <https://boardgamegeek.com/thread/1923078/article/28019490#28019490>. <https://boardgamegeek.com/thread/1405206/banner-fear-vs-summoner>. <https://boardgamegeek.com/thread/906506/arcane-immunity-clarification/page/1>.

<https://boardgamegeek.com/thread/1416332/targetting-attacks-summoners-and-enemies-arcane-im>.

<https://boardgamegeek.com/thread/3093478/dragon-summoner-and-banner-fear>.

⁷⁴⁶ *Lost Legion* rulebook p. 6.

⁷⁴⁷ In this rule snippet, "it" appears to mean "an enemy attack" not "the enemy token" itself.

⁷⁴⁸ <https://boardgamegeek.com/thread/1186456/article/16636429#16636429>.

⁷⁴⁹ *Lost Legion* rulebook, p. 7: VOLKARE has Arcane Immunity.

⁷⁵⁰ <https://boardgamegeek.com/thread/1942714/article/28306518#28306518>.

⁷⁵¹ <https://boardgamegeek.com/thread/819020/article/12204770#12204770>.

⁷⁵² <https://boardgamegeek.com/thread/819020/article/9449743#9449743>. <https://boardgamegeek.com/thread/747335/banner-protection-poison-power-pain>. <https://boardgamegeek.com/thread/2319601/banner-protection-special-ability>. <https://boardgamegeek.com/thread/3267781/strong-effect-banner-protection>.

- ⁷⁵³ Compare this wording to that of the strong effect of the *Banner of Command* ("Recruit any one Unit") and the *Banner of Fortitude* ("Heal all of your Units"), where the word "may" is not used.
- ⁷⁵⁴ <https://boardgamegeek.com/thread/2006844/banner-protections-strong-effect>.
- ⁷⁵⁵ <https://boardgamegeek.com/thread/3445563/book-of-wisdom-can-it-target-the-new-duel-mana-aa>.
- ⁷⁵⁶ <https://boardgamegeek.com/thread/1987901/article/29013807#29013807>. <https://boardgamegeek.com/thread/1006279/bow-starsdawn-wounds>.
- ⁷⁵⁷ <https://boardgamegeek.com/thread/1568263/bow-starsdawn-unit-attack>. <https://boardgamegeek.com/thread/3307518/bow-of-starsdawn-of-the-same-element>.
- ⁷⁵⁸ <https://boardgamegeek.com/thread/1770427/article/25734999#25734999>.
- ⁷⁵⁹ <https://boardgamegeek.com/thread/3263154/bow-starsdawn-strong-effect>.
- ⁷⁶⁰ Why? Because the base game rulebook, p. 6, in point 7a says that, with regard to Movement effects, you get to apply these in any order, and I read that to mean that every time you spend Movement points, you can apply them in any order. (E.g., if you have two Movement effects—A and B—in play, and if you apply them in order A-B for entry into a given space, and if you then play Movement effect C and then move into a second space, I believe you could choose to apply the Movement effects in a different order, maybe B-C-A if you wish.) And, absent a direct statement either way regarding Attack points, I prefer to permit the same level of freedom with Attack points that you have with Movement points. <https://boardgamegeek.com/thread/3122840/bow-starsdawn-and-altem-mages>.
- ⁷⁶¹ Ordinarily you cannot play Ranged Attack points against Fortified targets during the Ranged-and-Siege-Attack Phase, per p. 8 of the base game rulebook. (See Combat S13.) However I treat as being permissible those combinations that will become legal when you do look ahead, such as knowing that you will immediately be turning the interim Ranged Attack points into Siege Attack points. This is somewhat similar to how *Ghostly Elixir* works (*Ghostly Elixir* S1), turning unplayable plain Attack points into Ranged Attack points—although there I require the enabling power to be played first, as the rule-breaking is more severe: see the endnote to *Ghostly Elixir* S1. (Alternate views on this ruling are discussed here: <https://boardgamegeek.com/thread/3122840/bow-starsdawn-and-altem-mages>.) Ultimately, though, this is a tricky situation to untangle rule-wise and no argument is entirely convincing. The circumstances under which this combination would occur, however, are very rare and I favor the fun factor that'll be created if this combination is permitted.
- ⁷⁶² <https://boardgamegeek.com/thread/1158592/bow-starsdawn-and-altem-mages>. <https://boardgamegeek.com/thread/1071122/article/13998693#13998693>. <https://boardgamegeek.com/thread/1071122/bow-starsdawn>. <https://boardgamegeek.com/thread/3122840/bow-starsdawn-and-altem-mages>.
- ⁷⁶³ <https://boardgamegeek.com/thread/2677387/bow-starsdawn-question>.
- ⁷⁶⁴ As you read the entries below, the judgment calls made for some of the specific instances may feel arbitrary. Several of them are arguable, I agree, but I also find it's good to take a stance on these issues while not in mid-game, so at least the judgments are impartial. <https://boardgamegeek.com/thread/1789311/article/26023782#26023782>. Magnesi [syzygia] has also contributed much to the discussions of MKBG over the years. Here he addresses several uses of the *Circlet of Proficiency*.
- ⁷⁶⁵ <https://boardgamegeek.com/thread/1789311/article/26023782#26023782>.
- ⁷⁶⁶ <https://boardgamegeek.com/thread/1789311/article/26023782#26023782>.
- ⁷⁶⁷ For one thing, *Bonds of Loyalty* isn't a once-a-turn Skill—it's a one-time-use Skill, so at best you would treat it like a once-a-round Skill and use it only once. If you were to use it with the *Circlet*, the player would add two regular Units to the Units Offer. The player could then, I suppose, recruit a Unit for five fewer Influence points if it uses the *Bonds of Loyalty* as its command token—but the player would only be able to keep that Unit through the rest of his turn: the Unit would then have to be discarded during the end-of-turn sequence for that's when the *Circlet's* effect ends and the player loses use of the *Bonds of Loyalty*. As for the two Units that were added to the Unit Offer, whether they should then be discarded or not is another unknown that must be addressed. <https://boardgamegeek.com/thread/1201817/article/16308039#16308039>. <https://boardgamegeek.com/thread/1298299/article/17950437#17950437>.
- ⁷⁶⁸ *Lost Legions* p. 9. <https://boardgamegeek.com/thread/1789311/article/26023328#26023328>.
- ⁷⁶⁹ <https://boardgamegeek.com/thread/1789311/article/26023782#26023782>.
- ⁷⁷⁰ <https://boardgamegeek.com/thread/1789311/circlet-proficiency-timing-using-once-turn-skill-t>.
- ⁷⁷¹ *Lost Legions* p. 9. <https://boardgamegeek.com/thread/1789311/circlet-proficiency-timing-using-once-turn-skill-t>. And I probably wouldn't object too much if a player wanted to apply *Deadly Aim* to two different cards that were used in attacking two different enemy groups, just so long as both groups were attacked during the same sub-phase. From the rules and the effect text, it isn't crystal clear how combinations like this are meant to be played.
- ⁷⁷² That is because the Skill gets played during the Block Phase while blocking a single enemy Attack. <https://boardgamegeek.com/thread/1789311/circlet-proficiency-timing-using-once-turn-skill-t>.
- ⁷⁷³ <https://boardgamegeek.com/thread/1789311/circlet-proficiency-timing-using-once-turn-skill-t>. <https://boardgamegeek.com/thread/1529786/can-exploration-cost-be-reduced-0>.
- ⁷⁷⁴ Justification: the Skill reads "When activating a Unit . . .", which implies—seeing as it is to be used twice—that it has to be used on two different Units, since the first Unit will have already been activated when you use the Skill a second time. <https://boardgamegeek.com/thread/1789311/circlet-proficiency-timing-using-once-turn-skill-t>.

- ⁹¹⁴ <https://boardgamegeek.com/thread/918288/article/11365137#11365137>.
<https://boardgamegeek.com/thread/704520/article/19636858#19636858>. This interpretation, though, is perhaps overly strict. The intent seems to be that you use only one *Motivation* Skill during a turn. Since *Motivation* can be used when it's not your turn—in fact, that's when *Motivation* is most intended to be used—the text seems to be telling us what "once a turn" means, i.e., that it means "only once during the period between the beginning of one end-of-turn sequence and the beginning of the next end-of-turn sequence". (See also note † in Turn Start S1.) <https://boardgamegeek.com/thread/3592522/double-motivation-skill-use-in-solo>.

- ⁹¹⁸ <https://boardgamegeek.com/thread/1472511/natures-vengeance-braev-skill-used-versus-enemy-su>.
- ⁹¹⁹ See the rule on p. 6 of *Lost Legion* that allows an attack from an enemy with Arcane Immunity to be stripped of its Swiftess. Since Cumbersome and Swiftess are both enemy token "offensive abilities" (and are abilities related to the inertia and speed and dodge-ability of an attack), and since the rules allow effects to strip Swiftess from the attack of an enemy with Arcane Immunity, other effects should be able to add Cumbersome to the attack of an enemy with Arcane Immunity.

- ⁹³² KRANG FAQ. <https://boardgamegeek.com/thread/1234700/puppet-master-summoners-assigning-attack-targets>.
- Despite the consensus stance discussed in this paragraph, one might argue that a player holding *Puppet Master* must also designate the target of any summons attack (naming a single enemy token, or a single group of enemy tokens) before drawing any Summoned MONSTERS, (a player using a DRAGON SUMMONER having to name up to two targets). And that if a HYDRA is summoned, that the HYDRA must then use all of its attacks against its predesignated target. And that although a player may afterwards tack additional attacks onto the summoned attack, he cannot redirect the summoned attack itself. The argument being that if you pull the trigger to see what type of bullet is coming out of the barrel, that it's then too late to swivel the barrel to point it at a different target. But this argument is ably countered by pointing out that, according to the rules, players are permitted to delay the picking of which targets will be the focus of

enemy SUMMONER attacks (i.e., choosing from among his Unit(s) and his Mage Knight) in both the Block Phase and the Assign Damage Phase until after the MONSTER token is drawn.

⁹³⁷ The puppet isn't like a Unit. It's not reusable, nor can it be assigned damage. If it helps to envision what's going on, think of the puppet as a one-time addition to your Attack or Block, with the enemy token representing the value of that onetime addition. There's nothing there to be killed, and there's nothing there to which you can assign damage.)

⁹⁴⁴ <https://boardgamegeek.com/thread/1423504/article/20135787#20135787>.

⁹⁴⁵ In MKBG you choose which effects to play and the order in which to play them, and these effects apply to the state of the game as it exists at the moment that you play them. Once you've played an effect, and then play another effect, this latter effect functions against the new state of the game, not the previous state of the game.

⁹⁵⁷ <https://boardgamegeek.com/thread/838022/article/9765056#9765056>.

⁹⁵⁸ *Lost Legions* p. 10, second to the last bullet point. <https://boardgamegeek.com/thread/1043794/source-freeze-last-turn-round>.

⁹⁵⁹ The *Lost Legion* rulebook, p. 6, last paragraph under "COOPERATIVE SKILLS", when talking about back-to-back turns, says Skills "*expire before the start of the second turn*." But keeping this particular Skill past that point—that is, past the start of the second turn—is permitted because the Skill itself overrides the general rule when it states "on your next turn".

<https://boardgamegeek.com/thread/811320/article/9305920#9305920>.

⁹⁶² <https://boardgamegeek.com/thread/2237860/article/32458423#32458423>.

⁹⁶³ Interpret "an extra die" in *SOURCE Opening* like you interpret "one additional mana die" in *Mana Draw*'s basic effect: see *Mana Draw* S1. <https://boardgamegeek.com/thread/2276991/article/32949675#32949675>.

⁹⁶⁴ <https://boardgamegeek.com/thread/2276991/article/32949675#32949675>.

⁹⁶⁵ KRANG FAQ. <https://boardgamegeek.com/thread/1402704/spirit-guides-plus-diplomacy>.

⁹⁶⁶ <https://boardgamegeek.com/thread/1402704/spirit-guides-plus-diplomacy>.

⁹⁶⁷ <https://boardgamegeek.com/thread/1360817/spirit-guides-question>.

⁹⁶⁸ *Lost Legion* p. 6 says that if an effect reduces an enemy Attack or affects it in any other way, it can be used against the Attack of an enemy with Arcane Immunity. (If it helps, think of this Skill as a "magically assisted" taunt.) One way to give the Skill *Taunt* a little more punch would be to assume the opposite: that it's an entirely non-magical Skill and hence fully effective against enemy tokens with Arcane Immunity.

⁹⁶⁹ <https://boardgamegeek.com/thread/922723/wolfhawks-taunt-skill-versus-summoners>. Read also the endnotes to *Combat S23*.

Whichever way one decides this question, I think the same answer should also apply to *Dueling*, *Howl of the Pack*, *Taunt*, and *SHOCK-TROOPS*. Personally, I believe the prohibition—"as long as the summoned MONSTER is present, no effect can target the enemy that summoned it"—is primarily meant to prohibit cards like *Shield Bash*, *Ice Shield*, and *Exploding Shield* from affecting SUMMONERS.

⁹⁷⁰ <https://boardgamegeek.com/thread/1789311/circlet-proficiency-timing-using-once-turn-skill-t>. As Skills go, *Taunt* is relatively weak. A possible enhancement would be to allow it to be used in three different ways—during the Block Phase to (a) reduce one enemy attack of any enemy by one; (b) reduce the armor of one enemy by one; or (c) increase one attack of an enemy by one while also decreasing the armor of the same enemy by two.

⁹⁷¹ One might argue that I'm being inconsistent: here, I don't allow another effect (in this case *Taunt*) to affect an enemy token that's being used with *Possess*, but with CITY bonuses (see *Possess O2*), I say the bonus should apply. But I believe my approach is fair because when *Possess* is used on an enemy token inside a CITY, the CITY bonus is still active, but the *Taunt* bonus IMO ends when the enemy token doesn't attack. See also the orange text in *Circlet of Proficiency S14*.

⁹⁸⁷ *TEZLA* FAQ. <https://boardgamegeek.com/thread/1393472/article/19640966#19640966>.

⁹⁸⁸ Influence points and Move points, when accrued, first go into a pool of points that can be spent freely throughout the remainder of the turn, and so lose their association with any given Action card. (See *Miscellaneous S9*.) So the converted Attack points / Block points are not coming "from a single Action card"; they're coming from an Action card (*Diplomacy* or *Agility*) and from their respective Movement / Influence point pools. <https://boardgamegeek.com/thread/2245044/using-fire-gem-ice-shard-diplomacy>.

⁹⁸⁹ <https://boardgamegeek.com/thread/2965982/ice-shardfire-gem-concentration-combo>.

⁹⁹¹ <https://boardgamegeek.com/thread/2434325/article/35259468#35259468>.

⁹⁹² *Elixir* needs to be played before the Attack Points are played because, otherwise, standard Attack points cannot be played during the Ranged-and-Siege-Attack Phase (see also *Vial of Toxin S2*). This same restriction also applies to the black-mana ability of ALTEM MAGES (see *Bow of Starsdawn O5*). In this Compendium, though, we suggest allowing the sequence to be more forgiving with effects that are milder in their rule-breaking, as when allowing the play of Ranged Attack points/Siege Attack points during the Ranged-and-Siege-Attack Phase before there are any valid targets for those attacks: see *Combat S13* and *S49*, and *Bow of Starsdawn O5*. Read also the endnotes to *Bow of Starsdawn O5*. <https://boardgamegeek.com/thread/1542906/article/22110587#22110587>.

- ¹¹⁰⁴ <https://boardgamegeek.com/thread/3488416/2022-printing-components>.
- ¹¹⁰⁵ <https://boardgamegeek.com/thread/2798324/there-list-changes-between-editions>.
This downloadable file lists which base game components were changed/corrected/updated when the *Lost Legion* expansion came out:
<https://boardgamegeek.com/filepage/218720/easing-lost-legion-beginners>.
There was a free replacement kit published by Wizkids to correct the miss-sized enemy tokens in the first printing of *TEZLA*, but apparently when they printed it, the VAMPIRIC DRACONUM were missing the Vampiric icon:
<https://boardgamegeek.com/thread/1493915/one-step-forward-one-step-back/page/1>.
<https://boardgamegeek.com/thread/2970412/component-quality>. <https://boardgamegeek.com/thread/2849117/monster-token-different-shade-mkue>. <https://boardgamegeek.com/thread/2683181/someone-knock-some-sense-me-token-colors>.
<https://boardgamegeek.com/thread/2687741/component-quality-and-replay-ability-questions>.
<https://boardgamegeek.com/thread/2613057/mage-knight-ultimate-quality-or-lack>. <https://boardgamegeek.com/thread/2573244/cloth-bags>. <https://boardgamegeek.com/thread/3008355/token-quality-issue>.
- ¹¹⁰⁶ Actually this is a simplification. The site cards are single-sided; they were double-sided before. And in the *Ultimate Edition* two sets of Skills description cards are provided for each of the first five Mage Knights, one with the cooperative Skill listed and one with the competitive Skill listed. Previously there was just one Skills description card for these five Mage Knights, with a sixth Skills description card that explained the cooperative Skills for all of these five Mage Knights combined.
- Also, the map tiles and many of the other tokens were printed reversed on the countersheets, so when they were punched by the cutting die, the sharp edge of the cut is on the other side of these tiles/tokens. Some players find this a (very minor) issue:
<https://boardgamegeek.com/thread/2982729/comparison-material-between-old-mage-knight-and-ma>.
- Furthermore, I've noticed three changes in the Basic Action cards: *Threaten* still says "Reputation -1", but without the preceding text "At the end of your turn". Similarly *Noble Manners* and *Intimidate* have had the same text removed. These changes, generally, do not affect play: see *Noble Manners* S3 and *Threaten* S1.
